FEDERAL REGISTER WORKSHOPS

DENVER, COLORADO AND SEATTLE, WASHINGTON

FOR: Any person who must use the Federal Register and Code of Federal Regulations.

WHAT: Free public workshop (approximately 3 hours) to present:

1. Brief history of the Federal Register system.
2. Difference between legislation and regulations.
3. Relationship of Federal Register and the Code of Federal Regulations.
4. Important elements of a typical Federal Register document.
5. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them, as part of the General Services Administration's efforts to encourage public participation in government actions. There will be no discussion of specific agency regulations.

DENVER, COLORADO

WHEN: June 15 and 16, 1978, at 9 a.m.
(Each session identical).

WHERE: Room 269, U.S. Post Office Building, 1823 Stout Street, Denver.

RESERVATIONS: Call Liz Stout, Area Code 303-837-3602.

SEATTLE, WASHINGTON

WHEN: June 16, 1978, at 9 a.m.

WHERE: South Auditorium, 4th Floor, Federal Building, 915 2nd Avenue, Seattle.

RESERVATIONS: Call Patrick Brito or Susan Fuller, Area Code 206-442-4905.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
	CSC			CSC
	LABOR			LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Phone 523-5240
Area Code 202

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

FEDERAL REGISTER, VOL. 43, NO. 100—TUESDAY, MAY 23, 1978

Title 3—The President

PROCLAMATION 4572

Prayer for Peace
Memorial Day, May 29, 1978

By the President of the United States of America

A Proclamation

We pause at this time of year to remember those who sacrificed their lives over the last two centuries to preserve America's freedoms.

We honor them today for their faith in the principles of liberty and justice which motivated our founding fathers, and must motivate us today.

The highest tribute we can pay those who fought and sometimes died for our country is to strengthen in time of peace those values for which they struggled in time of war.

Let us pray for peace, but let us also vow that, if the test of unavoidable combat should ever come again, we will meet it with courage, and devotion to our country.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby designate Memorial Day, May 29, 1978, as a day for all Americans to join together in prayer for lasting peace. To that end, I designate the hour beginning in each locality at 11 o'clock on the morning of that day as the appropriate time for the American people to unite in prayer.

I call upon the appropriate officials of all levels of government to fly the flag at half-staff until noon during Memorial Day on all buildings, grounds, and naval vessels throughout the United States and in all areas under its jurisdiction and control. I request the people of the United States to display the flag at half-staff from their homes and other suitable places for the same customary forenoon period.

IN WITNESS WHEREOF, I have hereunto set my hand this nineteenth day of May, in the year of our Lord nineteen hundred seventy-eight, and of the Independence of the United States of America the two hundred and second.

Jimmy Carter

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of Energy, Equal Employment Opportunity Commission, Department of Housing and Urban Development

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment excepts under Schedule C certain positions at the Department of Energy, Equal Employment Opportunity Commission, and Department of Housing and Urban Development, because they are confidential in nature.

EFFECTIVE DATE: May 11, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael Sherwin, 632-4533.

Accordingly, 5 CFR 213.3331(n)(3), 213.3377(m) and 213.3384(a)(45) are added as set out below:

§ 213.3331 Department of Energy.

(n) Office of the Assistant Secretary for International Affairs. * * *

(3) One Confidential Assistant (Secretary) to the Principal Deputy Assistant Secretary for International Affairs.

§ 213.3377 Equal Employment Opportunity Commission.

(m) One Special Assistant to the Director, Office of Systemic Programs.

§ 213.3384 Department of Housing and Urban Development.

(a) Office of the Secretary. * * *

(45) One Special Assistant to the Secretary for Indian and Alaska Native Programs.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[3410-01]

Title 7—Agriculture

SUBTITLE A—OFFICE OF THE SECRETARY OF AGRICULTURE

PART 2—DELEGATIONS OF AUTHORITY BY THE SECRETARY OF AGRICULTURE AND GENERAL OFFICERS OF THE DEPARTMENT

Revision of Delegations of Authority

AGENCY: Department of Agriculture.

ACTION: Final rule.

SUMMARY: The delegations of authority of the Department of Agriculture are amended to transfer the authority to coordinate the Department's programs involving assistance to American Indians from the Assistant Secretary for Administration to the Assistant Secretary for Rural Development. The Assistant Secretary for Rural Development will coordinate this area with other Assistant Secretaries who have responsibilities for programs affecting Indians.

EFFECTIVE DATE: May 23, 1978.

FOR FURTHER INFORMATION CONTACT:

Preston Davis, Office of the Assistant Secretary for Administration, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-3881.

Accordingly, Part 2, Subtitle A, Title 7, Code of Federal Regulations is amended as follows:

Subpart C—Delegations of Authority to the Deputy Secretary, Assistant Secretaries, the Director of Economics, Policy Analysis and Budget, and the Director, Office of Governmental and Public Affairs

1. Section 2.23 is amended by adding a new paragraph (f) to read as follows:

§ 2.23 Delegations of authority to the Assistant Secretary for Rural Development.

(f) Related to Indian affairs. Coordinate the Department's programs involving assistance to American Indians except civil rights.

2. Section 2.25 is amended by revising paragraph (h)(1) to read as follows:

§ 2.25 Delegations of authority to the Assistant Secretary for Administration.

(h) Related to equal opportunity. (1) Coordinate all aspects of the Department's Civil Rights program.

Subpart J—Delegations of Authority by the Assistant Secretary for Administration

3. Section 2.80 is amended by revising paragraph (a)(9) to read as follows:

§ 2.80 Director, Office of Equal Opportunity.

(a) * * *
(9) Coordinate Department civil rights activities involving assistance to American Indians.

(5 U.S.C. 301 and Reorganization Plan No. 2 of 1953.)

For Subpart C, Dated May 17, 1978.

CAROL TUCKER FOREMAN,
Acting Secretary of Agriculture.

For Subpart J, Dated May 17, 1978.

JOAN S. WALLACE,
Assistant Secretary for Administration.

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Lime Reg. 38, Amdt. 1; Lime Reg. 6, Amdt. 2]

PART 911—LIMES GROWN IN FLORIDA

PART 944—FRUITS; IMPORT REGULATIONS

Grade and Size Regulations

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action extends the minimum grade and size requirements for fresh Florida limes and for imported limes beyond June 23, 1978, the date current requirements would otherwise end. Such action is needed to provide for orderly marketing of limes in the interest of producers and consumers.

EFFECTIVE DATE: June 24, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: On April 28, 1978, notice of proposed rulemaking was published in the FEDERAL REGISTER (43 FR 18182), regarding a proposed amendment to the regulation to be made effective pursuant to the marketing agreement and Order No. 911, both as amended (7 CFR Part 911), regulating the handling of limes grown in Florida. The domestic regulation was recommended by the Florida Lime Administrative Committee established pursuant to the marketing agreement and order. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). The amended regulation for imported limes is effective pursuant to section 8e of the act, which makes such regulation mandatory.

The notice allowed interested persons until May 12, 1978, to submit written comments for consideration in connection with the proposed amended regulations. None were received.

After consideration of all relevant matters presented, including the proposal set forth in the aforesaid notice, the recommendation and information submitted by the Florida Lime Administrative Committee, and other available information, it is hereby found and determined that the amended regulations, as hereinafter set forth, are in accordance with the provisions of the

amended marketing agreement and order and will tend to effectuate the declared policy of the act.

It is hereby further found that good cause exists for not postponing the effective date of the amended regulations until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) because of insufficient time between the date when information became available upon which the regulations are based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation for Florida limes at an open meeting and thereafter on the regulations for Florida and imported limes with respect to the April 28, 1978, notice of proposed rulemaking. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

Accordingly, it is found that the provisions of paragraph (a) of § 911.340 (Lime Regulation 38; 43 FR 16149) and paragraph (a) of § 944.205 (Lime Regulation 6; 43 FR 16149) should be and hereby are amended to read as follows:

§ 911.340 Lime Regulation 38.

Order. (a) During the period June 24, 1978, through April 30, 1979, no handler shall handle:

§ 944.205 Lime Regulation 6.

(a) On and after June 24, 1978, the importation into the United States of any limes is prohibited unless such limes are inspected and meet the following requirements:

(Secs. 1-19, 48 Stat. 31, as amended (7 U.S.C. 601-674).)

Dated May 18, 1978, to become effective June 24, 1978.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 78-14344 Filed 5-22-78; 8:45 am]

Title 16—Commercial Practices

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

SUBCHAPTER C—FEDERAL HAZARDOUS SUBSTANCES ACT REGULATIONS

PART 1500—HAZARDOUS SUBSTANCES AND ARTICLES; ADMINISTRATION AND ENFORCEMENT REGULATIONS

PART 1510—REQUIREMENTS FOR RATTLES

Banning of Hazardous Articles and Establishment of Safety Requirements

AGENCY: Consumer Product Safety Commission.

ACTION: Final rule.

SUMMARY: The Commission issues mandatory safety requirements for rattles in the form of a regulation banning rattles which do not have ends of a sufficient size. The regulation is designed to address choking and suffocation hazards associated with rattles by ensuring that a rattle cannot project into an infant's throat to a depth that could cause choking.

EFFECTIVE DATE: The regulation is effective August 21, 1978. The regulation is applicable to all rattles introduced into interstate commerce on or after that date.

FOR FURTHER INFORMATION CONTACT:

Elaine Besson, Office of Program Management, Consumer Product Safety Commission, Washington, D.C. 20207, 301-492-6453.

SUPPLEMENTARY INFORMATION:

BACKGROUND

In the FEDERAL REGISTER of November 18, 1977 (42 FR 59511), the Consumer Product Safety Commission (CPSC) proposed for public comment a regulation (16 CFR Part 1510) prescribing safety requirements for infant rattles and a regulation (16 CFR 1500.18(a)(15)) declaring as banned hazardous substances, rattles not meeting such safety requirements. The proposed regulation is intended to address choking and suffocation hazards associated with rattles by ensuring that a rattle cannot project into an infant's throat to a depth that could cause choking.

The Commission proposed the banning and safety requirements pursuant to section 2(f)(1)(D) of the Federal Hazardous Substances Act (FHSA) (15 U.S.C. 1261). Section 2(f)(1)(D) provides for the classification of any toy or other article intended for use by

children as a hazardous substance upon a determination by regulation that it presents a mechanical hazard. In addition, section 2(q)(1)(A) of the FHSA provides that such toy or article is automatically a banned hazardous substance. "Mechanical hazard" is defined by section 2(s) of the act, which reads in part:

An article may be determined to present a mechanical hazard if, in normal use or when subjected to reasonably foreseeable damage or abuse, its design or manufacture presents an unreasonable risk of personal injury or illness . . . (7) Because the article (or any part or accessory thereof) may be aspirated or ingested . . . or (4) because of any other aspect of the article's design or manufacture.

The need for the proposed regulation was demonstrated by injury data and death reports. At the time of the proposal, the Commission staff had identified, through in-depth investigations as well as consumer complaints and death certificates, 8 choking deaths and 10 non-fatal choking incidents involving the lodging of small rattles in the throats of infants. After a review of public comments on the proposal, the Commission staff can now document a total of ten choking deaths dating as far back as 1943, and occurring as recently as 1977. The Commission now has reports of a total of 19 incidents in which infants choked but did not suffocate because the rattle was promptly removed by an adult.

Based upon a review of the injury data, the Commission concluded in the proposal document that certain rattles can cause choking and suffocation in infants because their size or design permits them to be forced (as by an infant falling with its face down) or sucked into an infant's mouth and become lodged in the throat. The Commission studied the requirements and technical rationale supporting a recent Canadian rattle regulation and concluded that the test fixture used in that regulation was a reasonable and appropriate method of addressing the choking hazard. The Commission, therefore, proposed to adopt the dimensions of the Canadian test fixture in its own banning regulation. (A copy of the Canadian rattle regulation issued on June 23, 1977 under its Hazardous Products Act is on file at the Office of the Secretary of the Commission. The technical data supporting that regulation are discussed in the Commission's proposal document and are incorporated herein by reference.)

THE PROPOSAL

Proposed part 1510 consists basically of a definition of a rattle and a test procedure with safety requirements for rattles. In the proposal a rattle is defined as "an infant's toy, intended to be handheld, usually containing

pellets or other small objects and which produces sounds when shaken." The proposed test procedure uses a fixture having a cavity with opening dimensions of 1.968 x 1.378 inches (50 x 35 millimeters). The test procedure provides that the rattle is inserted in this opening, and if any part of the rattle can penetrate and contact the lower plate in the cavity (1.181 inches (30 millimeters) below the opening), the rattle fails the test. The test procedure also provides that the rattle is to be tested after performing several of the use and abuse tests of § 1500.51 of the Commission's regulations under the FHSA. The tests under this section are designed to simulate the use and abuse of toys and other articles intended for use by children 18 months of age or less. The purpose of prescribing these additional procedures before the fixture test is to ensure that no component of a rattle released as a result of the use and abuse tests presents a choking hazard.

COMMENTS ON THE PROPOSAL

The proposal of November 18, 1977, invited interested persons to submit written comments on or before December 19, 1977. This comment period was extended at the request of an interested party until January 3, 1978, by publication of a notice in the FEDERAL REGISTER (42 FR 63899). A total of 21 comments were received: 15 from concerned citizens, 1 from a visiting nurses' association, 1 from a local consumer protection bureau, 3 from manufacturers, and 1 from a retailer.

Nearly all of the commenters expressed support for the banning regulation. Thirteen of the concerned citizen commenters agreed with the proposed ban and eleven mentioned specific choking or suffocation incidents involving members of their families or neighbors as the basis of their support. The local consumer protection bureau and the visiting nurses' association also favored the ban, and the consumer protection bureau noted that it had requested local stores to voluntarily withdraw from sale the rattles covered by the proposed ban.

Two concerned citizens felt that manufacturers should not be required to redesign their infant rattles and that the individual parent should accept responsibility to supervise infant play. One of these commenters suggested that a warning label be required on small rattles indicating that parental supervision is necessary.

The Commission notes that an infant's natural tendency is to put any object in its mouth and that infants may be expected to play with a simple toy such as a rattle without constant, direct supervision. In addition, the Commission points out that the nature of the hazard associated with small rattles is such that it may cause

death to an infant. The Commission, therefore, concludes that nothing short of a ban of hazardous rattles will adequately protect children from the risk of injury.

The comments from the three manufacturers and one retailer indicated support of the intended purpose of the proposed regulation, but noted certain technical and language difficulties. The issues and criticism raised by these commenters and the Commission's responses are as follows:

1. DEFINITION OF A RATTLE

Three commenters requested clarification of the definition of a rattle contained in the proposal, on the basis that it did not accurately describe the range of products which would fall within the scope of the ban. The commenters noted that certain stuffed toys with noisemakers inside, play keys on a ring, or games that contain parts which produce noise when shaken might be considered rattles within the definition. Two commenters suggested that an age range be added to clarify the definition. One commenter recommended that the definition more closely describe the type of rattles which have been involved in the reported incidents.

It was never the intention of the Commission to include such items in the scope of this banning regulation. While the Commission believes that the product category "rattle" has a commonly understood definition which does not include items such as stuffed toys or games, the Commission has decided that to avoid any possibility of confusion, the proposed definition should be revised to add the following list of examples of products which are not covered by the regulation: dolls, stuffed animals, crib exercisers, crib mobiles, pull toys, shoe lace holders, bells (not part of the noise-making component of a rattle), plastic keys, games, puzzles, and musical instruments such as tambourines, castanets, and maracas. (Note: This list is not all-inclusive, but merely specifies the type of products not intended to be included within the banning regulation.) Because the Commission has revised the definition to exclude such products, and the product category subject to the regulation should now be clear, the Commission does not believe it is necessary to specify the intended user of the regulated product. Therefore, the Commission has not included an age range in its rattle definition because the Commission does not believe the inclusion would add any clarity.

As to the suggestion that the definition should more closely describe the type of rattles involved in actual incidents, the Commission recognizes that the proposed ban originated because small telephone, dumbbell, safety pin,

and clothespin rattles were associated with infant deaths and serious injuries. However, the Commission has found that other designs and shapes such as the traditional "lollipop" design present the same hazard. Furthermore, because of the limited information available on the actual mechanism of choking in infants and statistically valid anthropometric data for the infant oral pharyngeal area, the Commission has decided that these requirements should serve to prohibit the sale of any rattle which can project into the throat of an infant, not merely certain previously identified sizes and shapes.

These safety requirements are intended to serve as designing and manufacturing criteria to eliminate this choking and suffocation hazard from future products as well as those current designs available in the marketplace.

The Commission believes that it has responsibility to act in a reasonable manner and at the same time act on the side of safety when establishing requirements for a product which may cause death to the user.

One commenter suggested that pacifiers be specifically excluded from the rattle requirements because the hazards of pacifiers are addressed in a separate regulation. (See 16 CFR Part 1511; 42 FR 33276.) The same commenter noted that the word "usually" is a source of confusion in the proposed rattle definition at § 1510.3, which states, in part, that rattles "usually" contain "pellets or other small objects." The commenter recommended that the word be removed.

The Commission declines to make either suggested change. As to a specific exclusion for pacifiers, the Commission notes that a pacifier cannot reasonably be mistaken for a rattle. The Commission further believes that rattles and pacifiers have sufficient distinguishing characteristics to prevent any confusion as to which set of requirements the product must meet. In response to the second comment, the Commission notes that the intent of the word "usually" in the definition is to include rattles in the ban that may have the noise-maker removed, but still present the same choking hazard as those which contain it.

2. RATTLE TEST FIXTURE

One commenter expressed concern over differences between the proposed rattle test fixture and the test fixture contained in the Canadian regulation. The commenter noted that the opening of the Canadian fixture extends completely through the block, whereas the opening in the Commission's proposed test fixture extends only partially through the block. The commenter stated that the Canadian template with its full opening is more ac-

curate to use than the Commission's because the Canadian fixture could be placed on a flat surface coated with dye and any rattle that picks up a stain could easily be rejected as failing the test. In addition, the commenter noted that the Canadian test fixture would be less expensive to make because it is easier to cut a hole completely through a block rather than milling a "blind hole" to the required 1.181 inch (30 mm) depth. The same commenter also requested that the dimensions on the Commission's test fixture include tolerances such as those listed in the Canadian regulation.

The Commission agrees with this commenter that because the cavity in the fixture contained in the proposal is not a "through hole", there could be instances in which it would be more difficult to determine whether a rattle was or was not in compliance. Therefore, the Commission has changed the fixture which appeared in the proposal so that it contains a through hole (see figure 1 below). As to the issue of tolerances, the Commission believes that such tolerances serve only to introduce a band of uncertainty to the results of a test for compliance. For example, if the size of the entrance to the cavity in the Commission's rattle test fixture is manufactured to the upper limit of a tolerance and the size of a manufacturer's fixture is at the lower limit of a tolerance, a manufacturer could believe his rattles meet the requirements of the regulation while they may, in fact, fail if tested in the Commission's fixture. To avoid such uncertainty in test results, the Commission declines to include tolerances in the rattle requirements. The Commission notes that it will manufacture its test fixture and perform the compliance test in a manner such that any rattle failing the compliance test clearly is not in conformance with the intent of the requirements of Part 1510. The language of section 1510.4 of the final rule is that "the measurements of the opening of the Commission's test fixture will be no greater than those shown in figure 1 and the depth of the fixture used will be no less than that shown in figure 1."

3. STERLING SILVER RATTLES

One commenter, a manufacturer of silver products including sterling silver rattles, stated that the proposed requirements would increase the price of silver rattles from \$5 to \$8 each, from present prices of \$9.75, \$17.50, and \$21.50. The commenter, therefore, requested separate treatment for silver rattles, noting that none of the reported incidents involved a sterling silver rattle.

The Commission points out that a silver rattle was included among the choking incidents reported in the preamble to the proposed regulation, and

a second incident involving a silver rattle was reported by one of the commenters. While the Commission appreciates the cost and price effects of the regulation on manufacturers of silver as opposed to plastic rattles (see the section of this preamble below entitled Economic Considerations), the Commission believes silver rattles present the same potential hazard as other rattles and therefore, declines to exempt the items from the requirements of Part 1510. The Commission also notes that silver rattles are generally purchased as special gift items and may be regarded as heirlooms. Therefore, the Commission believes many purchasers may be willing to buy at higher prices or may substitute other silver gift products such as spoons. As indicated below, the firms which manufacture silver rattles also generally manufacture other silver products, and rattles comprise only a small percentage of their total sales.

4. EFFECTIVE DATE

A retailer requested that the effective date of the final banning regulation be 120 days after publication in the FEDERAL REGISTER to allow for necessary retooling, rather than 90 days as proposed.

The Commission notes that since the Canadian regulation has been in effect for over 6 months and products for both the Canadian and American markets are manufactured by many of the same suppliers, some complying rattles are already part of manufacturers' product lines. Given this circumstance, the lack of supporting evidence to demonstrate a need for a longer lead time and the fact that the nature of the hazard is such that it may cause death to an infant, the Commission believes that the proposed 90 day effective date is appropriate.

The regulation is applicable to all rattles introduced into interstate commerce on or after that date. For purposes of the regulation, introduction into interstate commerce is defined as follows: A rattle manufactured outside the United States is introduced into interstate commerce when it is first brought within a U.S. port of entry. A rattle manufactured in the United States is introduced into interstate commerce (a) at the time of its first interstate sale, or (b) at the time of its first intrastate sale if one or more of its components and/or raw materials were received interstate.

ECONOMIC EFFECTS

1. PLASTIC RATTLES

Manufacturers of plastic rattles are part of the infant products industry and are generally involved in a number of different product lines. The Toy Manufacturers Association (TMA) estimates that 45 million plastic rat-

ties are sold annually, with a manufacturer's selling value of \$9.4 million. These rattles are low cost, high volume items, generally retailing for between \$.26 and \$.69 each. In addition, there are some new, larger designs which retail for \$.79 to \$1.50 each.

The majority of American firms in the rattle business import their rattles from the Orient because of the lower production costs. In the U.S. approximately 5 firms manufacture plastic rattles.

Plastic rattles are manufactured by injection molding. In the Orient, molds have only a few cavities and cost an average of \$3,000. In the U.S., molds contain many cavities and cost approximately \$12,000 to \$14,000 each. The foreign producers of plastic rattles, that supply both the Canadian and American markets have already begun to modify or change their molds to meet the Canadian standard. To comply with this regulation, retooling costs will be incurred by the foreign suppliers for molds which they own and by American firms for foreign and domestic molds they own. In some cases only the mold for the handle will have to be changed at an estimated cost of \$1,000 to \$1,500 per handle mold. In other cases new designs will have to be conceived and additional new molds will have to be made. In addition to design and acquisition costs for new molds, other retooling costs include the costs of equipment for assembling and decorating the rattles. Also small additional costs may be incurred for packaging. Rattle manufacturers may choose to order new packaging so as to distinguish complying from non-complying rattles.

The changes that will be necessary to comply with the new regulation will probably result in increased retail prices for plastic rattles. The Commission staff estimates, however, that in most cases the item price of plastic rattles will only increase \$.05 to \$.10 each. Therefore, most plastic rattles will remain inexpensive. In addition, the increased amount of plastic will not add significant weight and adversely affect the utility of these products. The Commission does not expect that sales of these products will change significantly as a result of price or product changes. While sales of rattles may decrease slightly with increased prices, the Commission believes exposure to rattles will still remain high in comparison to other toys and children's products.

2. SILVER RATTLES

Sterling silver rattles are manufactured domestically. Commission staff have identified 11 firms that make these rattles. The majority of the firms manufacture other fine silver products and specialty items.

Less than one percent of the number of all rattles sold annually are silver. In contrast to the plastic rattles, these products are high cost, low volume items retailing for between \$9 and \$25.

The manufacturing process for silver rattles combines stamping and soldering and requires the use of dies, presses, and striking and trimming tools. Estimates of the cost for new tools and dies range from \$1,500 to \$4,000 per rattle design. Additional costs for development and new capital equipment may also result. As a result of the new size requirements, there will be substantial increases in the amount of silver needed. All of these costs will be reflected in the retail prices.

While a price increase of from \$5 to \$8 per rattle, as estimated by one manufacturer, may cause sales to decline, the Commission believes that many purchasers may be willing to buy at the higher prices since silver rattles tend to be purchased as special gift items or as heirlooms. In any event, the Commission does not believe the economic impact of this regulation will be overly burdensome to most silver rattle producing firms because silver rattles are generally a small percentage of total sales.

The Commission staff economic analysis is available from the Office of the Secretary.

ENVIRONMENTAL EFFECTS

The Commission has concluded that the rattle regulation will have no significant effects on the environment and that no environmental impact statement is necessary. The factors leading to this determination are set forth in an environmental assessment of the regulation which is on file with and available from the Commission's Office of the Secretary.

CONCLUSION

Based on the information available to the Commission, including information contained in the public comments, the Commission believes that the design of certain infant rattles (specifically the size of the rattle ends) enables the rattles to become lodged in the throats of infants, thereby presenting an unreasonable risk of personal injury to infants from choking or suffocation. The Commission finds that such rattles, in accordance with sections 2(s) and 2(f)(1)(D) of FHSA, present a mechanical hazard and should be classified as hazardous substances. Consequently, pursuant to section 2(q)(1)(A) of the FHSA, the Commission finds that such rattles must be banned from interstate commerce. In so finding, the Commission has considered the economic effects of the banning and safety requirements set forth below and has concluded that with respect to plastic rattles, nei-

ther the sales nor utility of these products will be adversely affected. While the retail price of silver rattles may rise substantially, rattles are generally a small percentage of total sales for affected silver rattle-producing firms, and purchasers may be willing to buy at the higher prices since the rattles are generally purchased as special gift items or heirlooms. After considering the severe nature of the risk of injury presented by certain plastic and silver infant rattles, the Commission concludes that this risk of injury clearly outweighs any effects of the rule on the cost, utility, and availability of infant rattles.

Accordingly, pursuant to provisions of the Federal Hazardous Substances Act (secs. 2(f)(1)(D), (q)(1)(A), (s), 3(e)(1), 74 Stat. 1304-05, 83 Stat. 187-189; 15 U.S.C. 1261, 1262) and under authority vested in the Commission by the Consumer Product Safety Act (sec. 30(a); 86 Stat. 1231; 15 U.S.C. 2079(a)), the Commission amends Title 16, Chapter II, Subchapter C by adding a new paragraph (a)(15) to § 1500.18 as follows:

§ 1500.18 Banned toys and other banned articles intended for use by children.

(a) Toys and other children's articles presenting mechanical hazards. Under the authority of § 2(f)(1)(D) of the act and pursuant to provisions of § 3(e) of the act, the Commission has determined that the following types of toys or other articles intended for use by children present a mechanical hazard within the meaning of § 2(s) of the act because, in normal use, or when subjected to reasonably foreseeable damage or abuse, the design or manufacture presents an unreasonable risk of personal injury or illness:

(15) Any rattle (as defined in § 1510.2 of this chapter) that is introduced into interstate commerce on or after August 21, 1978, and that does not comply with the requirements of Part 1510 of this chapter. For purposes of the regulation, introduction into interstate commerce is defined as follows: A rattle manufactured outside the United States is introduced into interstate commerce when it is first brought within a U.S. port of entry. A rattle manufactured in the United States is introduced into interstate commerce (a) at the time of its first interstate sale, or (b) at the time of its first intrastate sale if one or more of its components and/or raw materials were received interstate.

Part 1510 is added to read as follows:

Sec.
1510.1 Scope and purpose of Part 1510.
1510.2 Definition.

Sec.
1510.3 Requirements.
1510.4 Test procedure.

AUTHORITY: Secs. 2 (f)(1)(D), (g)(1)(D), (s), 3(e)(1), 64 Stat. 372, 374, 375, as amended 80 Stat. 1304-05, 83 Stat. 187-89 (15 U.S.C. 1261, 1262); sec. 30(a), 86 Stat. 1231 (15 U.S.C. 2079(a)).

§ 1510.1 Scope and purpose of Part 1510.

This Part 1510 sets forth the requirement whereby rattles (as defined in § 1510.2) are not banned articles under § 1500.18(a)(15) of this Chapter. The purpose of these requirements is to ensure that certain infant rattles which may cause choking and/or suffocation because their design or construction permits them to enter into an infant's mouth and become lodged in the throat are eliminated from interstate commerce.

§ 1510.2 Definition.

For the purposes of this Part 1510, a rattle is an infant's toy, intended to be hand held, usually containing pellets or other small objects and which produces sounds when shaken. Examples of products which may have similar noisemaking characteristics but which are excluded from the scope of this definition are: dolls, stuffed animals, crib exercisers, crib mobiles, pull toys, shoe lace holders, bells which are not part of the noisemaking component of a rattle, plastic keys or other figures on loops or chains which produce sound by striking together, games, puzzles and musical instruments such as tambourines, castanets, and maracas.

§ 1510.3 Requirements.

No portion of a rattle, when tested in accordance with the procedure of § 1510.4 below, shall be capable of entering and penetrating to the full depth of a cavity in a test fixture with dimensions shown in figure 1. (In determining these dimensions for compliance purposes, the English measurements shall be used. Metric equivalents are included for convenience.) Rattles shall meet this requirement both before and after performing the use and abuse tests of § 1500.51 of this Chapter (excluding the bite and flexure tests of paragraphs (c) and (d)).

§ 1510.4 Test procedure.

Place the test fixture shown in Figure 1 on a horizontal plane surface. Under its own weight and in a non-compressed state apply any portion of the test sample in the most adverse orientation to the opening in the test fixture. Repeat this procedure after performing the use and abuse tests of § 1500.51 (excluding the bite and flexure tests of paragraphs (c) and (d) of this section). In testing to ensure compliance with this regulation, the measurements of the opening of the Commission's test fixture will be no greater

than those shown in Figure 1 and the depth of the fixture used will be no less than that shown in Figure 1.

Dated: May 16, 1978.

SADYE E. DUNN,
Acting Secretary, Consumer
Product Safety Commission.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER A—GENERAL

PART 5—DELEGATIONS OF AUTHORITY AND ORGANIZATION

Subpart B—Re Delegations of Authority From the Commissioner of Food and Drugs

INVESTIGATIONAL DEVICE EXEMPTIONS

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document amends the regulations for delegations of authority and organization. Certain investigational devices have been regulated as investigational new drugs and are subject to transitional provisions

in the Medical Device Amendments of 1976. The authority delegated to the Director of the Bureau of Medical Devices is expanded to include actions concerning investigational exemptions which apply to these devices. The new authority will permit an orderly transfer of control over classes of devices previously regulated as drugs from the Bureau of Biologics and Drugs to the Bureau of Medical Devices.

EFFECTIVE DATE: May 23, 1978.

FOR FURTHER INFORMATION CONTACT:

Robert L. Miller, Office of Management and Operations (HFA-340), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4976.

SUPPLEMENTARY INFORMATION: The Bureau of Medical Devices has already assumed control over one class of investigational devices, vascular grafts of animal and human origin, which have been regulated as new drugs. Manufacturers of these products have been notified that the Bureau of Medical Devices is now the principal contact point for these products. The regulation setting forth the delegations of authority under the investigational device provisions of the Medical Device Amendments of 1976 under Part 5 (21 CFR 5.59) was published in the FEDERAL REGISTER of August 2, 1977 (42 FR 39100).

Further redelegation of the authority delegated is not authorized. Authority delegated to a position by title may be exercised by a person officially designated to serve in such position in an acting capacity or on a temporary basis, unless prohibited by a restriction written into the document designating him as "acting," or unless not legally permissible.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371(a))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), § 5.59 is revised to read as follows:

§ 5.59 Approval, disapproval, or withdrawal of applications for investigational device exemptions and termination of certain notices of claimed investigational exemption for a new drug.

The Director of the Bureau of Medical Devices is authorized to approve, disapprove, or withdraw applications for investigational device exemptions submitted under section 520(g) of the Federal Food, Drug, and Cosmetic Act; and terminate notices of claimed investigational exemption for a new drug under 21 CFR Part 312 which apply to transitional devices which are subject to the provisions of section 520(1) of the act.

Effective date. This regulation shall be effective May 23, 1978.

(Sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371(a)))

Dated: May 15, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner
for Regulatory Affairs.

[FR Doc. 78-14223 Filed 5-22-78; 8:45 am]

[4110-03]

SUBCHAPTER C—DRUGS: GENERAL

[Docket No. 77N-0102]

PART 201—LABELING

Thyroid, Digitalis, and Related Drugs for Human Use; Required Boxed Warnings

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This rule requires that the physician labeling for thyroid, digitalis, and related drugs contain a boxed warning against the use of the drugs for the treatment of obesity. This action is being taken because the drugs have been promoted and advertised for, and continue to be used in, the treatment of obesity, but their safety and effectiveness for that use has never been established. The action is intended to inform physicians of the serious and potentially life-threatening effects of such use of the drugs.

EFFECTIVE DATE: July 24, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael C. McGrane, Bureau of Drugs (HFD-30), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-5220.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of May 27, 1977 (42 FR 27262), the Commissioner of Food and Drugs proposed that labeling for drugs with thyroid hormone activity and labeling for digitalis and other related cardiotonic drugs be required to bear a boxed warning against using the drugs to treat obesity. Interested persons were given 60 days to submit comments on the proposal.

Twelve comments were received on the proposal: six from manufacturers of drug products subject to the proposed rules, four from interested individual physicians, one from the American Society of Bariatric Physicians, and one from the Pharmaceutical Manufacturer's Association. A summary of the comments and the Commissioner's conclusions regarding them are as follows:

1. One comment objected to the proposed boxed warnings on the grounds that the Food and Drug Administra-

tion (FDA) lacks the statutory authority to require a statement in drug labeling that warns against the use of a drug for an unapproved indication. The comment contended that FDA's authority to prescribe labeling statements is limited to requiring information on the safety and effectiveness of a drug for its labeled indications. Another comment claims that a final rule requiring boxed warnings for thyroid, digitalis, and related drugs would be an application of a notice of proposed rulemaking published in the FEDERAL REGISTER of April 7, 1975 (40 FR 15392), on the content and format of prescription drug labeling and, accordingly, would circumvent the notice and comment procedures required by the Administrative Procedure Act.

The Commissioner does not agree with these comments. As discussed fully in the preamble to the proposed revision of 21 CFR 1.3 (recodified as 21 CFR 1.21 in the FEDERAL REGISTER of March 22, 1977 (42 FR 15553)) published in the FEDERAL REGISTER of September 16, 1974 (39 FR 33229), the law requires that labeling of drug products include warnings about both potential and verified hazards in the use of a drug, when available medical information justifies the warning. The Commissioner has found that thyroid, digitalis, and related drugs are dispensed or prescribed for the treatment of obesity, even though substantial evidence of the effectiveness of the drug products for that use has never been demonstrated, and the use of the drugs in the treatment of obesity may produce serious or even life-threatening toxicity. Because drug labeling is intended to advise physicians about potential hazards in the use of the drug and convey documented statements about its safety and effectiveness, the Commissioner concludes that there is no legitimate basis for limiting the labeling to hazards arising from the approved use of the drug product, particularly where large scale and dangerous unapproved use has been found.

The Commissioner also rejects the argument that finalizing the boxed warning requirements must await the finalization of the April 7, 1975 proposal on the general format and content of prescription drug labeling. The Commissioner does not view the required boxed warning under this final rule as conflicting with the FDA policy announced in the April 7 proposal. The April 7 proposal was not intended to establish new regulatory requirements. Instead, it proposed standards for the format and content of drug labeling to bring all prescription drug labeling up to the level of the best labeling. The Commissioner did not, however, intend to imply that FDA would defer the adoption of labeling requirements for boxed warnings for specific drugs when the need

for such labeling was clearly demonstrated. He believes a need has been demonstrated for a boxed warning in the labeling for thyroid, digitalis, and related drugs against their use for treating obesity. Accordingly, requirements with that specific objective were proposed on May 27, 1977; comments on the proposed requirements were received and evaluated, and a final regulation, again, on this specific objective, is promulgated by this notice. Accordingly, this final rule is not an application of the April 7, 1975 proposal, but is based on the proposal of May 27, 1977, and promulgation of this final rule is consistent with the Administrative Procedure Act.

2. Several comments observed that 21 CFR 201.100(f) and 202.1(e)(2)(i) of FDA's prescription drug labeling and advertising regulations prohibit reminder labeling and advertisements, other than those intended to convey price information, for prescription drug products whose labeling contains a boxed warning relating to a serious hazard associated with the use of the drug product. The comments asked whether the proposed boxed warnings would fall under those regulations and, thus, whether reminder advertising would be prohibited for thyroid, digitalis, and related drugs. Several comments contended that reminder labeling and advertisements for properly labeled thyroid, digitalis, and related drug products should not be prohibited just because some practitioners dispense or prescribe the drug products for the unapproved use of treating obesity. The comments suggested that the substance of the proposed warnings is well known and understood by reputable physicians, and the addition of the warnings to the labeling of the drug products would probably not reduce the improper prescribing of them for obesity. One comment argued that if boxed warnings are to be effective for communicating important hazards about the use of a drug, a boxed warning should only be used in a serious or life-threatening situation that might occur when the product is used for its labeled indications. The comment expressed concern that the effectiveness of the boxed warning concept would be destroyed if it is applied in inappropriate instances, such as to caution prescribers against unapproved uses of a drug.

The Commissioner disagrees with these comments. A boxed warning is properly used for serious or life-threatening hazards associated with the use of a drug. As stated in the preamble to the proposal, as well as in the boxed warnings themselves, using thyroid, digitalis, and related drugs to treat obesity has the potential for producing serious and possibly fatal toxicity. The continued practice of dispensing or prescribing these drugs for obe-

sily, together with the potentially serious hazard associated with the use for that indication, demands that a boxed warning against this use appear in their labeling and advertisements. For that reason the Commissioner also concludes that complete information must be given to physicians concerning the use of the drug products. Reminder labeling and advertisements fail to convey the important information concerning the serious and potentially life-threatening effects of the drugs and therefore inappropriate for thyroid, digitalis, and related drug products. Accordingly, the prohibitions in §§ 201.100(f) and 202.1(e)(2)(i) against reminder labeling and advertising for drug products whose labeling contains a boxed warning are properly applied to the thyroid, digitalis, and related drug products. Although the addition of a boxed warning may not end the improper use of these drug products in the treatment of obesity, it is another important step in ending the promotion of these drugs for that use and informing prescribers of its dangers.

3. Two comments suggested that the statements against the use of thyroid, digitalis, and related drugs in the treatment of obesity belong in the "Contraindications" section of the labeling rather than the "Warnings" section. Another comment suggested that the warning for thyroid drug products be placed under the "Indications and Usage" section of the labeling.

The Commissioner disagrees with these comments. The "Contraindications" section of prescription drug labeling is intended to inform physicians of circumstances under which a drug product is not to be used for its labeled indications. For example, the use of a drug product for the treatment of a specific condition for which it is indicated in its labeling may be contraindicated if the patient is hypersensitive to the drug. The "Indications and Usage" section of prescription drug labeling is intended to provide information on the use of a drug for those conditions for which it has been demonstrated to be safe and effective. Under certain circumstances, the "Indications" section may be required to contain a statement that the drug is ineffective for a use for which it is commonly prescribed. A serious hazard to patients from the use of a drug for an indication for which it has not been demonstrated to be effective, however, it more properly the subject of a warning in labeling to ensure that the prescriber is aware of the hazard.

4. One comment suggested that the word "used" be substituted for the word "promoted" in the first sentence of each boxed warning.

The Commissioner has concluded that the word "used" is more appropriate

in the context of these warnings. Advertising and labeling claims by persons responsible for the labeling of the drug products have not promoted their use for treating obesity for many years. The warnings have been revised accordingly.

The labeling in 21 CFR 310.500(e) for digoxin products for oral use requires a boxed warning identical to that proposed for the other digitalis and related cardiotonic glycosides. Because the substitution of the word "used" for the word "promoted" in the boxed warning under this final rule for digitalis and related cardiotonic glycosides causes that warning to differ from the digoxin boxed warning, the Commissioner has revised the final rule to clearly state that it does not apply to oral digoxin drug products. The Commissioner will consider revising the boxed warning for oral digoxin drug products to conform it to the warning for related cardiotonic glycosides when additional revisions to the digoxin labeling are necessary.

5. One comment objected to the proposed 60-day effective date for the labeling warnings. The comment observed that the problem of the unapproved use of the drug products in treating obesity has been recognized for many years and, accordingly, immediate action in the form of a boxed warning in labeling is not warranted. The comment observed that past experience has shown that the wording of labeling statements in final regulations usually differs from the proposed wording, so new labeling can be printed only after the final regulation is published. Thus, a 60-day effective date would result in the needless destruction of supplies of current labeling. The comment suggested that the effective date be 180 days from the date of publication of the final regulation.

The Commissioner does not agree with this comment. As stated in the proposal, only drug products packaged on or after the effective date would be required to contain labeling that includes the boxed warnings against the use of the drugs in treating obesity. The 60-day effective date would allow drug products to be packaged with old labeling for 60 days after the final rule is published. It would also permit drug products that are packaged with old labeling before the effective date to be marketed after that date. With respect to the comment's request for an effective date 180 days from publication, the Commissioner believes that an effective date 60 days from publication is necessary, given the health risks associated with the new warnings, to ensure that the warning statements appear promptly in advertising and in labeling other than the package inserts and, as discussed in comment 2, to prohibit reminder advertisements

for these drug products after that date.

6. Several comments objected to the statement in proposed § 201.316 (21 CFR 201.316) that drugs with thyroid hormone activity within the range of daily hormonal requirements are ineffective for weight reduction when used in euthyroid patients (patients with normal thyroid function). The comments identified a number of references in the recent scientific literature describing changes in peripheral thyroid hormone metabolism as well as central regulatory mechanisms during starvation diets. The comments argued that during starvation diets "compensatory hypothyroidism" develops and thyroid hormone administration is therefore not only indicated but is beneficial in facilitating the rate of weight loss.

The Commissioner, having reviewed several articles in the recent scientific literature on this subject, does not agree with these comments. Copies of the articles have been placed on public display in the office of the Hearing Clerk (HFC-20), Food and Drug Administration, room 4-65, 5600 Fishers Lane, Rockville, Md. 20857. During starvation, distinctive disturbances of peripheral thyroid hormone metabolism have been reported, including a fall in total and free triiodothyronine (T-3) and an elevation in 3,3',5'-triiodothyronine (reverse T-3 (rT-3)), although total thyroxine (T-4) levels remain normal while free T-4 is normal or slightly increased. These observations have been interpreted to suggest there is an alteration in peripheral T-4 metabolism away from generating T-3 and toward the generation of rT-3, which is essentially metabolically inactive. This interpretation is supported by similar findings in fasting obese volunteers on suppressive doses of T-4. The changes in T-3 concentration seen with fasting, however, promptly revert to normal with feeding. In addition to these peripheral changes, serum thyrotropin (TSH) levels have been shown to fall within 2 days of fasting but then gradually rise to near baseline levels over the next few days despite continued fasting and the presence of low serum T-3 levels. In contrast to these findings, TSH levels increase in classical primary hypothyroidism and are indeed the most significant documentation of the disease. The clinical significance of these observations is unknown. The reliance upon low serum T-3 measurements in the presence of normal T-4 concentrations for the diagnosis of hypothyroidism, however, would not now be justified.

Accordingly, the Commissioner does not agree that the warning should be changed to suggest that thyroid drug products in doses used for replacement therapy are safe and effective for

treating obese individuals on starvation diets. He encourages, however, well-controlled clinical trials on the role of T-3 replacement therapy in obese patients on starvation diets with associated depression of serum T-3 levels. Such trials should include assessment of the range of thyroid hormone function and should be conducted under a Notice of Claimed Investigational Exemption for a New Drug (IND).

7. One comment complained that the boxed warning for thyroid drug products was not balanced because its reference to dosages within the range of daily hormonal requirements concerned only safety and made no comment as to effectiveness. The comment complained similarly about the warning regarding larger dosages.

The comment is incorrect in stating that the warning fails to speak to the effectiveness of dosages within the range of daily hormonal requirements. The warning specifically notes that such dosages are ineffective for weight reduction. Generally, however, the "Warnings" section of prescription drug labeling is intended to provide information on safety hazards from the use of the drug. Moreover, a boxed warning is intended to describe special safety problems, particularly those which may lead to death or serious injury. The effectiveness of a drug for a particular use is traditionally stated under the "Indications" section of the labeling. Such a statement has been included in the thyroid boxed warning only to emphasize that in euthyroid individuals physiological dosages simply suppress endogenous thyroid hormone production, whereas larger doses are associated with safety hazards. In any case, even if such a boxed warning normally included statements regarding effectiveness, such statements could not be included here. The Commissioner is not aware of adequate and well-controlled clinical trials that document either the safety or long-term efficacy of pharmacologic doses of thyroid hormone preparations in treating obesity. Indeed, one of the references cited by the comment noted that in a study of hospitalized patients who were followed afterwards as outpatients, no statistically significant greater average weight loss in the group treated with T-3 was demonstrated over the term of the study. In addition, all patients in the treatment group developed tachycardia (rapid heart rate), and one had to be removed from the study because of atrial fibrillation (irregular heartbeat).

8. One respondent reported on his personal unpublished clinical studies that suggested that obese individuals may be chemically euthyroid as demonstrated by their blood values, but that there exists a decreased utilization

of the hormone at the cellular level. An analogy was made to certain obese diabetics who may have normal or elevated levels of circulating insulin.

The Commissioner is unaware of any support for such an undocumented claim and rejects a change in the warning on that basis.

9. Several manufacturers of specific digitalis and thyroid drug products contended that the regulations should not apply to their products. A manufacturer of digoxin injection observed that the parenteral dosage form of digoxin is not used in the treatment of obesity and urged that the final rule specifically exempt parenteral dosage forms of digitalis and related cardiotonic drugs from the boxed warning requirement. Another comment submitted independent market research data for its brand of gitalin in support of its contention that its drug product is not being used by physicians to treat obesity and, accordingly, should be exempted from the boxed warning requirement. Another comment argued that its brand of sodium dextrothyroxine should be exempted from the thyroid boxed warning on the ground that it has no history of use for treating obesity and would not even be considered potentially effective for that use because it is estimated to have 5 percent or less of the metabolic stimulating thyroid activity of other thyroid drugs such as levothyroxine sodium.

The Commissioner acknowledges that the administration of injectable digoxin produces extreme pain at the site of injection, thus greatly minimizing the likelihood of its use for treating obesity. Other parenteral cardiotonic glycosides have a similar effect. Accordingly, he has revised the final rule to apply only to oral dosage forms of digitalis and related cardiotonic drugs.

The Commissioner does not agree, however, that marketing data on a drug can be used as a basis for exempting it from the boxed warning requirement. Although some brands of cardiotonic glycosides may not have been used in the past for treating obesity, the Commissioner believes that exempting them from the boxed warning requirement and the prohibition against reminder labeling and advertising would result in the use of those drugs in the treatment of obesity as the use of the drugs subject to the final rule declines. A drug cannot be exempted from the boxed warning requirement without having been shown to differ significantly from the drug products subject to the requirement in a way that can be expected to discourage its use for treating obesity (for example, the extreme pain associated with the administration of injectable cardiotonic glycosides). Although mar-

keting data may demonstrate that the respondent's gitalin has not been used in the past for treating obesity, the Commissioner believes it could be used for that indication to the same extent as other digitalis glycosides. Likewise, although sodium dextrothyroxine has less of the metabolic stimulating properties of other drugs with thyroid hormone activity, the Commissioner believes that to be an inadequate basis upon which to exempt it from the boxed warning requirement.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 701, 52 Stat. 1050-1053, 1055-1056, as amended (21 U.S.C. 352, 355, 371)) and under authority delegated to the Commissioner (21 CFR 5.1), Part 201 is amended as follows:

1. By adding new § 201.316, to read as follows:

§ 201.316 Drugs with thyroid hormone activity for human use; required warning.

(a) Drugs with thyroid hormone activity have been promoted for, and continue to be dispensed and prescribed for, use in the treatment of obesity, although their safety and effectiveness for that use have never been established.

(b) Drugs for human use with thyroid hormone activity are misbranded within the meaning of section 502 of the Federal Food, Drug, and Cosmetic Act unless their labeling bears the following boxed warning at the beginning of the "Warnings" section:

Drugs with thyroid hormone activity, alone or together with other therapeutic agents, have been used for the treatment of obesity. In euthyroid patients, doses within the range of daily hormonal requirements are ineffective for weight reduction. Larger doses may produce serious or even life-threatening manifestations of toxicity, particularly when given in association with sympathomimetic amines such as those used for their anorectic effects.

2. By adding new § 201.317, to read as follows:

§ 201.317 Digitalis and related cardiotonic drugs for human use in oral dosage forms; required warning.

(a) Digitalis and related cardiotonic drugs for human use in oral dosage forms have been promoted for, and continue to be dispensed and prescribed for, use in the treatment of obesity, although their safety and effectiveness for that use have never been established.

(b) Digitalis and related cardiotonic drugs for human use in oral dosage forms are misbranded within the meaning of section 502 of the Federal

Food, Drug, and Cosmetic Act unless their labeling bears the following boxed warning at the beginning of the "Warnings" section:

Digitalis alone or with other drugs has been used in the treatment of obesity. This use of digoxin or other digitalis glycosides is unwarranted. Moreover, since they may cause potentially fatal arrhythmias or other adverse effects, the use of these drugs in the treatment of obesity is dangerous.

(c) This section does not apply to digoxin products for oral use, which shall be labeled according to the requirements of § 310.500 of this chapter.

Effective date. This regulation shall be effective on July 24, 1978, for any drug product to which these rules apply that is packaged on or after that date.

(Secs. 502, 505, 701, 52 Stat. 1050-1053, 1055-1056, as amended (21 U.S.C. 352, 355, 371).)

SUBCHAPTER H—MEDICAL DEVICES

[Docket No. 77N-0110]

PART 808—EXEMPTIONS FROM FEDERAL PREEMPTION OF STATE AND LOCAL DEVICE REQUIREMENTS

Procedures for Consideration of Applications; Correction

AGENCY: Food and Drug Administration.

ACTION: Correction; final rule.

SUMMARY: In FR Doc. 78-11719, appearing on page 18661 in the *FEDERAL REGISTER* of Tuesday, May 2, 1978, the following correction is made on page 18666: In § 808.20(a), the first and second sentences which read, "(a) Any State or political subdivision may apply to the Food and Drug Administration for an exemption from preemption for any requirement that is preempted. An exemption may only be granted to a State or political subdivision for a requirement that it has enacted and that has been enacted, promulgated, or issued in final form by the authorized body or official of the State or political subdivision so as to have the force and effect of law" are changed to read, "(a) Any State or political subdivision may apply to the Food and Drug Administration for an

exemption from preemption for any requirement that it has enacted and that is preempted. An exemption may only be granted for a requirement that has been enacted, promulgated, or issued in final form by the authorized body or official of the State or political subdivision so as to have the force and effect of law."

EFFECTIVE DATE: July 3, 1978.

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-3495]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the Village of Glendale Heights, DuPage County, Ill.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rules.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the Village of Glendale Heights, DuPage County, Ill. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the Village of Glendale Heights, DuPage County, Ill.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Village of Glendale

Heights, DuPage County, Ill., are available for review at the bulletin board in the Village Hall, 1611 Bloomington Road, Glendale Heights, Ill.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations, for the Village of Glendale Heights, DuPage County, Ill.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
East Branch DuPage River.	Downstream corporate limits.	702
	Illinois Central RR.	703
	Upstream corporate limits.	705
Armitage Ditch.	Downstream corporate limits.	707
	Wayne Ave.	713

PART 1917—APPEALS FROM FLOOD
ELEVATION DETERMINATION AND
JUDICIAL REVIEW

Final Flood Elevation Determination
for the County of Noble, Ind.

AGENCY: Federal Insurance Adminis-
tration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year)
flood elevations are listed below for se-
lected locations in the County of
Noble, Ind.

These base (100-year) flood eleva-
tions are the basis for the flood plain
management measures that the com-
munity is required to either adopt or
show evidence of being already in
effect in order to qualify or remain
qualified for participation in the Na-
tional Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issu-
ance of the Flood Insurance Rate Map
(FIRM), showing base (100-year) flood
elevations, for the County of Noble,
Ind.

ADDRESSES: Maps and other infor-
mation showing the detailed outlines
of the flood-prone areas and the final
elevations for the County of Noble,
Ind., are available for review at the
bulletin board in the Hall of the
County Courthouse, Albion, Ind.

FOR FURTHER INFORMATION
CONTACT:

Mr. Richard Krimm, Assistant Ad-
ministrator, Office of Flood Insur-
ance, 202-755-5581 or toll free line
800-424-8872, room 5270, 451 Sev-
enth Street SW., Washington, D.C.
20410.

SUPPLEMENTARY INFORMATION:
The Federal Insurance Administrator
gives notice of his final determinations
of flood elevations for the County of
Noble, Ind.

This final rule is issued in accord-
ance with section 110 of the Flood Dis-
aster Protection Act of 1973 (Pub. L.
93-234), 87 Stat. 980, which added sec-
tion 1363 to the National Flood Insur-
ance Act of 1968 (Title XIII of the
Housing and Urban Development Act
of 1968 (Pub. L. 90-448), 42 U.S.C.
4001-4128, and 24 CFR Part 1917.4(a)).
An opportunity for the community or
individuals to appeal this determina-
tion to or through the community for

RULES AND REGULATIONS

a period of ninety (90) days has been
provided. No appeals of the proposed
base flood elevations were received
from the community or from individ-
uals within the community.

The Administrator has developed
criteria for flood plain management in
flood-prone areas in accordance with
24 CFR Part 1910.

The final base (100-year) flood eleva-
tions for selected locations are:

[Docket No. FI-36851]

PART 1917—APPEALS FROM FLOOD
ELEVATION DETERMINATION AND
JUDICIAL REVIEW

Final Flood Elevation Determination
for the County of St. Joseph, Ind.

AGENCY: Federal Insurance Adminis-
tration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year)
flood elevations are listed below for se-
lected locations in the County of St.
Joseph, Ind.

These base (100-year) flood eleva-
tions are the basis for the flood plain
management measures that the com-
munity is required to either adopt or
show evidence of being already in
effect in order to qualify or remain
qualified for participation in the Na-
tional Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issu-
ance of the Flood Insurance Rate Map
(FIRM), showing base (100-year) flood
elevations, for the County of St.
Joseph, Ind.

ADDRESSES: Maps and other infor-
mation showing the detailed outlines
of the flood-prone areas and the final
elevations for the County of St.
Joseph, Ind., are available for review
at the County/City Building, 227 Jef-
ferson Boulevard, South Bend, Ind.

FOR FURTHER INFORMATION
CONTACT:

Mr. Richard Krimm, Assistant Ad-
ministrator, Office of Flood Insur-
ance, 202-755-5581 or toll free line
800-424-8872, Room 5270, 451 7th
Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION:
The Federal Insurance Administrator
gives notice of his final determinations
of flood elevations for the County of
St. Joseph, Ind.

This final rule is issued in accord-
ance with section 110 of the Flood Dis-
aster Protection Act of 1973 (Pub. L.
93-234), 87 Stat. 980, which added sec-
tion 1363 to the National Flood Insur-
ance Act of 1968 (Title XIII of the
Housing and Urban Development Act
of 1968 (Pub. L. 90-448), 42 U.S.C.
4001-4128, and 24 CFR Part 1917.4(a)).
An opportunity for the community or
individuals to appeal this determina-
tion to or through the community for
a period of ninety (90) days has been
provided. No appeals of the proposed
base flood elevations were received
from the community or from individ-
uals within the community.

The Administrator has developed
criteria for flood plain management in
flood-prone areas in accordance with
24 CFR Part 1910.

The final base (100-year) flood eleva-
tions for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
St. Joseph River....	Darden Rd.....	665
	Bittersweet Rd.....	718
Judy Creek	Kenilworth Rd.....	707
	State Route 23.....	734

[Docket No. FI-3076]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATIONS AND JUDICIAL REVIEW

Final Flood Elevation Determinations for the City of Franklin, St. Mary Parish, La.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the City of Franklin, St. Mary Parish, La.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain

qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the city of Franklin, La.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the city of Franklin, are available for review at City Hall, Franklin, La.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, DC. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the city of Franklin, La.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided, and the Administrator has resolved the appeals presented by the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of Flooding	Location	Elevation in feet, national geodetic vertical datum
Bayou Teche.....	Willow St	7
	Sterling Bridge	7
Overland	Morris St. west of South	9
Hurricand Surge.	Pacific RR.	
	Pine St. west of South	10
	Pacific RR.	
	U.S. Highway 60	9
	northwest of South	
	Pacific RR. Branch.	
	Barrow Street north of	10
	South Pacific RR.	
	Branch.	

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Ad-

ministrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: April 11, 1978.

PATRICIA ROBERTS HARRIS,
Secretary.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the city of Elkader, Clayton County, Iowa.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the city of Elkader, Clayton County, Iowa, are available for review at the Municipal Building, 207 North Main, Elkader, Iowa.

FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410. 202-755-5581 or toll free line 800-424-8872

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the city of Elkader, Clayton County, Iowa.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Turkey River	Southern corporate limits.	720
	Boardman St. (extended).	721
	Bridge St. and State Highway 13.	724
	Cedar St. (extended).....	727
	Willow St. (extended)....	736
	McKinley St. (extended)	737
	Northern corporate limits.	739

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: April 12, 1978.

(Docket No. FI-4030)

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the City of Ashland, Boyd County, Ky.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the city of Ashland, Boyd County, Ky. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the city of Ashland, Boyd County, Ky.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the city of Ashland, Boyd County, Ky. are available for review at the City Clerk's Office, Ashland, Ky.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the city of Ashland, Boyd County, Ky.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Long Branch Creek	Just upstream 9th St.	553
Ohio River	Just upstream of Ashland-Coal Grove Bridge.	547
	Confluence of Keys Creek.	549

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective Jan. 28, 1969 (33 FR 17804, Nov. 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator (43 FR 7719).)

Issued: April 12, 1978.

GLORIA M. JIMENEZ,

Federal Insurance Administrator.

CHAPTER XIII—FEDERAL DISASTER ASSISTANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-78-501]

PART 2205—FEDERAL DISASTER ASSISTANCE

Individual and Family Grant Program

AGENCY: Federal Disaster Assistance Administration.

ACTION: Final rule.

SUMMARY: This rule revises the eligibility criteria for the Individual and Family Grant Program to conform to the August 25, 1977 agreement between Farmers Home Administration (FmHA) and the Small Business Administration (SBA) which permits either FmHA or SBA to make housing or personal property loans in a major disaster when farmers have suffered production and farm losses as well as housing and personal property losses.

EFFECTIVE DATE: June 22, 1978.

FOR FURTHER INFORMATION CONTACT:

C. T. Babcock, Federal Disaster Assistance Administration, Room B-133, 451 Seventh Street SW., Washington, D.C. 20410, 202-634-7860.

SUPPLEMENTARY INFORMATION: On Wednesday, February 1, 1978, the Federal Disaster Assistance Administration (FDAA) published an interim rule revising the eligibility criteria for the Individual and Family Grant Program to conform to the August 25, 1977 agreement between the Farmers Home Administration (FmHA) and the Small Business Administration (SBA). This agreement permits either FmHA or SBA to make housing or personal property loans in a major disaster when farmers have suffered production and farm losses as well as housing and personal property losses. This was a change aimed at improving and expanding the delivery of financial assistance to the agricultural community; however, it necessitated a change in the eligibility criteria for the Individual and Family Grant Program to recognize that farmers, ranchers and aquaculturists may now apply to SBA for assistance as well as to FmHA. The eligibility criteria specifies that a grant applicant must apply to available governmental disaster assistance programs before eligibility for a grant is determined. Since both the FmHA and SBA loan programs are considered governmental disaster assistance programs, a farmer rancher or aquaculturist would have to apply to both programs before grant eligibility could be determined. The interim rule removed that requirement and specified that a denial of loan assistance from either program (with one exception noted in § 2205.48(c)(1)(ii)) provides sufficient basis on which to determine eligibility for the Individual and Family Grant Program.

With the concurrence of the appropriate Departmental officials, the Administrator has issued a Finding of Inapplicability of Environmental Impact concerning this rule, in accordance with section 102 of the National Environmental Policy Act of 1969 and the procedures in HUD Handbook 1390.1 (38 FR 19182). It is the position of the signatories to this finding that this rule in itself has no significant impact on the human environment. Copies of this finding may be inspected or obtained at the Office of the Rules Docket Clerk, Office of the General Counsel, Room 5218, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410.

In order to insure that farmers, ranchers and aquaculturists receive maximum benefits as provided by the Disaster Relief Act of 1974, and more specifically Section 408, Individual and Family Grant Programs, at the earliest practicable date, FDAA determined that it was in the public interest to publish the changes as interim regulations, effective February 1, 1978. However, interested parties were encouraged to submit comments, suggestions,

data or arguments regarding the changes to the Rules Docket Clerk. No comments, suggestions, data or arguments were received. Accordingly, § 2205.48(c) is amended, effective on June 22, 1978 to read as follows:

§ 2205.48 Individual and family grants.

(c) *National eligibility criteria.*—In administering the Individual and Family Grant Program, a State shall determine the eligibility of an individual or family for a grant to meet a necessary expense or serious need in accordance with the following criteria.

(1) *General.* (i) In order to qualify for a grant under this section an individual or family representative must certify:

(A) That application has been made to other available governmental disaster assistance programs for assistance to meet a necessary expense or serious need and that neither he/she nor any member of his/her family has been determined to be qualified for such assistance or, for demonstrated reasons, any assistance received has not satisfied any such necessary expense or serious need (except as provided for in paragraph (c)(1)(ii) of this section).

(B) That with respect to the specific necessary expense or serious need or portion thereof for which application is made, neither he/she, nor to the best of his/her knowledge, any member of his/her family, has previously received or refused assistance from other means.

(C) That should the individual or family receive a grant and assistance from other means later becomes available to meet the necessary expense or serious need, the individual or family shall refund to the State that part of the grant for which assistance from other means has been received.

(ii) Farmers, ranchers, and persons engaged in aquaculture must apply to either the Farmers Home Administration (FmHA) or the Small Business Administration (SBA) for loan assistance, and obtain a denial of such assistance from either FmHA or SBA before they may be considered eligible for a grant under this section. If applicants for FmHA loan assistance are unable to obtain such assistance because, in FmHA's determination, they are able to obtain necessary credit from other sources, they will be considered ineligible for grant assistance for those items or services for which assistance may be provided by the FmHA's Emergency Loan Program.

(iii) Individuals or families who incurred a necessary expense or serious need in the major disaster area may be eligible for assistance under this section without regard to their residency in the major disaster area or within

the State in which the major disaster had been declared.

(Sec. 408, Pub. L. 93-288, 88 Stat. 156 (42 U.S.C. 5178); E.O. 11795 as amended by E.O. 11919 39 FR 25939; Delegation of Authority, 29 FR 23227.)

Issued at Washington, D.C., May 12, 1978.

WILLIAM H. WILCOX,
Administrator, Federal Disaster
Assistance Administration.

Title 32—National Defense

**CHAPTER VII—DEPARTMENT OF THE
AIR FORCE**

SUBCHAPTER C—PUBLIC RELATIONS

PART 835—SUPPORT OF NONGOVERNMENTAL TEST AND EVALUATION

AGENCY: Department of the Air Force, Department of Defense.

ACTION: Final rule.

SUMMARY: The Department of the Air Force is adding a new rule stating policy, authority, and limitations on procedures for providing Air Force support, services and facilities to nongovernmental organizations. This rule will permit DOD agencies to sponsor nongovernment test requests. Because contractors occasionally have had difficulty finding non-DOD agencies with mutually aligned interest, this rule should have a favorable impact.

EFFECTIVE DATE: May 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Major Melvin Hayashi, Headquarters U.S. Air Force, Planning, Programming and Analysis (AF/RDXT), Washington, D.C. 20330, 202-694-4590.

SUPPLEMENTARY INFORMATION: This rule was published as proposed on April 17, 1978 (43 FR 16193). As stated at that time, this rule describes procedures for providing Air Force support, services and facilities to nongovernmental organizations. These procedures give ways to test and evaluate products, techniques and equipment. The rule applies to government-owned facilities and serves as a specific guide for carrying out portions of DOD Directive 3200.11 that apply.

This rule is issued under authority of 10 U.S.C. 8012.

Since no significant comments were received from the public, Part 835 is added to Title 32 CFR, Chapter VII, Subchapter C, to read as follows:

Sec.
835.1 Purpose.
835.2 Background information.
835.3 Exceptions.
835.4 Terms explained.
835.5 Policies and procedures.
835.6 Responsibilities.
835.7 Authority for direct communication.
AUTHORITY: 10 U.S.C. 8012.

§ 835.1 Purpose.

This part states policy, authority, and limitations on procedures for providing Air Force support, services and facilities to nongovernmental organizations. These procedures give ways to test and evaluate products, techniques, and equipment. It applies to government-owned facilities and serves as a specific guide for carrying out portions of DOD Directive 3200.11 that apply.

§ 835.2 Background information.

The Air Force maintains and operates many kinds of unique facilities to meet its testing needs. These facilities can also accommodate many needs of the other Services and, in some cases, Government agencies outside the Department of Defense (DOD). Many of these facilities cannot be economically duplicated by other agencies (governmental or private). Frequently, businesses and institutions ask the Air Force to let them use its facilities to test and evaluate their products or techniques. DOD Directive 3200.11 gives procedures for using, managing, and operating major DOD ranges and test facilities designated collectively as the Major Range and Test Facility Base (MRTFB). The DOD directive covers both governmental and nongovernmental use. This part, however, adds to the DOD guidance that specifically pertains to nongovernmental use. It applies not only to the U.S. Air Force facilities in the MRTFB, but also to all other U.S. Air Force test facilities.

§ 835.3 Exceptions.

(a) This part does not apply to Government-owned and contractor-operated industrial facilities whose nongovernmental use is according to accountable contracts and pertinent regulations.

(b) AFP 400-7 Matrix Illustrating Reimbursement Policies for Interservice / Interdepartmental / Interagency Support, AFR 400-27, Basic Policies and Principles for Interservice, Interdepartmental, and Interagency Support, and DOD Directive 4000.19-M explain inter-Service support agreements and apply to Air Force test facilities.

(c) AFR 400-15, Logistic Support of United States Nongovernmental, Nonmilitary Agencies and Individuals in Overseas Military Commands, covers logistic support of military departments to U.S. nongovernment agencies or individuals in overseas military command areas.

(d) Section 13, Armed Services procurement regulations, governs the use of Government property by firms and institutions that perform Air Force contracts. Requests for test support in performing such contracts are not covered.

(e) The Arnold Engineering Development Center (AEDC) is exempted from the requirements of this part because it is authorized to provide industry with wind tunnel testing on a reimbursable basis.

§ 835.4 Terms explained.

(a) *Air Force test facility.* Any Air Force laboratory, range, or other facility intended for test and evaluation purposes. The facility may be operated by Service personnel or maintenance and operations contractors, or a combination of them.

(b) *Business.* A nongovernmental organization, other than an institution, desiring to test a product or technique that is not related to a government prime contract or subcontract.

(c) *Evaluation.* The review and analysis of qualitative or quantitative data from design review, hardware inspection, testing, or operational usage of equipment (AFR 80-14, Test and Evaluation).

(d) *Government sponsor.* A Federal executive agency whose directives or direct interest lead to a unique testing requirement.

(e) *Institution.* A nongovernmental organization, having an educational or scientific purpose, desiring to test a product or technique that is not related to a Government prime contract or subcontract.

(f) *Statement of support requirements.* A definitive statement prepared by an institution or business listing type, level, and how long support is required.

(g) *Support.* Services, supplies, equipment, and technical assistance provided to an institution or business.

(h) *Test.* Any program or procedure which is designed to obtain, verify, or provide data for the evaluation of: Research and development (other than laboratory experiments); progress in reaching development goals; or performance and operational capability of systems, subsystems, components, and equipment items (AFR 80-14).

(i) *Test support request (TSR).* A formal request for support sent by a Government sponsor that contains:

(1) A brief description of the mission or purpose of the requesting institution or business.

(2) A brief description of the nature of the test.

(3) A statement of support requirements.

(4) A "certificate of nonavailability" of suitable commercial facilities.

(5) A certification that the proposed test program is in the public interest.

(6) A statement that the business or institution has agreed not to use information regarding Air Force testing in connection with its advertising, and that such test support will not be interpreted as, nor constitute, an Air Force indorsement of that product.

§ 835.5 Policies and procedures.

(a) The Air Force may provide test support to businesses and institutions if such services are not reasonably available in private industry and can be supported without additional Service manning. In all cases, the items or techniques to be tested and evaluated must be in the public interest.

(b) Any business or institution desiring Air Force facilities and supporting services must seek as a sponsor a Federal executive agency. This agency must have regulations that require such testing or whose interests are directly aligned to the unique testing being proposed. The Government-agency sponsor must be responsible for filing with the Air Force the TSR in § 835.4(i).

(c) Except for the use of those facilities excluded from the uniform reimbursement policy (DODD 3200.11), the Air Force will be reimbursed for all costs (both direct and indirect) according to user-charge procedures of Part 812 of this chapter and other regulations that apply. The Air Force test facility comptroller bills the institution or business direct, NOT through the Government sponsor.

(d) The requesting institution or business must agree in all cases to indemnify the United States against all loss of, or damage to, Government property and injury to Government personnel, and to hold the United States harmless against all third-party claims unless willful misconduct of Air Force personnel is involved. AF Form 180, Hold Harmless Agreement, must be executed.

(e) Operations not within the scope of the stated purpose of such testing are prohibited. All tests must be accepted and approved on a noninterference basis and without rescheduling other planned Government activities. Any Government needs that arise during a test take precedence.

§ 835.6 Responsibilities.

(a) Major commands (MAJCOMs):

(1) Review TSRs sent by the Government sponsor.

(2) Transfer the TSR to another MAJCOM if the other command's test facilities are more appropriate.

(3) Disapprove and return TSRs that fall outside the scope of this part.

(4) Approve valid requests and direct proper action.

(5) Make sure that the Government sponsor has proved that Air Force test support is needed.

(6) Get an evaluation and recommendation from the Air Force test fa-

cility commander or a statement of whether the test can be accommodated and its probable impact on the facility's resources.

(b) Each Air Force test facility:

(1) Reviews TSRs sent by its MAJCOM headquarters.

(2) Estimates (according to Part 812 of this chapter) the cost of supporting the test, and explains cost factors involved.

(3) If the TSR involves aircraft, complies with Part 855 of this chapter.

(4) Estimates the resource impact on the Air Force test facility, if the test is accommodated.

(5) Within 30 calendar days after receiving the TSR, informs the MAJCOM headquarters as to the facility's capability to accommodate the test.

(6) Makes sure that all necessary safety measures are taken to prevent personal injury or property damage.

(7) Ensures compliance with security directives that apply.

(c) The Government sponsor:

(1) Sends a TSR in letter format containing the information in § 835.4(i), to the proper MAJCOM headquarters.

(2) Proves that the test is needed, and determines that such a test is indeed in the public interest.

(3) Verifies that test support services are not reasonably available in private industry.

§ 835.7 Authority for direct communication.

Direct communication is authorized between separate MAJCOM headquarters, between MAJCOM Headquarters and Government sponsors, and, after the TSR is received, between MAJCOM Headquarters and the requesting business or institution.

FRANKIE S. ESTEP,
Air Force Federal Register Liaison Officer, Directorate of Administration.

**Title 41—Public Contracts and
Property Management**

**PART 8-2—PROCUREMENT BY
FORMAL ADVERTISING**

PART 8-7—CONTRACT CLAUSES

Miscellaneous Changes

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: The Veterans Administration is revising the VA Procurement Regulations by specifying that maintenance of contract files will satisfy cer-

tain record requirements in the Federal Procurement Regulations (FPR); revoking obsolete material; correcting a cross-reference; updating an organizational title; reflecting agency policy of using precise terms denoting gender; and prescribing the use of new contract clauses. These changes are made to increase administrative and property management efficiency.

EFFECTIVE DATE: May 22, 1978.

FOR FURTHER INFORMATION CONTACT:

Chris A. Figg, Policy and Interagency Staff, Supply Service, Veterans Administration, Washington, D.C. 20420, 202-389-2334.

SUPPLEMENTARY INFORMATION: On page 14525 of the FEDERAL REGISTER of April 6, 1978, there was published a notice of proposed regulatory development to amend Parts 8-2 and 8-7.

Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulations. No written comments have been received and the proposed regulations are hereby adopted without change and are set forth below.

Approved: May 15, 1978.

By direction of the Administrator.

RUFUS H. WILSON,
Deputy Administrator.

1. In § 8-2.201, paragraphs (a), (c), (d)(3) and (e)(3) are revised and paragraph (g) is revoked. The revised material reads as follows:

§ 8-2.201 Preparation of invitations for bids.

(a) Invitations for bids for supplies, equipment and services will be serially numbered at the time of issue. The number will consist of the station or marketing division number, the serial number of the invitation, and the fiscal year in which issued, e.g., 101-25-78. A new series beginning with the number 1 will be started each fiscal year. Invitations for bids for supplies, equipment and services which are issued, accepted, and become contracts in the same fiscal year but, because of procurement leadtime, will not be performed until the ensuing fiscal year will be numbered in the series of the year in which they are issued. However, invitations issued in one fiscal year that will result in a contract that will become effective and performed only in the ensuing fiscal year will be numbered in the ensuing fiscal year series.

(c) In order to preclude adverse criticism of the Veterans Administration by prospective bidders relative to disclosure of bid prices prior to bid open-

ing, the following provision will be prominently placed in all invitations for bids:

CAUTION TO BIDDERS—BID ENVELOPES

It is the responsibility of each bidder to take all necessary precautions, including the use of a proper mailing cover, to insure that the bid price cannot be ascertained by anyone prior to bid opening. If a bid envelope is furnished with this invitation, the bidder is requested to use this envelope in submitting the bid. The bidder may, however, when it suits a purpose, use any suitable envelope, identified by the invitation number and bid opening time and date. If a bid envelope is not furnished, the bidder will complete and affix the enclosed Optional Form 17, Sealed Bid Label, to the lower left hand corner of the envelope used in submitting the bid.

(d) ***

(3) Invitations containing a summary bid request will contain the following statement:

The award will be made on either an individual item basis or summary bid basis, whichever results in the lowest cost to the Government. Therefore, to assure proper evaluation of all bids, a bidder quoting a summary bid price must also quote a price on each individual item included in the summary bid price.

(e) ***

(3) In addition to the clause in subparagraph (1) or (2) of this paragraph, the following clause will be included in the invitation when bids will be allowed on different packaging, unit designation, etc.

ALTERNATE PACKAGING AND PACKING

The bidder's offer must clearly indicate the quantity, package size, unit, or other different feature upon which the quote is made. Evaluation of the alternate or multiple alternates will be made on a common denominator such as per ounce, per pound, etc., basis.

(g) [Revoked]

2. In § 8-2.204, paragraph (b) is revised to read as follows:

§ 8-2.204 Records of invitations for bids and records of bids.

(b) Maintenance of the contract file prescribed by § 8-1.313-54 and retention of canceled Invitation for Bid files will fulfill the requirements set forth in FPR 1-2.204.

3. Section 8-7.150-24 is revised and § 8-7.150-25 is added so that the added and revised material reads as follows:

§ 8-7.150-24 Requirements for operating and maintenance manuals.

(a) Solicitations and requests for proposals for technical medical equipment and devices issued by a field station will normally require the contractor to provide operating and maintenance

manuals. Unless the station Chief, Engineering Service, indicates that such service manuals are not needed, each invitation for bid or request for proposal for technical medical equipment will include VA Specification No. X-1711, Documentation, Technical Service, for Technical Medical Equipment and Devices, as a requirement. The number of such manuals required will be specified in both the solicitation and the resulting purchase order.

(b) Solicitations and requests for proposals for mechanical equipment (other than technical medical equipment and devices) issued by a field station will include the following clause:

Service data manual. The contractor agrees to furnish two copies of a manual, handbook or brochure containing operating, installation, and maintenance instructions (including pictures or illustrations, schematics, and complete repair/test guides as necessary). Where applicable, it will include electrical data and connection diagrams for all utilities. The instructions shall also contain a complete list of all replaceable parts showing part number, name, and quantity required.

(c) When the bid or proposal will result in the initial purchase (including each make and model) of a centrally procured item, the following clause will be used:

Service data manual. The contractor agrees, when requested by the contracting officer, to furnish not more than five copies of the technical documentation required by VA Specification X-1711 to the Service and Reclamation Division, VA Supply Depot, Hines, Ill. In addition, the contractor agrees to furnish two copies of the technical documentation required by VA Specification X-1711 with each piece or equipment sold as a result of the invitation for bid or request for proposal.

§ 8-7.150-25 Guarantee clause.

(a) When the bid or proposal will result in any purchase, the following clause will be used:

Guarantee. The contractor guarantees the equipment against defective material, workmanship and performance for a period of ———, said guarantee to run from date of acceptance of the equipment by the Government. The contractor agrees to furnish, without cost to the Government, replacement of all parts and material which are found to be defective during the guarantee period. Replacement of material and parts will be furnished to the Government at the point of installation, if installation is within the continental United States, or f.o.b. the continental U.S. port to be designated by the purchasing officer if installation is outside of the continental United States. Cost of installation of replacement material and parts shall be borne by the contractor.¹

¹Normally, insert 1 year. If industry policy covers a shorter or longer period, i.e., 90 days or for the life of the equipment, insert such period.

²The above clause will be modified to conform to standards of the industry involved.

(b) Where it is industry policy to furnish, but not install, replacement material and parts at the contractor's expense, the last sentence will be changed to indicate that cost of installation shall be borne by the Government. Where it is industry policy to (1) guarantee components for the life of the equipment (i.e., crystals in transmitters and receivers in radio communications systems) or (2) require that highly technical equipment be returned to the factory (at contractor's or Government's expense) for replacement of defective materials or parts, the clause used will be compatible with such policy.

4. In § 8-7.600, paragraph (c) is revised to read as follows:

§ 8-7.600 Scope of subpart.

(c) Clauses inconsistent with those contained in FPR 1-7.6 and this subpart, but considered essential to the procurement of Veterans Administration requirements, shall not be used unless the deviation procedure set forth in § 8-1.109-2 has been complied with.

5. Section 8-7.650-3 is revised to read as follows:

§ 8-7.650-3 Work to be executed by contractor's forces.

(a) The contractor shall execute on the site, with his/her forces (exclusive of executive, supervisory and clerical forces), actual contract construction work equivalent to not less than — percent of the contract award price.

(b) Construction work shall consist of contract work accomplished on the site by laborers, mechanics, and foremen/forewomen on the Contractor's payroll and under his/her direct supervision. Cost of material and equipment installed by such labor may be included in the above percent of work required to be performed by the Contractor.

(c) The Contractor shall submit, simultaneously with schedule of costs required by Payment to Contractor provision of the General Conditions of these specifications, a statement designating the branch or branches of contract work to be performed with his/her forces. The approved schedule of costs will be used in determining value of a branch or branches, or portions thereof, of the work for the purpose of this article.

(d) If, during the progress of work hereunder, the contractor requests a change in the branch or branches of the work to be performed by his/her forces and the Contract-

³The Contracting Officer shall insert one of the following: Thirty percent for boiler replacements and piping, new or replacement elevators, emergency generators and wiring, water tanks and towers; 20 percent for water tanks where piping alterations are required and for new buildings with reinforced concrete frames; all other types of construction, 15 percent.

ing Officer determines it to be in the best interests of the Government, the Contracting Officer may, at his/her discretion, authorize a change in such branch or branches of said work. Nothing contained herein shall permit a reduction in the percentage of work to be performed by the contractor with his/her forces, it being expressly understood that this is a contract requirement without right or privilege of reduction.

(e) In the event the contractor fails or refuses to meet the requirement of paragraph (a) of his section, it is expressly agreed that the contract price will be reduced by 15 percent of the value of that portion of the percentage requirement which is accomplished by others. For the purposes of this provision, it is agreed that 15 percent is an acceptable estimate of the Contractor's overhead and profit, or mark-up, on that portion of the work which the Contractor fails or refuses to perform, with his/her own forces, in accordance with paragraph (a) of this section.

6. In § 8-7.650-5, paragraph (c) of the clause is revised to read as follows:

§ 8-7.650-5 Inspection and acceptance.

Clause 10, General Provisions, SF 23A is supplemented as follows:

(c) Final inspection will not be made until the contract work is ready for beneficial use or occupancy. The Contractor shall notify the Contracting Officer, through the Resident Engineer, fifteen (15) days prior to the date on which the work will be ready for final inspection. Should it develop that the work installed does not justify such inspection at that time, or that the character of material or workmanship is such that reinspection is found necessary, the cost of such reinspection including salary of the inspector(s), his/her traveling and other expenses, shall be borne by the Contractor and will be deducted from any money due him/her on the applicable contract.

7. Section 8-7.650-6 is revised to read as follows:

§ 8-7.650-6 Guaranty.

GUARANTY

(a) Unless otherwise specifically provided for in the contract or specifications, the Contractor, notwithstanding any final inspection, acceptance or payment, guarantees that all work performed and materials and equipment furnished under this contract are in accordance with the contract requirements. The Contractor also guarantees that when installed all materials and equipment were free from defects and will remain so for a period of at least 1 year from the date of acceptance by the Government.

(b) If defects of any kind should develop during the period such guaranties are in force, the Contracting Officer shall immediately notify the Contractor in writing of such defects. The Government thereupon shall have the right, by a written notice to that effect, to require the Contractor to repair or replace all inferior or defective work, material, or equipment or permit it to remain in place and assess the Contractor the costs he/she (the Contractor) would have incurred had he/she been required to effect repair or replacement.

(c) Any correction or replacement of parts, materials, equipment, supplies or con-

struction made pursuant to the provisions of this clause shall also be subject to the provisions of this clause to the same extent as parts, materials, equipment, supplies or construction originally installed. The warranty with respect to such new or corrected parts, materials, equipment, supplies or construction shall be equal in duration as that set forth in (a) above and shall run from the date that such parts, materials, equipment, supplies or construction are replaced or corrected and accepted by the Government.

(d) The Contractor guarantees to reimburse the Government for, or to repair or replace, any damages to the site, buildings, or contents thereof that is caused by inferior or defective workmanship, or the use of inferior or defective materials or equipment in the performance of this contract. The Contracting Officer shall immediately notify the Contractor in writing when such damage occurs. The Government shall have the right to require the Contractor to repair or replace such damaged areas or equipment, or elect to permit such damage to remain as is and assess the Contractor the costs he/she would have incurred had he/she been required to effect repair or replacement.

(e) Should the Contractor fail to proceed promptly, after notification by the Contracting Officer, to repair or replace any inferior or defective work, material, or equipment, or damage to the site, buildings, or contents thereof, caused by inferior or defective work, or the use of inferior or defective materials, or equipment, the Government may have such work, material, equipment, or damage repaired or replaced and charge all costs incident thereto to the Contractor.

(f) Any special guaranties that may be required under the contract, shall be subject to the elections set forth above unless otherwise provided in such special guaranties.

(g) The decision of the Contracting Officer as to liability of the Contractor under this clause is subject to the appeal procedures provided for in the "Disputes clause of this Contract."

8. Section 8-7.650-8 is revised to read as follows:

§ 8-7.650-8 Reference to "Standards".

(a) Any materials, equipment, or workmanship specified by references to number, symbol, or title of any specific Federal, Industry or Government Agency Standard Specification shall comply with all applicable provisions of such standard specifications, except as limited to type, class or grade, or modified in contract specifications. Reference to "Standards" referred to in the contract specifications, except as modified, shall have full force and effect as though printed in detail in specifications.

(b) Federal Specification numbers refer to specifications issued by General Services Administration. Such specifications may be seen at the Office of Construction, Veterans' Administration, Washington, D.C. or at the office of the Resident Engineer for this project. An Index to the Specifications may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington,

D.C. 20402. Single copies of specifications may be obtained without charge for bidding purposes, from any GSA Business Service Center provided a copy of the Invitation for Bids is furnished. Multiple copies may be purchased only from GSA Specifications Branch, Building 197, Washington, Navy Yard, Washington, D.C. 20407.

9. In § 8-7.650-9, paragraph (c) of the clause is revised to read as follows:

§ 8-7.650-9 Government supervision.

(c) Within the limits of any specific authority delegated by the Contracting Officer, the Resident Engineer may by written direction make changes in the work. The Contractor shall be advised of the extent of such authority.

10. Section 8-7.650-10 is revised to read as follows:

§ 8-7.650-10 Daily report of workers and material.

The Contractor shall furnish to the Resident Engineer each day a consolidated report for the preceding work day in which is shown the number of laborers, mechanics, foremen/forewomen and pieces of heavy equipment used or employed by the contractor and subcontractors. The report shall bear the name of the firm, the branch of work which they perform such as concrete, plastering, masonry, plumbing, sheet metal work, etc. Report shall give breakdown of employees by crafts, location where employed, and work performed. The report shall also list materials delivered to the site on the date covered by the report.

11. In § 8-7.650-12, Paragraphs (b) and (c) of the clause are revised to read as follows:

§ 8-7.650-12 Subcontracts and work coordination.

The following clause is for use except as provided in § 8-7.650-13.

SUBCONTRACTS AND WORK COORDINATION

(b) The Contractor shall be responsible to the Government for acts and omissions of his/her own employees, and of the subcontractors and their employees. The Contractor shall also be responsible for coordination of the work of the trades, subcontractors, and material suppliers.

(c) The Government or its representatives will not undertake to settle any differences between the Contractor and subcontractors or between subcontractors.

12. Section 8-7.650-13 is revised to read as follows:

§ 8-7.650-13 Work coordination (alternate provision).

For new construction work with complex mechanical-electrical work, the following provision relating to work coordination may be substituted for paragraph (b) of the clause set forth in § 8-7.650-12:

The Contractor shall be responsible to the Government for acts and omissions of his/her own employees, and subcontractors and their employees. The Contractor shall also be responsible for coordination of the work of the trades, subcontractors, and material suppliers. The Contractor shall, in advance or the work, prepare coordination drawings showing the location of openings through slabs, the pipe sleeves and hanger inserts, as well as the location and elevation of utility lines, including, but not limited to, conveyor systems, pneumatic tubes, ducts, and conduits and pipes 2 inches and larger in diameter. These drawings, including plans, elevations, and sections as appropriate shall clearly show the manner in which the utilities fit into the available space and relate to each other and to existing building elements. Drawings shall be of appropriate scale to satisfy the previously stated purposes, but not smaller than 1/4-inch scale. Drawings may be composite (with distinctive colors for the various trades) or may be separate but fully coordinated drawings (such as sepias or photographic paper reproductions) of the same scale. Separate drawings shall depict identical building areas or sections and shall be capable of being overlaid in any combination. The submitted drawings for a given area of the project shall show the work of all trades which will be involved in that particular area. Six complete composite drawings or six complete sets of separate reproducible drawings shall be received by the Government not less than 20 days prior to the scheduled start of the work in the area illustrated by the drawings, for the purpose of showing the Contractor's planned method of installation. The objectives of such drawings are to promote carefully planned work sequence and proper trade coordination, in order to assure the expeditious solutions of problems and the installation of lines and equipment as contemplated by the contract documents while avoiding or minimizing additional costs to the Contractor and to the Government. In the event the Contractor, in coordinating the various installations and in planning the method of installation, finds a conflict in location or elevation of any of the utilities with themselves, with structural items or with other construction items, he/she shall bring this conflict to the attention of the Contracting Officer immediately. In doing so, the Contractor shall explain the proposed method of solving the problem or shall request instructions as to how to proceed if adjustments beyond those of usual trades coordination are necessary. Utilities installation work will not proceed in any area prior to the submission and completion of the Government review of the coordinated drawings for that area, nor in any area in which conflicts are disclosed by the coordination drawings until the conflicts have been corrected to the satisfaction of the Contracting Officer. It is the responsibility of the Contractor to submit the required drawings in a timely manner consistent with the requirement to complete the work covered by this contract within the prescribed contract time.

13. In § 8-7.650-14(a), paragraph (a)(2) of the clause is revised to read as follows:

§ 8-7.650-14 Payments to contractors.

(a) For contracts that do not contain a section entitled "Network Analysis Systems (NAS), Clause 7, General Provisions, SF 23A," will be implemented as follows:

PAYMENTS TO CONTRACTORS

Clause 7, General Provisions, SF 23A, is implemented as follows:

(a) * * *

(2) Costs as shown by this schedule must be true costs and, should the resident engineer so desire he/she may require the contractor to submit the original estimate sheets or other information to substantiate detail makeup of schedule.

[FR Doc. 78-14202 Filed 5-22-78; 8:45 am]

[3510-20]

CHAPTER 13—DEPARTMENT OF COMMERCE

PROCUREMENT REGULATIONS; FINAL RULES

AGENCY: Department of Commerce.

ACTION: Final regulations.

SUMMARY: These regulations contain portions of Commerce procurement policies and procedures which implement and supplement the Federal Procurement Regulations in the areas of: (a) general information and requirements, (b) special evaluation procedures for particular negotiated procurements, (c) procurement support for acquisitions of major systems, and (d) submission, receipt, handling and evaluation of unsolicited proposals. These initial issuances are part of a continuing Department of Commerce effort to update, codify and publish its procurement regulations and to provide uniformity with the Federal Procurement Regulatory system.

This material is intended to extend, to all interested parties, an understanding of the Department's procedures and methods of procuring goods and services and to provide contractors and potential contractors with a reference to and an understanding of Commerce procedures for entering into contracts, authorities of procurement and other officials and the full extent of and rationale for many contract requirements and provisions.

EFFECTIVE DATE: May 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles Carter, Procurement Analyst, Office of Administrative Ser-

vices and Procurement, U.S. Department of Commerce, Washington, D.C. 20230; 202-377-3891.

SUPPLEMENTARY INFORMATION: Part 13-1 of these regulations sets forth general policies and procedures of the Department to implement subparts 1-1.0 through 1-1.3 of the Federal Procurement Regulations (FPR), Title 41, CFR Chapter 1, Part 1-1, as well as portions of Subpart 1-1.4, relative to responsibilities of personnel other than those directly involved in the procurement process. This issuance of Part 1 also replaces all of the existing Part 13-1 regulations now contained in Title 41, CFR Chapter 13.

The material in Part 13-3 of these regulations provides for use of a system for proposal evaluation by a special board under certain competitive negotiated procurements. Part 13-4 of these regulations sets forth the Department's procedures concerning unsolicited proposals, implementing Title 41, CFR Subpart 1-4.9, and provides Commerce procedures for acquisitions of major systems, implementing Office of Management and Budget (OMB) Circular A-109.

All of these regulations supplement and/or implement Federal Procurement Regulations (FPR) (Title 41, CFR Chapter 1) or OMB Circulars concerning procurement activities. Since the implemented portions of both the FPR and OMB Circulars were published for comment in the FEDERAL REGISTER, it has been determined that no further purpose would be served in publishing these regulations as proposed rules for comment.

Chapter 13 of Title 41 CFR is amended by revising Part 13-1 and by adding new Parts 13-3 and 13-4 to read as follows:

PART 13-1 GENERAL

Sec.
13-1.000 Scope of part.

Subpart 13-1.0—Regulation System

13-1.001 Scope of subpart.
13-1.002 Purposes.
13-1.003 Authority.
13-1.004 Applicability.
13-1.004-50 Relationship to the FPR.
13-1.006 Issuance.
13-1.006-1 Code Arrangement.
13-1.006-2 Publication.
13-1.006-3 Copies.
13-1.006-4 Coordination.
13-1.007 Arrangement.
13-1.007-1 General plan.
13-1.007-2 Numbering.
13-1.007-3 Citation.
13-1.008 Agency implementation.
13-1.008-50 Particular regulatory requirements of operating units or Departmental offices.
13-1.009 Deviation.
13-1.009-2 Procedure.
13-1.009-3 Limitation on deviations.

Subpart 13-1.2—Definitions of Terms

Sec.
13-1.201 Definitions.
13-1.204 Head of the Agency.
13-1.205 Procuring Activity.
13-1.206 Head of the procuring activity.
13-1.250 Organizational elements.

Subpart 13-1.3—General Policies

13-1.302 Procurement sources.
13-1.302-3 Contracts between the Government and Government employees or business concerns substantially owned or controlled by Government employees.
13-1.305 Specifications.
13-1.305-3 Deviations from Federal Specifications.
13-1.306 Standards.
13-1.306-1 Mandatory use and application of Federal Standards.
13-1.313 Records of contract actions.
13-1.313-50 General procedures.
13-1.313-51 Exceptions.
13-1.317 Noncollusive bids and proposals.
13-1.317-50 Procedures.
13-1.318 Disputes clause.
13-1.318-1 Contracting Officer's decision under the disputes clause.
13-1.318-50 Coordination of proposed decisions.
13-1.318-51 Modification or withdrawal of decisions.
13-1.318-52 Appeals from contracting officer decisions.
13-1.327 Protection of the privacy of individuals.
13-1.327-5 Procedures.

Subpart 13-1.4—Procurement Responsibility and Authority

13-1.450 Responsibilities of other Government personnel.
13-1.450-1 General.
13-1.450-2 Planning for procurement.
13-1.450-3 Procurement planning reports.
13-1.450-4 Planning for major systems acquisitions.
13-1.450-5 Precontract support.
13-1.450-6 Postaward contract administration.

AUTHORITY: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary in Department Order 10-5.

§ 13-1.000 Scope of part.

This part contains information introducing and establishing the Department of Commerce Procurement Regulations (DOCPR) which, combined with the Federal Procurement Regulations (FPR), govern all procurement by the Department of Commerce or any of its organizational elements. The materials contained in this and later parts supplement, implement and provide procedures for supplementation and implementation of, as well as deviation from the FPR.

Subpart 13-1.0—Regulation System

§ 13-1.001 Scope of subpart.

This subpart sets forth introductory information pertaining to the DOCPR. It explains the purpose of the DOCPR, the authority under which they are issued, their relationship to the FPR, applicability, method

of issuance, exclusions and arrangement. It also outlines procedures for implementing and supplementing the FPR and DOCPR and for deviating therefrom.

§ 13-1.002 Purpose.

The DOCPR, combined with the FPR, are hereby designated as the authorized regulations governing the procurement of personal property and nonpersonal services (including construction) and leasing of real property by the Department of Commerce or by any organizational unit thereof.

§ 13-1.003 Authority.

The DOCPR are prescribed by the Assistant Secretary for Administration under the authorities contained in 5 U.S.C. 301, 5 U.S.C. 552 and section 205(c), Federal Property and Administrative Services Act of 1949 as amended (40 U.S.C. 486(c)), as delegated by the Secretary in Department Organization Order 10-5.

§ 13-1.004 Applicability.

The FPR and DOCPR apply to all procurements, by every operating unit and any other organizational element of the Department of Commerce except where specific limited exception authority is provided to the Maritime Administration. This exception will only be exercised upon appropriate determination by the Assistant Secretary for Maritime Affairs or a properly designated delegate. A copy of each exception determination shall be forwarded to the Director, Office of Administrative Services and Procurement.

§ 13-1.004.50 Relationship to the FPR.

Material published in the DOCPR will not repeat, paraphrase, or otherwise restate the FPR except to the extent necessary to supplement, implement, or deviate therefrom.

§ 13-1.006 Issuance.

§ 13-1.006-1 Code arrangement.

Department of Commerce Procurement Regulations are issued in the Code of Federal Regulations as Chapter 13 of Title 41, Public Contracts and Property Management.

§ 13-1.006-2 Publication.

DOCPR, as deemed necessary by the Assistant Secretary for Administration for information to the general public, are published initially in the daily issue of the FEDERAL REGISTER and in final cumulated form in Title 41 of the Code of Federal Regulations. The above regulations, as well as additional DOCPR material of interest primarily for internal agency guidance, are printed in separate loose-leaf volume form for distribution to appropriate Department of Commerce organizations.

§ 13-1.006-3 Copies.

Copies of the DOCPR published in the FEDERAL REGISTER and the Code of Federal Regulations may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Upon request, copies of the DOCPR loose-leaf volume and amendments and additions thereto will be distributed to Departmental Procurement activities and other appropriate DOC organizational units, by the Internal Distribution Branch of the Office of Administrative Services and Procurement.

§ 13-1.006-4 Coordination.

(a) Comments and suggestions of interested Departmental procurement activities will be solicited where feasible during the development of DOCPR issuances. Comments and suggestions of others will be solicited only when and to the extent deemed appropriate by the Assistant Secretary for Administration.

(b) Where there is urgent or compelling need to issue regulations which precludes adherence to the procedures in paragraph (a) of this section, such regulations shall be issued as consecutively numbered Temporary Department of Commerce Procurement Regulations (TDOCPR) and distributed as appendices to the loose leaf DOCPR volumes. Each TDOCPR shall be effective for a period stated within the TDOCPR, which period shall not exceed six months from the date of issuance unless extended by the Assistant Secretary for Administration.

(c) If a temporary regulation, issued pursuant to paragraph (b) of this section, is intended for eventual permanent implementation, it shall be distributed for comments and suggestions in accordance with paragraph (a) of this section. Notices of temporary regulation implementation will be published in the FEDERAL REGISTER when the TDOCPR involves material revision to existing DOCPR content of significance to business concerns and others properly interested, and where otherwise deemed appropriate by the Assistant Secretary for Administration.

§ 13-1.007 Arrangement.**§ 13-1.007-1 General plan.**

The general plan, numbering system and nomenclature, used in the DOCPR conform with those of the Federal Procurement Regulations and FEDERAL REGISTER standards approved for the FPR.

§ 13-1.007-2 Numbering.

(a) This Chapter 13 has been allocated to the Department of Commerce for implementing, supplementing and deviating from Chapter 1 of Title 41 CFR.

(b) Where the DOCPR implements or deviates from a part, subpart, section, or subsection of the FPR, the DOCPR part, subpart, section, or subsection will be numbered and captioned to correspond to the part, subpart, section, or subsection of Chapter 1, of Title 41 CFR.

(c) Where the subject matter contained in a part, subpart, section, or subsection of FPR requires no further implementation, the DOCPR will contain no corresponding part, subpart, section, or subsection number and the subject matter as published in the FPR governs.

(d) DOCPR's which supplement the FPR will be assigned an appropriate number and title different from any assigned to an FPR.

§ 13-1.007-3 Citation.

DOCPR will be cited in accordance with FEDERAL REGISTER standards approved for the FPR. Thus this section, when referred to in sections of the DOCPR, should be cited as "§ 13-1.007-3 of this chapter." When this section is referred to formally in official documents, such as legal briefs, it should be cited as "41 CFR 13-1.007-3." Any section of DOCPR may be informally identified, for purposes of brevity, as DOCPR followed by the section number, i.e., "DOCPR 13-1.007-3."

§ 13-1.008 Agency implementation.

§ 13-1.008-50 Particular regulatory requirements of Operating Units or Departmental Offices.

DOCPR issuances may be requested by heads of operating units or Departmental offices to provide for their special regulatory requirements. Such requests shall be submitted to the Assistant Secretary for Administration for approval and issuance as appropriate.

§ 13-1.009 Deviation.

Deviations from the FPR and DOCPR shall be kept to a minimum and controlled as prescribed in this section.

§ 13-1.009-2 Procedure.

(a) Deviations in both individual cases and classes of cases must be authorized in advance by the Director, Office of Administrative Services and Procurement (OAS&P). Requests for such authorization may be initiated by the heads of operating units or by the heads of their procuring activities. Requests shall: Cite the specific parts of the FPR or DOCPR from which it is desired to deviate; provide a full description of the deviation; indicate the circumstances which will require use of the deviation; and give detailed reasons supporting the action requested.

(b) Where the deviation applies to a class of cases, authorization will be

subject to prior coordination with the General Services Administration by the Office of Administrative Services and Procurement unless, in the considered judgment of the Director, OAS&P, and with due regard to the objective of uniformity, circumstances preclude such coordination. In such an instance, the Office of Administrative Services and Procurement shall inform the GSA of the deviation and circumstances under which it was required.

(c) Authorization will be by memorandum addressed to the requesting officer with copies to any other interested offices. The contract file(s) of the requesting office shall include a copy of the request and approval. Class deviations will be issued as a part of DOCPR, if they are of a continuing nature and publication is deemed appropriate by the Assistant Secretary for Administration.

§ 13-1.009-3 Limitations on deviation.

Deviations concerning Automated Data Processing procurement shall be processed according to the procedures in paragraphs (a) through (c) of § 13-1.009-2 except that the Director, Office of Automatic Data Processing Management (OADPM) shall be the authorizing and coordinating authority in lieu of the Director, OAS&P in paragraphs (a) and (b) of § 13-1.009-2.

Subpart 13-1.2—Definitions of Terms**§ 13-1.201 Definitions.**

For the purposes of this chapter, and unless otherwise indicated, the following terms have the meanings set forth in this subpart.

§ 13-1.204 Head of the agency.

"Head of the agency" means the Assistant Secretary for Administration, unless otherwise indicated in a specific section of this Chapter 13.

§ 13-1.205 Procuring activity.

"Department of Commerce Procuring Activity" means that organizational element or associated elements of an operating unit or Department office to which procurement authority and responsibility has been delegated.

§ 13-1.206 Head of the procuring activity.

"Head of the procuring activity" means the head of an operating unit or Departmental office which has been delegated procurement authority by the Assistant Secretary for Administration or that deputy, assistant or associate head of the operating unit or Departmental office to whom procurement authority is in turn delegated together with assignment of responsibility for direction and management of the procuring activity. Authorities and responsibilities of the head of the procuring activity shall not be redelegated.

§ 13-1.250 Organizational elements.

The definitions of various Departmental organizational elements as contained in the Department's Organizational Order series shall apply to Departmental organizational elements referred to in Chapter 13 (DOCPR).

Subpart 13-1.3—General Policies**§ 13-1.302 Procurement sources.**

§ 13-1.302-3 Contracts between the Government and Government employees or business concerns substantially owned or controlled by Government employees.

When a requisitioning office becomes aware that a suggested procurement source is either a Government employee(s) or a business or organization substantially owned by a Government employee(s), or the spouse or immediate family of a Government employee(s) the appropriate procurement office shall be immediately notified and shall seek alternative sources. If no alternative sources can be located, the requisitioning office shall prepare a written justification to clearly support a contracting officer decision to procure from the Government employee source and to provide for actions, where possible, to prevent future related procurements from employee sources. Approvals shall be obtained from the head of the operating unit or Departmental office responsible for the requisitioning office and from the Assistant Secretary for Administration or designee prior to any procurement award to a Government employee source.

§ 13-1.305 Specifications.

§ 13-1.305-3 Deviations from Federal specifications.

The head of each procuring activity shall be responsible to ensure that the requirements contained in 41 CFR 1-1.305-3 are met and that the recommendations and notifications required therein are submitted to the General Services Administration.

§ 13-1.306 Standards.

§ 13-1.306-1 Mandatory use and application of Federal standards.

Justifications and requests for exceptions from mandatory use of Federal standards as required by 41 CFR 1-1.306-1 shall be submitted to the General Services Administration by the head of the procuring activity requiring the exception.

§ 13-1.313 Records of contract actions.**§ 13-1.313-50 General procedures.**

All Departmental procuring activities or organizational elements thereof shall maintain an official file for each contract issued, regardless of its dollar

value. Each such contract file must constitute an independent record, documented to provide a complete chronology of all contract related actions, including sufficient data to explain and support the rationale, judgments and authorities upon which each decision or action was predicated.

§ 13-1.313-51 Exceptions.

Procurements which are valued at less than \$10,000 and made pursuant to small purchase authorities as well as delivery orders and purchase orders, regardless of their value, which are issued against existing Government contracts and related documents, may be combined in categorically organized files according to the specific instructions of individual procuring activity heads.

§ 13-1.317 Noncollusive bids and proposals.**§ 13-1.317-50 Procedures.**

(a) The authority to make the determination described in paragraph (d) of the "Certificate of Independent Price Determination" (See 41 CFR 1-1.317(a)) shall vest in the heads of the individual procuring activities without authority to redelegate.

(b) Where a certification is suspected of being false or there is indication of collusion, the procuring activity shall collect and prepare documents and additional information in accordance with 41 CFR 1-1.902 and 1-1.903, and the head of the procuring activity shall transmit the matter to the Assistant Secretary for Administration. The Assistant Secretary for Administration shall have the matter referred to the Attorney General for appropriate action when, after coordination with the General Counsel or his designee, it is the Assistant Secretary's opinion that there is evidence of any violation of the antitrust laws.

§ 13-1.318 Disputes clause.

§ 13-1.318-1 Contracting officer's decision under the Disputes Clause.

Where a dispute cannot be settled by agreement and a decision under the Disputes Clause is necessary, the contracting officer will prepare a letter to the contractor containing written findings of fact and a final decision pursuant to the Disputes Clause of the contract. This decision document should:

- Identify the claim, including the date of submission and name and title of the submitter of the claim,
- Set forth the contracting officer's decision and related findings of fact in sufficient detail to enable the contractor to understand both the decision and the basis therefor,
- Reference the disputes clause as the authority for the decision,
- Include the paragraph contained in 41 CFR 1-1.318-1, and

(e) Cite the Department's rules for contractor appeals from decisions of contracting officers (Title 15 CFR Part 3).

§ 13-1.318-50 Coordination of proposed decisions.

As required by internal directives, contracting officers shall refer proposed final decisions made under disputes clauses to the head of the procuring activity and to appropriate legal counsel for clearance before forwarding them to contractors.

§ 13-1.318-51 Modifications or withdrawal of decisions.

After issuing the final decision, but prior to the contractor filing a timely notice of appeal, the contracting officer and the contractor may continue to seek agreement and the contracting officer may modify or withdraw his final decision pursuant to such agreement. Such withdrawal or modification shall be set forth in a written document, with modifications in the form described in § 13-1.318-1 and coordinated as prescribed in § 13-1.318-50.

§ 13-1.318-52 Appeals from contracting officer decisions.

Rules of procedure for handling contract appeals from decisions of Department of Commerce Contracting officers are published as Part 3 of Title 15 of the Code of Federal Regulations.

§ 13-1.327 Protection of the privacy of individuals.**§ 13-1.327-5 Procedures.**

The following notice shall be included in every solicitation and resulting contract and in every contract awarded without a solicitation in which the clause titled "Privacy Act" as contained in 41 CFR 1-1.327-5(c) is incorporated:

NOTICE OF DEPARTMENT OF COMMERCE'S PRIVACY ACT POLICIES

With reference to the contractor's compliance with requirements set forth under paragraph (a)(1) of the Privacy Act clause, the contractor is hereby notified that the Department's Privacy Act policies and procedures are contained in Title 15, CFR, Part 4b. All applicable inquiries are to be directed to the appropriate Privacy Officer as required by 15 CFR 4b.3.

Subpart 13-1.4—Procurement Responsibility and Authority**§ 13-1.450 Responsibilities of other Government personnel.****§ 13-1.450-1 General.**

(a) Responsibilities for preparing procurement item descriptions, specifications and work statements and for determining delivery requirements and fund availability or restraints rest with the program office or requisition-

ing activity. Responsibilities for determining the method of procurement, type of contract, conduct of the procurement process, suitability of prices and execution of required contract documents rest with the procurement activity, the contracting officer in particular.

(b) Personnel responsible for requisitioning should maintain a close and continuous relationship with their supporting procurement activity to ensure that appropriate procurement personnel are made aware of contemplated procurement actions or possible complications far ahead of the actual contracting phase of procurement. This will be mutually beneficial in terms of better program and procurement planning as well as providing for more timely, efficient and economical acquisitions.

(c) Personnel not delegated contracting authority may not commit the Department, formally or informally, to any type of contractual obligation either before or after contract award. However, all personnel who require procurement support in accomplishing their missions or assignments must support the procuring activity and the Contracting Officer in ensuring that (1) requirements are clearly defined and specified; (2) competitive sources are solicited, evaluated and selected; (3) quality standards are prescribed and met; (4) performance or delivery is timely; (5) prices, estimated costs and fees are reasonable; (6) contract provisions, procurement regulations and applicable laws are complied with; and (7) files are sufficiently documented to substantiate the judgments, decisions and actions taken.

(d) Varying degrees of cooperation, communication and planning are necessary commensurate with the dollar value, complexity, legal and regulatory environment or other factors incident to each particular contemplated procurement. Planning and reporting requirements contained in this and later sections of the DOCPR are general requirements and are by no means all inclusive. All those involved in a procurement must be careful to assure adequate coordination among the procurement, the requisitioning and any other affected organizations.

§ 13-1.450-2 Planning for procurement.

(a) All program and project planning shall include plans for procurement of anticipated supply, equipment or service requirements.

(b) Where funds of another Government Agency are provided or are to be provided under the Economy Act or other appropriate authority, programs undertaken by any Commerce activity and requiring procurement actions shall be coordinated with the appropriate procurement offices prior to any commitment to accept the requisitioning agency or sponsoring agency deadlines.

(c) Program and project managers should solicit the advice and assistance of procurement personnel in developing the procurement element of the program and project plans so that the following factors can be considered early in the planning process.

(1) Definitions of requirements in terms of specifications or work statements for use in invitations for bids, requests for proposals, and contract provisions.

(2) Development of "in-house" estimates for cost of property or services to be procured, and identification of appropriated funds available for the contract.

(3) Identification of factors which require special consideration, including but not limited to; source evaluation criteria; providing facilities and equipment; quality control; product qualification testing and acceptance; patents and copyright reporting requirements; and other approvals or clearances (e.g., Security or Personnel clearances).

(4) Development of lead-time necessary to complete the procurement process, i.e., prepare and process the purchase request, prepare and process any necessary determination and findings, locate and evaluate sources, receive and evaluate bids or proposals, conduct preaward audits, conduct preaward surveys or conferences, and negotiate and/or award the contract or contracts.

(d) It is incumbent upon initiators of procurement requirements to obtain timely approvals from higher authority whenever such approvals are required by regulations of this Department or other Government agencies; e.g., procurement of data processing resources; procurement of management consultant services; clearances by Office of Management and Budget; Government Printing Office, Treasury Department, General Services Administration, etc. However, Agency Procurement Requests (APR's) required to be sent to GSA under 41 CFR 1-4.1104 for ADP procurements will be processed by the Departmental Office of Automatic Data Processing Management as required by DAO 212-1.

§ 13-1.450-3 Procurement planning reports.

(a) In order to assure continually effective, economical and timely procurement throughout the Department, each operating unit and/or Departmental office shall report procurement plans as indicated in the following paragraphs:

(1) *General Office Supply and Equipment Requirements.* At least 90 days prior to the beginning of each fiscal year, an itemized listing of general office supplies, equipment and

furnishings required for the ensuing fiscal year shall be submitted to the appropriate procurement office for planning purposes. Required items which are normally available through GSA Supply Stores or by requisition through any other established Government supply system need not be reported. The listings shall include total quantities, required delivery dates and respective delivery quantities if multiple deliveries are required. Each item shall be described in general terms and brand names, makes and/or model names or numbers shall be avoided wherever possible.

(2) *Specialized, Supply, Equipment, Furniture and Service Requirements.* At least six months prior to the beginning of each fiscal year an itemized listing of anticipated specialized supply, equipment, furniture and service requirements shall be submitted to the appropriate procurement office for planning purposes. The listing shall include estimated total quantities or efforts and anticipated required delivery dates. Each item listed shall be described in synopsis form sufficient for publicizing in the *Commerce Business Daily*. (See S 1-1.1003-1.)

(3) Heads of affected procuring activities may waive the reporting requirements contained in this Section for specific procurements or for specified classes of procurements where unusually short procurement lead-time or other extraordinary circumstances exist.

(4) Except where reporting requirements have been waived in accordance with paragraph (a)(3) of this section, requisitions containing procurement needs which are additional to those listed in the procurement plans submitted under the requirements of paragraphs (a) (1) and (2) of this section shall be accompanied by narrative justification explaining why those needs were not or could not have been included in the procurement plans. Such requests shall be submitted to the appropriate procurement office through an official designated by the head of the departmental office or operating unit.

(b) Each departmental office and/or operating unit should develop and issue implementing procedures to provide for collection of procurement planning data from all subordinate organizations in order to accommodate timely submission of the required reports.

§ 13-1.450-4 Planning for major systems acquisitions.

(a) Upon approval of a mission need by the Secretary (See DAO 208-3 and OMB Circular A-109) the Department's Acquisition Executive shall designate the procurement office which will provide procurement support throughout all phases of that major

systems acquisition process. (See DOC PR 13-4.50.)

(b) Upon notification of the designation of a supporting procurement office, the program manager shall, within 60 days, contact that procurement office for assistance in developing an overall procurement plan to be submitted to the acquisition executive for approval. The overall procurement plan shall include a schedule for completion of at least each of the following functions for each of the major systems acquisition procurement phases (i.e. exploration of alternative systems, competitive demonstrations, full-scale development and production):

(1) Development of a solicitation in terms of mission need.

(2) Advance publicity for the initial, exploration phase.

(3) Issuance of Requests for Proposals (RFP's).

(4) Closing dates for RFP's.

(5) Evaluation and award.

(c) All changes in the overall procurement plan shall be submitted by the program manager to the acquisition executive along with a narrative explanation of the necessity for each change.

§ 13-1.450-5 Precontract support.

After submission of the requirement to the procurement activity, program personnel must continue to support the procurement process by providing advice and assistance to the contracting officer in activities such as:

(a) Formulation of procurement schedules.

(b) Conduct of presolicitation or prebid/preproposal briefings of prospective contractors.

(c) Conduct of preaward surveys to determine contractor responsibility.

(d) Evaluation of technical and business proposals submitted by contractors, including requests for Government-furnished facilities and equipment.

(e) Development or evaluation and documentation of plans, procedures, and contract provisions relating to quality control, inspection, test data, patent data and acceptance of products or services.

(f) Establishment of contract requirements concerning packing, packaging, marking, inspection, point of acceptance, and shipment of products.

§ 13-1.450-6 Postaward contract administration.

(a) Upon execution of the contract by the contracting officer and the contractor, the mutual obligations of the Government and the contractor are established by and limited to the written stipulations in the contract instrument. Unless authorized by the contracting officer, program or technical personnel shall not direct or request

the contractor to assume any obligation or take any action not specifically stated in the contract. Only the contracting officer may impose on the contractor any requirement which will result in a change to the contract. All contract changes must be directed in writing or confirmed in writing by the contracting officer.

(b) The role of program, technical, and other personnel in postaward administration of the contract is to assist or advise the contracting officer (or act as his representative when so designated by the contracting officer) in activities such as:

(1) Conduct of conferences to ensure mutual understanding between the Government and the contractor as to the scope of the contract, technical and business requirements, and the rights and obligations of the parties.

(2) Technical liaison during contract performance and matters relating to product delivery, acceptance, or rejection.

(3) Evaluation of contractor performance, evaluation of reports and data, subcontract management, utilization of facilities and equipment, cost control, etc.

(4) Contractor systems and procedures evaluation; including accounting policies and procedures, purchasing policy and practices, property accounting and control, wage and salary plans and rate structures, personnel policies and practices, etc.

(5) Modification, renewal, or termination of the contract.

(6) Processing of final decisions under the disputes clause and appeals therefrom.

PART 13-3—PROCUREMENT BY NEGOTIATION

Subpart 13-3.8—Price Negotiation Policies and Techniques

Sec. 13-3.805-50 Evaluation procedures—Use of the Source Selection Advisory Boards System.

Subpart 13-3.8—Price Negotiation Policies and Techniques

§ 13-3.805-50 Evaluation procedures—Use of the Source Selection Advisory Boards System.

(a) The Source Selection Advisory Boards System (SSABS) shall be used by all operating units and Departmental offices for evaluating competitive negotiated procurement proposals when:

(1) The estimated value of the procurement is expected to exceed \$1,000,000 or,

(2) The estimated value of the immediate procurement is expected to be less than \$1,000,000, but continuing related procurements are foreseeable

and the cumulative total may exceed \$1,000,000 or,

(3) The estimated value of the procurement is not expected to exceed \$1,000,000 but the head of the requisitioning office or activity, either independently or at the request of the contracting officer, determines in writing that SSABS processing is desirable and would be cost effective. Such written determinations shall be forwarded to the cognizant contracting officer for inclusion in the official procurement file.

(b) Procurements which are formally advertised or noncompetitively negotiated and procurements for Architect-Engineer Services are specifically excluded from consideration for SSABS Action.

(c) The detailed operating procedures for Source Selection Advisory Boards Systems are contained in Department Administrative Order DAO 208-15 and in the specific implementing instructions of each Departmental office or operating unit.

(Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary in Department Order 10-5)

PART 13-4—SPECIAL TYPES AND METHODS OF PROCUREMENT

Subpart 13-4.9—Unsolicited Proposals

Sec. 13-4.900 Scope of subpart.
13-4.902 Policy.
13-4.903 Agency program direction and operation.
13-4.905 Advance guidance.
13-4.908 Agency points of contact.
13-4.909 Receipt, review and evaluation.
13-4.910 Method of procurement.

Subpart 13-4.50—Procurement Support for Major Systems Acquisition

13-4.5001 General.
13-4.5002 Major systems acquisition procurement phases.
13-4.5002-1 Procurement of alternative systems designs.
13-4.5002-2 Procurement of competitive systems demonstrations.
13-4.5002-3 Contracting for full scale development of a major system.
13-4.5002-4 Contracting for production of additional identical systems.

AUTHORITY.—Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary in Department Order 10-5.

Subpart 13-4.9—Unsolicited Proposals.

§ 13-4.900 Scope of subpart.

This subpart implements 41 CFR Subpart 1-4.9 and provides Departmental policies and procedures concerning submission, receipt, handling, evaluation and making acquisition decisions concerning unsolicited proposals.

§ 13-4.902 Policy.

It is the policy of the Department to invite public interest in its various missions and to encourage submission of innovative ideas and suggestions which will help to improve or enhance any of the Department's activities.

§ 13-4.903 Agency program direction and operation.

Each operating unit and Departmental office should develop policies, procedures and guidelines sufficient to assure implementation of the provisions in this subpart and in 41 CFR Subpart 1-4.9.

§ 13-4.905 Advance guidance.

(a) All Departmental employees should be instructed to welcome and encourage inquiries relative to the Department's missions, needs and methods of operation and to refer inquiries to the program or technical offices concerned with the subject matter of an inquiry. Any inquiry which indicates the possibility of or may lead to procurement action shall be promptly directed to the head of the procuring activity for processing coordination. Employees should be further instructed: (1) to advise inquirers not to submit proposals before communicating with the appropriate control point (see § 13-4.908) and; (2) to immediately forward all unsolicited proposals received to the appropriate control points.

(b) Control Point Officials shall provide a properly completed Department Form CD-330 (Instructions for Submission of Unsolicited Proposals),¹ along with a copy of the publication, *How to Sell to the Department of Commerce* and any additional material prescribed by their operating unit or Departmental office to each inquirer whose inquiry may result in submission of an unsolicited proposal.

§ 13-4.908 Agency points of contact.

Heads of Procuring Activities or their designees shall serve as control points for coordination, receipt and handling of unsolicited proposals. The Deputy Director for Program Development, Office of Administrative Services and Procurement is the control point for unsolicited proposals which are of interest to a Departmental office or operating unit that does not have an internal procuring activity and for proposals which are of interest to more than one Departmental office or operating unit.

§ 13-4.909 Receipt, review and evaluation.

(a) Control Point Officials shall acknowledge receipt of unsolicited pro-

¹The Department form CD-330 will not be published as a part of these regulations. However, the original form is on file with the original of this document in the Office of the Federal Register.

posals within ten (10) working days by a letter using the following format:

DEAR _____:

This is to acknowledge receipt of your unsolicited proposal dated _____, and to advise you of the policies of the Department of Commerce for treatment of unsolicited proposals.

The Department encourages submission of ideas, concepts or suggestions which may apply to any Commerce activity. Such submissions often help us to accomplish our various missions more efficiently or effectively.

When ideas are truly original or unique and germane to the missions of the Department, they may cause the Department to enter into a contractual relationship with the submitter. In other cases, where proposals do not contain proprietary information and the Department decides to implement the suggestions contained therein, the Department is free to enter into any resultant contracts by means of normal competitive procurement processes. The Department's acceptance of an unsolicited proposal for evaluation purposes does not imply a promise to pay, a recognition of novelty or originality, nor a promise to restrict the use of information to which the Government would otherwise be entitled.

If your proposal contains information which you or your organization wishes to be used only for evaluation and not disclosed for other purposes, you must specifically identify such data by including the following legend on the title page and by marking each sheet containing restricted data with the legend contained in parentheses below:

USE AND DISCLOSURE OF DATA

This data shall not be disclosed outside the Government and shall not be duplicated, used, or, disclosed in whole or in part for any purpose other than to evaluate the proposal: *Provided*, That if a contract is awarded to this offeror as a result of or in connection with the submission of this data, the Government shall have the right to duplicate, use, or disclose the data to the extent provided in the contract. This restriction does not limit the Government's right to use information contained in the data if it is obtainable from another source without restriction. The data subject to this restriction is contained in sheets _____. (Use or disclosure of proposal data is subject to the restriction on the title page of this Proposal.)

Proposals or parts thereof submitted without the appropriate restrictive legends prescribed above may be handled as if free of all restrictions. If your proposal contains a restrictive endorsement or notice other than the ones prescribed above, you must either correct such notice or remove the restricted material prior to any evaluations by the Department.

You are requested to acknowledge this letter and to indicate whether or not you wish your proposal to be evaluated. Pending a reply from you, your proposal will not be accepted for evaluation, but will be held in safekeeping.

Sincerely,

(b) Upon receipt of a response to the letter prescribed in paragraph (a) above, requesting evaluation, Control Point Officials shall review the proposal in accordance with 41 CFR 1-4.909(b) (1) and (2) and 1-4.913(b) and

shall coordinate processing and evaluation of the proposal in accordance with 41 CFR 1-4.909 (c), (d) and (e) and the following:

(1) The original and each copy of the unsolicited proposal shall be covered by a sheet of paper marked with the notice contained in 41 CFR 1-4.913 (c) (or as such notice is modified pursuant to circumstances described under 41 CFR 1-4.913 (d) or (e)), unless the offeror gives a clear written indication that no restrictions on the disclosure or use of the data contained in the proposal are desired.

(2) Within ten (10) working days after receipt of an unsolicited proposal which conforms to the requirements of this DOCPR Subpart, Control Point Officials shall forward a copy of the proposal along with a Department Form CD-331 (Instructions for Technical Evaluation of Unsolicited Proposals)² to the appropriate technical or program office for evaluation. If more than one Department activity may have interest in a particular proposal, copies of the proposal shall be circulated to each interested office.

(3) Program or technical offices receiving unsolicited proposals for evaluation shall conduct their evaluations in accordance with this DOCPR Subpart, 41 CFR Subpart 1-4.9, Department Form CD-331 (see paragraph (b)(2) of this section) and with any additional policies provided by the cognizant operating unit or Departmental office.

(4) Evaluations shall be completed and recommendations submitted to the Control Point Official within sixty (60) working days after receipt of a proposal for evaluation. All copies of the unsolicited proposal shall be returned to the Control Point Official with the completed evaluation recommendations.

(5) Unsolicited proposals and any material contained therein shall not be duplicated nor circulated outside of the evaluating office and shall be closely safeguarded to prevent disclosure of any restrictive data. Only Control Point Officials or their designees are permitted to duplicate unsolicited proposals and then only to facilitate evaluation by more than one technical entity or multiple evaluations within one technical entity.

§ 13-4.910 Method of procurement.

(a) Control Point Officials shall return all copies of unsolicited proposals not recommended for noncompetitive procurement action to the submitters along with reasons for the return in accordance with 41 CFR 1-4.910.

²The Department Form CD-331 will not be published as a part of these regulations. However, the original form is on file with the original of this document in the Office of the Federal Register.

(b) Unsolicited proposals which are acceptable and recommended for non-competitive procurement together with appropriate requisition documents shall be forwarded by Control Point Officials to an appropriate contracting office for procurement action. If multiple requests for procurement are received pursuant to evaluations of the same unsolicited proposal, procurement actions shall be combined wherever practicable.

Subpart 13-4.50—Procurement Support for Major Systems Acquisitions

§ 13-4.5001 General.

Basic management and program policies and procedures for acquisition of major systems are contained in OBM Circular A-109 and DAO 208-3. In addition, the Office of Federal Procurement Policy (OFPP) Pamphlet No. 1 contains further guidance for application of OMB Circular A-109 and DOCPR § 13-1.450-4 provides for reporting major systems procurement plans by program managers. Generally, the procurement guidelines contained in OFPP Pamphlet No. 1 dated August 1976, should be followed wherever practicable in the procurement phases of major systems acquisitions. This DOCPR Subpart shall serve to implement and supplement the above described document.

§ 13-4.5002 Major systems acquisition procurement phases.

There are four interdependent procurement phases to be performed in succession for acquisition of major systems. They are: (a) Alternative systems design procurement, (b) Procurement of competitive systems demonstrations, (c) Contracting for full scale development of the major system, and (d) Contracting for production of identical additional systems. Generally, traditional negotiated procurement practices and methods should be used in accomplishing each of the above procurement phases. However, the following subsections provide additional guidelines and procedures which shall be followed to enhance effective acquisitions of major systems.

§ 13-4.5002-1 Procurement of alternative systems designs.

(a) The initial procurement effort for acquisition of a major system is to solicit competitive proposals for developing alternative systems designs. Parallel short term contracts for development of systems designs shall be negotiated with and awarded to as many qualified offerors as funding restraints and other considerations permit.

(b) Each request for proposals (RFP) for alternative systems designs shall contain a provision indicating the possibility of future contingent pro-

curements and requiring the offeror's participation in the competitive demonstration procurement phase, if the offeror's proposal is determined to be acceptable to the major system acquisition effort. Following is a sample clause which will accommodate these requirements:

NOTICE OF REQUIREMENT TO PARTICIPATE IN LATER PROCUREMENT

This solicitation and resulting contracts represent the first procurement phase in an overall Major System Acquisition plan which may require future related procurements. Awards will be made to as many offerors, whose proposals are determined to be acceptable, as funding restraints and other program limitations or considerations may permit. Only those offerors who are awarded contracts pursuant to this solicitation will be eligible for later related procurements. Accordingly, the offeror, by accepting award under this solicitation, agrees to participate in a possible subsequent procurement for competitive, prototype or model system demonstrations.

§ 13-4.5002-2 Procurement of competitive systems demonstrations.

(a) Systems demonstration contracts shall be negotiated with as many alternative system design phase contractors, whose systems designs have been selected for demonstration, as available funding will permit.

(b) Each contract for competitive demonstration shall contain a provision requiring the contractor to:

(1) Submit a plan for the necessary plant and equipment to accomplish full-scale development and limited production of the demonstrated system. This plan may involve purchase or lease arrangements, teaming or subcontracting arrangements with companies which have the necessary plant facilities and equipment to develop and produce the system.

(2) Participate in the full-scale development procurement phase if the contractor's proposed system is selected for limited production development.

(3) Submit a proposal for full-scale development and initial production before the conclusion of the demonstration.

(c) Following is a sample clause which will accommodate the above requirements:

NOTICE OF REQUIREMENTS TO PROVIDE FULL-SCALE DEVELOPMENT CAPABILITIES AND TO PARTICIPATE IN LATER PROCUREMENT

This system design demonstration contract represents the second procurement phase in an overall Major System Acquisition plan which may require future related procurements. Accordingly, the contractor by accepting this contract agrees to participate in a possible later procurement of full-scale development and limited production of the contractor's demonstrated system. Further, the contractor agrees to submit upon beginning the demonstration under this contract, a plan for the necessary plant and equipment to accomplish full-scale development and limited production of the demon-

strated system. The contractor also agrees to submit, before conclusion of the demonstration, a final proposal including estimated cost data and delivery times for full-scale development, and initial production of the demonstrated system.

§ 13-4.5002-3 Contracting for full-scale development of a major system.

If the Secretary selects a system for full-scale development from among those demonstrated in the competitive demonstrations procurement phase, a contract shall be negotiated with the submitter of the selected demonstrated system for development and production of one system for test, evaluation and implementation.

§ 13-4.5002-4 Contracting for production of additional identical systems.

Following satisfactory test and evaluation results and reconfirmation of additional mission need and program objectives, the Secretary may authorize additional contracts for production of systems identical to the system procured in the full-scale development phase.

Dated: May 5, 1978.

Approved for issuance by:

ELSA A. PORTER,
Assistant Secretary for Administration,
U.S. Department of Commerce.

Title 46—Shipping

CHAPTER IV—FEDERAL MARITIME COMMISSION

[General Order 7; Docket No. 73-64]

PART 528—SELF-POLICING SYSTEMS

AGENCY: Federal Maritime Commission.

ACTION: Enlargement of time to seek reconsideration; denial of stay.

SUMMARY: Limited amount of additional time to seek reconsideration of the final rules in this proceeding (43 FR 18175; April 28, 1978) is necessary to allow overseas parties to confer with counsel and develop their views. Stay of effective date not necessary as sufficient time has been provided for compliance with rules.

DATE: Petitions for reconsideration to be filed by June 9, 1978.

FOR FURTHER INFORMATION CONTACT:

Francis C. Hurney, Secretary, Federal Maritime Commission, Room 11101, 1100 L Street NW., Washington, D.C. 20573, 202-523-5725.

SUPPLEMENTAL INFORMATION: Counsel for Associated North Atlantic

Freight Conferences, et al. has requested a 60-day enlargement of time to file petitions for reconsideration of the final rules in this proceeding and also for stay of the rules pending reconsideration. A certain extension of time to allow counsel to confer with overseas clients and to allow the carriers to meet and consider to what extent reconsideration of the rules should be sought seems appropriate. However, 60 days would appear excessive. Indeed, counsel for other conferences of carriers suggests an extension to June 9, 1978, would be sufficient. We agree. Time for filing petitions for reconsideration is so extended.

We are not persuaded that a stay is necessary or appropriate. The rules were served 2½ months prior to the July 1, 1978, effective date. Counsel claims this allows insufficient time for compliance because qualified neutral bodies will have to be contracted to perform the policing functions required by the new rules or existing contracts will have to be renegotiated. We note, however, that the conferences and associations seeking the stay already employ an experienced neutral body. It has not been shown why any renegotiation of contract would require more time than already provided. Accordingly, the petition for stay is denied.

By the Commission.

FRANCIS C. HURNEY,
Secretary.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

Editorial Amendments Deleting Certain Sections of the Rules

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: Certain sections of the Commission's rules regarding assignment of frequencies to ship radio telegraph stations have been overtaken by time and superseded by changes in the rules. We are therefore deleting these sections.

EFFECTIVE DATE: May 31, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Kemp J. Beaty, Safety and Special Radio Services Bureau, 202-632-7197.

SUPPLEMENTARY INFORMATION:

ORDER

Adopted: May 16, 1978.

Released: May 17, 1978.

1. Section 83.332 of the Commission's rules contains provisions regarding the assignment of frequencies to ship radiotelegraph stations and § 83.333 of the rules indicates the available "High traffic ship radiotelegraph working frequencies." These sections of the rules were superseded by the Commission's actions in the Report and Order, Docket No. 20813, FCC 77-380, released June 10, 1977, which implemented the changes into our rules to the International Radio Regulations adopted at the 1974 World Administrative Radio Conference regarding telegraphy.

2. Accordingly, the Commission's rules are being amended to delete §§ 83.322 and 83.333. Authority for this amendment is contained in sections 4(i) and 303 (c) and (r) of the Communications Act of 1934, as amended, and § 0.231(d) of the Commission's rules. Since the amendment is editorial in nature and the provisions in these sections are no longer applicable the public notice, procedure and effective date provisions of 5 U.S.C. 553 do not apply.

3. In view of the above: *It is ordered*, That the rule amendment set forth below is adopted effective May 31, 1978.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; (47 U.S.C. 154, 303).)

FEDERAL COMMUNICATIONS COMMISSION,

R. D. LICHTWARDT,
Executive Director.

Part 83 of Chapter I of Title 47 of the Code of Federal Regulations is amended to read as follows:

§ 83.332 [Deleted]

1. Section 83.332 is deleted.

§ 83.333 [Deleted]

2. Section 83.333 is deleted.

[FR Doc. 78-14242 Filed 5-22-78; 8:45 am]

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Final Threatened Status and Critical Habitat for the Leopard Darter; Correction

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Correction.

SUMMARY: The Fish and Wildlife Service's list of counties designated critical habitats for the threatened species, the Leopard Darter, has an error. This document corrects the error in the list of counties. These habitats are preserved in order to assure the continued existence of a threatened species.

EFFECTIVE DATE: May 22, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Keith M. Schreiner, Associate Director—Federal Assistance, Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240, 202-343-4646.

In FR Doc. 78-2182 in the issue for Friday, January 27, 1978, page 3715, the following county names are corrected. In the middle column lines 6, 12 and 19 from the bottom of the page, Pushmataha County should be, and is hereby, changed to read McCurtain County.

Dated: May 16, 1978.

LYNN A. GREENWALT,
Director,
Fish and Wildlife Service.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[1620-01]

COST ACCOUNTING STANDARDS BOARD

[4 CFR Part 416]

ACCOUNTING FOR INSURANCE COSTS

Cost Accounting Standard; correction

AGENCY: Cost Accounting Standards Board.

ACTION: Proposed Rule—correction.

SUMMARY: This document corrects a proposed rule on accounting for insurance costs which appears at page 20806 of the FEDERAL REGISTER of May 15, 1978.

DATE: Written comments must be received on or before June 30, 1978.

ADDRESSES: Written comments should be sent to the Cost Accounting Standards Board, 441 G Street NW., Room 4836, Washington, D.C. 20548.

NOTE.—All written submissions made pursuant to this Notice will be made available for public inspection at the Board's Office during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Robert Straith, Associate Director, Cost Accounting Standards Board, 441 G Street NW., Room 4836, Washington, D.C. 20548, 202-275-6136.

SUPPLEMENTARY INFORMATION:

FR Doc. 78-13169, appearing at page 20806 in the FEDERAL REGISTER for Monday, May 15, 1978, contained an omission, as set forth below.

On page 20811, following paragraph § 416.10, insert the following paragraph:

§ 416.20 Purpose.

The purpose of this Standard is to provide criteria for the measurement of insurance costs, the assignment of such costs to cost accounting periods, and their allocation to cost objectives. The application of these criteria should increase the probability that insurance costs are allocated to cost objectives in a uniform and consistent manner.

ARTHUR SCHOENHAUT,
Executive Secretary.

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

[7 CFR Part 1701]

AUDIT OF REA BORROWERS' ACCOUNTING RECORDS

Proposed Revision of REA Bulletin

AGENCY: Rural Electrification Administration, USDA.

ACTION: Proposed rule.

SUMMARY: This action concerns the revision of REA Bulletin 185-1: 467-1, Audit of REA Borrowers' Accounting Records. Changes to the Professional Standards by the American Institute of Certified Public Accountants (AICPA) require revision of this bulletin. The revised bulletin updates REA requirements with the generally accepted auditing standards of the accounting profession as promulgated by the AICPA. When the revisions to the bulletin are issued, Appendix A to part 1701 will be modified accordingly.

DATE: Public comments must be received by REA no later than June 22, 1978.

ADDRESS: Submit written comments to the Director, Accounting and Auditing Division, Rural Electrification Administration, Room 4307, South Building, U.S. Department of Agriculture, Washington, D.C. 20250; submissions are available for public inspection at the above address during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Mr. Sheldon Chazin, Director, Accounting and Auditing Division, Rural Electrification Administration, Room 4307, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, telephone 202-447-7221.

SUPPLEMENTARY INFORMATION: Notice is hereby given that pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), REA proposes to revise REA Bulletin 185-1:465-1, Audit of REA Borrowers' Accounting Records.

GENERAL SUMMARY OF CHANGES

The information required in the notes to the financial statements and in the supplemental letter is to include the disclosures required by the Ac-

counting Principles Board Opinion No. 22 and recent Statements on Auditing Standards issued by the American Institute of Certified Public Accountants. These additional requirements relate to disclosure of accounting policies, the effects of EDP on the evaluation of internal control, and disclosure of related party transactions.

A copy of the proposed revision of REA Bulletin 185-1:465-1 may be secured in person or by written request from the Director, Accounting and Auditing Division.

Dated: May 16, 1978.

DAVID A. HAMIL,
Administrator.

[7 CFR Part 1701]

RURAL ELECTRIC PROGRAM

Supplemental Loan Criteria

AGENCY: Rural Electrification Administration, USDA.

ACTION: Proposed rule.

SUMMARY: REA proposed to revise REA Bulletin 20-14, Supplemental Financing for Loans Considered Under Section 4 of the Rural Electrification Act. This bulletin provides REA borrowers with criteria for eligibility and the proportion of supplemental financing expected to be obtained from non-REA lenders under the concurrent loan program. The proposed change consists of a revised "Sample Board Resolution Requesting Concurrent Financing" (Attachment B). The change will simplify the calculation of the amounts to be provided by the supplemental lender including any required equity investment in the supplemental lender. The same instructions should also be applied to calculations on Section B of REA Form 740c, Cost Estimates and Loan Budget for Electric Borrowers.

DATE: Public comments must be received by REA no later than June 22, 1978.

ADDRESS: Persons interested in the proposed bulletin may submit written data, views or comments to the Director, Electric Borrowers' Management Division, Room 3346, South Building, U.S. Department of Agriculture, Washington, D.C. 20250. All written submissions made pursuant to this

notice will be made available for public inspection at the Office of the Director, Electric Borrowers' Management Division during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Mr. Charles R. Weaver, Director, Electric Borrowers' Management Division, Rural Electrification Administration, Room 3346, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, telephone number 202-447-5900.

SUPPLEMENTARY INFORMATION: Notice is hereby given that pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), REA proposes to modify the calculation method for concurrent financing as follows:

New Financing Requested for Facilities \$—.

REA Loan Requested for Facilities (%) \$—.

Total Supplemental Loan (%) \$—.

Required Investment in Supplemental Lender (CTC's) \$—.

Supplemental Loan Requested for Facilities \$—.

Instructions

*Multiply New Financing Requested for Facilities by the appropriate percentage of plant financing to be obtained from REA as determined by current PRR. Round to nearest thousand.

*Multiply New Financing Requested for Facilities by the appropriate percentage of plant financing to be obtained from a supplemental lender. When CFC is the supplemental lender divide the result by 0.95 and round to the nearest thousand, and

*Multiply the Total Supplemental Loan by 0.05 to obtain the amount of Capital Term Certificates (CTC's) required, and

*Multiply the Total supplemental Loan by 0.95 to obtain the amount available for facilities.

Adjust: New Financing Requested for Facilities such that it equals the sum of the REA Loan Requested for Facilities and the Supplemental Loan Requested for Facilities (+)

A copy of proposed revision to REA Bulletin 20-14 may be secured in person or by written request from the Director, Electric Borrowers' Management Division.

Dated: May 15, 1978.

RICHARD F. RICHTER,
Assistant Administrator,
Electric.

(FR Doc. 78-14165 Filed 5-22-78; 8:45 am)

[3410-34]

Animal and Plant Health Inspection Service

[9 CFR Part 85]

PSEUDORABIES REGULATIONS

Proposed Rulemaking

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: The purpose of this document is to revise a proposed rule which was published in the *FEDERAL REGISTER*, May 27, 1977, the intent of which was to propose regulations which would prevent the spread of pseudorabies in the United States. This new proposal is necessitated by the comments received on the first proposal which justify substantial changes in the original proposal. The new proposal would alter the manner in which the former proposal would have regulated the interstate movement of livestock.

DATE: Comments on or before July 24, 1978.

ADDRESS: Comments to Deputy Administrator, USDA, APHIS, VS, Room 704, Federal Building, Hyattsville, Md. 20782.

FOR FURTHER INFORMATION CONTACT:

Dr. J. A. Downard, Chief Staff Veterinarian, Swine Diseases, USDA, APHIS, VS, Room 704, Federal Building, Hyattsville, Md. 20782, 301-436-8487.

SUPPLEMENTARY INFORMATION: On May 27, 1977, there was published in the *FEDERAL REGISTER* (42 FR 27250-27251) proposed regulations intended to prevent the spread of pseudorabies in the United States. That proposal was published because of an alarming increase in the number of cases of pseudorabies in the United States. Pseudorabies, also known as Aujeszky's disease, mad itch, and infectious bulbar paralysis, is primarily a disease of swine caused by a herpes virus. Occasionally, this disease also infects other livestock, dogs, cats, and wild animals causing a fatal encephalomyelitis manifested by intense itching and self-mutilation. Swine are believed to be the chief reservoir of pseudorabies. In swine the infection is often inapparent, except in suckling pigs which usually develop a fatal encephalomyelitis, and in sows that abort or produce stillborn or mummified fetuses. The number and severity of outbreaks of pseudorabies has been increasing dramatically during the past 3 years and is expected to continue. Since pseudorabies is particularly prevalent in swine, this trend is expected to cause serious financial losses to individual swine producers and the swine industry in general. The proposed regulations are intended to reduce and stop the spread of pseudorabies in the United States. A period of 60 days was provided for comment on the original proposal by interested parties, and 102 letters of comment were received which are summarized as follows: 6 supported the proposal without substantive change; 3 addressed matters not contained in the

proposal; 83 expressed support for the proposal but recommended various changes; and 10 opposed the proposal. Because the comments received numerous problems and questions concerning the proposed regulations, which, after consideration, have resulted in substantial modifications of such proposed regulations, this document proposes such revised regulations for comment again before final promulgation of any regulations to control pseudorabies. The 83 comments supported the proposal, but suggesting various changes, fall into the following general categories:

1. The proposed definition for "exposed livestock" in § 85.1(f) of the original proposal was: "Any livestock that has ever been in contact with an animal affected with pseudorabies or that has ever been inoculated with pseudorabies virus or attenuated or inactivated vaccine, or that has ever been in contact with an inoculated animal." Comments received suggested this definition was excessively restrictive since it would have placed undue restrictions on the movement of pseudorabies-free swine and other livestock if they had ever been in contact with any animal infected with or vaccinated against pseudorabies.

The original proposal would be amended to reflect the fact that susceptible animals other than swine are not known to become carriers and are not known to transmit the disease after a period of 21 days since last being exposed to a clinical case of the disease. The incubation period for pseudorabies virus in animals is relatively short; therefore, animals other than swine are believed not to be potential spreaders of pseudorabies after a period of 21 days since their last exposure to the virus. The term "exposed livestock" would be redefined in § 85.1(n) of this proposal to reflect the foregoing.

The original proposal would impose restrictions on the interstate movement of livestock affected with or exposed to pseudorabies, other than those showing clinical signs of pseudorabies. This proposal would amend the original proposal to allow livestock, other than swine, which are not showing clinical evidence of pseudorabies and have not been exposed to an animal showing clinical evidence of pseudorabies within 21 days prior to the time of movement to be moved interstate without restriction under this part. Livestock exposed to an animal showing clinical evidence of pseudorabies within 21 days prior to the time of movement would not be allowed to be moved interstate.

The original proposal made no provision for changing the classification of exposed swine to swine not known to be infected with or exposed to pseudorabies. Swine are more resistant to

pseudorabies than most other livestock and some swine develop an inapparent carrier state. Such swine are capable of transmitting the disease to other animals even though these carrier swine are apparently healthy. Therefore, swine would be considered to be infected or exposed until they have been found negative to an official pseudorabies test described below. This proposal, by incorporating the Minimum Standards for Veterinary Services Participation in Cooperative Pseudorabies Programs, proposes a test mechanism for changing the classification of exposed swine to swine not known to be infected with or exposed to pseudorabies. This would be accomplished by conducting two negative 100 percent pseudorabies herd tests conducted as follows: test 100 percent of the herd and remove any official test positive swine; retest entire herd at no more than 30-day intervals until there are two successive negative herd tests. The herd must have two negative herd tests after the removal of any test positive swine to change the classification of exposed swine to swine not known to be infected with or exposed to pseudorabies.

2. The proposed definition of "official test" in § 85.1(m) of the original proposal was found to be unacceptable by the scientific community, since it would not have taken into consideration diagnostic tests for pseudorabies now being developed. It is proposed that the term "official test" be changed to "official pseudorabies test" to better identify the test. It is further proposed that "official pseudorabies test" be revised to permit the use of new tests following their approval by the Deputy Administrator and inclusion in the Minimum Standards for Veterinary Services Participation in Cooperative Pseudorabies Programs which would be incorporated by reference in the proposed regulations. The definition of "official test" in the original proposal specifies the serum neutralization test and the enzyme labeled antibody test. The enzyme labeled antibody test is still being developed and is not available at the present time. Several new pseudorabies tests are being evaluated at the present time which might be accepted as official pseudorabies tests in the future. Therefore, it is proposed that "official pseudorabies test" be redefined in § 85.1(q) to mean any test for the diagnosis of pseudorabies approved by the Deputy Administrator in accordance with the Minimum Standards for Veterinary Services Participation in Cooperative Pseudorabies Programs and conducted in an approved laboratory as listed in the Minimum Standards for Veterinary Services Participation in Cooperative Pseudorabies Programs.

3. The definition of "breeding farm", as originally proposed in § 85.1(n), was

found to be inadequate to assure that all animals in the herd were free of pseudorabies in that there was no provision for systematic testing of the swine on such a farm to assure that pseudorabies was not present. Therefore, in response to comments by producer, technical and regulatory groups, it is proposed that this definition be replaced by the term "qualified pseudorabies negative herd" which appears in § 85.1(dd) of this proposal and which is also described in the Minimum Standards for Veterinary Services Participation in Cooperative Pseudorabies Programs. It is proposed that a "qualified pseudorabies negative herd" be a herd of swine none of which has been vaccinated for pseudorabies, in which all swine over 6 months of age test negative to an official pseudorabies test. It is proposed that the status of the herd would be maintained by quarterly official pseudorabies tests of 25 percent of the swine over 6 months of age in the herd and finding all swine so tested negative. It is proposed that no swine in the herd be tested twice during the year for qualification purposes; however, it is proposed that all swine over 6 months of age in the herd must be subjected to a test during the year. It is proposed that a minimum of 90 percent of the swine would be required to have been on the premises and part of the herd for at least 90 days prior to the qualifying test or have entered directly from another qualified pseudorabies negative herd. This requirement would be added to conform with the Minimum Standards as approved by the United States Animal Health Association. Recently established herds often contain swine from numerous sources. The likelihood of swine being in the incubation stages of pseudorabies is much greater in such herds. This proposal would allow swine owners that wish to attain qualified pseudorabies herd status some flexibility in that 10 percent of the herd could be added within 90 days. All swine additions would be required to be from another qualified pseudorabies negative herd or be tested negative for pseudorabies within 30 days before being added to the herd.

4. As originally proposed, to qualify for interstate movement, pseudorabies affected and exposed swine would have been required to be identified by a hole punched in the left ear, and additionally it would have been required that the movement be continuous, without unloading, directly to a recognized slaughtering establishment for immediate slaughter. Comments received pointed out that the proposed ear punch identification would endanger the swine involved and could be a means of disease spread due to extensive bleeding caused by punching the 1/2-inch hole in the ear. Further, it was

pointed out that only allowing consignment directly to a recognized slaughtering establishment would disrupt normal marketing procedures and would result in economic losses to producers as a great many producers ship their market swine to slaughter markets rather than direct to a slaughter establishment. Therefore, the proposed provision for ear punch identification is deleted from this proposal. The proposed provision for shipment direct to a recognized slaughtering establishment would be amended in this proposal. It is proposed that swine infected with or exposed to pseudorabies be moved, under permit, directly to a recognized slaughtering establishment or directly through no more than one slaughter market to a recognized slaughtering establishment. This would appear to allow a more normal marketing of such swine while still maintaining enough control of such swine to prevent the spread of pseudorabies. Specifically, this proposal would regulate the movement of swine infected with or exposed to pseudorabies other than swine showing clinical evidence of pseudorabies or swine exposed to an animal showing clinical evidence of pseudorabies within 21 days in § 85.5(a).

Because of the disease status of such swine, a permit which lists the identification of each animal would be required to accompany the swine. Further, such swine would be required to move to destination in one continuous movement without unloading enroute. These restrictions are necessary to maintain continuous control over the swine during interstate movements to slaughter. In light of the disease status of each swine, continuous control is necessary to minimize the risk of the spread of pseudorabies.

This proposal would also allow the interstate movement of pseudorabies exposed swine that are negative to an official pseudorabies test 21 days or more after last being exposed to any livestock showing clinical evidence of pseudorabies to a quarantined herd or quarantined feedlot. Such swine would be required to have been officially vaccinated for pseudorabies within 10 days after the negative test and moved interstate within 30 days after the negative test. These requirements would appear to increase the likelihood that such swine are in fact not infected and that they are more resistant to such infection. Further, such swine would be required to be accompanied by a permit which lists the present quarantine status of the farm of origin; the identification of the swine being moved; the date of the official pseudorabies test and the name of the laboratory where the test was conducted; the date of the official vaccination for pseudorabies; and evidence that approval for the interstate

movement has been issued by the State animal health official of the State of destination prior to the interstate movement of the swine. This would allow the controlled interstate movement of such swine to swine herds under the control of the State animal health official of the State of destination and should present a minimum risk of the spread of pseudorabies.

5. Many comments were received which recommended that pseudorabies vaccination of breeding swine in herds not known to be infected with pseudorabies be permitted and that unvaccinated offspring from such herds be permitted to move interstate without additional restrictions when tested negative for pseudorabies within 30 days prior to such movement. Therefore, it is proposed that the term "pseudorabies controlled vaccinated herd" be added to this proposal. It is proposed that a "pseudorabies controlled vaccinated herd" be a herd of swine in which all of the swine over 6 months of age are negative to an official pseudorabies test and are vaccinated for pseudorabies within 10 days after such test. The status of the herd would be maintained by testing 25 percent of the off-spring of these vaccinated swine when the offspring are between 3 and 4 months of age. All such tests must be negative to maintain herd status. It is believed that testing of 25 percent of the unvaccinated offspring of vaccinated parents will sufficiently monitor the herd to insure that field strains of the pseudorabies virus have not been introduced into the herd. It is proposed that all additions to the herd shall test negative to an official pseudorabies test, be vaccinated for pseudorabies within 10 days after such test, and be added to the herd not more than 30 days after such test.

This category would be added so that people in endemic areas could vaccinate their swine and thereby establish some resistance in their herds to pseudorabies while at the same time permitting the interstate movement of noninfected offspring.

6. Of the ten comments received which were considered to oppose the original proposal, two expressed the opinion that the proposal would discourage reporting of infected herds. The definition and classification of exposed livestock in the original proposal was deemed to be too restrictive and perhaps would have discouraged reporting of infected herds. This is another reason why exposed livestock has been redefined in this proposal. One comment opposed the proposal as written but offered no specific suggestions. One comment expressed the opinion that swine going to sale barns and stockyards would not be restricted. The original proposal required

pseudorabies infected or exposed swine moving interstate to move directly to a recognized slaughtering establishment and did not permit them to move interstate through sale barns or stockyards. All feeding and breeding swine moving interstate would have had to meet the same requirements regardless of whether or not they moved through a sale barn or stockyard or other point. This proposal would permit pseudorabies infected and exposed swine to be moved interstate directly to a recognized slaughtering establishment or directly through no more than one slaughter market and then directly to a recognized slaughtering establishment. Slaughter market is defined in this proposal in § 85.1(c). Swine passing through these slaughter markets should present little or no hazard of spreading pseudorabies due to the controls on these markets.

It is proposed that only swine not known to be infected with or exposed to pseudorabies be allowed to move interstate to or from a livestock market selling feeding or breeding swine. Feeding and breeding swine moving interstate from a livestock market would be required to meet the same requirements as such swine moving interstate from any other origin.

Five comments expressed the need for unrestricted pseudorabies vaccination and unrestricted movement of such vaccinated swine. The movement of vaccinated swine has been provided for; however, unrestricted movement of vaccinated swine would allow dissemination of the disease by vaccines in that the vaccines being produced at the present time do not induce immunity, but increase the resistance of the vaccinates to the disease. Some vaccinates, when exposed to pseudorabies virus, develop the disease and shed the virus; however, they recover faster with fewer complications than non-vaccinates. Some swine vaccinated after being exposed to field strains of the virus are known to become carriers of the virus and be spreaders of the disease. Our present tests are not capable of differentiating between antibodies due to field strains of the virus and antibodies due to vaccine strains of the virus produced after vaccination; therefore, it is believed at this time that unrestricted movement of vaccinates would interfere with any pseudorabies control or eradication program. Pseudorabies exposed swine from infected or exposed herds that are negative to an official pseudorabies test 21 days or more after last being exposed to livestock showing clinical evidence of pseudorabies would be permitted to move interstate to a quarantined herd or quarantined feedlot if officially vaccinated for pseudorabies with 10 days of the negative test, and the swine are moved in-

terstate within 30 days after the negative test. Further, the movement would be required to have the prior approval of the State animal health official of the State of destination. Such prior approval is required by many States. This requirement would be added to insure that the State animal health official would be made aware of such interstate swine movements into their State for pseudorabies control purposes and enable them to advise importers of State requirements.

One comment expressed the opinion that there is insufficient knowledge of pseudorabies to attempt to control it. This comment was rejected, as other diseases have been controlled and some eradicated from the United States with far less known about them than is known about pseudorabies.

It is proposed that the following definitions be added to those contained in the previous proposal:

(a) It is proposed that "certificate" be defined as an official document issued by a Veterinary Services representative, a State representative, or an accredited veterinarian for and prior to the interstate movement of swine which are not known to be infected with, exposed to or vaccinated for pseudorabies. The certificate would list the following information: (1) Number and description of the swine to be moved, (2) a statement that the swine to be moved are not infected with or exposed to pseudorabies and are not official vaccinates, (3) the purpose for which the swine are to be moved, (4) the points of origin and destination, and (5) the consignor and consignee. It is proposed that this definition be added so that dual sets of documents would not have to accompany shipments of healthy swine as we have attempted to include in the certificate the information required by the various States for permitting the entry of swine. The information which would be required is necessary for APHIS to properly identify and trace the swine being moved to their farm of origin.

(b) It is proposed that "official pseudorabies vaccine" be defined as any pseudorabies virus vaccine produced under license from the Secretary of Agriculture under the Virus, Serum, and Toxin Act of March 4, 1913, 21 U.S.C. 151 et seq. and any legislation amendatory thereof. This definition would be added to assure that officially vaccinated swine are vaccinated with a product of known quality and standards.

(c) It is proposed that "official vaccinated" be defined as swine that have been (1) vaccinated with an official pseudorabies vaccine by a Federal, State, or accredited veterinarian in accordance with recommendations on the vaccine label and the laws and reg-

ulations of the State in which the swine are vaccinated, (2) identified by an eartag, tattoo, or notch recognized by a breed association, or similar identification of each swine vaccinated, and (3) reported as official vaccinated at the time of accination to the State animal health official. This definition would be added to assure that such swine were properly vaccinated and could be so identified and certified.

(d) It is proposed that "pseudorabies vaccine" be defined as any swine vaccinated with any product containing antigens for pseudorabies. This would include official vaccinates and all other vaccinates. This definition would be added to bring all pseudorabies vaccinated swine within the scope of the regulations as vaccinated swine. Such swine cannot be serologically differentiated from naturally infected swine. The inability to make such a differentiation would interfere with the accuracy of serological surveys and epidemiology should the vaccination status of swine in market channels be unknown.

(e) It is proposed that "slaughter market" be defined as an approved livestock market at which swine for sale and shipment for slaughter are handled only on days when no swine are handled for sale and shipment for feeding or breeding purposes and which is cleaned and disinfected in accordance with the requirements of this part before being used for feeding or breeding swine. This definition would be added to give swine producers access to controlled markets in addition to direct shipments to slaughtering establishments for marketing their infected and exposed swine.

(f) It is proposed that "quarantined feedlot" be defined as a premises where pseudorabies infected or exposed swine are fed under the supervision and control of the State animal health official and from which such swine are moved interstate directly to a recognized slaughtering establishment or directly through no more than one slaughter market and then directly to a recognized slaughtering establishment. This definition would be added to give swine producers a controlled outlet for pseudorabies-exposed swine not ready for slaughter which are test negative and officially vaccinated before being moved interstate to a quarantined feedlot.

(g) It is proposed that "quarantined herd" be defined as a herd in which pseudorabies-infected or exposed swine are bred, reared, and fed under the supervision and control of the State animal health official and from which such swine are moved interstate directly to a recognized slaughtering establishment or directly through no more than one slaughter market and then directly to a recognized slaughtering establishment, or from which

exposed test negative officially vaccinated swine may be moved interstate to another quarantined herd, or a quarantined feedlot. This definition would be added so that producers having infected swine herds could purchase test negative exposed swine that have been officially vaccinated as breeding replacements.

(h) It is proposed that "farm or origin" be defined as a farm where the swine to be shipped interstate were born or on which they have resided for at least 90 days immediately preceding an interstate shipment. It is proposed that this definition be added so that swine might be traced to the breeding herd from which they originated and source foci of infection could be discovered should pseudorabies be disclosed in swine after they have moved interstate.

(i) It is proposed that "pseudorabies controlled vaccinated herd" be defined as a herd of swine in which all of the swine over 6 months of age are negative to an official pseudorabies test and are vaccinated for pseudorabies within 10 days after such test. The status of the herd would be maintained by testing 25 percent of the offspring of these vaccinated swine when the offspring are between 3 and 4 months of age and finding all swine so tested negative. All additions to the herd must be test negative to an official pseudorabies test before being vaccinated and added to the herd. This definition would be added to give producers in pseudorabies endemic areas the option of vaccinating their breeding herd and at the same time being able to market the unvaccinated offspring of the vaccinates other than for slaughter.

(j) It is proposed that "approved livestock market" be defined as a stockyard, livestock market, buying station, concentration point or any other premises under State or Federal veterinary supervision where swine are assembled for sale or sale purposes, and which has been approved by the Deputy Administrator under § 76.18. This definition would be added to permit the interstate movement of non-pseudorabies vaccinated swine not known to be infected with or exposed to pseudorabies to such approved livestock markets.

(k) It is proposed that "feedlot" be defined as a premises where swine are fed separate and apart from swine kept for breeding or other purposes and from which such swine are moved interstate directly to a recognized slaughtering establishment or directly through no more than one slaughter market and then directly to a recognized slaughtering establishment, or to a quarantined herd or a quarantined feedlot. This definition would be added to permit controlled movements of swine not ready for slaughter and

not known to be infected with, exposed to or vaccinated for pseudorabies through normal marketing channels. This definition would require the separation of breeding herds from feeder swine moving interstate at such feedlots and should help to control the spread of pseudorabies as all swine in feedlot would be sold only to a quarantined feedlot, quarantined herd or for slaughter.

(l) It is proposed that "Veterinary Services representative" and "State representative" be defined to identify the Federal and State officials who may issue permits and certificates required under this part.

(m) It is proposed that "State animal health officials" be defined to identify the person or persons to whom copies of permits and certificates required under this part shall be mailed, from whom approved for the interstate movement of certain swine must be obtained prior to their interstate movement and to whom notification of any confirmed or suspected cases of pseudorabies must be made.

(n) It is proposed that "herd" be defined for the purpose of identifying groups of animals referred to under this part. Because of the risk that pseudorabies may be disseminated to animals through their intermingling, the term as proposed includes not only animals which are maintained on common ground, but would also include two or more groups of animals geographically separated but which have an interchange of animals without regard to whether the animals are affected with or exposed to pseudorabies.

(o) It is proposed that "known infected herd" be defined and the term apply to those herds in which any livestock has been determined to be infected with pseudorabies by an official pseudorabies test or diagnosed by a veterinarian as having pseudorabies. A herd of livestock, other than swine, shall no longer be considered to be a known infected herd after 21 days since the last clinical case of the disease in the herd. A herd of swine which has been released from pseudorabies quarantine in accordance with the Minimum Standards shall be no longer classified as a known infected herd. This term would be added to clarify its use in defining exposed livestock and exposed swine.

(p) It is proposed that "exposed swine" be defined as any swine that has been in contact with an animal infected with pseudorabies including all swine in a known infected herd. This definition would be added to differentiate exposed swine from exposed livestock. Livestock, other than swine, which have not been exposed to a clinical case of pseudorabies for a period of 21 days would no longer be considered to be exposed. Swine, how-

ever, would be considered exposed after having been in contact with an animal infected with pseudorabies, and there would be no time limitation on the disease status of swine. This is because animals other than swine are not known to transmit the disease after a period of 21 days since last being exposed to a clinical case of the disease. Animals other than swine are considered to be dead end hosts for pseudorabies in that once they become infected they die. However, swine are known to recover from pseudorabies and some recovered swine are known to become carriers of and transmit the virus to other animals.

(q) It is proposed that "infected livestock" replace the term "affected livestock." The change in the term and words used in the definition would be made for the purpose of clarification.

(r) It is proposed that "Minimum Standards" be defined as "The Minimum Standards for Veterinary Services Participation in Cooperative Pseudorabies Programs." The Minimum Standards would be incorporated by reference in the proposed regulations.

(s) It is proposed that "swine not known to be infected with or exposed to pseudorabies" be defined as any swine from a herd of swine in which no animal has been classified as a reactor to an official pseudorabies test or has been diagnosed as having pseudorabies or suspected of having pseudorabies by a veterinarian.

The following definitions would also be changed to clarify terms used in the regulation:

(a) It is proposed that "accredited veterinarian" be changed to reflect the wording used in §160.1(d) specifically rather than refer the reader to Part 160 of this chapter.

(b) It is proposed that "State" be changed to include all territories of the United States and the Northern Mariana Islands and specific mention of the United States Virgin Islands be deleted since it would be included within the general category of territory.

(c) It is proposed that "permit" be changed to apply only to swine rather than livestock since this proposal would only require permits for certain classes of interstate swine movements. Further, the identification requirements would be deleted from the definition since the substantive parts of the regulation would specifically require identification where required. Other changes were made for editorial reasons.

(d) It is proposed that "recognized slaughtering establishment" be changed for editorial reasons.

The original proposal contained a general restriction on the movement of livestock. This proposal would retain the general restriction with editorial changes only.

The original proposal prohibited the interstate movement of livestock showing clinical evidence of pseudorabies. This proposal would retain this restriction with editorial changes only. The original proposal allowed the interstate movement of livestock affected with or exposed to pseudorabies other than those showing clinical signs of the disease from any point to a recognized slaughtering establishment for immediate slaughter under the following conditions: (1) Livestock must be accompanied by a permit and (2) moved in one continuous movement without unloading enroute. This proposal would retain the prohibition of the interstate movement of livestock showing clinical evidence of pseudorabies and would add a prohibition on the interstate movement of livestock which have been exposed to an animal showing clinical evidence of pseudorabies within 21 days of such exposure. This is proposed to prevent the interstate movement of livestock which might be in the incubative stage of the disease.

The original proposal allowed the interstate movement of swine affected with or exposed to pseudorabies from any point directly to a recognized slaughtering establishment for immediate slaughter under certain conditions. These conditions and changes made in the original proposal and reasons for such changes have been previously discussed herein.

The original proposal broke the requirements for the interstate movement of swine not known to be affected with or exposed to pseudorabies into two classifications, swine other than breeding swine and breeding swine. Swine other than breeding swine not known to be infected with or exposed to pseudorabies would have been permitted to move interstate without restriction for a period of one year following the effective date of the regulation, after which such movements would have been permitted only from a State which requires that the State animal health official be immediately notified of all confirmed or suspected cases of pseudorabies and that pseudorabies infected and exposed animals be quarantined. The purpose of this one year time period was to provide adequate time for States to obtain necessary legal authority and to place control measures into effect.

As originally proposed, the spread of pseudorabies would have been prevented by regulating the interstate movement of swine not known to be infected with or exposed to pseudorabies for breeding purposes by requiring such swine to be accompanied by a certificate listing certain information.

This proposal would completely alter the original proposal in that this proposal would categorize swine not

known to be infected with or exposed to pseudorabies on the basis of vaccination status. Since the publication of the original proposal, a modified live pseudorabies vaccine has been approved for use in the United States. Several killed pseudorabies vaccines are being researched and may soon be available for use by the swine industry. Vaccines are of value to swine producers in mitigating their losses; however, the vaccines are not known to prevent carriers from developing and spreading the disease should swine be infected prior to or after being vaccinated. European literature on pseudorabies cites cases where pseudorabies cycled in vaccinated herds. Also, should an eradication program be initiated in the future, it may be necessary or useful to be able to distinguish between vaccinated and naturally infected swine. This cannot be done serologically at the present time. For the foregoing reasons it is felt that the interstate movement of pseudorabies vaccinated swine must be regulated.

It is proposed that pseudorabies vaccinated swine not known to be infected with or exposed to pseudorabies be permitted to move interstate for slaughter directly to a recognized slaughtering establishment or directly through no more than one slaughter market and then directly to a recognized slaughtering establishment. Such swine would be required to be moved in one continuous movement without unloading enroute. A permit would be required to accompany the swine, and be delivered to the consignee. It is proposed that pseudorabies vaccinated swine not known to be infected with or exposed to pseudorabies be permitted to move interstate to a quarantined herd or quarantined feedlot if accompanied by a permit listing the following information in addition to the information described in §85.1(bb): (1) The pseudorabies status of the herd, (2) the identification tag, tattoo, ear notch recognized by a breed association, or similar identification of each animal being moved, (3) the date of the official vaccination for pseudorabies, (4) and evidence that approval for the interstate movement has been issued by the State animal health official of the State of destination. This additional information is believed to be necessary to properly identify and trace the swine being moved. The permit would be required to accompany the swine and be delivered to the consignee.

The unrestricted movement of vaccinated swine would allow the dissemination of the disease by vaccines in that the vaccines being produced at the present time do not induce immunity but, rather, increase the resistance of the vaccinates to the disease. This proposal would restrict the interstate movement of such swine to rec-

ognized slaughtering establishments, slaughter markets, quarantined herds and quarantined feedlots. All of these destinations are under the control of State or Federal regulatory agencies. It is believed that such control is necessary to minimize the risk of pseudorabies spread.

Nonpseudorabies vaccinated swine not known to be infected with or exposed to pseudorabies would be permitted to move interstate for slaughter without restriction. Such swine would be permitted to move interstate to other destinations under the following specified requirements. Such swine would be permitted to move interstate directly to a feedlot, a quarantined herd, a quarantined feedlot or to an approved livestock market for subsequent movement directly to a feedlot, a quarantined feedlot or quarantined herd only if such swine are from a qualified pseudorabies negative herd, or if accompanied by a certificate listing: (1) The number and description of the animals to be moved; (2) a statement that the animals to be moved are not infected with or exposed to pseudorabies and are not official vaccinates; (3) the purpose for which the animals are to be moved; (4) the points of origin and destination; (5) the consignor and consignee; (6) the identification to the farm of origin of each animal being moved, by an ear notch recognized by a breed association, identification tag, tattoo, or similar identification; and (7) a statement that approval for interstate movement has been issued by the State animal health official of the State of destination.

The purpose of the certificate is to certify the pseudorabies status of the swine and contain information to enable tracing the swine to their farms of origin should they be suspected of transmitting the disease during or subsequent to their movement.

Further, this proposal would require that nonpseudorabies-vaccinated swine not known to be infected with or exposed to pseudorabies moved interstate directly to a feedlot, quarantined feedlot, quarantined herd, or an approved livestock market for subsequent movement to a feedlot, quarantined feedlot, or quarantined herd, within one year from the effective date of this part. Such swine would only be permitted to move from a State which requires the State animal health official to be immediately notified of any confirmed or suspected cases of pseudorabies in that State and which requires that pseudorabies-exposed or infected animals be quarantined. Provisions for quarantines to be released in conformance with the Minimum Standards have been added by referencing the Minimum Standards so there will be uniformity in the releasing of quarantines among the States.

It is proposed that swine from qualified pseudorabies negative herds moving interstate to approved livestock markets, feedlots, quarantined feedlots or quarantined herds be allowed to move unrestricted since such herds are monitored periodically for the presence of pseudorabies and are, therefore, considered to present little or no risk of spreading pseudorabies.

Other interstate movements of nonpseudorabies-vaccinated swine not known to be infected with or exposed to pseudorabies would be permitted only if such swine are accompanied by a certificate listing the same specified additional information as outlined above regarding certificates issued for the movement of swine not pseudorabies-vaccinated and not known to be infected with or exposed to pseudorabies to a quarantined herd or a quarantined feedlot; however, there would be the additional requirement that such swine be negative to an official test for pseudorabies within 30 days prior to such interstate movement. The additional testing requirement is to reasonably assure the pseudorabies negative status of the swine. In the original proposal a negative pseudorabies test would have been valid for 60 days; however, this proposal would limit the validity of a negative pseudorabies test to 30 days as a further safeguard against the spread of the disease.

The proposal also would have required the cleaning and disinfection of means of conveyance, facilities, and premises used in the interstate movement of pseudorabies-infected or exposed livestock. This proposal would retain the requirement that means of conveyance, livestock markets and other facilities used in the interstate movement of pseudorabies-infected or exposed livestock, be cleaned and disinfected. However, such cleaning and disinfecting would be required to be done in accordance with §§76.30 and 76.31 of this chapter rather than §71.7 of this chapter. This change would be made because the requirements in §§76.30 and 76.31 are more specific and less likely to be misinterpreted. The reference to §§76.30 and 76.31 caused certain aspects of §85.7 of the original proposal to become unnecessary, and these provisions would be deleted in this proposal.

The original proposal would have allowed the Deputy Administrator to permit the movement in specific cases of livestock not otherwise provided for in this part. This proposal would retain this provision but refers instead to the interstate movement of livestock and adds that the Deputy Administrator could prescribe conditions on any such movement to prevent the spread of pseudorabies. These changes were made to give the Deputy Administrator flexibility when dealing with unique situations.

This proposal would add the requirement that permits and certificates which would be required to accompany the swine interstate shall be delivered to the consignee by the person delivering the swine. Further, a copy of any such permit or certificate required under this part would be required to be mailed to the State animal health official of the State of destination by the person issuing the document within 3 days of the interstate movement of the swine covered by the document. This requirement would be added to insure that the State of destination is notified of swine entering the State.

The proposal would also add a provision requiring the consignor of swine not pseudorabies vaccinated and not known to be infected with or exposed to pseudorabies which are moved interstate directly to a feedlot, quarantined feedlot, quarantined herd or to a concentration point for subsequent movement directly to a feedlot, quarantined feedlot or quarantined herd to maintain records for 2 years whereby an individual animal can be traced to the farm of origin. Such records would be available to the State animal health official or Veterinary Services on request.

All of these provisions would be added to enable the Department to trace the interstate movement of the swine in question. Such provisions would aid the Department in locating the sources from which pseudorabies might spread.

The original proposal did not regulate the interstate movement of swine semen or swine embryos. This oversight would be corrected by the addition of such regulation in this proposal. Such regulation is believed to be necessary to prevent the spread of pseudorabies through the interstate movement of swine semen and swine embryos for insemination of or implantation into swine.

Accordingly, Part 85, Title 9, Code of Federal Regulations, would be amended to read:

PART 85—PSEUDORABIES

- Sec.
- 85.1 Definitions.
- 85.2 Notice relating to the existence of the contagion of pseudorabies.
- 85.3 General restriction.
- 85.4 Interstate movement of livestock.
- 85.5 Interstate movement of infected swine or exposed swine.
- 85.6 Interstate movement of pseudorabies vaccinate swine not known to be infected with or exposed to pseudorabies.
- 85.7 Interstate movement of non pseudorabies vaccinate swine not known to be infected with or exposed to pseudorabies.
- 85.8 Other interstate movements.
- 85.9 Interstate movement of swine semen and swine embryos for insemination of or implantation into swine.
- 85.10 Permits and certificates.
- 85.11 Maintenance of records.

Sec.

85.12 Cleaning and disinfecting means of conveyance.

85.13 Cleaning and disinfecting livestock markets and other facilities.

AUTHORITY: Secs. 4-7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791-792, as amended; secs. 1-4, 33 Stat. 1264, 1265, as amended; sec. 1, 75 Stat. 481; secs. 3 and 11, 76 Stat. 130, 132; (21 U.S.C. 111, 112, 113, 115, 117, 120, 121, 123-126, 134b, 134f).

§ 85.1 Definitions.

For purposes of this part, the following terms mean:

(a) **Administrator.** The Administrator of the Animal and Plant Health Inspection Service, United States Department of Agriculture, or any other official of the Service to whom authority has been delegated or may be delegated to act in his stead.

(b) **Deputy Administrator.** The Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service, United States Department of Agriculture, or any other Veterinary Services official to whom authority has been delegated or may be delegated to act in his stead.

(c) **Veterinary Services.** Veterinary Services, Animal and Plant Health Inspection Service, United States Department of Agriculture.

(d) **Veterinary Services Representative.** A person employed by Veterinary Services, Animal and Plant Health Inspection Service, United States Department of Agriculture, who is authorized to perform the function involved.

(e) **State Animal Health Official.** The State animal health official who is responsible for the livestock and poultry disease control and eradication programs, in the official's State or his designated representative.

(f) **State Representative.** A person regularly employed in animal health work of a State and who is authorized by such State to perform the function involved under a Cooperative Agreement with the United States Department of Agriculture.

(g) **Accredited Veterinarian.** A veterinarian approved by the Deputy Administrator in accordance with Part 161 of this Title to perform functions specified in Part 11 of Subchapter A, and Subchapters B, C, and D of this Chapter, and to perform functions required by cooperative State-Federal disease control and eradication programs.

(h) **State.** Any State or Territory of the United States, the District of Columbia, Puerto Rico, Guam or the Northern Mariana Islands.

(i) **Interstate.** From any State into or through any other State.

(j) **Pseudorabies.** The contagious, infectious, and communicable disease of livestock and other animals also known as Aujeszky's disease, mad itch, or infectious bulbar paralysis.

(k) **Herd.** Any group of livestock maintained on common ground for

any purpose, or two or more groups of livestock under common ownership or supervision, geographically separated, but which have an interchange or movement of animals without regard to whether the animals are infected with or exposed to pseudorabies.

(l) **Known Infected Herd.** Any herd in which any livestock has been determined to be infected with pseudorabies by an official pseudorabies test of diagnosed by a veterinarian as having pseudorabies. A herd of livestock, other than swine, shall no longer be considered to be a known infected herd after 21 days since the last clinical case of the disease in the herd. A herd of swine which has been released from pseudorabies quarantine in accordance with the Minimum Standards shall be no longer classified as a known infected herd.

(m) **Livestock.** Swine, cattle, sheep, or goats.

(n) **Exposed Livestock.** Any livestock that has been in contact with an animal infected with pseudorabies, including all livestock in a known infected herd; except that livestock, other than swine, that have not been exposed to a clinical case of the disease for a period of 21 days shall no longer be considered to be exposed livestock.

(o) **Exposed Swine.** Any swine that has been in contact with an animal infected with pseudorabies, including all swine in a known infected herd.

(p) **Infected Livestock.** Any livestock determined to be infected with pseudorabies by an official pseudorabies test, or diagnosed by a veterinarian as having pseudorabies.

(q) **Official Pseudorabies Test.** Any test for the diagnosis of pseudorabies approved by the Deputy Administrator in accordance with the Minimum Standards and conducted in an approved laboratory as listed in the Minimum Standards.

(r) **Moved.** Shipped, transported, or otherwise moved, or delivered or received for movement by land, water, or air.

(s) **Recognized Slaughtering Establishment.** A slaughtering establishment operated under the provisions of the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) or a State inspected slaughtering establishment.

(t) **Slaughter Market.** A livestock market approved in accordance with § 76.18 at which swine for sale and shipment for slaughter are handled only on days when no swine are handled for sale and shipment for feeding or breeding purposes and which is cleaned and disinfected in accordance with the requirements of this part before being used for feeding or breeding swine.

¹Notices containing lists of slaughter markets approved for the purposes of the regulations in this part are published in the FED-

(u) **Quarantined Feedlot.** A premises where pseudorabies infected or exposed swine are fed under the supervision and control of the State animal health official, and from which such swine are moved directly to a recognized slaughtering establishment or directly through no more than one slaughter market and then directly to a recognized slaughtering establishment in accordance with the provisions of this part.

(v) **Quarantined Herd.** A herd in which pseudorabies infected or exposed swine are bred, reared, and fed under the supervision and control of the State animal health official, and from which such swine are moved interstate directly to a recognized slaughtering establishment or directly through no more than one slaughter market and then directly to a recognized slaughtering establishment, or from which exposed test negative officially vaccinated swine may be moved only to a quarantined herd or quarantined feedlot.

(w) **Feedlot.** A premises where swine are fed separate and apart from swine kept for breeding or other purposes and from which such swine are moved directly to a recognized slaughtering establishment or directly through no more than one slaughter market and then directly to a recognized slaughtering establishment, quarantined herd, or quarantined feedlot.

(x) **Farm of Origin.** A farm where the swine were born, or on which they have resided for at least 90 days immediately prior to the interstate shipment.

(y) **Official Pseudorabies Vaccine.** Any pseudorabies virus vaccine produced under license from the secretary of Agriculture under the Virus, Serum and Toxin Act of March 4, 1913, and any legislation amendatory thereof 21 U.S.C. 151 et seq.

(z) **Official Vaccinate.** Any swine which have been (1) vaccinated with an official pseudorabies vaccine by an accredited veterinarian or a State or Federal veterinarian in accordance with recommendations on the vaccine label and the laws and regulations of the State in which the swine are vaccinated, (2) identified by an eartag, tattoo, ear notch recognized by a breed association, or similar identification of each swine vaccinated, and (3) reported as official vaccinates at the time of vaccination to the State animal health official.

(aa) **Pseudorabies Vaccinate.** Any swine that have been vaccinated with any product containing antigens for pseudorabies.

ERAL REGISTER. Information concerning slaughter markets can be obtained from the Veterinarian in Charge, Veterinary Services, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, for the State in question.

(bb) **Permit.** An official document issued for and prior to the interstate movement of pseudorabies infected, exposed or vaccinated swine under this part by a Veterinary Services representative, State representative, or an accredited veterinarian which states: (1) The number of swine to be moved; (2) the purpose of for which the swine are to be moved; (3) the points of origin and destination; (4) the consignor and the consignee; and (5) any additional information required by this part.

(cc) **Certificate.** An official document issued for and prior to the interstate movement of swine not known to be infected with, exposed to or vaccinated for pseudorabies under this part by a Veterinary Services representative, a State representative, or an accredited veterinarian which states: (1) The number and description of the swine to be moved; (2) that the swine to be moved are not infected with or exposed to pseudorabies and are not official vaccinates; (3) the purpose for which the swine are to be moved; (4) the points of origin and destination; (5) the consignor and consignee; and (6) any additional information required by this part.

(dd) **Qualified Pseudorabies Negative Herd.** A herd of swine, none of which has been vaccinated for pseudorabies, and in which all swine over 6 months of age have been tested negative to an official pseudorabies test on the qualifying test as described in the Minimum Standards. The status of the herd is maintained by an official pseudorabies test of at least 25 percent of the swine over 6 months of age every 90 days and finding all swine so tested negative. No swine is to be tested twice in one year to comply with the 25 percent requirement. All swine over 6 months of age in the herd shall be subjected to the official pseudorabies test during the year. A minimum of 90 percent of the swine must have been on the premises and part of the herd for at least 90 days prior to the qualifying test or have entered directly from another qualified pseudorabies negative herd. All additions to the herd must test negative to an official pseudorabies test not more than 30 days before being added to the herd or be from another qualified pseudorabies negative herd.

(ee) **Pseudorabies Controlled Vaccinated Herd.** A herd of swine in which all of the swine over 6 months of age are negative to an official pseudorabies test and are vaccinated for pseudorabies within 10 days after such test. The status of the herd is maintained by an official pseudorabies test of 25 percent of the offspring between 3 and 4 months of age and finding all swine so tested negative. All additions to the herd must test negative to an official pseudorabies test, be vaccinat-

ed for pseudorabies within 10 days after such test, and be added to the herd not more than 30 days after such test.

(ff) **Minimum Standards.** The Minimum for Veterinary Services Participation in Cooperative Pseudorabies (PR) Programs recommended by the United States Animal Health Association, and approved as amended, by Veterinary Services, May 17, 1978.¹

(gg) **Approved Livestock Market.** A stockyard, livestock market, buying station, concentration point or any other premises under State or Federal veterinary supervision where swine are assembled for sale or sale purposes, and which has been approved by the Deputy Administrator under § 76.18.

(hh) **Swine not known to be infected with or exposed to pseudorabies.** Any swine from a herd of swine in which no animal has been classified as a reactor to an official pseudorabies test, or has been diagnosed as having pseudorabies or suspected of having pseudorabies by a veterinarian.

§ 85.2 Notice relating to the existence of the contagion of pseudorabies.

Notice is hereby given that there is reason to believe that the contagion of pseudorabies may exist in each State and that to prevent the spread and dissemination of the contagion thereof, and to protect the livestock of the United States, the regulations in this part are promulgated.

§ 85.3 General restriction.

Livestock shall not be moved interstate except in compliance with the regulations in this part.

§ 85.4 Interstate movement of livestock.

(a) Livestock showing clinical evidence of pseudorabies shall not be moved interstate.

(b) Livestock that have been exposed to an animal showing clinical evidence of pseudorabies shall not be moved interstate within 21 days of such exposure.

(c) Except as provided in paragraphs (a) and (b) of this section, livestock other than swine may be moved interstate without restriction under this part.

(d) Except as provided in paragraphs (a) and (b) of this section, swine, semen, and swine embryos shall be moved interstate only in compliance with the regulations in this part.

¹Copies of the May 17, 1978, Minimum Standards for Veterinary Services Participation in Cooperative Pseudorabies (PR) Programs are available upon request from Veterinary Services, Animal and Plant Health Inspection Service, United States Department of Agriculture, Federal Building, Hyattsville, Md. 20782.

§ 85.5 Interstate movement of infected swine or exposed swine.

Infected swine or exposed swine, other than swine described in § 85.4 (a) or (b), shall only be moved interstate in accordance with the following provisions:

(a) **Movement of infected or exposed swine for slaughter.** Infected or exposed swine shall be moved interstate for slaughter only if:

(1) The swine are moved directly to a recognized slaughtering establishment or directly through no more than one slaughter market and then directly to a recognized slaughtering establishment;

(2) The swine are accompanied by a permit and such permit is delivered to the consignee;

(3) The permit in addition to the information described in § 85.1(bb) lists the identification tag, tattoo, ear notch recognized by a breed association, or similar identification of each animal being moved; and

(4) The swine are moved to destination in one continuous movement without unloading enroute.

(b) **Movement of exposed swine to a quarantined herd or a quarantined feedlot.** Exposed swine shall be moved interstate directly to a quarantined herd or a quarantined feedlot only if:

(1) The swine are negative to an official pseudorabies test 21 days or more after last being exposed to any livestock showing clinical evidence of pseudorabies;

(2) The swine are officially vaccinated for pseudorabies within 10 days after the negative test;

(3) The swine are moved interstate within 30 days after the negative test;

(4) The swine are accompanied by a permit and such permit is delivered to the consignee; and

(5) The permit, in addition to the information described in § 85.1(bb), states: (i) The present pseudorabies quarantine status of the farm of origin; (ii) the identification tag, tattoo, ear notch recognized by a breed association, or similar identification of each animal being moved; (iii) the date of the official pseudorabies test and the name of the laboratory where the test was conducted; (iv) the date of the official vaccination for pseudorabies; and (v) that approval for the interstate movement has been issued by the State animal health official of the State of Destination prior to the interstate movement of the swine.

§ 85.6 Interstate movement of pseudorabies vaccinate swine not known to be infected with or exposed to pseudorabies.

Pseudorabies vaccinate swine not known to be infected with or exposed to pseudorabies shall only be moved interstate only in accordance with the following provisions:

(a) *Movement of pseudorabies vaccine swine for slaughter.* Pseudorabies vaccine swine not known to be infected with or exposed to pseudorabies shall be moved interstate for slaughter only if:

(1) The swine are moved directly to a recognized slaughtering establishment or directly through no more than one slaughter market and then directly to a recognized slaughtering establishment;

(2) The swine are accompanied by a permit and such permit is delivered to the consignee; and

(3) The swine are moved to destination in one continuous movement without unloading enroute.

(b) *Movement of pseudorabies vaccine swine to a quarantined herd or quarantined feedlot.* Pseudorabies vaccine swine not known to be infected with or exposed to pseudorabies shall be moved interstate directly to a quarantined herd or quarantined feedlot only if:

(1) The swine are accompanied by a permit and such permit is delivered to the consignee; and

(2) The permit in addition to the information described in § 85.1(bb) states: (i) The pseudorabies status of the herd; (ii) the identification tag, tattoo, ear notch recognized by a breed association, or similar identification of each animal being moved; (iii) the date of the official vaccination for pseudorabies; and (iv) that approval for the interstate movement has been issued by the State animal health official of the State of destination prior to the interstate movement of the swine.

§ 85.7 Interstate movement of nonpseudorabies vaccine swine not known to be infected with or exposed to pseudorabies.

Non pseudorabies vaccine swine not known to be infected with or exposed to pseudorabies shall only be moved interstate in accordance with the following provisions:

(a) *Movement for slaughter.* Nonpseudorabies vaccine swine not known to be infected with or exposed to pseudorabies may be moved interstate for slaughter without further restriction under this part.

(b) *Movement to a feedlot, quarantined feedlot, quarantined herd, or approved livestock market.* Nonpseudorabies vaccine swine not known to be infected with or exposed to pseudorabies shall be moved interstate directly to a feedlot, quarantined feedlot, quarantined herd, or to an approved livestock market for subsequent movement directly to a feedlot, quarantined feedlot or quarantined herd only if:

(1) The swine are from a qualified pseudorabies negative herd, in which instance such swine may be moved interstate without further restriction under this part; or

(2) The swine are accompanied by a certificate and such certificate is delivered to the consignee;

(3) The certificate in addition to the information described in § 85.1(cc) states: (i) The identification of the farm of origin of each animal being moved by an ear notch recognized by a breed association, identification tag, tattoo, or similar identification; and (ii) approval for the interstate movement has been issued by the State animal health official of the State of destination prior to the interstate movement of the swine; and

(4) The swine are moved from a State which requires the State animal health official of that State to be immediately notified of any suspected or confirmed case of pseudorabies in that State and which requires that exposed or infected livestock be quarantined, such quarantine to be released only in conformance with the Minimum Standards: Except, That this provision shall only be effective 1 year after the effective date of this part.

(c) *Other movements.* Non pseudorabies vaccine swine not known to be infected with or exposed to pseudorabies shall be moved interstate other than for slaughter and other than directly to a feedlot, quarantined feedlot, quarantined herd or to an approved livestock market for subsequent movement directly to a feedlot, quarantined feedlot or quarantined herd only if:

(1) The swine are accompanied by a certificate and such certificate is delivered to the consignee; and

(2) The certificate in addition to the information described in § 85.1(cc) states: (i) The identification tag, tattoo, ear notch recognized by a breed association, or similar identification of each animal being moved; and (ii) that each animal to be moved: (a) was subjected to an official pseudorabies test within 30 days prior to the interstate movement and was found negative, the test date and the name of the laboratory conducting the test; or (b) is part of a currently recognized qualified pseudorabies negative herd and the date of the last qualifying test; or, (c) is part of a pseudorabies controlled vaccinated herd and is one of the offspring that was subjected to the official test to achieve or maintain the status of the herd as a pseudorabies controlled vaccinated herd, and the date of the last test to maintain said status.

§ 85.8 Other interstate movements.

The Deputy Administrator may, upon request in specific cases, permit the interstate movement of livestock not otherwise provided for in this part under such conditions as he may prescribe to prevent the spread of pseudorabies.

§ 85.9 Interstate movement of swine semen and swine embryos for insemination of or implantation into swine.

Swine semen and swine embryos moved interstate for insemination of swine or implantation into swine shall be accompanied by a document issued by an accredited veterinarian stating that the donor swine are not known to be infected with or exposed to pseudorabies, were negative to an official pseudorabies test within 30 days prior to the collection of the semen or embryos or were members of a qualified pseudorabies negative herd, and had not been exposed to pseudorabies within 30 days prior to the collection of the semen or embryos.

§ 85.10 Permits and certificates.

(a) Each permit or certificate required under this part to accompany swine interstate shall be delivered with the swine to the consignee by the person delivering the swine.

(b) A copy of each permit or certificate required under this part to accompany swine interstate shall be mailed or delivered to the State animal health official of the State of destination by the person issuing the document within 3 days of the interstate movement of the swine covered by said document.

§ 85.11 Maintenance of records.

(a) The consignor of non pseudorabies vaccine swine not known to be infected with or exposed to pseudorabies which are moved interstate directly to a feedlot, quarantined feedlot, quarantined herd, or to an approved livestock market for subsequent movement directly to a feedlot, quarantined feedlot or quarantined herd shall maintain records whereby individual swine can be traced to the farm of origin.

(b) Such records shall be maintained for two (2) years after the swine are moved interstate by the consignor, and such records shall be made available to the State animal health official or Veterinary Services representative on request.

§ 85.12 Cleaning disinfecting means of conveyance.

All means of conveyance used in connection with the interstate movement of pseudorabies infected or exposed livestock shall be cleaned and disinfected in accordance with § 76.30 of this chapter using one of the disinfectants registered under the Federal Insecticide, Fungicide and Rodenticide

Such records shall list: (1) The names and addresses of the consignor and consignee; (2) the identification tag, tattoo, ear notch recognized by a breed association, or similar identification of each animal moved; and (3) the date of the shipment.

Act, as amended (7 U.S.C. 135 et seq.) with herpes virucidal claims. These disinfectants shall be used in accordance with directions on their labels accepted in connection with their registration.

§ 85.13 Cleaning and disinfecting livestock markets and other facilities.

Livestock markets and other facilities used in connection with the interstate movement of pseudorabies infected or exposed livestock shall be cleaned and disinfected in compliance with § 76.31 of this chapter using one of the disinfectants registered under the Federal Insecticide, Fungicide and Rodenticide Act, as amended (7 U.S.C. 135 et seq.) with herpes virucidal claims. These disinfectants shall be used in accordance with directions on their labels accepted in connection with their registration.

All written submissions made pursuant to this notice will be made available for public inspection at the Federal Building, Room 714, 6505 Belcrest Road, Hyattsville, Md., during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27(b)).

Comments submitted should bear a reference to the date and page number of this issue in the FEDERAL REGISTER. Done at Washington, D.C., this 17th day of May 1978.

NOTE: The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

PIERRE A. CHALOUX,
Deputy Administrator,
Veterinary Services.

DEPARTMENT OF COMMERCE

Bureau of Economic Analysis

[15 CFR Part 806]

DIRECT INVESTMENT SURVEYS

Mandatory Reporting Requirement

AGENCY: Bureau of Economic Analysis, Commerce.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document proposes a regulation regarding the institution of a mandatory reporting requirement for an annual statistical survey of foreign-owned U.S. business enterprises. The purpose of this amendment is to further implement the President's responsibilities under the International Investment Survey Act of 1976. These responsibilities were delegated to the

Secretary of Commerce in Section 3 of Executive Order 11961 of January 19, 1977.

DATE: Comments must be received on or before June 26, 1978.

ADDRESSES: Send comments to: U.S. Department of Commerce, Bureau of Economic Analysis, International Investment Division (BE-50), Washington, D.C. 20230. All comments, material, questions, etc., in response to this proposal will be available of public inspection during normal business hours, 8:30 a.m. to 5 p.m., in Room 608, 1401 K Street NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

George R. Krueger, Chief, International Investment Division, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, D.C. 20230, 202-523-0657.

SUPPLEMENTARY INFORMATION: On December 22, 1977 the Department published final rules implementing the duties and authority delegated to it by the President in section 3 of Executive Order 11961 of January 19, 1977 to carry out the International Investment Survey Act of 1976 (Pub. L. 94-472, 90 Stat. 2059, 22 U.S.C. 3101-3108). Section 806.15(f)(1) of those rules read as follows: "BE-15—Annual Survey of Foreign Direct Investment in the U.S.—this form is not required at this time, but a notice of proposed rulemaking concerning it will be inserted in the FEDERAL REGISTER at a later date."

This notice of proposed rulemaking is to inform the public that a BE-15 survey form has been prepared and to invite public comment on the reporting requirements.

The BE-15 survey will be an annual survey and the first year of coverage is to be 1977. A report must be filed by each U.S. business enterprise which is owned or controlled, directly or indirectly, by one foreign person to the extent of 10 percent or more of the voting securities of an incorporated business enterprise or an equivalent interest if an unincorporated business enterprise. Such an enterprise, based on consolidated data where applicable, will not be required to report if: (a) Each of the following three items for the enterprise (not the foreign parent's share) was between -\$5,000,000 and +\$5,000,000 during the reporting period: (1) Total assets, (2) net sales or gross operating revenues, excluding sales taxes, and (3) net income after provision for U.S. income taxes; and (b) the enterprise did not own 200 acres or more of land. If the enterprise owned 200 acres or more of land, it must report regardless of the value of the three items listed above.

The due date of the reports will be set to fall not less than 60 days after

the survey forms are mailed to potential respondents.

The legal authorities, provisions, definitions and requirements presently contained in 15 CFR Part 806 pertaining to foreign direct investment in the United States are applicable to this BE-15 report form.

NOTE.—The Department of Commerce has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

It is therefore proposed to modify Part 806, 15 CFR, as set forth below.

JUANITA M. KREPS,
Secretary.

In § 806.15, paragraph (f)(1) is revised to read as follows:

§ 806.15 Foreign direct investment in the United States.

(f)(1) BE-15—Annual Survey of Foreign Direct Investment in the United States—one report is required for each U.S. affiliate, as consolidated, exceeding an exemption level of \$5,000,000, except that a U.S. affiliate which owns 200 acres or more of land must report regardless of the value of the items on which the exemption level is based, i.e., total assets, net sales or gross operating revenues excluding sales taxes, and net income after income taxes, whether positive or negative.

NOTE.—This survey will not be conducted for the year for which a BE-12, Benchmark Survey of Foreign Direct Investment in the U.S., is conducted.

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 230]

[Release No. 33-5933, IC-10242, File No. S7-742]

"ANNUITY CONTRACTS" AND "OPTIONAL ANNUITY CONTRACTS"

Proposed Rule Interpreting Exemptive Provisions

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rule.

SUMMARY: The Commission, as a result of the study by its Division of Investment Management of certain contractual arrangements issued by insurance companies, proposes a rule interpreting section 3(a)(8) of the Securities Act of 1933 ("Act"). The purpose

of the proposed rule is to provide guidance in determining when a contract, though issued by an insurance company and styled an "annuity," is ineligible for the section 3(a)(8) exemption and required, unless another exemption is available, to be registered pursuant to section 5 of the Act. The proposed rule sets forth a number of factors which are to be considered in determining the status under the federal securities laws of a contract issued by an insurance company.

DATE: Comments must be received on or before July 17, 1978.

ADDRESSES: Comments should be sent in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. All submissions will be made available for public inspection at the Commission's Public Reference Section, Room 6101, 1100 L Street NW., Washington, D.C. 20005 and should refer to file No. S7-742.

FOR FURTHER INFORMATION CONTACT:

Peter Ambrosini, 202-755-0230 or Laura Boughan, 202-755-0233, Division of Investment Management, Securities and Exchange Commission, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission today announced that its Division of Investment Management ("Division") has completed its inquiry into the status under the federal securities laws of certain contracts issued by insurance companies, including what are generally known as guaranteed investment contracts, tax-deferred annuity contracts and similar products. The staff's inquiry was announced in Securities Act Release No. 5838 (42 FR 32861, June 28, 1977), which solicited public comments on the ways in which guaranteed investment contracts are similar to and different from traditional deferred annuities.

SCOPE OF STUDY

The staff's study related to certain contracts issued and funded by the general account of an insurance company, which have not been registered under the Act (15 U.S.C. 77a et seq.) in reliance upon section 3(a)(8) thereof (15 U.S.C. 77c(a)(8)). Section 3(a)(8) exempts from the registration requirements of the Act "any insurance or endowment policy or annuity contract or optional annuity contract, issued by a corporation subject to the supervision of the insurance commissioner, bank commissioner or any agency or officer performing like functions, or any State . . ." However, the exemption is not necessarily available to all products labeled insurance policies or annuity contracts. As the Supreme

Court held in *Securities and Exchange Commission v. Variable Annuity Life Insurance Company of America*, 359 U.S. 65 (1959), the meaning of "annuity" under the federal securities laws is a federal question.

Because new types of contracts which were often promoted as investments were being issued by insurance companies, the Division instituted a study of these new contracts with a view to determining their status under the federal securities laws.

The study was announced by the Commission in Securities Act Release No. 5838, which requested public comment on the ways in which the new contracts, commonly called guaranteed investment contracts, are different from and similar to traditional deferred fixed annuities. The release stated that the following factors were of concern to the staff:

1. Advertising emphasizing investment;
2. Provision for payment of interest in excess of a guaranteed rate;
3. Short term contracts;
4. Annuity purchase rates subject to change;
5. State insurance law.

The Commission received numerous comments in response to the release, expressing various points of view. Contracts and sales literature were also submitted and reviewed by the Division.

After analysis of the comments, contracts, and sales literature, it is the position of the Commission that many contracts, developed within the past several years and now being sold, are sufficiently different in their terms and in the manner in which they are sold from annuity contracts offered prior to that time so as to raise serious questions as to the availability of the section 3(a)(8) exemption. Many such contracts appear to be treated in the commercial world as investments.

The proposed rule sets forth conditions under which contracts, though styled "annuities," will not be deemed to be annuities exempt from the registration provisions of the Act pursuant to section 3(a)(8).

"NO-ACTION" POSITIONS

On March 18, 1977, the Division stated, in response to a request based upon section 3(a)(2) of the Act (15 U.S.C. 77c(a)(2)), that it would not recommend enforcement action under the Act if guaranteed investment contracts were sold to corporate pension or profit-sharing plans qualified under section 401 of the Internal Revenue Code of 1954, as amended, without registration under the Act. Provided, That such plans meet certain conditions.¹

The Division also has taken a "no-action position" with respect to the

¹Letter dated Mar. 18, 1977, to the American Council of Life Insurance.

offer and sale of guaranteed investment contracts to certain H.R. 10 plans which have received Commission orders of exemption under section 3(a)(2) of the Act.²

These "no-action" assurances remain in effect and would not be modified by enactment of the proposed rule. Thus, if the rule is adopted as proposed, guaranteed investment contracts may continue to be sold without registration under the Act to tax-qualified pension and profit-sharing plans which meet the conditions set forth in the Division's letters.

OTHER REGULATORY CONSIDERATIONS

While the Commission is requesting comments only with respect to the proposed rule, it is appropriate to bring to the attention of those concerned that where a significant portion of a company's business is the issuing of contracts which must be registered under the Act that company may be subject to the provisions of the Investment Company Act of 1940 ("1940 Act"). Such a company may not meet the definition of "insurance company" set forth in section 2(a)(17) of the 1940 Act (15 U.S.C. 80a-2(a)(17)) and, in that event, would not be exempt from the provisions of the 1940 Act pursuant to section 3(c)(3) thereof (15 U.S.C. 80a-3(c)(3)).

SYNOPSIS OF PROPOSED RULE

PRELIMINARY NOTE

The operative provisions of the proposed rule are preceded by a preliminary note, which provides a brief summary of the purpose of the proposed rule and the manner in which it will operate.

The purpose of the proposed rule is to set forth criteria which will make the section 3(a)(8) exemption unavailable to a contract or contractual arrangement issued by an insurance company. In some cases the terms of the contract alone will determine that it will not be regarded as an annuity exempt from registration. In other cases, the interaction between the contract's terms and the manner in which it is sold will lead to the same conclusion.

DEFINITIONS

Paragraph (a) of the proposed rule contains definitions of three terms: "deposit fund rider"; "permanent annuity purchase rate guarantee"; and "participating contract."

A "deposit fund rider" is a provision of, or associated with, a life insurance or annuity contract. Under such a provision, funds may be deposited with

²See letters dated Dec. 14, 1977, to Covington & Burling, and Mar. 7, 1978, to The Aetna Life & Casualty Co.

the insurance company to accumulate with interest and may be withdrawn by the depositor without significant penalty. The purchaser usually has the option to use accumulated funds to purchase an annuity. However, the contractual arrangement is designed and marketed as a savings vehicle which may be used to accumulate capital on a tax deferred basis.

The term "permanent annuity purchase rate guarantee" is defined as a guarantee, which the issuer cannot unilaterally modify, of a level of annuity benefits to be provided by the insurance company at a future certain date in return for funds accumulated under the contract.

The term "participating contract" is defined as a contract pursuant to which the issuer may declare interest in excess of the guaranteed rate in accordance with provisions of its charter or by-laws which require the allocation of the insurance company's divisible surplus and/or provisions of state insurance laws or regulations. Participating contracts have traditionally been issued primarily by mutual life insurance companies and generally are not regarded in the commercial world as investments.

CONTRACTS NOT ANNUITIES

Paragraph (b) of the proposed rule describes certain classes of contracts which will not be regarded as eligible for the exemption from registration provided in section 3(a)(8) of the Act. In two cases, the provisions of the contracts cause the exemption to be unavailable, while in the third case consideration is given to circumstances surrounding the sale.

1. Contracts without permanent annuity purchase rate guarantees.—The guarantee of a fixed level of income, continuing for a lifetime, which cannot be changed or revoked, is perhaps the most important feature of annuities as they were known at the time the Act was passed. Without such a guarantee, the only reason for purchasing an annuity would be to obtain interest on which Federal income taxes are deferred. Therefore, a contract which does not contain permanent guaranteed annuity purchase rates will not be deemed an exempt annuity.

2. Contracts which contain deposit fund riders.—A deposit fund rider is an alternative to a savings account. The Division of Corporation Finance, in declining to take a no-action position, has expressed the view that such arrangements are securities for which no exemption from registration is available.³ The proposed rule reaffirms that position.

³See letters of May 7, 1973, June 25, 1973, December 16, 1974, and April 21, 1975, to Ideal National Insurance Co.

3. Contracts which are primarily investments.—The determination whether a contract is primarily insurance or primarily an investment involves, under this section, consideration of both the contractual terms and the manner of sale. The status of a contract under the Federal securities laws depends upon the totality of the circumstances surrounding the sale of that contract. Thus, it is necessary to consider more than the terms of the contract in many cases.

FACTORS TO BE CONSIDERED

Paragraph (c) of the proposed rule sets forth specific factors which are to be considered in making the determination called for by paragraph (b)(3).

(1) *Short-term Contracts.* Some contracts styled as annuities are written for a relatively short term, perhaps five to twelve years, and guarantee, for the entire term, a relatively high rate of interest. At the end of the contract term, the participant may have certain rights, including the right to leave his accumulated funds with the company, where interest will be credited at a minimal rate, or to "roll over" his accumulation into a new contract with new interest rate and annuity purchase rate guarantees.

When a short-term contract is sold to an individual who, because of his or her age, cannot reasonably be expected to annuitize by the time the initial term of the contract ends, the contract cannot be regarded as an exempt annuity. The purpose of the contract, in this situation, is to provide a means for tax-deferred capital accumulation.

(2) *Permanent annuity purchase rate guarantees which are not meaningful.* When guaranteed annuity purchase rates provide significantly lower benefits than are otherwise commercially available, the contract may be regarded as an investment rather than an annuity, particularly where its investment aspects are emphasized in marketing, or where the contract also contains provisions for the discretionary payment of excess interest.

(3) *Discretionary determination of excess interest.* Many contracts issued by insurance companies provide that the company may, in its sole discretion, declare interest in excess of the guaranteed rate. As the note to this section explains, provision for discretionary excess interest does not, in itself, mean a contract is not an exempt annuity. Rather, it is an indication that the contract may be an investment. If other factors contained in paragraph (c) are present, especially a marketing program emphasizing investment potential, registration of the contract may be required.

Traditional participating contracts are excluded from this section. They are not regarded as investments, and their exempt status would not be affected by the proposed rule.

(4) *Marketing as an investment.* This section involves consideration of circumstances in addition to the terms of the contract. Sales literature, advertising in print and electronic media, and representations by salespersons may all affect the determination as to whether a contract is primarily an investment.

AUTHORITY

Rule 154 would be adopted pursuant to the authority contained in section 19(a) of the Act (15 U.S.C. 77s(a)).

It is proposed to amend Part 230 of Chapter II of Title 17 of the Code of Federal Regulations by adding new § 230.154 as follows:

§ 230.154 "Annuity contract" or "optional annuity contract" for purposes of section 3(a)(8).

PRELIMINARY NOTE

"Annuity contracts" and "optional annuity contracts" are exempt from the registration provisions of the Act pursuant to section 3(a)(8). However, a variety of contracts and contractual arrangements, including some which are very different from contracts commonly in use at the time the Act was passed, have been labelled "annuities." Some of these are securities within the meaning of section 2(1) of the Act (15 U.S.C. 77b(1)), are regarded in the commercial world as investments, and are not contracts intended to be covered by section 3(a)(8). The purpose of Rule 154 is to provide criteria which will aid issuers and others in determining whether a contract, though issued by an insurance company and styled an "annuity," is outside the exemption from registration provided by section 3(a)(8) of the Act, and is required to be registered pursuant to section 5 of the Act.

In some instances, the provisions of a contract may, by themselves, cause the section 3(a)(8) exemption to be unavailable to that contract. A contract which does not provide, at its inception, a guaranteed, fixed annuity benefit cannot be regarded as an annuity exempt from registration. Similarly, the exemption is not available to a "deposit fund rider," the functional equivalent of an account maintained by a bank or savings and loan institution but not subject to any banking authority.

However, in determining the status of a contract under the federal securities laws, it will often be necessary to consider the totality of the circumstances surrounding the sale of that contract, including both the terms of the contract and the manner in which it is sold. Considered together, a contract's terms and the manner in which it is sold may cause such contract to be primarily an investment rather than an exempt annuity. The factors to be considered in making such a determination are set forth in paragraph (c) of the rule.

(a) *Definitions.* The following definitions shall apply for purposes of this rule.

(1) The term "deposit fund rider" shall mean a provision of, or associated with, a life insurance or annuity contract which permits the accumulation of funds with interest which may be applied to the purchase of an annuity.

ity and which permits withdrawal without significant penalty.

(2) The term "permanent annuity purchase rate guarantee" shall mean a guarantee provided in a contract at the date of issue which (i) specifies the level of annuity benefits to be provided by the issuer at a future certain date in return for the funds to be accumulated by the purchaser pursuant to the contract, and (ii) cannot be modified unilaterally by the issuer.

(3) The term "participating contract" shall mean a contract pursuant to which purchasers may receive additional interest or dividends to be declared by the issuer in accordance with its charter or bylaws requiring the allocation of its divisible surplus and/or in accordance with any applicable state laws or regulations which govern "participating contracts" or which prohibit discrimination in the allocation of divisible surplus among various classes or groups of contractholders.

(b) *Contracts not annuities.* The terms "annuity contract" and "optional annuity contract" as used in section 3(a)(8) of the Act shall not include contracts where:

(1) The contract contains no permanent annuity purchase rate guarantee;

(2) The contract is a deposit fund rider; or

(3) Considering the terms of the contract and the manner in which it is sold, the contract is primarily an investment.

(c) In determining whether a contract is primarily an investment, the following factors will be considered:

(1) Whether the initial term of the contract ends prior to a date on which the purchaser may reasonably expect to elect to begin receiving annuity payments;

(2) Whether the permanent annuity purchase rate guarantee provides for a level of benefits which is substantially less than otherwise commercially available;

(3) Whether the contract provides for determination of interest in excess of the guaranteed rate at the discretion of the issuer, except for participating contracts; and

(4) Whether the contract is marketed as an investment. In determining how a contract is marketed, consideration will be given to the contents of advertisements and sales literature, as well as to representations made or authorized to be made by persons engaged in sale and distribution, activities.

(d) Under paragraph (c) of this section, provision for discretionary determination of excess interest by the insurer in a contract does not, in itself, mean that such contract is not an annuity exempt from registration. Similarly, the presence of guarantees of benefits substantially less than otherwise available by itself will not cause

an otherwise exempt contract to be nonexempt. However, either of these factors in conjunction with how the contract is marketed may cause the section 3(a)(8) exemption to be unavailable.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

MAY 17, 1978.

Food and Drug Administration

[21 CFR Parts 182, 184]

[Docket No. 78N-0015]

INOSITOL

Proposed Affirmation of Gr^{as} Status as a
Direct Human Food Ingredient

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This is a proposal to affirm the generally recognized as safe (GRAS) status of inositol as a direct human food ingredient. The safety of this ingredient has been evaluated pursuant to the comprehensive safety review being conducted by the agency. The proposal would list the ingredient as a direct food substance affirmed as GRAS.

DATE: Comments by July 24, 1978.

ADDRESS: Written comments to the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Corbin I. Miles, Bureau of Foods (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204, 202-472-4750.

SUPPLEMENTARY INFORMATION: A comprehensive study of human food ingredients classified as GRAS or subject to a prior sanction is being conducted by the Food and Drug Administration (FDA). The Commissioner of Food and Drugs has issued several notices and proposed regulations, published in the FEDERAL REGISTER of July 26, 1973 (38 FR 20040), initiating this review. Pursuant to this review, the safety of inositol has been evaluated. In accordance with the provisions of § 170.35 (21 CFR 170.35), the Commissioner proposes to affirm the GRAS status of this ingredient.

Inositol is the common name for the family of isomeric

hexahydroxycyclohexanes. Although there are several optically active and inactive isomers, considerations of inositol, or myo-inositol, as a food additive refer specifically to optically inactive 1,2,3,5,6-cyclohexanehexol. Inositol is obtained commercially from an aqueous (0.2 percent sulfur dioxide) extract of corn kernels by precipitation and hydrolysis of crude phytate. Inositol is also a widely distributed natural constituent of plant and animal tissues. The animal tissues richest in inositol are brain, heart, stomach, kidney, spleen, and liver where it occurs free or as a component of phospholipids. Among plants, cereals are rich sources of inositol particularly in the form of polyphosphoric acid esters, called phytic acids.

Inositol was thought for a time to be a vitamin because experimental animals, on synthetic diets, developed clinical signs that were corrected by inositol supplementation. However, the status of inositol as a vitamin is questionable because no cofactor or catalytic function for inositol has been found and because it can be synthesized and occurs in relatively high concentration in tissues. Although there is no direct evidence of a dietary requirement of inositol in adult humans subsisting on mixed and varied diets, it may be reasonable to put inositol in certain special dietary foods. For example, milk contains inositol as a naturally occurring component, and the addition of 100 mg of inositol per liter (about 1.1 quart) of milk-free infant formula is current commercial practice. On the average, cow's milk contains 80 mg per liter. The inositol content of human milk, which is 450 mg per liter starting at birth, falls to about 210 mg per liter at 1 week after birth and to 90 mg per liter within 3 months.

Inositol is listed as GRAS in the broad food additive category of nutrients in § 182.5370 (21 CFR 182.5370), pursuant to a regulation published in the FEDERAL REGISTER of January 31, 1961 (26 FR 938).

A representative cross section of food manufacturers was surveyed to determine the specific foods in which inositol is used and the levels of usage. Information from surveys of consumer consumption was obtained and combined with the manufacturing information to obtain an estimate of consumer exposure to inositol. The total amount of inositol used in food in 1970 was estimated to be 12,000 pounds, or about 18 times that used in 1960. Most of this amount was used in milk-free infant formulas. Also some inositol is used in defined formula diets used solely under medical supervision for the dietary management of specific diseases and disorders.

Inositol has been the subject of a search of the scientific literature from

1920 to the present. The parameters used in the search were chosen to discover any articles that considered: (1) chemical toxicity, (2) occupational hazards, (3) metabolism, (4) reaction products, (5) degradation products, (6) any reported carcinogenicity, teratogenicity, or mutagenicity (7) dose response, (8) reproductive effects, (9) histology, (10) embryology, (11) behavioral effects, (12) detection, and (13) processing. A total of 596 abstracts on inositol was reviewed and 45 particularly pertinent reports from the literature survey have been summarized in a scientific literature review.

The scientific literature review shows, among other studies, the following information as summarized in the report of the Select Committee on GRAS Substances (hereinafter referred to as the Select Committee), selected by the Life Sciences Research Office of the Federation of American Societies for Experimental Biology:

Much of the biological information on inositol has resulted from studies of its possible role in nutrition as a lipotropic agent and its metabolic relationship to other carbohydrates. The particular role of inositol in human nutrition is poorly understood; neither is it clear how important dietary inositol is in the synthesis of the inositol-containing constituents of the tissues, versus inositol synthesized de novo from glucose or other carbohydrate sources.

Although inositol has demonstrable lipotropic activity, it is considerably less effective than choline. Under certain experimental conditions, inositol has a synergistic effect with choline, but inositol does not prevent hemorrhagic kidneys in young rats receiving a diet low in choline and methionine; indeed, it seems to increase the severity of the renal pathology in these animals. It also appears, at least in rats, that the lipotropic activity of inositol depends upon the dietary intake of other nutrients, particularly biotin and thiamin. Signs of inositol deficiency have been demonstrated in several species of animals, but these observations have been complicated by interactions with such nutrients as biotin, pyridoxine, choline, and p-aminobenzoic acid. Moreover, possible therapeutic uses of inositol in the management of adult patients with diseases associated with disturbances in fat transport and fat metabolism have failed to provide any convincing evidence of beneficial effects in man.

Biosynthesis of inositol from glucose via glucose-6-phosphate involves enzymes which catalyze the cyclization of glucose-6-phosphate (cyclase) and removal of the phosphate (phosphatase). These two enzymes are present in fetal rat liver but decrease in activity promptly after birth. Studies by Nixon on sheep fetuses suggest that fetal blood inositol is of fetal rather than maternal or placental origin. However, it was also observed that blood inositol concentration declines after birth which is suggestive of placental origin. While a possible explanation of these findings was offered, the question regarding the site of inositol synthesis was not resolved. Naccarato and Wells have recently isolated a new disaccharide containing galactose and inositol (6-0-B-D-galactopyranosyl myo-inositol) from the mammary gland of the lactating rat.

While the significance of this inositol derivative is not known, its discovery emphasizes the importance of further investigations on inositol metabolism in early development.

In animals, ingested inositol appears to be absorbed slowly. Fasted rats given 250 mg of inositol orally (about 1.25 g per kg of body weight) required 24 to 48 hours for nearly complete absorption and only about one percent was excreted in the urine. Anderson found inositol (2 g per kg of body weight) to be absorbed very slowly in the dog and largely eliminated in the feces. The daily oral intake of 1.5 g of inositol in man for three weeks produced only a moderate increase in plasma inositol concentration. If given at a dose level of 0.5 g per kg body weight per day, inositol produced diarrhea in man, which subsided after a few days even with continued inositol administration; about 9 percent was excreted in the urine and the remainder of the ingested dose was not accounted for. Others have found that adults given 1 to 2 g of inositol per day for several weeks experienced no apparent harmful effects.

Stetten and Stetten demonstrated with deuterium-labeled inositol that a significant fraction of an intraperitoneal dose of 2 g, divided in four portions and given at 150-minute intervals, was converted to glucose in a phlorhizinized rat. Coots showed that intraperitoneal [¹⁴C] inositol is incorporated intact in complex tissue components, such as phospholipids, and is vigorously metabolized to CO₂ by the male rat. 20 to 40 percent of the dose being excreted in the respiratory CO₂ within 8 hours. Moscatelli and Lerner found significant amounts of parenteral [¹⁴C] inositol to be incorporated into lipids of the brain, liver, kidney, and heart of the rat. Howard and Anderson found that the kidney may be the major site of inositol metabolism since oxidation of labeled inositol to CO₂ did not occur in nephrectomized rats.

The maximum tolerated intraperitoneal dose of inositol in the mouse is 500 mg per kg of body weight. Human subjects have been given up to 4 g of inositol intravenously, dissolved in isotonic saline (up to about 67 mg per kg of body weight), without reported adverse reactions, although there was a reduction in basal metabolic rate.

Young Wistar rats weighing about 50 g were fed diets providing doses of inositol of 0.5, 5, 10, and 50 mg daily for 45 days. At a dose of 0.5 mg per day, weight gain was greater than in control animals, but at 50 mg per day (about 1 g per kg of body weight) there was retardation of growth, staining of the hair, and general hyposthenia. When the experiment was repeated in 3-month-old rats no growth inhibition occurred with daily oral inositol supplements up to 5 g per kg body weight for a month. Further studies in young rats showed that the growth inhibition by an inositol intake of 50 mg per day was largely prevented by increasing either the protein content or by adding choline to the basal diet. Interestingly, in earlier work, inositol fed to female rats for 60 days at a level of 1 g per kg body weight had no effect on growth rate. In these experiments the diet contained 30 percent casein and was supplemented with choline.

Herrmann fed 36 hens 0.5 g inositol daily for 30 to 68 days. Blood cholesterol decreased by about 20 percent, indicating that inositol acts as a decholesterizing agent in hens.

No long-term toxicity studies on inositol in animals have been reported.

Lazlo and Leuchtenberger and subsequently Hasselbach and Burke found that intravenously injected inositol inhibited the rate of growth of transplanted Sarcoma 180 in female mice. Inhibition was dose-related. Oral and subcutaneous administration were ineffective.

Inositol fed at 1 percent of the diet (about 2 g per kg body weight) for 60 days to female rats prior to mating had no effect on growth rate. In continuing feeding after mating, no effects were observed in reproductive performance, litter size, or weight of offspring, and no gross structural abnormalities were found in the offspring.

A study designed to evaluate mutagenic potential by several *in vitro* assay procedures revealed that inositol did not exhibit mutagenic activity. The assay procedures included estimation of reversion or conversion frequencies of three strains of *Salmonella typhimurium* and two strains of *Saccharomyces cerevisiae*, with and without activation by tissue homogenates derived from mouse, rat, or monkey liver, lung, or testis. Concentrations up to 5 percent inositol were used.

Inositol displayed no teratogenicity at levels up to 200 mg per kg when aqueous solutions were injected into the air cell or yolk of incubated eggs or eggs after 96 hours of incubation. An LD₅₀ could not be determined for any of the four test conditions. Scattered minor abnormalities were observed but in no instance were they significantly higher in incidence or different in nature from those observed in the solvent-treated or untreated control eggs.

Inositol, fed at a dose of 280 mg to patients with cancer of the gastrointestinal tract and elevated fat in their livers, with some expectation that it might reduce the fat content, decreased liver lipid to about the same extent as an 8 g dose of lipocaine, a crude mixture containing 2.6 percent choline and 3.5 percent inositol. Neither inositol nor lipocaine caused as great a reduction in hepatic lipid as did a 3 g dose of choline chloride. It should be noted that in rats, inositol had a lipotropic effect only when animals consumed a fat-free diet, and the effect was greater when choline also was given.

Hypercholesterolemic patients given 2 g inositol daily for 6 to 10 weeks showed slightly reduced blood levels of cholesterol and cholesterol esters, but the investigator did not consider the reduction to be significant. Attempts to treat high-tone deafness and alopecia with inositol were unsuccessful when 1 to 3 g daily were given orally in divided doses for as long as 12 months. These and other therapeutic trials indicate that appreciable amounts of inositol can be tolerated in the diet of adults without adverse effects.

All the available safety information on inositol has been carefully evaluated by qualified scientists of the Select Committee. It is the opinion of the Select Committee that:

Inositol is a naturally-occurring substance that is widely distributed in plant and animal tissues and synthesized in animals and man. Orally administered inositol is absorbed slowly and is metabolized. The available information from toxicological studies in animals suggests no adverse effects associated with consumption of inositol at levels considerably in excess of those now consumed by humans.

Despite the demonstration of signs of inositol deficiency in several animal species, no requirement for dietary inositol in man has been established. The high inositol concentration of human milk, and the relatively low concentration in cow's milk, together with the inadequate understanding of inositol metabolism and utilization during neonatal development in animals and man, suggest the possibility that basic infant formulas, particularly milk-free preparations, may contain less inositol than is necessary for optimal growth and development. The rationale for adding inositol to certain infant formulas is based on an assumption that the greater intake insures against a possible deficiency of inositol during early growth and development, when the need for dietary sources of inositol might be maximal. However, if future investigations should clearly demonstrate a need for additional inositol in infant formulas, and if that need should be greater than the amount now added, it is unlikely that the recommended level of intake would exceed that supplied by human milk.

It is the conclusion of the Select Committee that there is no evidence in the available information on inositol that demonstrates, or suggests reasonable grounds to suspect, a hazard to the public when it is used at levels that are now current or that might reasonably be expected in the future. Based upon his own evaluation of all available information on inositol, the Commissioner concurs with this conclusion. The Commissioner therefore concludes that no change in the current GRAS status of inositol is justified. He also affirms the GRAS status of inositol as a nutrient for use in special dietary foods. Such food shall conform to labeling regulations in 21 CFR Part 105 (formerly 21 CFR Part 125).

Copies of the scientific literature review on inositol, the mutagenic evaluation, and the report of the Select Committee are available for review at the office of the Hearing Clerk, Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, and may be purchased from the National Technical Information Service, 5285 Port Royal Road, Springfield, Va. 22151, as follows:

Title	Order No.	Price code	Price*
Inositol (scientific literature review).	PB-223-861/AS.	A04	\$5.25
Inositol (select committee report).	PB-262-660/AS.	A02	4.00
Inositol (mutagenic evaluation).	PB-245-433/AS.	A03	4.50

*Price subject to change.

This proposed action does not affect the present use of inositol for pet food or animal feed.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 701(a), 52 Stat. 1055, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348, 371(a))) and under authority delegated to him (21 CFR 5.1), the

Commissioner proposes that parts 182 and 184 be amended as follows:

PART 182—SUBSTANCES GENERALLY RECOGNIZED AS SAFE

§ 182.5370 [Deleted]

1. In part 182 by deleting the entry for § 182.5370 *Inositol*.

PART 184—DIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE

2. In part 184 by adding new § 184.1341 to read as follows:

§ 184.1341 Inositol.

(a) Inositol, or myo-inositol ($C_6H_{12}O_6$, CAS Reg. No. 000087-89-8) cis-1,2,3,4-trans-4, 6-cyclohexanhexol, occurs naturally and is prepared from an aqueous (0.2 percent sulfur dioxide) extract of corn kernels by precipitation and hydrolysis of crude phytate.

(b) The ingredient meets the specifications of the Food Chemicals Codex, 2d Ed. (1972).¹

(c) The ingredient is used as a nutrient supplement as defined in section 170.3(o)(20) of this chapter.

(d) The ingredient is used in food, in accordance with § 184.1(b)(1), at levels not to exceed good manufacturing practice. Current good manufacturing practice results in the use of this ingredient in infant formulas and other special dietary foods, as defined in part 105 of this chapter.

The Commissioner hereby gives notice that he is unaware of any prior sanction for the use of this ingredient in foods under conditions different from those proposed herein. Any person who intends to assert or rely on such a sanction shall submit proof of its existence in response to this proposal. The regulation proposed above will constitute a determination that excluded uses would result in adulteration of the food in violation of section 402 of the act, and the failure of any person to come forward with proof of such an applicable prior sanction in response to this proposal constitutes a waiver of the right to assert or rely on such sanction at any later time. This notice also constitutes a proposal to establish a regulation under part 181 (21 CFR part 181), incorporating the same provisions, in the event that such a regulation is determined to be appropriate as a result of submission of proof of such an applicable prior sanction in response to this proposal.

Interested persons may, on or before July 24, 1978, submit to the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written

¹Copies may be obtained from: National Academy of Sciences, 2101 Constitution Avenue NW., Washington, D.C. 20037.

comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

NOTE.—The Food and Drug Administration has determined that this proposal will not have a major economic impact as defined by Executive Order 11821 (amended by Executive Order 11949) and OMB Circular A-107.

Dated: May 12, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner
for Regulatory Affairs.

NOTE.—Incorporation by reference approved by the Director of the Office of Federal Register on July 10, 1973, and is on file in the Federal Register Library.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing—
Federal Housing Commissioner

[24 CFR Part 201]

[Docket No. R-78-535]

PROPERTY IMPROVEMENT AND MOBILE HOME LOANS

Refinancing of Loans

AGENCY: Department of Housing and Urban Development.

ACTION: Proposed rule.

SUMMARY: The proposed rules would extend the maximum permissible repayment terms for property improvement loans that are refinanced. They would permit certain refinanced obligations (primarily loans made for the improvement or rehabilitation of single family homes) to have a term of up to 15 years and 32 days provided that the new obligation would not mature later than 25 years from the date of the original obligation. The maximum term for other types of loans refinanced would be 12 years and 32 days provided that the new obligation would not mature later than 22 years from the date of the original obligation.

DATE: Comments must be received on or before June 22, 1978.

ADDRESS: Written comments should refer to the docket number and date and should be submitted to the Rules Docket Clerk, Office of the Secretary, Room 5218, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410.

FOR FURTHER INFORMATION CONTACT:

William B. Stansbery, Title I Loan Insurance Division, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-8686.

SUPPLEMENTARY INFORMATION:

The refinancing of property improvement loans is of significant aid in assisting homeowners who due to changed circumstances are unable to make the loan payments they originally contracted for. Refinancing enables such homeowners to lower their payments by lengthening the term of the loans.

Accordingly, the Department proposes to amend 24 CFR as follows:

§ 201.9 Refinancing.

(a) ***

(b) *Maximum maturity.* (1) A Class 1(a) loan may be refinanced for an additional period not in excess of 15 years and 32 days from the date of the refinancing, except that the term of the new note shall not extend beyond 25 years from the date of the original note.

(2) A Class 1(b) or 2 loan may be refinanced for an additional period not in excess of 12 years and 32 days from the date of the refinancing except that the term of the new note shall not extend beyond 22 years from the date of the original obligation.

(3) A Class 2(b) loan secured by a first mortgage, first deed of trust, or other security instrument constituting a first lien upon the improved property may be refinanced for an additional period not in excess of 15 years and 32 days from the date of the refinancing, except that the term of the new note shall not extend beyond 25 years from the date of the original obligation.

(4) A new note combining any of the above classes of loans shall not have a term in excess of the loan having the shortest permissible maturity.

(c) ***

(Sec. 7(d) 79 Stat. 670 (42 U.S.C. 3535(d)); sec. 2, 48 Stat. 1246 (12 U.S.C. 1703 as amended).)

Issued at Washington, D.C. May 16, 1978.

LAWRENCE B. SIMONS,
Assistant Secretary for Housing,
Federal Housing Commissioner.

VETERANS ADMINISTRATION

[38 CFR Part 21]

VETERANS EDUCATION

Policies and Procedures

AGENCY: Veterans Administration.

ACTION: Request for public comment.

SUMMARY: The Veterans Administration is publishing for public comment new and revised statements of policy and procedures which have been adopted by the Agency to implement the GI Bill Improvement Act of 1977. These policy and procedural statements will better acquaint veterans, eligible persons, educational institutions, and the public at large with the way in which this Act will be administered.

DATES: Comments must be received on or before June 22, 1978.

ADDRESSES: Send written comments to: Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420.

Comments will be available for inspection at the address shown above during normal business hours until July 3, 1978.

FOR FURTHER INFORMATION CONTACT:

June C. Schaeffer, Assistant Director for Policy and Program Adminis-

tration, Education and Rehabilitation Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420, 202-389-2092.

SUPPLEMENTARY INFORMATION: This publication contains DVB Circular 20-77-97, Appendix H. This appendix deals with the policy and procedures necessary to implement provisions of the GI Bill Improvement Act of 1977 which concern counseling. This appendix has been implemented and has or will be distributed through normal channels to interested persons.

ADDITIONAL COMMENT INFORMATION

Interested persons are invited to submit written comments, suggestions, or objections regarding this document to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until July 3, 1978. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Services Unit in room 132. Such visitors to a VA field station will be informed that the records are available for inspection only in Central Office and furnished the address and the above room number.

Approved: May 12, 1978.

By direction of the Administrator.

RUFUS H. WILSON,
Deputy Administrator.

(DVB Circular 20-77-97; Appendix H, Mar. 20, 1978)

EDUCATIONAL AND VOCATIONAL COUNSELING UNDER CHAPTER 34

1. *Purpose:* This appendix provides instructions regarding the amendments to 38 U.S.C. 1663 which mandate the provision of comprehensive counseling services to all eligible veterans requesting counseling and require the VA to conduct an effective outreach program to acquaint eligible veterans with the availability and advantages of such counseling assistance.

2. *Background:* Comprehensive educational and vocational counseling assistance has been available to eligible veterans under the GI Bill since its inception during World War II. Original provisions allowed the Administrator, at his discretion, to provide educational and vocational counseling to eligible veterans upon the request of the veteran. Later regulations required counseling in cases of unsatisfactory progress and prior to approval of some changes of program. Although voluntary counseling has been provided for under all GI Bill programs, the proportion of veterans utilizing this service during the Vietnam era program has been significantly lower than that during the earlier programs. As there is some indication that many veterans are not aware of VA's

counseling services and that many of those veterans would avail themselves of this assistance if they were fully aware of the benefit, the current amendments are intended to increase the emphasis placed upon voluntary counseling and to assure that the availability and advantages of this VA service are effectively communicated to eligible veterans. An additional aspect of the current amendments is to specifically define the purpose of such counseling assistance, as assisting the veteran in selecting "(1) an educational or training objective and an educational institution or training establishment appropriate for the attainment of such objective, or (2) an employment objective that would be likely to provide such veteran with satisfactory employment opportunities in light of such veteran's personal circumstances." The intent of this provision is to ensure a broadened scope of counseling services which will be available to, and meet the needs of eligible veterans whose present goal is employment as well as those who desire to enter a program of education or training. Accordingly, outreach efforts directed to all eligible veterans are planned as follows: (a) A nationwide media campaign advising of the availability and advantages of VA vocational and educational counseling; (b) modification of VADS mailouts to newly separated veterans encouraging counseling; (c) mailout of check stuffer (VA Form 22-878lu) to active chapter 34 veteran-trainees regarding available VA counseling (starting with a 10 percent sample, (terminal digits 50 through 59) in April 1978); (d) development of a special brochure-application form for requesting counseling under chapter 34. The number of chapter 34 counseling cases nationwide for fiscal year 1978 is expected to increase approximately 55 percent over last fiscal year, from 69,000 to 108,000 as a result of the implementation of these provisions of Pub. L. 95-202.

3. **Procedure:** Counseling requests from veterans with eligibility for chapter 34 benefits should be processed in accordance with existing instructions contained in M22-2, part II, chapters 1 and 2, and M22-1, part I, chapter 4. Timeliness as well as quality is essential in providing necessary services to veterans who request counseling assistance under chapter 34. An individual letter or, if appropriate, Form Letter 22-875 should be used if counseling must be deferred. Adequate station controls will be established to ensure that the requested counseling is provided as soon as possible. The extent and nature of counseling assistance provided should be geared to the individual needs of the veteran so as to enable each veteran to select, plan for, and reach his or her training or employment objective.

4. **Counseling process:** The comprehensive vocational and educational counseling process discussed in M22-1, part I, chapter 2, is for continued application in all requests from veterans for counseling under chapter 34. The expanded reference to counseling contained in the amendments to 38 U.S.C. 1663 warrant some discussion of implications for the overall counseling process. Renewed emphasis should be placed on assisting the veteran in identifying suitable educational or employment objectives by helping the veteran to learn more about his or her own vocational interests and abilities,

the opportunities for potential employment, and the availability of training programs. The opportunity should be provided for the veteran requesting counseling to go over his or her background, ambitions and other personal matters, in consideration of the following: (1) His or her aptitudes, interests and abilities; (2) the duties and employment outlook for various occupations and professions; (3) the veteran's chances of successfully completing various kinds of education and training; (4) information on where and how to enter on-the-job training, secondary school, trade school, college, and/or professional school; (5) information on the availability of various Federal Government programs of financial and employment assistance; (6) information on licensing requirements, labor unions, State and local laws, physical requirements, and other factors that may influence the veteran's choice of a training or employment objective. Some veterans may be unsure of their objective or feel a need to review current training program or future plans, while others may be experiencing problems or personal difficulties which may interfere with training. The counseling assistance provided should be that help needed to assist the veteran in reaching suitable training and/or employment goals. It becomes apparent to the counseling psychologist that the assistance needed is one of psychotherapy, or could be delivered with greater benefit to the veteran by referral to other counseling resources. appropriate referral should be made with full clarification and discussion of actions being taken provided to the veteran.

5. **Information requirements:** Comprehensive and current educational and occupational information must be available to the counseling staff in all offices where VA counseling is carried out. These resources should include materials on national, regional and local employment data and projections, specific job requirements, available training programs, and available Federal and local government programs such as CETA prime sponsor programs, VA work study, and other programs of financial and employment assistance. Every effort should be made to update this information frequently so that current and accurate information is available to veterans as specific needs arise. Possible use of State occupational information systems should be explored in those locations where available. Frequent staff inservice training sessions should be devoted to local employment trends, available employment resources (especially in regard to placement assistance and part-time employment while pursuing training), and requirements for taking advantage of available Federal and local government programs.

6. **Case Control and Followup:** In view of the PL 95-202 emphasis on expanding the outreach effort and providing comprehensive counseling assistance, it is imperative that proper attention be given to case control, followup and followthrough. All cases will be processed in the manner detailed in M22-1, part I, par. 4.08b, with the following additional considerations: (1) In situations where a veteran fails to keep a scheduled counseling appointment, an effort should be made to contact the veteran (by phone if possible) to see if a new, mutually agreeable

appointment can be set up. If the counselee declines a followup appointment at this time, the reason for such a decision should be sought and entered into the veteran's record before disposing of the case. If subsequent followup action is indicated, the case should be diaried for appropriate future contact. If direct contact with the veteran cannot be made, an individual letter or, if appropriate, FL 22-871 should be sent advising that counseling is still available; (2) If a veteran initiates counseling but does not complete the process to the point of selecting a training or employment objective, the reason for suspending counseling will be noted in the record and, if indicated, the case will be diaried for future contact; (3) If the veteran indicates the desire to defer education and training in favor of an employment objective, all indicated immediate assistance should be provided including referral to the State Employment Service for placement assistance if needed. The veteran should be further advised that if his/her personal circumstances or goals change, additional counseling assistance and further consideration of educational benefits may again be requested.

7. **Reporting format:** In order to evaluate the effectiveness of outreach efforts and the resulting workload, the following report (RCS 77-17) Report on Chapter 34 Requested Counseling, should be submitted monthly to the Field Director (042B21). Beginning with cases received in April (reporting cumulatively thereafter) and utilizing the regular cutoff date for the month, information should be in the following format:

REPORT ON CHAPTER 34 Requested Counseling (RCS 22-17)

- A. Cumulative No. of cases received ———.
B. Cumulative No. of cases disposed of with counseling ———.
(1) Training objective selected ———.
(2) Employment objective selected ———.
(3) Counseling suspended ———.

C. Cumulative No. of cases disposed of without counseling ———.

D. No. of cases pending disposition (sum of B, C, and D must total A). ———.

8. No local form or form letter will be developed for this purpose. Reports should reach Central Office by the 10th workday of each month. The first report will be due May 12, 1978.

IMPLEMENTATION OF THE CLEAN WATER ACT AMENDMENTS OF 1977

Correction

In FR Doc. 78-12929, appearing at page 20821 in the issue for Monday, May 15, 1978; the tables appearing on pages 20821 and 20822 should have appeared as printed below:

Short title and Section of Act	Brief Description	Estimated Date of Publication	Contact Name	Mail Code	Telephone
Construction Grant Regulations					
Proposed Amendments to 40 CFR Part 35 Subpart F (Construction Grants) covers the following topics:		5/1/78	M. Cook	WH-547	426-9404
Recreational Use 201(g)(1)	future State, interstate and intermunicipal grants must demonstrate that project planning has analyzed potential recreation and open space opportunities.				
Innovative Technology 201(g)(5), (11) 201(a)(2)(1)(3) 201(d)(3)	Several provisions to encourage the use of innovative and unconventional waste water treatment systems.				
Contract Enforcement 201(c)	Upon request, EPA may provide technical and legal assistance to administer and enforce contracts related to EPA grant-assisted treatment works.				
Interim/final amendments to 40 CFR Part 35 Subpart E covering the following topics:		5/1/78	M. Cook	WH-547	426-9404
State Priority 201(i)(1) 201/204/216	Establishes State authority to determine relative priority of their eligible project categories.				
201(g)(5), (16) 201(h)/205(h)(2)					
Grant Eligibility 211	Restricts the use of population data as test of eligibility of collector sewers; limits eligibility of these sewers and also makes separate storm sewers ineligible.				
Land Eligibility 212	Land for the storage of wastewater in a land treatment system is now grant eligible.				
Industrial Cost Recovery 201(b)(3) (b)(6)	Under certain conditions, small industrial dischargers with flows up to 25,000 gpd (requiring treatment comparable to domestic waste) may be exempted from industrial cost recovery.				
User Charges 201(b)(1) (5)	Specifies conditions where an ad valorem system may be used for user charges for residential and small non-residential users.				
Individual Systems 201(n)	Will make available grants to privately-owned treatment works where such projects will be more cost-effective than a central publicly-owned treatment works.				
Step 2/3 Combined 203(a)	Construction grants for steps 2 and 3 may be combined for projects under \$2 million serving grantee population up to 25,000.				
Buy America 215	Requires preference for the use of American-made products in treatment works funded by construction grants.				
Training Grants 201(b)(1) (2)(3)	Will provide for grants to cover expenses of State treatment works operator training programs, and raise the maximum grant to \$100,000.				
Cost Effectiveness Guidelines 201(j) 217	Regulations to provide for cost-effectiveness guidelines that emphasize identification of alternatives, e.g., re-tiling of sewers, use of sludge, and preference for innovative and alternative processes.				
Reserve Capacity 201(a)(5)	Criteria for determining reserve capacity include reduction of unnecessary water consumption and sewage flows and the use of population data from 200 plans.				
Water Quality Management Regulations					
The Water Quality Management Regulations will be revised to (1) incorporate the Clean Water Act Amendments and (2) to consolidate and simplify the regulations in accordance with the March 23, 1978 Executive Order on improving government regulations.		6/23/78	J. Brivak	WH-554	295-4911
Open Space and Recreation 201(b)(2)(A)	Water quality management plan must analyze open space and recreation opportunities.				
State Best Management Practices (Related to 403) 201(b)(4)	Authorizes States to establish regulatory programs for discharge of dredge and fill material.				
Agricultural Cost Sharing 201(j)	Department of Agriculture will provide up to 40% grant to install BMP's for soil conservation to improve water quality.				
Other Regulations					
Urban Discharge 201(h)	Will provide for modification of secondary treatment requirements for existing deep marine dischargers if they meet specified conditions.	9/18/78	T. O'Farrell	WH-547	426-6976
BCT Definition and Pollutant Removals 201(b)	Development of conventional pollutant effluent limitations.	Not Scheduled	J. Dent	WH-552	426-2707
BMP's for Industry 201(e)	Control indirect discharges of toxic pollutants from various industrial point sources.	Not Scheduled	J. Dent	WH-552	426-2707
Pre-treatment Removal Credit Regulations 201(b)(1)	Promulgated regulations allow modification of national toxic pre-treatment standards if joint industry/treatment works treatment will meet direct discharge requirements.	5/9/78	S. Moore	WH-505	295-8995
Oil Spill Liability 211(a)-(d), (1)-(4), (p), (q)(2)	Will extend liability for oil spills to a 200 mile limit and provide for use of funds if there is a substantial threat of a discharge.	Not Scheduled	K. Piglane	WH-548	295-3048
Marine Sanitation Devices 212	Prohibits wastewater discharges from commercial vessels on the Great Lakes and provide protection for drinking water intake areas.	11/78	J. Anson	WH-585	295-3236
Clean Lakes 211	Provides EPA assistance to States for the preparation of surveys on the quality of freshwater lakes.	12/78	L. Guarato	WH-595	295-3042
Dredge or Fill 201(a)-(1) (1)(1)(ii)	Final EPA site selection guidelines for disposal of dredge or fill material will be developed along with guidance for approval of State programs.	5/15/78	J. Lewis	WH-505	295-0581
Guidelines for Sludge Disposal 201(b)(1)	EPA guidelines will address uses for sludge, costs of usage and disposal, and pollutant concentrations that interfere with use and disposal.	5/15/78	B. Beente	WH-584	295-9120

STATE CAPACITY-BUILDING PROGRAM

Decision to Develop Regulations

AGENCY: National Center for Education Statistics.

ACTION: Notice of decision to develop regulations.

SUMMARY: The Administrator of the National Center for Education Statistics proposes to develop regulations to govern the award of discretionary grants to build the statistical capabilities of State educational agencies by facilitating improvements or automation in their statistical systems. These grants, made under the authority of the Education Amendments of 1974, are intended to reduce data burden; improve the timeliness, quality, or utility of statistical data; or meet similar objectives by enhancing the long-term capabilities of State educational agencies to collect, process, analyze, or report data about education. The Administrator has allocated \$300,000 for the support of this program in fiscal year 1978.

FOR FURTHER INFORMATION CONTACT:

Ms. Donna Mertens, National Center for Education Statistics, 400 Maryland Avenue SW., Room 3061, Washington, D.C. 20202, phone: 202-245-7813.

Dated: March 27, 1978.

MARIE D. ELDRIDGE,

Administrator, National
Center for Education Statistics.

INTERSTATE COMMERCE
COMMISSION

[49 CFR Part 1109]

(Ex Parte No. 327 (Sub-No. 1))

REQUIREMENTS AND PROCEDURES RELATING
TO RAILROAD REVITALIZATION AND REGULATORY REFORM ACT OF 1976Requirements and Procedures Relating to Rate
Incentives for Capital Investment

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Proposed Rule-making.

SUMMARY: The Commission invites public comment on proposed changes in existing regulations special govern-

ing procedures for the filing of rail rates based on capital investments of \$1 million or more. The proposed changes are designed to encourage good faith negotiations between the carrier and shipper prior to the filing of a capital incentive rate proposal, to provide the potential shipper with better notice of the filing of a capital incentive rate proposal with the Commission, and to improve the administrative handling of capital incentive rate proceedings by providing for a prompt determination of the validity of the proposed capital investment prior to the filing of a notice of intent to file a capital incentive rate.

DATES: Any person who wishes to participate in this proceeding shall file with the Commission a notice of intent to participate within 20 days of the FEDERAL REGISTER publication. An original and 1 copy of the notice of intent to participate will be appreciated. The Commission will then compile and distribute to interested persons a service list and by notice establish a procedural schedule for the submission of pleadings.

ADDRESS: Send notice of intent to participate to: Office of Proceedings, Section of Rates, Room 5342, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Janice M. Rosenak, or Harvey Gobetz, 202-275-7693.

SUPPLEMENTARY INFORMATION: Section 15(19) of the Interstate Commerce Act permits the filing of railroad rates based on a capital investment of \$1 million or more, individually or collectively, by a carrier, shipper, receiver, or interested third party. If a railroad files a notice of intent to publish such a rate, the Commission must determine its lawfulness within 180 days. If the rate is not held unlawful within that time, it may not be set aside as unlawful under sections 1, 2, 3, or 4 of the Act for 5 years after it is published. However, the Commission may at any time order the rate revised to the variable cost level, if it finds the rate reduces the carrier's going concern value.

The current regulations provide for concurrent determinations of the eligibility of the proposed rates for this treatment and their lawfulness, within 180 days of the filing of a notice of intent to publish capital incentive rates with the Commission. Together with this notice, the railroad must file copies of the tariff containing basic information about the proposal, and a summary of the proposal suitable for publication in the FEDERAL REGISTER. After this summary is published, interested persons have 25 days to file protests. An additional 70 days is provided

for completion of the evidentiary record. No mechanism for directly notifying known users of the proposed rates is provided.

By petition filed December 28, 1977, Allied Chemical Corporation proposed that the notice requirements in 49 CFR § 1109.20(b)(3) relating to information to be included in a summary of a capital incentive rate proposal suitable for publication in the FEDERAL REGISTER be expanded to include these additional details: the rate itself, carload and trainload minimum weights, annual minimum volume requirements, demurrage provisions which differ from standard, whether the rate applies to railroad or privately owned cars, and whether the rate is subject to an escalation clause (and its terms).

We believe this modification is justified by the need to provide interested persons with adequate notice of the basic details of a capital incentive rate proposal.

In light of our experience under the existing capital incentive rate procedures, we have found that substantial questions as to eligibility to use the capital incentive provisions can be analyzed only with extreme difficulty in the 180 day statutory time period between the filing of a notice of intent to file a capital incentive rate and the necessary determination as to its lawfulness. We believe that Congress intended that this period be utilized to make a determination of the lawfulness of rates which clearly qualify. We propose therefore to require a showing that the investment qualifies before the notice of intent may be filed. The difficulty in determining whether the necessary investment will be made is particularly acute where the investment relied on is additions or improvements to existing rolling stock, track, or roadbed. We propose to require greater detail as to these types of investments.

When the existing regulations in Ex Parte No. 327 were adopted, it was anticipated that good faith negotiations would take place where both the railroad and a shipper made qualifying investments. There has been some indication that certain rail carriers may have attempted to file proposed rates higher than those negotiated, after concerned shippers had made multimillion dollar rail related investments. This situation is obviously counterproductive if outside investment is to be attracted by the rail industry. The proposed modifications would permit the Commission to take appropriate action, including denial of capital incentive rate treatment, where the negotiating process is clearly abused.

The existing procedures have proved inefficient in notifying known persons who are entitled to use the proposed capital incentive items. We propose to require the carrier to notify these persons directly.

A determination as to eligibility to use the capital incentive rate procedure will be made within 40 days of the completion of evidentiary proceedings on that matter. The Commission has moved to expedite further handling of these proceedings by proposing that the procedural time limits for submitting statements as to the lawfulness of qualified proposed schedules be shortened and that uncontested proposals and contested proposals found to be lawful receive special permission to publish on less than 30 days' notice whenever feasible.

Accordingly, it is the purpose of this notice to initiate modification of the Ex Parte No. 327 procedures, inform interested parties on the scope of the modification, and invite comments. The revised § 1109.20 (new or changed provisions are italicized) would read as follows:

§ 1109.20 Requirements and special procedures relating to rate incentives for capital investments.

(a) *Applicability.* The provisions of this part apply only to railroad proposals for a new rate, fare, charge, classification, regulation, or practice that requires a total capital investment of \$1 million or more, individually or collectively, by such carriers, or by a shipper, receiver, or agent thereof, or an interested third party. These proposed rates are hereafter referred to as capital incentive rates.

(b) *Establishment of requisite capital investment.* (1) *General.* No carrier may file a notice of intent to file a capital incentive rate under paragraph (d) unless it has previously established that the requisite \$1 million investment has been or will be made.

(2) *Required Information.* A carrier seeking to establish that it is entitled to file a notice of intent shall file with the Commission an original and seven copies of a sworn affidavit detailing the following information:

(i) *A full description and explanation of the proposed investment.* If any part of the investment is additional locomotives or rail cars, the affidavit shall explain the extent to which and why the carrier's existing locomotive or car pools cannot supply the needed equipment. If any part of the investment consists of improvement to existing rail track or roadbed, the affidavit shall detail and provide documentary evidence of the specific improvements that have been made prior to the filing of the affidavit, and the extent to which other specific planned track or roadbed improvements will be necessary over each of the next 5 years, and shall show why and to what extent the planned investment exceeds average maintenance of way expenditures for the previous 3 years. All other alleged capital investments must be fully detailed. The carrier may only rely on in-

vestments specifically detailed in this affidavit.

(ii) The name and contribution of each entity proposing to make the investment, and the names of all shippers and receivers eligible to tender freight under the capital incentive item.

(iii) The anticipated rate level, any carload or trainload minimum weights or annual volume requirements, any demurrage provisions which differ from standard demurrage provisions, whether the rate will apply to railroad or privately-owned cars, and whether the rate will be exempted from ex parte general increases or whether a formula for its periodic adjustment has been predetermined (and the nature of any such formula).

(3) *Service of affidavit on capital incentive rate users.* A copy of the affidavit required by sub-paragraph (2) must be served on all known persons eligible to tender freight under the capital incentive item by the carrier proposing the item, on or before the date it is filed with the Commission.

(4) *Federal Register Publication.* The carrier, at the time it files the affidavit required by sub-paragraph (2), must provide the Commission with a summary suitable for publication in the FEDERAL REGISTER detailing the information required by sub-paragraph (2) and the name and address of the responsible carrier representative to whom inquiries and requests for pertinent documents may be addressed. As soon as practicable, the summary shall be published in the FEDERAL REGISTER by the Commission and in one transportation trade publication of general distribution by the carrier.

(5) *Protests of eligibility of proposed capital investment.* Any person which does not wish to contest the eligibility of the proposed capital investment, but wishes to reserve the right to challenge the lawfulness of the proposed capital incentive schedule should the investment be found to qualify for treatment under this part, may file a statement to that effect on or before the 25th day from the date of publication in the FEDERAL REGISTER. Any person which contests the eligibility of the proposed capital investment must file an original and seven copies of its protest containing all its evidence and arguments on this issue on or before the 25th day from the date of publication in the FEDERAL REGISTER. The protest shall state the date of publication of the summary in the FEDERAL REGISTER, if known. The carrier may reply within 20 days after the filing of a protest.

(6) *Discovery.* When a protest is filed under subparagraph (5), it is not contemplated that either party shall exercise the right of discovery. However, in extraordinary situations, the Commission may grant a limited right of discovery where there is a serious ques-

tion as to the carrier's apportionment of additional locomotive, rail car, track, or roadbed expense, necessitated by the particular traffic that will move under the proposed capital incentive rate, between existing pools, facilities, and routine maintenance, and new equipment or facilities.

(7) *Finding as to eligibility; Time Limit; Burden of Proof.* If no protest challenging eligibility is filed under sub-paragraph (5), the carrier shall be entitled to capital incentive rate treatment and may file a notice of intent to file a capital incentive rate. If a protest is filed, the Commission shall determine whether or not the carrier is entitled to capital incentive rate treatment within 40 days of the completion of evidentiary proceedings on that issue. The burden of establishing entitlement to capital incentive treatment shall be on the carrier if a protest challenging eligibility is filed.

(c) *Requirement of good faith negotiations.* Where a protest challenging the eligibility of the proposed investment or the lawfulness of the proposed capital incentive rate schedule is filed by a person eligible to tender freight under the capital incentive item which has itself already made capital investment of \$1 million or more in rail related plant or equipment, that person and the carrier must submit a summary of the negotiations which preceded the attempt to establish the proposed capital incentive rate item. If it appears that either party has acted in bad faith during or after these negotiations, the Commission may dismiss the proceeding or take such other action with respect to the proceeding as justice requires.

(d) *Notice of intention.* A notice of intention to file a schedule containing a capital incentive rate must be filed in advance of the filing of the actual tariff by the carrier (or its agent) electing to use the special procedures adopted pursuant to section 15(19). The notice may only be filed by an eligible carrier, shall refer to Ex Parte No. 327, and shall be accompanied by the following:

(1) Two copies of the proposed tariff, one copy of which will be received and remain available for public inspection in the Public Tariff File, Room 6217, of the Interstate Commerce Commission, Washington, D.C.

(2) An original and seven copies of a sworn affidavit by the carrier proposing the schedule containing a brief description of the eligible capital investment, the rate level, any carload or trainload minimum weights or annual volume requirements, any demurrage provisions which differ from standard demurrage provisions, a statement whether the schedule applies to railroad or privately owned cars and whether the proposed schedule will be exempted from ex parte general in-

creases or whether a formula for periodic adjustment of the proposed schedule has been predetermined (and the nature of any such formula), and estimates of the variable cost per unit of service under the proposed schedule. The carrier shall serve a copy of these documents on each party to the proceeding on or before the date of filing with the Commission.

(e) *Hearing.* Upon receipt of the notice of intent, the Commission will immediately schedule a hearing on the lawfulness of the proposed schedule. If no protests challenging the lawfulness of the proposed schedules are filed, the schedule will not be further investigated and its publication will be authorized under subparagraph (f)(2).

(1) *Burden of proof.* In any hearing pertaining to the lawfulness of a proposed capital incentive rate schedule the burden of proof shall be on the protestant.

(2) *Procedural dates.* A protestant's initial presentation, in written form under modified procedure shall be due 20 days from service of the Commission order instituting the hearing. The reply statement of the carrier (respondent) or any interested party shall be due 20 days thereafter. Protestant's rebuttal statement shall be due 20 days after the filing of the reply statement. Oral hearing will be directed only when the Commission deems it necessary for the purposes of cross examination or other strong cause.

(3) *Postponement of procedural dates.* In view of the statutory requirement that hearings be concluded and a determination of lawfulness made within a 180 day period following the date of filing of the notice of intention to file a capital incentive rate, postponement of the procedural dates established by these regulations is not contemplated except in the most extraordinary situation. Request for postponement will not be accepted for filing if received later than 10 days before the due date.

(f) *Orders authorizing or prohibiting the publication of capital incentive rates.*

(1) *Investigated proposals.* After a hearing on the lawfulness of a capital incentive rate proposal, the Commission shall, as expeditiously as possible but in no event later than 180 days after the filing of the notice of intent, either authorize publication of all or part of the proposed schedule on 30 days notice or prohibit the publication of the schedule.

(2) *Noninvestigated proposals.* An order authorizing the tariff publication on 30 days' notice shall be entered 30 days after service of the order scheduling a hearing under paragraph (e) if no statement challenging the lawfulness of the proposed schedule is timely filed.

(3) *Period of authorization.* The authorization under sub-paragraphs (1)

and (2), if not exercised, shall expire 180 days after service of the order of authorization.

(4) *Special permission to file on less than 30 days' notice.* A carrier may request special permission to file an approved capital incentive rate on less than 30 days' notice. Such a request will be liberally granted.

(g) *Notations in tariffs or schedules.* Tariff provisions implementing capital incentive rates shall contain the following notations:

Provision named herein authorized by Commission order served _____, Docket No. _____ in conformity with 49 CFR 1109.20.

Tariff provisions shall further state, if applicable, the name(s) of shippers and/or receivers eligible to tender freight under the capital incentive item.

(h) *Reopening.* The Commission shall retain jurisdiction in order that the capital incentive rate by increased to a variable cost level in the event the capital incentive rate is found to reduce the going-concern value of the carrier.

(i) *Effect of capital incentive rate treatment.* For a period of 5 years following the date a capital incentive rate becomes effective, the proceeding shall not be reopened nor any complaint received for consideration of alleged violations of section 1, 2, 3, or 4 of the act.

The proposed modifications do not appear to be a major Federal action requiring preparation of an environmental impact statement under the procedures of the National Environmental Policy Act of 1969, 42 U.S.C. 4321, et seq. However, comments regarding environmental issues, if any, should be included in statements filed with the Commission in response to this notice.

Decided May 8, 1978.

By the Commission, Commissioner Murphy not participating, Commissioner Stafford absent and not participating.

H. G. HOMME, Jr.,
Acting Secretary.

MID-ATLANTIC FISHERY MANAGEMENT COUNCIL'S ADVISORY PANEL

Public Meeting

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Public meeting announcement.

SUMMARY: This document announces a public meeting of the Mid-Atlantic Fishery Management Council's Advisory Panel to be held in Dover, Del., on June 9, 1978.

DATE: The meeting will be held on June 9, 1978, at 10 a.m.

ADDRESS: The meeting will be held at the Quality Inn (Mayor's Room), U.S. Route 13 and Lookerman Street, Dover, Del.

FOR FURTHER INFORMATION CONTACT:

Mr. John Bryson, 302-674-2331.

SUPPLEMENTARY INFORMATION: A meeting of the Surf Clam Advisory Panel of the Mid-Atlantic Fishery Management Council, established under section 302(g) of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265) will be held on June 9, 1978, at the Quality Inn (Mayor's Room), U.S. Route 13 and Lookerman Street, Dover, Del. 19901, from 10 a.m. to approximately 5 p.m.

Proposed agenda. (1) Review of moratorium provision in the Surf Clam Fishery Management Plan; (2) review of enforcement procedures; (3) update of resource assessment and coordination needed on future surveys; (4) discussion of draft procedures and criteria for closing surf clam beds; (5) advantages and disadvantages of vessel quotas and the split fishing season proposed; and (6) discussion of duties and procedures of Advisory Panel operation.

Meeting is open to the public. For more information on seating, changes to the agenda, and/or written comments, contact John Bryson, Executive Director, Mid-Atlantic Fishery Management Council, Room 2115, Federal Building, Dover, Del. 19901, telephone 302-674-2331.

Dated: May 16, 1978.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

NEW ENGLAND FISHERY MANAGEMENT COUNCIL

Public Meeting

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Public meeting announcement.

SUMMARY: The document announces a meeting of the New Eng-

land Fishery Management Council to be held in June in Portland, Maine.

DATE: The meeting will be held on June 7 and 8, 1978.

ADDRESS: The meeting will be held at the Holiday Inn (downtown), Portland, Maine.

FOR FURTHER INFORMATION CONTACT:

Mr. Spencer Apollonio, 617-535-5450.

SUPPLEMENTARY INFORMATION: The New England Fishery Management Council, established under Sec-

tion 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265), will meet June 7-8, 1978, at the Holiday Inn (downtown), Portland, Maine. The meeting starts at 10 a.m. and will adjourn at approximately 5 p.m. on June 7; and 9 a.m. to approximately 5 p.m. on June 8.

Proposed Agenda: (1) Herring Fishery Management Plan: Council discussion of comments from public hearings; (2) Groundfish Fishery Management Plan: Status, review, and discussion; (3) Discussion and status of U.S.-Canadian negotiations and interim agreement; (4) Ocean Perch Fishery Management Plan: Discussion of ob-

jectives and management strategies; and (5) Other management business.

Meeting is open to the public. For more information on seating, changes to the agenda, and/or written comments, contact Spencer Apollonio, Executive Director, New England Fishery Management Council, Peabody Office Building, One Newbury Street, Peabody, Massachusetts 01960; telephone: 617-535-5450.

Dated: May 17, 1978.

ILLINOIS ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Illinois Advisory Committee (SAC) of the Commission will convene at 7 p.m. and will end at 10 p.m. on June 18, 1978 at the Palmer House, also at 10 a.m. to 4 p.m. on June 19, 1978 at 219 South Dearborn Street, Chicago, Ill.

Persons wishing to attend this planning meeting should contact the Committee Chairperson, or the Midwestern Regional Office of the Commission, 230 South Dearborn Street, 32nd Floor, Chicago, Ill. 60604.

The purpose of this meeting will be to review information received from representatives from Federal, State and local educators relative to the Chicago desegregation plan. The June 19 meeting will be a status report and discussion with invited representatives on steps to be taken to desegregate Chicago's school system.

This meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, D.C., May 18, 1978.

JOHN I. BINKLEY,
Advisory Committee
Management Officer.

DEPARTMENT OF COMMERCE

Foreign-Trade Zone Board

(Docket No. 5-78)

FOREIGN-TRADE ZONE—BATTLE CREEK, MICH.

Application and Public Hearing

Notice is hereby given that an application has been submitted to the Foreign-Trade Zones Board (the Board) by the City of Battle Creek, a Michigan municipal corporation, requesting a grant of authority to establish a foreign-trade zone in the City, within the Battle Creek Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act of 1934, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on May 10, 1978. The applicant is authorized to make this proposal under Chapter 447 of Act 154 of the Michigan Public Acts of 1973, effective September 6, 1963.

The proposal calls for the establishment of a general-purpose foreign-trade zone as part of a 23-acre Customs cargo facility, located within the 2400-acre Fort Custer Industrial Park in the City of Battle Creek, some 2 miles west of the Kellogg Regional Airfield. The zone is to consist of two warehouse areas, totalling some 84,000 square feet, within the cargo facility building which is under construction on City-owned land. The zone application also describes its plans for future zone development.

The zone will be operated for the City by the BC/Cal/Kal Inland Port Authority of South Central Michigan Development Corporation, a non-profit public corporation. The zone site and surrounding industrial park are served by highway and rail, and an air cargo facility is nearby at Kellogg Regional Airfield.

The application contains economic data and information concerning the need for zone services in the Battle Creek area. Several firms have indicated their intention to use the zone for storage, processing, packaging, exhibition, and manufacturing activities. Among the initial zone users are firms involved in a variety of products, including: electric motors, machinery and parts, furniture, musical instruments, farm supplies, automobile parts and hardware, chemicals and medical surgical supplies.

In accordance with the Board's regulations, an Examiners Committee has been appointed to investigate the application and report thereon to the Board. The Committee consists of: Hugh J. Dolan (Chairman), Office of the Secretary, U.S. Department of Commerce, 14th and E Streets NW., Washington, D.C. 20230; Louis A. Mezzano, District Director, U.S. Customs Service, 477 Michigan Avenue, Detroit, Mich. 48226; and Col. Melvyn D. Remus, District Engineer, U.S. Army Engineer District Detroit, P.O. Box 1027, Detroit, Mich. 48231.

As part of its investigation of the proposal, the Examiners Committee will hold a public hearing on June 22, beginning at 9:30 a.m., in Staff College Classroom A, U.S. Federal Building, 50 North Washington Avenue, Battle Creek, Mich. The purpose of the hearing is to help inform interested persons about the proposal, to provide an opportunity for their expression of views, and to obtain information useful to the examiners.

Interested persons or their representatives are invited to present their views at the hearing. Such persons should, by June 15, notify the Board's Executive Secretary, in writing at the address below, of their desire to be heard. In lieu of an oral presentation, written statements may be submitted in accordance with the Board's regulations to the Examiners Committee, care of the Executive Secretary, at any time from the date of this notice through July 24, 1978. The submission of evidence is not desired during the posthearing period unless it is clearly shown that the matter is new and material and that there are good reasons why it could not be presented at the hearing. A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

Port Director, U.S. Customs Service, 5085 Leonard Wood Road, Battle Creek, Mich. 49016.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 6886-B, 14th and E Streets NW., Washington, D.C. 20230.

Dated: May 18, 1978.

JOHN J. DA PONTE, Jr.,
Executive Secretary.

National Oceanic and Atmospheric Administration

NATIONAL MARINE FISHERIES SERVICE

Public Meeting

The National Marine Fisheries Service announces a technical workshop on the subject of fees charged to each foreign nation for fishing for fishery

resources subject to the jurisdiction of the United States.

The meeting will be held June 22-23, 1978 at the Penthouse Conference Room, 2001 Wisconsin Avenue NW., Washington, D.C. 20235, commencing at 8:30 a.m. on June 22, and adjourning at 5 p.m. on June 23. This meeting may be extended or shortened depending on length of discussions.

The purpose of the meeting is to reexamine the underlying theory, criteria, and practices relating to foreign fishing fees. Specialists have been asked to prepare papers for this technical meeting. From the discussion of these papers a set of principles is expected to emerge.

The technical papers will be discussed by a limited number of specialists invited to the meeting. The meeting is open to the public and limited seating will be available. Interested public will be invited to participate in a larger conference on this subject to be held this fall.

For further information on seating, changes to the agenda, and/or written comments, contact Clemens Bribitzer, Fishery Management Specialist, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Washington, D.C. 20235, telephone 202-254-8554.

Dated: May 17, 1978.

WINFRED H. MEIBOHM,
Acting Executive Director, National Marine Fisheries Service.

Department of the Army

ARMY ADVISORY PANEL ON ROTC AFFAIRS

Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is given of a meeting of the Army Advisory Panel on ROTC Affairs to be held on June 21, 1978 at the Fort Riley Officers' Open Mess, Fort Riley, Kans. The proposed schedule of activities is as follows:

0900 Hours—Opening Remarks and Introductions.
0915 Hours—Remarks, Deputy for Military Personnel Policy, Office of the Assistant Secretary of the Army (Manpower and Reserve Affairs).
0930 Hours—Department of the Army/U.S. Army Training and Doctrine Command Briefings.
1040 Hours—Review of Education and Training for Officer Study Group Presentation.
1300-1630 Hours—Panel Discussion on ROTC Topics.

This meeting is open to the public.

NOTICES

DATE: May 15, 1978.

By authority of the Secretary of the Army.

ROME D. SMYTH,
Colonel, U.S. Army, Director,
Administrative Management,
TAGCEN.

MILITARY PERSONAL PROPERTY CLAIMS SYMPOSIUM

Open Meeting

Announcement is made of a meeting of the Military Personal Property Claims Symposium. This meeting will be held on 15 June 1978, at Headquarters, Military Traffic Management Command, Nassif Building, Room 716, 5611 Columbia Pike, Falls Church, Va. 22041. The meeting will convene at 0900 hours and adjourn at approximately 1500 hours.

Proposed Agenda: The purpose of the Symposium is to provide an open discussion and free exchange of ideas with the public on mutual problems arising from claims for loss, damage, or destruction of personal property while in transit or storage.

This Symposium will be open to the public to the extent that space limitations of the meeting space permit. Because of these limitations, interested parties are requested to reserve space by contacting the Commander, Military Traffic Management Command, Attn: MT-PPM, Washington, D.C. 20315, telephone 202-756-1808.

All interested persons desiring to submit topics to be discussed should submit them in writing to the address given in the preceding paragraph. Topics to be discussed should be received on or before 8 June 1978.

Date: 12 May, 1978.

DONALD H. MENSCH,
Colonel, GS

Director of Personal Property.

FEDERAL COMMUNICATIONS COMMISSION

(Report No. 910)

COMMON CARRIER SERVICES INFORMATION

Applications Accepted for Filing

MAY 15, 1978.

The applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications, if upon further examination, it is determined they are defective and not in conformance with the Commission's rules and regulations or its policies.

Final action will not be taken on any of these applications earlier than 31

days following the date of this notice, except for radio applications not requiring a 30 day notice period (See Section 309(c) of the Communications Act), applications filed under Part 68, applications filed under Part 63 relative to small projects, or as otherwise noted. Unless specified to the contrary, comments or petitions may be filed concerning radio and Section 214 applications within 30 days of the date of this notice and within 20 days for Part 68 applications.

In order for an application filed under Part 21 of the Commission's rules (Domestic Public Radio Services) to be considered mutually exclusive with any other such application appearing herein, it must be substantially complete and tendered for filing by whichever date is earlier: (a) The close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which the subsequent application is in conflict) as having been accepted for filing. In common carrier radio services other than those listed under Part 21, the cut-off date for filing a mutually exclusive application is the close of business one business day preceding the day on which the previously filed application is designated for hearing. With limited exceptions, an application which is subsequently amended by a major change will be considered as a newly filed application for purposes of the cut-off rule. (See Section 1.227(b)(3) and 21.30(b) of the Commission's Rules.)

FEDERAL COMMUNICATIONS
COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

RURAL RADIO SERVICE
 60239-CR-P-78 J. M. Blodgett d.b.a. Radio Page Communications (new). C.P. for a new Rural Subscriber station to operate on 43.34, 43.42, 43.54 MHz to be located at any temporary fixed location within the territory of the grantee.

POINT TO POINT MICROWAVE RADIO SERVICE
 NY-2149-CF-P-78 Eastern Microwave, Inc. (KFN 21). NYC-GWB, 15 Columbus Circle, New York, N.Y. (Lat. 40° 46' 09" N., Long. 73° 58' 55" W.): Construction permit to add 6212.0H MHz toward Yonkers, N.Y.
 OH-2000-CF-P-78 Tower Communication Systems Corp. (WCT 906). Columbus ATC, 1 mile northwest of Alum Creek Road and Refugee Road, Columbus, Ohio (Lat. 39° 55' 42" N., Long. 82° 58' 11" W.): Construction permit to add 11625.0V, 11305.0V, and 11545.0V MHz toward Columbus KBLE, via power split and 11225.0V and 11465.0V MHz toward same point, on azimuth 326.8° and to correct coordinates.

MI-2201-CF-MP-78 American Microwave & Communications, Inc. (KYO 48). 2.0 mile southeast of Perrinton, Mich. (Lat. 43° 09' 36" N., Long. 84° 39' 14" W.): Construction permit to add 6345.5V MHz toward Greenville, Mich., via power split.
 NH-2207-CF-MP-78 Yankee Microwave (KYZ 85). Mt. Washington, Mt. Washington Summit, Sargents Purchase, N.H. (Lat. 44° 16' 13" N., Long. 71° 18' 13" W.): Construction permit to add 5960.0V MHz toward Mt. Mansfield, Vt., via power split and to add 6078.6V MHz toward same point on azimuth 283.8° and to replace transmitter(s) toward existing points of communication.
 VT-2208-CF-P-78 Yankee Microwave (new). Mt. Mansfield, Stowe, Vt. (Lat. 44° 31' 36" N., Long. 72° 48' 57" W.): Construction permit for new station—6197.2H and 6256.2H MHz toward Barre, Vt., on azimuth 142.6°.
 CA-2237-CF-P/ML-78 The Pacific Telephone & Telegraph Co. (KMB 68). Mt. Wilson, Video Road, Mount Wilson, Calif. (Lat. 34° 13' 34" N., Long. 118° 03' 58" W.): Construction permit and modification of license to add 10735.0H MHz toward Glendale TV, Calif., on azimuth 250.2°.
 CO-2250-CF-P-78 Mountain Microwave Corp. (KBI 22). Almagre Mt., 8 miles west of Broadmoor, Colo. (Lat. 38° 46' 21" N., Long. 104° 59' 32" W.): Construction permit to add 6137.9V and 6187.6H MHz toward Brookside, Colo., on azimuth 203.3°.
 DTF-2251-CF-R-78 Hawaiian Telephone Co. (KUQ 93). Temporary fixed-developmental, Application for renewal of radio station license.
 DFX-2280-CF-R-78 General Telephone Co. of Florida (WHU 40). Fixed developmental within the territory of the grantee. Application for renewal of radio station license.
 WA-2311-CF-P-78 American Television & Communications Corp. (WBO 60). 1611 18th Street, Seattle, Wash. (Lat. 47° 36' 57" N., Long. 122° 18' 27" W.): Construction permit to add 6004.5V MHz toward Squak Mountain, Wash., on azimuth 121.9°.
 MO-2177-CF-P-78 Southwestern Bell Telephone Co. (KZI35). St. Louis 2, 2651 Olive Street, St. Louis (St. Louis City), Mo. Lat. 38° 38' 01" N., Long. 90° 12' 55" W. C.P. to add frequency 6286.2H MHz, add receive antennas on frequency 6390V MHz, and move and replace antennas on frequency 11665V toward Alton, Mo.
 NE-2189-CF-P-78 American Telephone & Telegraph Co. (KAC58). 4.8 miles northwest of North Bend (Dodge), N.J. Lat. 41° 31' 24" N., Long. 96° 50' 55" W. C.P. to add frequency 4170V MHz toward Arlington, Nebr.
 NE-2190-CF-P-78 Same (KAC59). 2.9 miles southeast of Arlington (Washington), Nebr. Lat. 41° 25' 32" N., Long. 96° 18' 36" W. C.P. to add frequency 4130H MHz toward Omaha, Nebr.
 IA-2190-CF-P-78 Same (KAS44). 5 miles west southwest of Hampton (Franklin), Iowa, Lat. 42° 42' 55" N., Long. 93° 17' 27" W. C.P. to change polarization from H to V on frequencies 3710, 3790, 3870, 3950, 4030, and 4110 MHz toward Radcliff, Iowa.
 IA-2192-CF-P-78 Same (KAS43). 1 mile south southeast of Radcliff (Hardin), Iowa, Lat. 42° 18' 06" N., Long. 93° 25' 22" W. C.P. to change polarization from H to V on frequencies 3750, 3830, 3910, 3990,

MN-2223-CF-P-78 Northwestern Bell Telephone Co. (KBL83). North Rochester, 5 miles north-northeast of Rochester (Olmsted), Minn. Lat. 44°05'34" N., Long. 92°29'04" W. C.P. to add frequency 5945.2V MHz, replace transmitters and receive antennas on frequency 6063.8V MHz, replace receive antennas on frequency 6004.5V, 6123.1V MHz toward Hader, Minn.; add frequencies 11325H and 11485H MHz toward Rochester, Minn.

MN-2224-CF-P-78 Northwestern Bell Telephone Co. (KVU57). 200 Second Avenue SW., Rochester (Olmsted), Minn. Lat. 44°01'19" N., Long. 92°27'54" W. C.P. to add frequencies 11155V, 10835V MHz and change polarization from H to V on frequency 11075 MHz toward North Rochester.

KS-2225-CF-P-78 Southern Bell Telephone Co. (KAD26). Topeka Junction, third and Oakley, Topeka (Shawnee), Kan. Lat. 39°03'46" N., Long. 95°42'56" W. C.P. to add frequencies 6034.2V, 6152.8V, and 5974.8V MHz toward Oskaloosa, Kans.

KS-2226-CF-P-78 Same (KAD25). 4 miles south of Oskaloosa (Jefferson), Kans. Lat. 39°09'31" N., Long. 95°19'33" W. C.P. to add frequencies 6286.2H, 6404.8H, and 6226.9H MHz toward Topeka Junction, Kans., add a new point of communication on frequencies 6286.2V, 6404.8V, 6256.5H, 6375.2H MHz on azimuth 060.6°, Leavenworth, Kans., and 6286.2H, 6345.5H, 6404.8H, 6226.9H MHz on azimuth 159.6° toward Lawrence, Kans., also increase structure height.

KS-2227-CF-P-78 Same (new). 2.7 miles west of Leavenworth (Leavenworth), Kans. Lat. 39°19'01" N., Long. 94°57'46" W. C.P. for a new station on frequencies 6034.2H, 6152.8H, 6004.5V, and 6123.1V MHz on azimuth 240.8° toward Oskaloosa, Kans., 11055V, 10895V, MHz on azimuth 280.0° toward Easton, Kans., 6034.2V, 6093.5V, 6152.8V, 6004.5H, and 5974.8V MHz on azimuth 126.3° toward Kansas City, Kans.

MO-2228-CF-P-78 Same (KAC96). Kansas City Toll, 1425 Oak Street, Kansas City, (Jackson), Mo. Lat. 39°05'47" N., Long. 94°34'41" W. C.P. to increase structure height, decrease power and add a new point of communication on frequencies 6286.2H, 6345.5H, 6404.8H, 6256.5V, and 6226.9H MHz on azimuth 306.5° toward Leavenworth, Mo.

KS-2229-CF-P-78 Same (new). 714 Vermont, Lawrence (Douglas), Kans. Lat. 38°58'14" N., Long. 95°14'11" W. C.P. for a new station on frequencies 6034.2V, 6093.5V, 6152.8V, and 5974.8V MHz on azimuth 339.7° toward Oskaloosa, Kans.

KS-2230-CF-P-78 Same (new). 0.55 miles southwestern of Easton (Leavenworth), Kans. Lat. 39°20'20" N., Long. 95°07'28" W. C.P. for a new station on frequencies 11265V, 11585V, MHz on azimuth 099.9° toward Leavenworth, Kans., and 11265V, 11585V MHz on azimuth 003.0° toward Atchison, Kans.

KS-2231-CF-P-78 Same (new). 2 miles south of Atchison (Atchison), Kans. Lat. 39°30'57" N., Long. 95°06'45" W. C.P. for a new station on frequencies 11055V and 10895V MHz on azimuth 183.0° toward Easton, Kans.

PA-2277-CF-P-78 Bell Telephone Co. of Pennsylvania (WCG251). Rockview, 1.7 miles south-southwest of Pleasant Gap (Centre), Pa. Lat. 40°50'42" N., Long. 77°44'55" W. C.P. to move and replace antennas on frequencies 10795H, 11115H

MHz toward State College, Pa., and 5974.8H MHz toward Thick Mountain, Pa. AR-2247-CF-P-78 Southwestern Bell Telephone Co. (WQP87). SO end of Kenilworth Avenue, Fayetteville (Washington), Ark. Lat. 36°04'17" N., Long. 94°08'25" W. C.P. to add a new point of communication on frequency 6034.2H MHz on azimuth 002.9° toward Rogers, Ark.

AR-2248-CF-P-78 Same (new). 700 West Walnut, Rogers (Benton), Ark. Lat. 36°19'58" N., Long. 94°07'27" W. C.P. for a new station on frequency 6286.2V MHz on azimuth 182.9° toward Fayetteville, Ark.

AR-2255-CF-P-78 Mountain Home Telephone Co. (new). 0.1 mile northwest of Mountain Home, (Baxter) Ark. Lat. 36°20'55" N., Long. 92°24'02" W. C.P. for a new station on frequency 6004.5H MHz on azimuth 251.7° toward Summit, Ark.

FEDERAL MARITIME COMMISSION

AGREEMENTS FILED

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of each of the agreements and the justifications offered therefor at the Washington Office of the Federal Maritime Commission, 1100 L Street NW., Room 10218; or may inspect the agreements at the Field Offices located at New York, N.Y., New Orleans, La., San Francisco, Calif., Chicago, Ill., and San Juan, P.R. Interested parties may submit comments on each agreement, including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before June 2, 1978. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed agreement. Comments shall discuss with particularity allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Agreement No.: 10038-3.
Filing Party: Mr. John D. Straton, Jr., Director—Rates and Conferences, Moore-McCormack Lines, Inc., 2 Broadway, New York, N.Y. 10004.

Summary: Agreement No. 10038-3, between Empresa Lineas Maritimas Argentinas S.A. and Moore-McCormack Lines, Inc.,

modifies the basic cargo revenue pooling, sailing and equal access agreement in the United States-Argentina trades by incorporating therein provisions for the admission of additional U.S. flag or Argentine flag carriers, and extending the basic agreement, so modified, through August 31, 1978.

By Order of the Federal Maritime Commission.

Dated: May 17, 1978.

FRANCIS C. HURNEY,
Secretary.

(FR Doc. 78-14333 Filed 5-22-78; 8:45 am)

[6730-01]

AGREEMENTS FILED

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of each of the agreements and the justifications offered therefor at the Washington Office of the Federal Maritime Commission, 1100 L Street NW., Room 10218; or may inspect the agreements at the Field Offices located at New York, N.Y., New Orleans, La., San Francisco, Calif., Chicago, Ill., and San Juan, P.R. Interested parties may submit comments on each agreement, including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before June 12, 1978. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed agreement. Comments shall discuss with particularity allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Agreement No.: 50-35.
Filing Party: F. Conger Fawcett, Esquire, Graham & James, One Maritime Plaza, San Francisco, Calif. 94111.

Summary: Agreement No. 50-35, entered into among the member lines of the Pacific Coast-Australasian Tariff Bureau, would amend proposed new Article VII by inserting in the caption of said Article the words "and Tonnage" and by inserting in the text of said Article the following sentence to appear as the second sentence of said Article:

"The parties may also from time to time discuss and, by the same vote, agree upon

and implement reductions in numbers of vessels and/or tonnage to be provided by one or more of the parties."

Notice is also hereby given that a pre-effective amendment has been filed to Agreement No. 50-34 to delete therefrom (a) the words "and Tonnage" in the caption of proposed Article VII and (b) the second sentence thereof now being added to Article VII under Agreement No. 50-35. Notice of Agreement No. 50-34 appeared in the FEDERAL REGISTER of March 6, 1978, in Volume 43, No. 44, at Page 9204.

Agreement No.: T-3648.
Filing Party: Mr. David A. Schaller, Manager, Administration, Port Everglades Authority, P.O. Box 13136, Port Everglades, Fla. 33316.

Summary: Agreement No. T-3648, between Port Everglades Authority (Authority) and Seatrain Lines, Inc. (Seatrain), provides for the one-year lease of approximately one acre of land to be used in connection with the handling of containers. As compensation, Seatrain will pay \$596.10 per month, as land rent, plus applicable taxes, utility charges and tariff charges. Thirty days after Authority has received combined revenues of \$12,249.30 (based on \$4,500 for revenues from dockage and wharfage plus the annual land rent and one month's rent) and for each succeeding month, Authority will refund to Seatrain that month's land rent. In the event combined revenues exceed \$18,806.40, Authority will refund all land rent paid during the lease year not previously refunded. Seatrain has the option to lease additional land adjoining the above premises.

By Order of the Federal Maritime Commission.

Dated: May 17, 1978.

FRANCIS C. HURNEY,
Secretary.

DELTA STEAMSHIP LINES, INC.

Acquisition and Substitution

Delta Steamship Lines, Inc., and Prudential Lines, Inc., have notified the Federal Maritime Commission that commencing on or about May 22, 1978, Delta Steamship Lines, Inc., will acquire the Mexican, Caribbean, Central American, and South American trades and operations of Prudential Lines, Inc., and the vessels participating in those trades and that, thereafter, as the said vessels are acquired by Delta Steamship Lines, Inc., as they become available for transfer from Prudential Lines, Inc., the trades and services to those areas presently served by Prudential Lines, Inc., will be operated by Delta Steamship Lines, Inc. As a result of this acquisition, Delta Steamship Lines, Inc., will succeed to the rights of Prudential Lines, Inc., in those trades, including the rights, and all future liabilities, under the respective section 15 agreements to which Prudential Lines, Inc., is presently a party, which are applicable to those trades. Accordingly, the records of the Federal Maritime Commission concerning such agreements to which Prudential Lines, Inc., is presently a party will be changed, effective the date of the acquisition, to substitute the name of "Delta Steamship Lines, Inc." as a participating carrier, in place of Prudential Lines, Inc. In addition, the conference and rate-making agreements applicable to the trades in question, to which Prudential Lines, Inc. is presently a party, are obligated to notify the Federal Maritime Commission that they have also changed their records accordingly. The following is a list of the agreements involved:

CONFERENCE AND RATE AGREEMENTS

[Docket No. 78M-0102]

HUNTER SESSIONS VENA CAVA BALLOON OCCLUDER

Premarket Approval

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces its approval of the application for premarket approval of the Hunter Sessions

vena cava balloon occluder (P770-005), sponsored by the Barlow Manufacturing Co., Hinsdale, Ill. After reviewing the Cardiovascular Device Classification Panel's recommendation, FDA notified the sponsor that the device had been approved as safe and effective.

DATES: Any petition for administrative review and supporting data and information must be submitted on or before June 22, 1978.

ADDRESS: Requests for information and petitions for administrative review to the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Keith Lusted, Bureau of Medical Devices (HFK-402), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, Md. 20910, 301-427-7550.

SUPPLEMENTARY INFORMATION: The sponsor, the Barlow Manufacturing Co., Hinsdale, Ill., submitted the application for premarket approval of the Hunter-Sessions vena cava balloon occluder to FDA on July 7, 1977. The Cardiovascular Device Classification Panel recommended approval of the application. On December 19, 1977, FDA approved the application by a letter from the Director, Bureau of Medical Devices, FDA, to the sponsor.

DESCRIPTION OF DEVICE

The vena cava balloon occluder consists of a long catheter with a balloon on its end that is inserted into the venous system and positioned under X-ray control in the vena cava. The balloon is inflated and left in place while the catheter is withdrawn. The balloon blocks the vena cava without requiring surgery.

In 6 to 8 months, the balloon collapses. By that time, the walls of the vein close and scar around the balloon remnant, which remains fixed in position.

The vena cava balloon occluder is designed for treatment of a common, often fatal, condition known as pulmonary embolism, which occurs when blood clots formed in the legs or lower parts of the body are carried by the blood stream to the lungs.

The standard treatment of this condition involves the use of drugs to decrease the ability of the blood to form clots. If this treatment is ineffective or contraindicated, surgery may be performed to close the main blood vessel through which these clots travel, the vena cava. However, surgery and the anesthesia required cause further complications or death in a significant

number of patients, and the anticoagulating drugs cannot be used during surgery.

The vena cava balloon occluder is intended for use in patients who cannot have, or refuse, surgery or in whom drug therapy is unsuccessful.

REVIEW OF APPLICATION

The Food and Drug Administration has concurred with the Cardiovascular Device Classification Panel's recommendation to approve the premarket application subject to the condition that the sponsor conduct post-approval studies, with annual reports to FDA, to generate additional data on long term biocompatibility of the materials used in the implant (i.e., compatibility of the materials with tissue and blood). Based on the panel's recommendation, FDA has approved the application subject to the recommended condition.

A detailed summary of the information on which FDA's approval is based is available upon request from the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

OPPORTUNITY FOR ADMINISTRATIVE REVIEW

Section 515(g) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360e(g)) authorizes any interested person to petition for administrative review of FDA's decision to approve this application. A petitioner may request either a formal hearing under Part 12 of the FDA's administrative practices and procedures regulations (21 CFR Part 12) or a review of the application and FDA's action by an independent advisory committee of experts. A petition shall be in the form of a petition for reconsideration of FDA action under §10.33(b) (21 CFR 10.33(b)). A petition shall designate the form of review that the petitioner requests (hearing or independent advisory committee) and shall be accompanied by supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing any petition, FDA will decide whether to grant or deny the petition by notice published in the FEDERAL REGISTER. If FDA grants the petition, the notice will state the issues to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may at any time on or before June 22, 1978, file with the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, four copies of each petition and supporting data and information, identified with the name of the device and

the Hearing Clerk docket number found in brackets in the heading of this document.

Dated: May 16, 1978.

SHERWIN GARDNER,
Acting Commissioner
of Food and Drugs.

Health Resources Administration

NATIONAL COUNCIL ON HEALTH PLANNING AND DEVELOPMENT

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory body scheduled to meet during the month of June 1978:

Name: National Council on Health Planning and Development.

Date and Time: June 9, 1978, 8:30 a.m.-5 p.m.

Place: Main Auditorium, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, D.C. 20201.
Open for entire meeting.

Purpose. The National Council on Health Planning and Development is responsible for advising and making recommendations with respect to (1) the development of national guidelines under section 1501 of Pub. L. 93-641, (2) the implementation and administration of Title XV and XVI of Pub. L. 93-641, and (3) an evaluation of the implications of new medical technology for the organization, delivery and equitable distribution of health care services. In addition, the Council advises and assists the Secretary in the preparation of general regulations to carry out the purposes of section 1122 of the Social Security Act and on policy matters arising out of the implementation of it, including the coordination of activities under that section with those under other parts of the Social Security Act or under other Federal or federally assisted health programs. The Council considers and advises the Secretary on proposals submitted by the Secretary under the provisions of section 1122(d)(2) that

health care facilities or health maintenance organizations be reimbursed for expenses related to capital expenditures notwithstanding that under section 1122(d)(1) there would otherwise be exclusion of reimbursement for such expenses.

Agenda. The Council will continue discussion on Goals Implementation Strategy it proposed in April. Evaluation Plans and Issues of Rate Regulations, Certification of Need and Health Planning Linkages will also be discussed.

Anyone wishing to participate, obtain a roster of members, minutes of meetings, or other relevant information should contact Mrs. S. Judy Silsbee, Executive Secretary, National Council on Health Planning and Development, Room 10-27, Center Building, 3700 East-West Highway, Hyattsville, Md. 20782, telephone 301-436-7175.

Agenda items are subject to change as priorities dictate.

Dated: May 11, 1978.

JAMES A. WALSH,
Associate Administrator for
Operations and Management.

Health Services Administration

ADVISORY COMMITTEE

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory body scheduled to meet during the month of June 1978:

Name: PHS Hospitals Ad Hoc Advisory Committee.

Date and Time: June 9-10, 1978, 8:30 a.m.
Place: 607 G1, Hubert Humphrey Building, 200 Independence Avenue, SW., Washington, D.C. 20201.

Open for entire meeting.

Purpose: The Committee will conduct an in-depth examination of each PHS hospital in relation to its principal beneficiaries and the community in which it is located; its health needs and delivery system; and the cost of operation and achievements. It will assist in developing options and recommendations concerning the present and future role of the hospitals in the continuation and improvement of health care delivery.

Agenda: To review, discuss and modify second draft of the report.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should contact Mr. Jordan Popkin, Office of the Administrator, Health Services Administration, Parklawn Building, Room 14-15, 5600 Fishers Lane, Rockville, Md. 20857, telephone 301-443-2245.

Agenda items are subject to change as priorities dictate.

Dated: May 18, 1978.

WILLIAM H. ASPDEN, JR.,
Associate Administrator
For Management.

[4110-85]

Office of the Assistant Secretary for Health

ADVISORY COMMITTEE

Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory bodies scheduled to meet during the month of June 1978:

Name: Health Care Technology Study Section.

Date and Time: June 7-9, 1978, 8 p.m.
Place: Shoreham Americana Hotel, 2500 Calvert Street NW., Washington, D.C. 20008.

Open June 7, 8 p.m. to adjournment. June 8, 9:00 a.m. to 10:00 a.m.
Closed for remainder of meeting.

Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Center for Health Services Research.

Agenda: The open session of the meeting on June 7 will be devoted to a discussion of the Report of the Information Systems Evaluation Work Group, and on June 8 the open session will be devoted to a business meeting covering administrative matters. The closed portion of the meeting will be utilized in a review of health services research grant applications relating to the delivery, organization, and financing of health services. The closing is in accordance with the provisions set forth in section 552b(c)(6), Title 5, U.S. Code, and the Determination by the Acting Assistant Secretary for Health, pursuant to Pub. L. 92-463.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should contact Dr. Alan E. Mayers, National Center for Health Services Research, OASH, Room 7-50A, Center Building, 3700 East-West Highway, Hyattsville, Md. 20782, telephone 301-436-6198.

Name: Health Services Developmental Grants Study Section.

Date and Time: June 12-13, 1978, 9 a.m.
Place: Shoreham Americana Hotel, 2500 Calvert Street NW., Washington, D.C. 20008.

Open June 12, 9:00 a.m. to 10:00 a.m.
Closed for remainder of meeting.

Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Center for Health Services Research.

Agenda: The open session of the meeting on June 12, 1978, will be devoted to a business meeting covering administrative matters and reports. During the closed sessions, the Study Section will be reviewing research grant applications relating to the delivery, organization and financing of health services. The closing is in accord-

ance with provisions set forth in section 552b(c)(6), Title 5, United States Code, and the Determination by the Acting Assistant Secretary for Health, pursuant to Pub. L. 92-463.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should contact Mr. David McFall, National Center for Health Services Research, OASH, Room 7-50A, Center Building, 3700 East-West Highway, Hyattsville, Md. 20782, telephone 301-436-6916.

Name: Health Services Research Study Section.

Date and Time: June 14-15, 9:00 a.m.
Place: Thomas Paine Room, Sheraton Park Hotel, 2660 Woodley Road NW., Washington, D.C. 20008.

Open June 14, 9:00 a.m. to 10:00 a.m.
Closed for remainder of meeting.

Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Center for Health Services Research.

Agenda: The open session on June 14, 1978, will be devoted to a business meeting covering administrative matters and reports. During the closed session, the study section will be reviewing research grant applications relating to the delivery, organization, and financing of health services. The closing is in accordance with provisions set forth in section 552b(c)(6), Title 5, United States Code and the Determination by the Acting Assistant Secretary for Health pursuant to Pub. L. 92-463.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should contact Mr. Hoke S. Glover, National Center for Health Services Research, OASH, Room 7-50A, Center Building, 3700 East-West Highway, Hyattsville, Md. 20782, telephone 301-436-6916.

Agenda items are subject to change as priorities dictate.

Dated: May 18, 1978.

WAYNE RICHEY, Jr.,
Acting Associate Director for
Management Office of Health
Policy Research and Statistics.

Office of the Secretary

Reestablishment of the Secretary's Advisory Committee on the Rights and Responsibilities of Women

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776, 5 U.S.C. App. I), the Office of the Secretary announces the reestablishment of the Secretary's Advisory Committee on the Rights and Responsibilities of Women by the Secretary, Department of Health, Education, and Welfare.

Authority for this committee will expire on May 5, 1980, unless the Secretary formally determines that continuance is in the public interest.

Further information on the committee may be obtained from Susan C. Lubick, Executive Secretary, Office of

the Secretary, Department of Health, Education, and Welfare, 200 Independence Avenue SW., Washington, D.C. 20201, telephone 202-245-8454.

Dated: May 17, 1978.

SUSAN C. LUBICK,
Executive Secretary, Secretary's
Advisory Committee on the
Rights and Responsibilities of
Women.

Social Security Administration

ENGLISH LANGUAGE AND EMPLOYMENT SERVICES FOR INDOCHINESE REFUGEES

Availability of Funding

AGENCY: Office of Family Assistance, Social Security Administration, HEW.

ACTION: Final notice of availability of funding.

SUMMARY: This document governs the award of grants to public and private non-profit agencies for the purpose of operating English language and employment services for Indochinese refugees in fiscal year 1978, in order to assist refugees in resettling in the United States and in gaining skills and education necessary to become self-reliant.

FOR FURTHER INFORMATION CONTACT:

Gerard R. Wynne, 202-472-2417.

SUPPLEMENTARY INFORMATION:

1. PUBLIC COMMENT TO THE NOTICE OF AVAILABILITY OF FUNDING

A notice of the Availability of Funding was published on March 22, 1978 in 43 FR 11859-11861. Interested persons were invited to submit comments, suggestions, or objections to the notice, to be received by the Director, Special Programs Staff, Office of Family Assistance, on or before April 21, 1978.

Comments were received from nine persons or organizations outside the Department of Health, Education, and Welfare. While all commenters expressed general support for the proposal, certain suggestions were offered. The comments, summarized by subject area, are listed below, with responses.

Certain other changes were made in order to correct omissions and typographic errors printed in the initial notice. Significant changes are noted under Item 3, "Other Changes."

2. SUMMARY OF COMMENTS

Comment. One commenter suggested that allowable activities be expanded to include the provision of supplemen-

tal services such as transportation and child day care for program participants where warranted.

Response. While such an inclusion would undoubtedly be beneficial in enabling more refugees to enroll in projects, Special Projects funding constraints prohibit this. However, such services may be available under Indochinese Refugee Assistance Program (IRAP) Social Services funding to the States.

Comment. Three commenters discussed the manner in which the funds are allocated among the 10 HEW Regions, based upon the number of Indochinese refugees receiving cash assistance in those regions. The comments noted such complex and sophisticated factors as refugee distribution among the States, the varying levels of cash assistance support among the States, the continuing secondary migration of refugees from State to State, and differing needs of the refugee population of the various States.

Response. Pub. L. 95-145 places strong emphasis upon Special Projects funds as a means to help refugees gain skills and education necessary to become self-reliant. In the absence of more reliable yardsticks to measure the degree of refugee self-reliance, the cash assistance caseload remains the most accurate basis for determining such self-reliance.

Comment. Two Commenters proposed that the scope of the projects be broadened to afford specialized training for Indochinese refugee professionals as an allowable activity.

Response. While such upgrading would undoubtedly be desirable in helping refugee professionals upgrade their job skills, and while such training would not be precluded under the notice, the limited amount of funds available, the substantial number of refugees needing training to reach self-support levels, and the cost/benefit ratio for such professional training preclude specific incorporation of this feature into the notice.

Comment. One commenter urged that the teaching of mathematics be included in Item V under "allowable activities."

Response. Item V (5) would permit the teaching of mathematics provided it met the requirement of "employment-enhancing job training."

Comment. One commenter expressed concern that the voluntary agencies which have assisted in the resettlement of Indochinese refugees be given opportunity to participate in the projects.

Response. Such opportunity is provided in the Notice in accordance with section 2(c) of Pub. L. 95-145, which provides that these funds shall be "for special projects and programs, administered in whole or in part by State or local public agencies or by private vol-

untary agencies participating in the Indochina refugee assistance program."

Comment. One commenter urged that at least 50 percent of the Special Projects funds available under this notice be earmarked to train unemployed adult refugees receiving cash assistance.

Response. While this category of refuge is included among those eligible to participate in the projects, it was felt that such a requirement would not necessarily conform to refugee needs in a given locality.

3. OTHER CHANGES

a. Item V, "Eligible Projects," has been changed to conform with Office of Management and Budget (OMB) policy. If, subsequent to a grant award, the grantee wishes to enter into a contract with a third party, the grantee must submit a request for prior approval to appropriate HEW officials, but need not submit the proposed contract itself.

b. Item VIII, "Application Submission and Approval Procedures." Dates for application submission and award of grants have been changed, reflecting the publication date of this notice. Also, pursuant to HEW grants policy, compliance with OMB Circular A-95 Part I is required.

c. Item X, "Application Content." Pursuant to HEW grants policy, SF 424 is substituted for submitting basic project proposals.

d. Item XI, "Records and Reports." Pursuant to OMB policy, reports will be required quarterly rather than monthly. Item (4) has been changed to read "Fiscal records," correcting a typographical error.

e. Item XII, "Conditions of Award," has been broadened to assure full appeal and non-discrimination in the grant process, and the HEW Grants Administration Manual has been substituted for the grants administration policies of the former Social and Rehabilitation Service.

f. Number 13.814 in the 1978 Catalog of Federal Domestic Assistance has been assigned.

I. PURPOSE AND SCOPE

This notice describes the availability of national funding for special projects and programs of English language instruction, training, and employment services for Indochinese refugees. The objective of such projects and programs is to assist refugees in resettling in the United States and in gaining skills and education necessary to become self-reliant.

Funding will be available through the Special Programs Staff, Office of Family Assistance, Social Security Administration, HEW, for project grant awards to public and non-profit private agencies for intensive employ-

ment assistance activities for Indochinese refugees currently receiving cash assistance or likely to receive such assistance in the future.

In addition to addressing the problem of refugee unemployment which results in the need for public cash assistance, these projects will also attack the problem of refugee underemployment by upgrading refugee vocational skills and earning power to the point where supplementary cash assistance is no longer needed by working refugees.

Projects to be funded will be those which emphasize direct job placement whenever possible and provide work-related English language and vocational training leading to secure jobs with advancement potential and the usual range of employee fringe benefits.

II. AUTHORIZATION

Funds for the activities listed below are authorized under the Indochina Migration and Refugee Assistance Act of 1975 Pub. L. 94-23 as amended by Pub. L. 95-145. Specifically, that act authorizes funds to be appropriated to the Department of Health, Education, and Welfare for the performance of functions set forth in the Migration and Refugee Assistance Act of 1962, Pub. L. 87-510. It is intended that the grants be for up to 12 months from the date of award.

III. ELIGIBLE GRANTEES

Section 2(c) of Pub. L. 95-145 states that special projects and programs are to be "administered in whole or in part by State or local public agencies or by private voluntary agencies participating in the Indochina Refugee Assistance Program, to assist refugees in resettling and in gaining skills and education necessary to become self-reliant."

Eligible grantees are State and local governments, public and incorporated nonprofit private agencies, or any combination of these. Private for-profit agencies or firms are not eligible for grants.

IV. ALLOTMENT OF FUNDS

Project grant applications will be funded on merit, as outlined in Item IX, "Criteria for Evaluating Applications." Funds will be made available among the 10 HEW regions, taking into account the number of refugee cases receiving cash assistance.

Based on the percentage of the National cash assistance caseload in each region, it is estimated that the funding that could be available among the HEW regions for new projects pursuant to this notice will be as follows:

Region	Percent of total cash	Amounts
Region I	2.234	\$67,000
Region II	2.109	63,000

Region	Percent of total cash	Amounts
Region III	9.664	290,000
Region IV	5.253	158,000
Region V	8.922	268,000
Region VI	8.641	259,000
Region VII	5.035	151,000
Region VIII	3.444	103,000
Region IX	45.021	1,351,000
Region X	9.677	290,000

V. ELIGIBLE PROJECTS

Proposed projects must provide for direct services to refugees and must be designed to move employable adult refugees receiving cash assistance, likely to receive cash assistance, or in need of employment services into permanent full-time employment, and to upgrade the earning power of currently underemployed refugees.

Allowable activities include:

- (1) Identification and employability assessment of eligible adults.
- (2) Job placement services.
- (3) Provision of English language training, provided that such training emphasizes the teaching of English that is essential to the attainment of employment, including language training which is related to the needs of a specific occupation.
- (4) Vocational Training.
- (5) Vocational counseling, testing, employment-enhancing job training, skill training, and follow-up counseling. Special emphasis on career planning, with the goal of steady advancement in a field of specialty, is strongly encouraged.

The payment of stipends is not an allowable activity.

Project plans must show how the selected activities will support the objectives as outlined in section I, "Purpose and Scope" above. A range of services and a mix of activities that reflect the individual needs of each area to be served are encouraged. Jointly funded or supported activities are allowed and encouraged.

Creation of advisory boards, made up of representatives from the Indochinese community, the public sector, and the private sector (such as voluntary agencies, labor organizations and employers) is required for all projects.

Intent to contract with third parties (including profit-making organizations) must be fully described in the grant application. If, subsequent to the grant, the grantee desires to enter into a contract with a third party, a request for prior approval must be submitted through the Regional Commissioner SSA, and approved by the Director, Special Programs Staff, Office of Family Assistance, as outlined in Chapter 1-430 of the HEW Grants Administration Manual.

VI. DEFINITION OF A REFUGEE

For the purpose of participation in these projects, refugees are defined as:

"Aliens who (A) because of persecution or on account of race, religion, or political opinion, fled from Cambodia, Vietnam, or Laos; (B) cannot return there because of fear of persecution on account of race, religion, or political opinion."

To be eligible, a refugee must have status as described by one of the following: (1) An individual with parole, voluntary departure or conditional entry status as indicated by an Immigration and Naturalization Service (INS) Form I-94; (2) An individual admitted to the United States with permanent resident status on or after April 8, 1975, or an individual who has permanent resident status as a result of adjustment of status under Pub. L. 95-145, as indicated by INS Form I-151 or I-551.

VII. ELIGIBLE PARTICIPANTS

Consistent with the scope and purpose of the authorizing legislation, the eligible participants shall be:

- (1) Unemployed, employable adult refugees receiving public cash assistance or likely to receive public cash assistance.
- (2) Underemployed adult refugees needing job upgrading to achieve or maintain self-sufficiency.
- (3) Underemployed adult refugees needing job upgrading to achieve career potential.
- (4) Minors age 16 or 17 who are not in school.

VIII. APPLICATION SUBMISSION AND APPROVAL PROCEDURES

Eligible applicants may request grant applications and information from the HEW Regional Offices listed at the end of this notice, or from the Special Programs staff, Office of Family Assistance, Social Security Administration, Room 1124, Donohoe Building, HEW, 330 Independence Avenue SW., Washington, D.C. 20201.

An original application and two copies must be received by the Regional Commissioner, Social Security Administration, by 5 p.m. (local time), 30 days subsequent to the publication of this notice. No grant application will be accepted after this date.

Regional panels to be convened by the Regional Commissioners, Social Security Administration, will review, evaluate, and rank the proposals received, based on (1) the criteria outlined in Item IX of this notice; (2) the needs of the refugee population within the region; and (3) existing resources available to refugees in the target area. The review panel's recommendations and the Regional Commissioners' concurrence and/or comments will be forwarded to the Director, Special Programs Staff, Office of Family Assistance for review. Upon the director's approval, the grant awards are expected to be issued within 45 days of

the closing date for receipt of applications.

All applications are subject to the Project Notification and Review procedures required by OMB Circular A-95 Part I. This circular requires applicants to notify State and areawide clearinghouses of their intention to apply for a grant and, if requested by a clearinghouse, to submit a copy of the application.

IX. CRITERIA FOR EVALUATING APPLICATIONS

Project grant applications will be evaluated on the following criteria:

1. Familiarity and experience of the applicant organization in Indochinese refugee resettlement, manpower programs, and/or teaching English as a second language (0-10 Points).
2. Qualifications of applicant organization in operating human service programs, including:
 - (a) Provision of direct services; (b) project administration; (c) monitoring of subcontracts, if applicable; (d) training and supervision of staff; and (e) demonstration of commitment and responsiveness to refugee concerns through implementation of Advisory Boards, feedback mechanisms, and program evaluation (0-15 Points).
3. Projected impact of the proposed program in increasing self-sufficiency and reducing dependency—i.e., specific project objectives (0-15 Points).
4. Qualifications of individual professional personnel delivering the services and administering the project (0-10 Points).
5. Understanding and analysis of the problem, in light of local conditions and the needs of the target population to be served (0-10 Points).
6. The extent to which the grant application outlines a clear and achievable plan to reduce unemployment and/or underemployment among target adult refugees (0-15 Points).
7. The extent to which the proposed project mobilizes, coordinates, and expands existing resources and activities which are providing, or could provide, services to refugees, including:
 - (a) Ongoing activities funded through the Office of Family Assistance and Office of Education under the Refugee Assistance Program; (b) State or local resettlement task forces or committees; and (c) Voluntary efforts undertaken by Voluntary Agencies (VOLAGs), other resettlement agencies, and Indochinese associations and coalitions (0-15 Points).
8. Comprehensiveness and coordination of proposed project components (0-10 Points).
9. Adequacy and accessibility of facilities and other resources (0-10 Points).
10. Reasonableness of estimated costs in relation to anticipated results (cost/benefit ratio) (0-15 Points).

Selection of a State for a grant award does not preclude a grant award to other public or non-profit private agencies within the State. Applicants must demonstrate their willingness and intention to work cooperatively with other agencies serving the same population.

X. APPLICATION CONTENT

All applicants will use Standard Form 424, "Federal Assistance" in submitting project proposals. Grants applications must also include the following:

- (1) *Description of the applicant organization.* Description of the proposer (public agency, private nonprofit, consortium). If other than a public agency, description of its organizational mandate, funding sources, principal officers, address, and telephone number. A description of the advisory board's makeup, the selection process used for its members, and the Board's function. If the applicant is a unit of a larger institution, assurances must be provided that the operation and objectives of the project will not be subordinated to other institutional objectives.
- (2) *Applicant experience with Indochinese refugees.* Description of other projects or experience which the applicant has had in serving the Indochinese refugee population.
- (3) *Identification of the target population.* Includes estimates of the number of people to be served (compared to the total refugee population in the area), number receiving cash assistance, and other relevant distinctions, such as:
 - a. Number unemployed and underemployed.
 - b. Heads of households and secondary wage earners.
 - c. Sex and family status.
 - d. Native language (Vietnamese, Cambodian, Lao, H'mong).
- This section will include an explanation of the methodology and data sources used in arriving at the estimates.
- (4) *Project objectives.* Description of proposed project objectives, including the number of enrollees who will achieve each of the listed objectives.
- (5) *Existing service deliverers.* Brief overview of existing services to Indochinese refugees which have bearing on the proposed project. Where other service projects are in operation, proposer should provide assurances that either:
 - a. Coordinative linkages with such projects have been arranged (demonstrated by letters of commitment or support or descriptions of working agreements), or
 - b. The proposed project is not in competition with, nor duplicative of, existing projects.
- (6) *Work plan.* A work plan to meet the project objectives including identi-

fication of all service deliverers and a procedure to insure service linkages. A description of proposed contracting with third parties should be included. The work plan should describe in detail the proposed services and components, such as:

a. *Outreach and recruitment.* Description of how proposer plans to locate and recruit the target population, along with a schedule of enrollment goals.

b. *Intake and assessment.* Description of how proposer plans to determine eligibility and make assessments of enrollee needs, including assessment tools or proposed tests.

c. *Counseling and career planning.* Description of how proposer plans to provide counseling and career planning services. If already developed, samples should be included of Employment Plan or Career Plan forms which will be completed for enrollees.

d. *Language training.* Description of how proposer plans to deal with the language problems of the refugees. If English as a Second Language (ESL) programs are planned, description of class sizes, amount of instruction, and assurances that classes will be refugee-specific.

e. *Vocational training.* If proposed, description of how proposer plans to provide or arrange for vocational training, including skill areas, length of training, and likelihood of related employment.

f. *Job development and placement.* Description of how proposer plans to develop jobs, or other positive alternatives (such as on-the-job training or higher education). Description of placement methodology.

g. *Follow-up.* Description of how proposer plans to maintain follow-up contacts and records for ninety days after all placements.

(7) *Supportive services.* Supportive services required, with an indication of how they will be provided.

(8) *Management plan.* A plan for fiscal and program management to accomplish the program objectives. The program management plan should describe how the proposer plan to administer the project, train and supervise staff, monitor subcontracts (if proposed), maintain records, and evaluate performance.

(9) Program budget.

XI. RECORDS AND REPORTS

Grantees will be required to maintain such fiscal and operational records as are necessary for Federal monitoring and auditing of the grants. This record-keeping shall include but is not limited to:

(1) Individual case records on all refugees counted as enrolled and receiving services. At a minimum these records must include identification data; career planning and counseling data;

services provided; progress reports; job referrals; job placements; and follow-up.

(2) Quarterly program progress reports, due 10 days after the last calendar day of each quarter following the effective date of the contract award. The quarterly report shall include:

a. A narrative statement of project status: Progress achieved, problems encountered, and proposed actions to resolve problems.

b. The number of refugees receiving services, including current enrollment and cumulative totals for each service provided by the grant project.

c. The number of refugees placed in jobs and hourly wage rates.

d. Of those placed, the number still employed 30, 60, and 90 days after job placement.

e. A cash assistance status report of the refugees served.

(3) Fiscal reports.

(4) Fiscal records.

(5) Additional reports as required for effective Federal monitoring.

XII. CONDITIONS OF AWARD

All grants made under this announcement will be subject to:

1. The following HEW regulations in 45 CFR, as amended: Part 16, "Department Grant Appeals Process;" Part 74 "Administration of Grants;" Part 75, "Informal Grant Appeals Procedures;" and Parts 80, 84, and 86 relating to nondiscrimination.

2. The HEW Grants Administration Manual.

Copies of these documents may be inspected in the offices of Regional Commissioners, SSA, or of the Special Programs Staff, Office of Family Assistance, HEW, Room 1124, Donohoe Building, 400 Sixth Street SW., Washington, D.C.

XIII. ADDITIONAL INFORMATION

Additional information and grant applications can be obtained from the following persons in the HEW Regional Offices:

REGION I

Tran Phuoc Truong or Sydney Henkel, Social Security Administration, HEW, John F. Kennedy Federal Building, Government Center, Boston, Mass. 02003, telephone 617-223-6833, FTS 8-223-6833.

MENTAL HEALTH PROJECTS FOR INDOCHINESE REFUGEES

Availability of Funding

AGENCY: Office of Family Assistance, Social Security Administration, HEW.

ACTION: Proposed notice of available funding.

SUMMARY: This document governs the award of grants to public and private nonprofit agencies for the purpose of operating mental health projects for Indochinese refugees beginning in fiscal year 1978, in order to assist refugees in resettling in the United States and in becoming self-reliant.

COMMENT DATE: Public comments must be received on or before June 22, 1978.

ADDRESSES: Comments should be addressed to Director, Special Pro-

grams Staff, Office of Family Assistance, Social Security Administration, HEW, Room 1124, Donohoe Building, 330 Independence Avenue SW., Washington, D.C. 20201. Comments received in response to this notice will be available for inspection at the above office, Mondays through Fridays between 8:30 a.m. and 5 p.m.

FOR FURTHER INFORMATION CONTACT:

Charles W. Soffel, 202-472-2397.

I. PURPOSE AND SCOPE

This notice describes the availability of national funding for special projects and programs designed to assist Indochinese refugees in coping with mental health problems. The objective of such projects and programs is to assist refugees in resettling in the United States and in gaining self-reliance.

Funding will be made available through the Special Programs Staff, Office of Family Assistance, Social Security Administration, HEW, for project grant awards to public and nonprofit private agencies.

A. BACKGROUND

The Indochinese refugees, having undergone the traumas of emergency evacuation from their homelands and relocation in this (to them) alien culture, suffered considerable stress. The Refugee Task Force (now the Special Programs Staff) received in the spring and summer of 1976 consistent warnings, from Regional Refugee Coordinators and agencies involved in the resettlement program, of growing evidence of behavioral problems attributed generally to the trauma of resettlement.

In fiscal year 1976 and 1977, the Task Force approved six small grants to deal with mental health problems of the refugees. Reports from the projects confirmed the informal body of information already available. The projects found cases of depression, anxiety, alcohol and drug abuse, and wife and child abuse. The psychosomatic ailments they found included headaches, dizziness, and nausea.

In addition to the findings of the mental health projects, refugee Employment and Training Projects reported that emotional problems were preventing significant numbers of enrolled refugees from securing or holding gainful employment.

It became apparent that the national objective of refugee self-sufficiency could not be achieved for those refugees suffering from mental health problems unless those problems were addressed. It also became apparent that the existing mental health services delivery system in most localities was not able to respond adequately to the problems of the refugee community. This notice is a result of those conclusions.

B. SCOPE OF PROJECTS

To bridge the gap between existing facilities and the needs of Indochinese refugees, assuring that refugees are afforded the same mental health services available to the general population, the Special Programs Staff proposes to fund approved programs and projects as outlined in this notice. There are three major objectives of this effort:

1. *To impact the existing mental health services delivery system.* Included under this objective would be projects designed, through in-service training and other means, to alert mental health officials and practitioners to the scope and special nature of the refugee problems in their localities. The results of such efforts should include, both qualitatively and quantitatively, an increase of services to refugees.

2. *To increase the opportunities for employment in the mental health field for the Indochinese.* Included under this objective would be projects to provide on-the-job training for Indochinese as mental health workers, competent to work independently at counseling, interviewing, and rendering other direct services to Indochinese under supervision of certified or licensed professionals. (Long-term training of psychiatrists, psychologists, or other professionals is not envisioned.)

3. *To create community comprehensive support systems.* Included under this objective would be projects designed to work with mental health systems, to train paraprofessionals, to establish linkages among social service deliverers, and to facilitate the understanding within the refugee population of the American approach to mental health and mental health services.

It is recognized that prospective applicants for the grants may not choose to respond to all three objectives; therefore, it is allowable under this notice to propose projects which respond to one or more of the objectives. Consideration for funding will take into account the expected permanence of the change the projects will effect and the amount of direct service generated. Applications should clearly indicate which objectives the proposal will address, and in what way.

Because of funding limitations, it is not envisioned that these grants will provide direct clinical services to refugees except as that provision relates to on-the-job training.

II. AUTHORIZATION

Funds for the activities listed below are authorized under the Indochina Migration and Refugee Assistance Act of 1975, Pub. L. 94-23 as amended by Pub. L. 95-145. Specifically, that act authorizes funds to be appropriated to the Department of Health, Education,

and Welfare for the performance of functions set forth in the Migration and Refugee Assistance Act of 1962, Pub. L. 87-510. It is intended that the grants be for up to 12 months from the effective date of award.

III. ELIGIBLE GRANTEES

Section 2(c) of Pub. L. 95-145 states that special projects and programs are to be "administered in whole or in part by State or local public agencies or by private voluntary agencies participating in the Indochina Refugee Assistance Program, to assist refugees in resettling and in gaining skills and education necessary to become self-reliant."

Eligible grantees are State and local governments, public and incorporated nonprofit private agencies, or any combination of these. Private for-profit agencies or firms are not eligible for grants.

Selection of a State for a grant does not preclude a grant award to other public or nonprofit private agencies within the State.

IV. ALLOTMENT OF FUNDS

Project grant applications will be funded on merit, as outlined in item IX, "Criteria for Evaluating Applications." Funds will be made available among the 10 HEW Regions, taking into account the proportionate refugee populations of each region as indicated by Alien Registration data compiled by the Immigration and Naturalization Service as of January 1978. This data is expected to be available from INS during April or May 1978.

A national total of approximately \$2,500,000 is expected to be made available pursuant to this notice.

V. ELIGIBLE PROJECTS

Projects are expected to advance the mental health of the Indochinese refugee population. Such projects are to be designed primarily with the goal of placing needy refugees into effective contact with the existing mental health systems, and of enhancing the responsiveness and effectiveness of the systems in providing services to the refugees.

Allowable activities: It is allowable to propose projects which respond to one or more of the objectives listed in section I, "Purposes and Scope." The allowable activities listed here are grouped under the objectives for guidance; however, the listings are not mutually exclusive and, where warranted, a mix of activities may be proposed.

Objective 1: *Impacting existing mental health services delivery systems*

1. Activities designed to inform appropriate State, local, and private mental health officials and practitioners of the needs of the refugees. These

could include the utilization or adaptation of resource materials and the development of training packages on such topics as Indochinese perceptions of and attitudes toward Western mental health practices and modalities of treatment for this population.

2. Training sessions, conferences, and workshops aimed at improving mental health services provided to refugees.

3. Short-term research to identify the scope and nature of refugee mental illness and the availability of treatment within the existing systems.

Objective 2: Increasing opportunities for employment in the mental health field for the Indochinese

1. Development of training projects for Indochinese individuals. These should include a reasonable mix of classroom training and on-the-job training and supervision designed to enable the trainees to secure employment in the mental health field.

2. Career planning for trainees. This should include the development of career ladders leading to permanent positions and upward job mobility in the field.

Objective 3: Creating community comprehensive support systems

1. Development of interagency mental health forums, task forces, or committees, which include representation from the public and voluntary sectors and the refugee community to coordinate activities.

2. Training and supervision for Indochinese paraprofessionals to function as outreach workers, counselors, or facilitators.

3. Creation of devices, such as referral systems and public education, designed to familiarize the refugee population with services and facilities available to them, to encourage use of such services and facilities when warranted, and to carry out community mental health work in the refugee community.

Project plans must show how the proposed activities will support one or more of the objectives outlined in section I, "Purpose and Scope." A range of services and a mix of activities that reflect the individual needs of each area to be served are encouraged.

Also encouraged is concurrent and coordinated use of additional funding and support, such as State, local, or private funds, and other program participation.

Proposed projects may be region-wide, statewide, countrywide, or smaller. Because of the limitation of funds, a multi-jurisdictional approach and consortia arrangements are permitted.

Creation of advisory boards, made up of equal numbers of representatives from among the refugee commu-

nity, mental health clinicians, and social services agencies, is required for all projects.

Project activities may be carried out by third parties (including profitmaking organizations) under contract from the grantee; however, the grantee may not contract out 100 percent of the services, and must in any case retain full administrative control. Intent to contract with third parties must be fully described in the grant application. If, subsequent to the grant, the grantee desires to enter into a contract with a third party, a request for prior approval must be submitted through the Regional Commissioner, SSA, and approved by the Director, Special Programs Staff, as outlined in chapter 1-430 of the HEW Grants Administration Manual.

VI. DEFINITION OF A REFUGEE

For the purpose of participation in these projects, refugees are defined as "Aliens who: (A) because of persecution or on account of race, religion, or political opinion, fled from Cambodia, Vietnam, or Laos; (B) cannot return there because of fear of persecution on account of race, religion, or political opinion."

To be eligible, a refugee must have status as described by one of the following: (1) An individual with parole, voluntary departure, or conditional entry status as indicated by an Immigration and Naturalization Service (INS) form I-94; (2) an individual admitted to the United States with permanent resident status on or after April 8, 1975, or an individual who has permanent residence status as a result of adjustment of status under Pub. L. 95-145, as indicated by INS form I-151 or I-551.

VIII. APPLICATION SUBMISSION AND APPROVAL PROCEDURES

Eligible applicants may request grant applications and information from the HEW Regional Offices listed at the end of this notice, or from the Special Programs Staff, Office of Family Assistance, Social Security Administration, Room 1124, Donohoe Building, HEW, 330 Independence Avenue SW., Washington, D.C. 20201.

Applications must be received by the Regional Commissioner, Social Security Administration, by 5 p.m. July 5, 1978. No grant application will be accepted after this date.

Regional panels to be convened by the Regional Commissioners, Social Security Administration, will review and evaluate the proposals received, based on the criteria outlined in item IX of this notice. The review panels' recommendations and the Regional Commissioners' concurrence and/or comments will be forwarded to the Director, Special Programs Staff, Office of Family Assistance for review and,

upon approval, for issuance of grant awards.

All applications are subject to the Project Notification and Review procedures required by OMB circular A-95 part I. This circular requires applicants to notify State and area-wide clearinghouses of their intention to apply for a grant and, if requested by a clearinghouse, to submit a copy of the application.

VIII. APPLICATION CONTENT

All applicants will use standard form 424 "Federal Assistance" in submitting project proposals. Grant applications must also include the following:

(1) *Description of the applicant organization.* Description of the proposer (public agency, private nonprofit, consortium). If other than a public agency, description of its organizational mandate, funding sources, principal officers, address, and telephone number. A description of the makeup of the project's advisory board, the selection process used for its members, and the board's function must be included. If the applicant is a unit of a larger institution or government entity, assurances must be provided that the operation and objectives of the project will not be subordinated to other objectives.

(2) *Applicant experience with Indochinese refugees.* Description of other projects or experience which the applicant has had in serving the Indochinese refugee population.

(3) *Identification of the target population.* Specify the total Indochinese population in the project area, identified, where possible, by native language (Vietnamese, Cambodian, Lao, H'mong).

(4) *Existing mental health systems.* Brief overview of existing systems for delivery of mental health services to the general public in the area to be served by the project.

(5) *Existing deliverers of services to Indochinese.* Brief overview of existing services to Indochinese refugees which have bearing upon the proposed project. (Where such services are in operation, proposer should provide assurances that coordinative linkages have been arranged, or that the proposed project is not in competition with nor duplicative of, the existing services.)

(6) *Project scope and objectives.* A statement of the mental health needs of the target population, the objective(s) outlined in item I, "Purpose and Scope" which the project addresses, and the project's specific goals. Proposer must describe the efforts planned to assure provision of mental health services to Indochinese refugees beyond the project grant period.

(7) *Project description.* A detailed description of a work plan designed to achieve the objectives specified in item

(6) above. Describe fully the overall project approach, proposed components of the program, activities, staffing, and how linkages with other service providers will be ensured.

Applications proposing training projects under objective 2 should state what steps will be taken to ensure the employment of the trainees in the mental health field.

X. CRITERIA FOR EVALUATING APPLICATIONS

The following criteria will be used to evaluate all project grant applications. It is recognized that not all applications will address themselves to all three major objectives; therefore, ratings based on the criteria will be made selectively according to the objectives addressed.

1. Familiarity and experience of the applicant organization with Indochinese refugee resettlement, including knowledge of the needs of the people to be served and local conditions; understanding of the cultural and institutional barriers which inhibit the normal delivery of services; understanding of the differing needs, where relevant, of the Vietnamese, Cambodian, Lao, and H'mong refugee communities.

2. Qualifications of the applicant organization in meeting the selected objectives. Applicants addressing objectives 1 or 2 should indicate their professional competence in the mental health field and in staff training, and should include the qualifications of individual professional personnel. Applicants addressing objective 3 should indicate their experience in community-based programs, especially those which cut across traditional service delivery lines.

3. The extent to which the application addresses the identified mental health needs of the target population and outlines a clear and achievable plan to interface with existing systems of service delivery. This will include the specifics of utilization of services and facilities and plans to mobilize, coordinate, and expand existing resources and activities which are providing, or could provide, services to refugees.

4. Projected impact of the proposed program. Where direct services are to be provided, the extent to which proposer quantifies anticipated results.

5. Reasonableness of estimated cost in relation to anticipated results (cost/benefit ratio).

6. Comprehensiveness and coordination of proposed project components. The extent to which proposed linkages with other institutions and agencies are supported by such evidence as proposed subcontracts, letters of commitment, or working agreements.

7. Adequacy and accessibility of facilities and other resources.

X. RECORDS AND REPORTS

Grantees will be required to maintain such fiscal and operational records as are necessary for Federal monitoring and auditing of the grants:

- (1) Quarterly program progress reports, due 10 days after the last calendar day of each quarter;
- (2) fiscal reports; and
- (3) additional reports as required for effective Federal monitoring.

XI. CONDITIONS OF AWARD

All grants made under this announcement will be subject to: (1) The following HEW regulations in 45 CFR, as amended: part 16, "Department Grant Appeals Process;" part 74, "Administration of Grants;" part 75, "Informal Grant Appeals Procedures;" and parts 80, 84, and 86 relating to non-discrimination, and (2) the HEW Grants Administration Manual.

Copies of these documents may be inspected in the offices of the Regional Commissioners, SSA, or Special Programs Staff, Office of Family Assistance, HEW, Room 1124, Donohoe Building, 400 Sixth Street SW., Washington, D.C.

XII. ADDITIONAL INFORMATION

Additional information and grant applications can be obtained from the following persons in the HEW regional offices:

LOUISIANA

Major Disaster and Related Determinations

AGENCY: Federal Disaster Assistance Administration, HUD.

ACTION: Notice.

SUMMARY: This is a Notice of the Presidential declaration of a major disaster for the State of Louisiana (FDAA-556-DR), dated May 9, 1978, and related determinations.

DATED: May 9, 1978.

FOR FURTHER INFORMATION CONTACT:

Frank J. Muckenaupt, Chief, Program Support Staff, Federal Disaster Assistance Administration, Department of Housing and Urban Development, Washington, D.C. 20410, 202-634-7825.

NOTICE: Pursuant to the authority vested in the Secretary of Housing and Urban Development by the President under Executive Order 11795 of July 11, 1974, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-74-285; and by virtue of the Act of May 22, 1974, entitled "Disaster Relief Act of 1974" (88 Stat. 143); notice is hereby given that on May 9, 1978, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of Louisiana resulting from severe storms and flooding beginning about May 3, 1978, is of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 93-288. I therefore declare that such a major disaster exists in the State of Louisiana.

Notice is hereby given that pursuant to the authority vested in the Secretary of Housing and Urban Development under Executive Order 11795, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-74-285, I hereby appoint Mr. Joe D. Winkle of the Federal Disaster Assistance Administration to act as the Federal Coordinating Officer for this declared major disaster.

I do hereby determine the following areas of the State of Louisiana to have been adversely affected by this declared major disaster.

The Parishes of: Jefferson, Orleans, St. Bernard, and St. John the Baptist.

(Catalog of Federal Domestic Assistance No. 14.701, Disaster Assistance.)

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

(NM 33352)

NEW MEXICO

Application

MAY 10, 1978.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Co. has applied for one 4½-inch natural gas pipeline right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 22 S., R. 21 E.,
Sec. 1, lot 2.

This pipeline will convey natural gas across 0.163 miles of public land in Eddy County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will

be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, N. Mex. 88201.

SAFFORD DISTRICT GRAZING ADVISORY BOARD

Meeting

Notice is hereby given in accordance with Pub. L. 92-463 that a meeting of the Safford District Grazing Advisory Board will be held on June 29, 1978.

The meeting will begin at 9:30 a.m. in the Conference Room of the Bureau of Land Management, 425 East 4th Street, Safford, Ariz.

The agenda for the meeting will include: (1) A discussion of the function of the Board; (2) the Expenditure of range betterment and advisory board funds for range improvements; (3) a review of the current policy and program relating to allotment management plans including the ongoing and future grazing environmental statement effort; (4) election of officers; (5) discussion of the board's future involvement in the allotment management plan program, and; (6) the arrangement for the next meeting.

The meeting is open to the public. Interested persons may make oral statements to the board between 3 and 4 p.m. on June 29, 1978, or file written statements for the board's consideration. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, 425 East 4th Street, Safford, Ariz. 85546, by June 23, 1978. Depending on the number of persons wishing to make oral statements, a per person time limit may be established by the District Manager. Summary minutes of the board meeting be maintained in the District Office and be available for public inspection and reproductions

(during regular business hours) within 30 days following the meeting.

Dated: May 15, 1978.

GUY E. BAIER,
District Manager.

WHITE COLLAR CRIME DATA

Solicitation

The National Institute of Law Enforcement and Criminal Justice announces a competitive grant program aimed at research and analysis on white collar crime data sources focusing primarily on those sources at the Federal level. The anticipated project would identify, describe, and assess the uses and limitations of a number of major data sources relevant to white collar crime, and produce reports on the findings.

The solicitation requests the submission of proposals to be postmarked no later than July 7, 1978. One grant is planned to be awarded by September 29, 1978, with funding support not to exceed \$250,000 and 15 months in duration. Because this is a research grant program, profitmaking organizations are prohibited by LEAA policy from receiving funding support.

A copy of the solicitation can be obtained by sending a self addressed mailing label to: WCC Data Sources, CCP Division, NILECJ, 633 Indiana Avenue NW., Washington, D.C. 20531.

BLAIR G. EWING,
Acting Director, National Institute of Law Enforcement and Criminal Justice.

DEPARTMENT OF LABOR

Office of the Secretary

INVESTIGATIONS REGARDING CERTIFICATIONS OF ELIGIBILITY TO APPLY FOR WORKER ADJUSTMENT ASSISTANCE

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assist-

ance, Bureau of International Labor Affairs, has instituted investigations pursuant to section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligi-

ble to apply for adjustment assistance under title II, chapter 2, of the Act in accordance with the provisions of subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 2, 1978.

Interested persons are invited to submit written comments regarding

the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 2, 1978.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 4th day of May 1978.

MARVIN M. FOOKS,
Director, Office of
Trade Adjustment Assistance.

Office of the Secretary

[TA-W-2950]

ALTON BOX BOARD CO., ST. LOUIS, MO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-2950: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 25, 1978, in response to a worker petition received on January 9, 1978, which was filed by the Printing Specialties & Paper Products Union on behalf of workers and former workers producing shoe boxes at the St. Louis, Mo., plant of the Alton Box Board Co.

The notice of investigation was published in the FEDERAL REGISTER on

February 17, 1978 (43 FR 7068). No public hearing was requested and none was held.

The information upon which the determination was made was obtained from the Alton Box Board Co., the U.S. Department of Treasury, the U.S. Department of Commerce, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The St. Louis, Mo., plant of the Alton Box Board Co. produces rigid and folding shoe boxes which are sold to manufacturers throughout the Midwest.

Imports of rigid boxes are not separately identifiable in the official trade statistics. Folding boxes and paperboard are classified under TSUS item 256.5400, "Boxes, Paper, Paperboard, and Paper Mache, NES." A survey of industry sources and U.S. Customs officials and a review of U.S. Customs invoices indicated that there are no imports of shoe boxes into the United States.

Workers filing this petition allege that increased imports of shoes contained in boxes have contributed importantly to the separation of workers at the St. Louis plant of the Alton Box Board Co. Although an unknown quantity of imported shoes are shipped in boxes, those packaged shoes are not like or directly competitive with the boxes produced by Alton.

CONCLUSION

After careful review I conclude that all workers at the St. Louis, Mo., plant of the Alton Box Board Co. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of May 1978.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and planning.
[FR Doc. 78-14170 Filed 5-22-78; 8:45 am]

[4510-28]

[TA-W-3115]

AMERICAN BRUSH CO., INC., BOSTON, MASS.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3115: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on February 13, 1978, in response to a worker petition received on January 26, 1978, which was filed on behalf of workers and former workers producing paint brushes at the American Brush Co., Inc., Boston, Mass. During the course of the investigation it was determined that paint rollers are also produced.

The notice of investigation was published in the FEDERAL REGISTER on February 28, 1978 (43 FR 8207). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the American Brush Co., Inc., the American Brush Manufacturers' Association, the U.S. Department of Commerce, U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof and to the absolute decline in sales or production.

American Brush Co., Inc., was established in 1923 in Boston, Mass., to manufacture paint brushes and rollers primarily for residential and industrial uses. No artist brushes are produced.

Imports of paint brushes and rollers, have comprised less than two percent of the domestic market since 1973. Further, most imported brushes are either flat or round short bristle brushes without adequate paint-carrying ability for residential or industrial

painting jobs. Imported brushes are primarily used for artistic purposes.

CONCLUSION

After careful review of the facts obtained in the investigation, I determine that workers at American Brush Co., Inc., Boston, Mass., are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of May 1978.

HARRY J. GILMAN,
Acting Director, Office of
Foreign Economic Research.
[FR Doc. 78-14171 Filed 5-22-78; 8:45 am]

[4510-28]

[TA-W-3376]

ANTHONY SPORTSWEAR, BOSTON, MASS.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3376: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on March 21, 1978, in response to a worker petition received on March 6, 1978, which was filed on behalf of workers and former workers producing ladies' sportswear at Anthony Sportswear, Boston, Mass.

The notice of investigation was published in the FEDERAL REGISTER on March 28, 1978 (43 FR 12967). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Anthony Sportswear, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

that sales or production, or both, of the firm or subdivision have decreased absolutely.

Sales and production data are equal. Production, in terms of 1975 dollars, increased from 1975 to 1976 and from 1976 to 1977. Production also increased in the first quarter of 1978 compared to the same period in 1977. Production increased in each of the four most recent quarters when compared to the respective quarter of the

previous year, and increased in March 1977 compared to March 1976.

CONCLUSION

After careful review, I conclude that all workers at Anthony Sportswear, Boston, Mass., are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of May 1978.

HARRY J. GILMAN,
Acting Director, Office of
Foreign Economic Research.

[4510-28]

[TA-W-2854]

ARMCO STEEL CORP., MARION, OHIO

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2854: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 5, 1978, in response to a worker petition received on December 19, 1977, which was filed by the United Steelworkers of America on behalf of workers and former workers producing hot rolled bars, reinforcing bars, and steel posts for fences at the Marion, Ohio, Works of Armco Steel Corp. During the course of the investigation it was established that the plant also produces steel posts for signs.

The notice of investigation was published in the FEDERAL REGISTER on January 20, 1978 (43 FR 2952). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Marion Works of Armco Steel Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. With respect to the workers producing concrete reinforcing bar and hot rolled carbon steel bars and structural shapes, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That sales or production, or both of such firm or subdivision have decreased absolutely.

The Department's investigation revealed that annual sales of reinforcing bar increased in terms of both quantity and value in 1976 compared to 1975 and in 1977 compared to 1976. Plant production of reinforcing bars increased each year during the 1975-77 period.

The Department's investigation also revealed annual sales of hot rolled bars increased in terms of both quantity and value in 1977 compared to 1976. Production of these products increased each year during the 1975-77 period.

With respect to workers producing steel sign and fence posts, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threats thereof, and to the absolute decline in sales or production.

The Department's investigation revealed that none of the customers surveyed, which account for a substantial proportion of the subject firm's sales of sign and fence posts, indicated that they purchased imports of steel sign or fence posts during period from 1975 through 1977.

After careful review of the facts obtained in the investigation, I conclude that all workers of the Marion, Ohio, plant of the Armco Steel Corp. are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of May 1978

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.

[TA-W-2645]

AVTEX FIBERS, INC., NITRO, W. VA.

Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2645: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on November 23, 1977, in response to a worker petition received on November 14, 1977, which was filed on behalf of workers and former workers producing rayon staple fiber at the Nitro, W. Va., plant of Avtex Fibers, Inc.

The notice of investigation was published in the FEDERAL REGISTER on December 6, 1977 (42 FR 61695). No

public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from Avtex Fibers, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of rayon and acetate staple and tow fibers increased from 37.9 million pounds in 1975 to 43.2 million pounds in 1976, an increase of 14.0 percent. During the January-September period of 1977, imports increased to 48.0 million pounds from 32.9 million pounds for the same period in 1976, representing an increase of 45.9 percent. The ratio of imports to domestic production decreased from 9.9 percent in 1975 to 8.9 percent in 1976. During the January-September period of 1977, the ratio of imports to domestic production increased to 11.8 percent from 9.1 percent during the same period of 1976.

A survey of customers of Avtex Fibers, Inc., indicated that major customers decreased their purchases of rayon staple fiber from the subject firm and other domestic sources while increasing imports in 1976 and 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with rayon staple fibers produced at the Nitro, W. Va., plant of Avtex Fibers, Inc., contributed importantly to the decline in sales and production and to the total or partial separation of workers of that plant.

In accordance with the provisions of the Act, I make the following certification:

All workers at the Nitro, W. Va., plant of Avtex Fibers, Inc., who became totally or partially separated from employment on or after August 26, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 10th day of May 1978.

HARRY J. GILMAN,
Acting Director, Office of
Foreign Economic Research.

[TA-W-2874]

BETHLEHEM STEEL CORP., BURNS HARBOR PLANT, CHESTERTON, IND.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2874: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 9, 1978, in response to a worker petition received on December 19, 1977, which was filed by the United Steelworkers of America on behalf of workers and former workers producing carbon steel products at the Burns Harbor plant of Bethlehem Steel Corp., Chesterton, Ind. It was subsequently determined that this plant produces basic steel products, from which produces cold and hot rolled sheet and strip, steel plates, and tin mill products.

The petition was dated November 1, 1977. Because the petition was received on December 19, 1977, more than 30 days after the petition date, the postmark date of December 15, 1977, will be used as the date of the petition.

The notice of investigation was published in the FEDERAL REGISTER on January 27, 1978 (43 FR 3778). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Bethlehem Steel Corp., and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met the following criterion has not been met:

That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated.

Average annual employment increased in 1977 compared to 1976. Average hours worked showed no change in 1977 compared to 1976. Currently, there is no threat of future separations evident.

Some workers were laid off in July 1977 while a blast furnace was being relined. These workers were all recalled in July or August. No workers were laid off during 1977 due to production cutbacks or lack of work.

Company officials indicate that no threat of total or partial separation is evident.

CONCLUSION

After careful review I conclude that all workers at the Burns Harbor plant of Bethlehem Steel Corp., Chesterton, Ind., are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of May 1978.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.

[TA-W-2875]

BRISTOL FASHIONS, INC., BRISTOL, R.I.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2875: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 9, 1978, in response to a worker petition received on December 20, 1977, which was filed on behalf of workers formerly producing ladies' sportswear at Bristol Fashions, Inc., Bristol, R.I.

The notice of investigation was published in the FEDERAL REGISTER on January 27, 1978 (43 FR 3778). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Bristol Fashions, Inc., its customers, the International Ladies' Garment Workers' Union, the U.S. Department of Commerce, U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Bristol Fashions was a contractor of ladies' bottom garments and worked almost exclusively for one manufac-

turer. This manufacturer, which does not import, increased contract work with other domestic contractors while reducing contract work with Bristol Fashions in 1976 and 1977. The manufacturer's sales increased in 1976 and 1977.

CONCLUSION

After careful review I conclude that all workers at Bristol Fashions, Inc., are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of May 1978.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.

[TA-W-3351]

CONSOLIDATED RAIL CORP., YOUNGSTOWN, OHIO, BRIER HILL YARD AND ROAD

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3351: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on March 15, 1978, in response to a worker petition received on February 6, 1978, which was filed by the United Transportation Union on behalf of workers and former workers engaged in employment related to transporting commodities at the Youngstown, Ohio, Brier Hill Yard and Road of the Consolidated Rail Corp., Pittsburgh, Pa.

The notice of investigation incorrectly stated that the petition was filed by three workers.

The investigation revealed that ConRail is engaged in the rail transportation of freight and passengers.

The notice of investigation was published in the FEDERAL REGISTER on April 7, 1978 (43 FR 14774). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Consolidated Rail Corp. and the Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act, must be met. The Department has determined that services are not "articles" within the meaning of section 222 of the Act, and that independent firms for which the subject firm pro-

vides services cannot be considered to be the "workers' firm".

The Department's investigation revealed that the Consolidated Rail Corp. (ConRail), a Pennsylvania corporation based in Pittsburgh, is a railroad company operating throughout 17 Eastern states. ConRail is licensed and regulated by the Interstate Commerce Commission as a common carrier. The company offers its transportation services to a wide variety of customers in the market area through which its railroad network extends. ConRail is not engaged in any production operations. ConRail's Brier Hill Yard and Road in Youngstown, Ohio, provided transportation services for various customers.

Workers in this subdivision are engaged in rail transportation operations.

The Youngstown, Ohio, Brier Hill Yard and Road of ConRail is not financially, corporately, or otherwise involved in the business of any of its customers. The workers on whose behalf this petition was filed were hired and are paid by and subject to the control of ConRail personnel only. All employment benefits are provided and maintained by ConRail. Thus, ConRail must be considered the workers' firm.

CONCLUSION

After careful review, I conclude that all workers at the Youngstown, Ohio, Brier Hill Yard and Road of the Consolidated Rail Corp., Pittsburgh, Pa., are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of May 1978.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.

[TA-W-2761]

COPPERWELD CORP. METALLIC DIVISION, GLASSPORT, PA.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2761: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 12, 1977 in response to a worker petition received on December 2, 1977 which was filed by the United Steelworkers of America on behalf of workers and former workers producing copper-clad and aluminum-clad steel wire products at the Metallic Division of Copperweld Corp., Glassport, Pa.

The Notice of Investigation was published in the **FEDERAL REGISTER** on December 30, 1977 (42 FR 65306). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Copperweld Corp., the United Steelworkers of America, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Imports of insulated electrical conductors containing copper are included in the U.S. tariff schedule under items 688.04. Imports of aluminum-clad steel wire and cable are imported under item 688.20. According to industry sources, there are no known imports of copper-clad and aluminum-clad steel wire products.

CONCLUSION

After careful review, I conclude that workers at the Metallic Division of Copperweld Corp., Glassport, Pa. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of May 1978.

(TA-W-2921)

EAGLE CLOTHES, INC., BROOKLYN, N.Y.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2921: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 12, 1978 in response to a worker petition received on December 20, 1977, which was filed by the Window Trimmers and Helpers Union,

on behalf of workers and former workers engaged in the setting up of clothing displays at New York and New Jersey retail stores of Eagle Clothes, Inc.

The notice of investigation was published in the **FEDERAL REGISTER** on February 3, 1978 (43 FR 4695). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Eagle Clothes, Inc., the Window Trimmers and Helpers Union and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met.

Evidence developed during the Department's investigation revealed that the retail stores owned by Eagle Clothes, Inc. sold men's apparel. It is company policy that at least 70 percent of the volume of apparel sold in the New York and New Jersey stores be purchased from imported sources and domestic sources other than Eagle Clothes, Inc. Window trimmers for Eagle Clothes, Inc. are engaged in the setting up of clothing displays at retail stores that purchased predominantly from domestic sources other than Eagle Clothes, Inc. and from abroad. Since the retail stores handled apparel which was purchased predominantly from sources other than Eagle Clothes, Inc., the stores are not an "appropriate subdivision" of Eagle Clothes, Inc. within the meaning of section 222 of the Trade Act of 1974.

In addition, the window trimmers and the retail stores did not produce any articles and the Department of Labor has previously determined that the performance of services is not included within the term "articles," as used in section 222 (3) of the Act.

CONCLUSION

After careful review, I conclude that all workers, engaged in preparing window and store displays at retail stores owned by Eagle Clothes, Inc. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of May 1978.

(TEA-W-206)

FEDERAL MOGUL CORP., SOUTHFIELD, MICH.

Revised Certification of Eligibility of Workers To Apply for Adjustment Assistance

Following a Tariff Commission report pursuant to section (c)(2) of the Trade Expansion Act of 1962 (76 Stat. 884), and a subsequent investigation as authorized under 29 CFR Part 90, a certification, pursuant to section 302(c) of the Trade Expansion Act, was issued for the workers of the Shoemaker Avenue plant of Federal Mogul Corp. on November 5, 1973 (38 FR 31215). Workers at Federal Mogul's Hart Avenue plant were denied certification at that time because the investigation showed that workers in the Hart Avenue plant "were primarily involved in employment related to over 4-inch bearing production and therefore increased imports of 0- to 4-inch tapered roller bearing are not the major factor causing their unemployment or underemployment" (38 FR 31215).

At the request of the Hart Avenue plant workers and on the basis of a showing of additional information, a further investigation was instituted by the Office of Trade Adjustment Assistance pursuant to section 302(c) of the Trade Expansion Act. This investigation indicated that certain workers at the Hart Avenue plant were engaged in employment directly related to the production of the adversely affected articles, and consequently the November 5, 1973, certification was revised August 21, 1975 (40 FR 36633). The revised certification read as follows:

All workers of the Hart Avenue, Detroit, Mich. plant of the Federal Mogul Corp.'s Bower Roller Bearing Division employed in the operation of Inline O.D. I.D. hone machines for the manufacture of 0-4 inch tapered roller bearings who became unemployed or underemployed after August 27, 1972, and before March 1, 1974, are eligible to apply for adjustment assistance under title III, chapter 3 of the Trade Expansion Act of 1962.

On the basis of the Department of Labor's continuing jurisdiction over the November 5, 1973, certification, and on the basis of yet additional information from the workers and Federal Mogul Corp. indicating a greater level of activity at the Hart Avenue plant in the production of under 4-inch roller bearings than previously recognized, the November 5, 1973, certification is revised again to read as follows:

All hourly and salaried workers, excluding hourly and salaried workers of the Bower Room of the Hart Avenue, Detroit, Mich., plant of the Federal Mogul Corp.'s Bower Roller Bearing Division employed in the manufacture of 0-4 inch tapered roller bearings who became unemployed or underem-

ployed after August 27, 1972, and before March 1, 1974, are eligible to apply for adjustment assistance under title III, chapter 3, of the Trade Expansion Act of 1962.

Signed at Washington, D.C., this 10th day of May 1978.

HERBERT N. BLACKMAN,
Associate Deputy Under Secretary for International Affairs.
(FR Doc. 78-14180 Filed 5-22-78; 8:45 am)

[4510-28]

(TA-W-3075)

FLORSHEIM SHOE CO., MEXICO, MO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3075: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on February 7, 1978, in response to a worker petition received on January 25, 1978, which was filed by the United Shoe Workers of America on behalf of workers and former workers producing women's shoes at the Mexico, Mo., plant of the Florsheim Shoe Co.

The notice of investigation was published in the **FEDERAL REGISTER** on February 24, 1978 (43 FR 7744). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Florsheim Shoe Co., the Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

Imports of women's nonrubber footwear, except athletic, decreased, in absolute terms, from 1973 to 1974, increased from 1974 to 1975, and increased from 1975 to 1976. Imports decreased 8.5 percent from 1976 to 1977. The ratios of imports to domestic production and consumption increased from 117.9 percent and 54.1 percent, respectively, in 1976 to 122.8 percent and 55.1 percent, respectively, in 1977.

The International Trade Commission recently found that certain footwear articles, including women's nonrubber shoes, are being imported into the United States in such increased quantities as to be a substantial cause of serious injury to the domestic industry producing such articles.

The ratio of imports to domestic production of women's nonrubber

footwear has been greater than 100 percent in each of the past 5 years, reaching a peak level of 122.8 percent in 1977.

Florsheim Shoe Co. began importing women's footwear in November 1975. The company's imports increased 20 percent in quantity from 1976 to 1977. In February 1978, Florsheim discontinued its production of women's shoes at the Mexico plant. As a result, two-thirds of the workers were laid off. The Mexico plant was the last remaining Florsheim plant engaged in the production of women's shoes.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with women's shoes produced at the Mexico, Mo., plant of the Florsheim Shoe Co. contributed importantly to the total or partial separation of workers at the plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Mexico, Mo., plant of the Florsheim Shoe Co. who became totally or partially separated from employment on or after January 20, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 15th day of May 1978.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.
(FR Doc. 78-14181 Filed 5-22-78; 8:45 am)

[4510-28]

(TA-W-2670)

HAWTHORNE TANNERS, INC., SALEM, MASS.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-2670: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on November 29, 1977, in response to a worker petition received on November 21, 1977, which was filed on behalf of workers and former workers producing tanned sheepskin at Hawthorne Tanners, Inc., Salem, Mass.

The notice of investigation was published in the **FEDERAL REGISTER** on December 16, 1977 (42 FR 63486). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Hawthorne Tanners, Inc., its customers, the U.S. Department of Commerce,

the U.S. International Trade Commission, the Tanning Council of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met the following criterion has not been met.

that sales or production, or both, of such firm or subdivision have decreased absolutely.

Sales at Midwest Steel increased in quantity terms (tons) in 1976 compared to 1975, and increased in 1977 compared to 1976.

Production at Midwest Steel increased in quantity terms (tons) in 1976 compared to 1975, and increased in 1977 compared to 1976.

CONCLUSION

After careful review I conclude that all workers at Portage, Ind., National Steel Corp., Midwest Steel Division, are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of May 1978.

TA-W-3083)

JAY GARMENT CO., CLARKSVILLE, TENN.

Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on February 7, 1978, in response to a worker petition received on January 31, 1978, in which was filed by the Amalgamated Clothing & Textile Workers Union on January 10, 1978, on behalf of workers and former workers producing men's work shirts and one-piece overalls at the Clarksville, Tenn., plant of the Jay Garment Co.

The notice of investigation was published in the **FEDERAL REGISTER** on February 28, 1978 (43 FR 7744). No public hearing was requested and none was held.

On July 27, 1976, the Department certified as eligible to apply for adjustment assistance all workers at the Clarksville, Tenn., plant of the Jay Garment Co. (TA-W-685). Since workers newly separated, totally or partially, at such plant on or after March 9, 1975 (impact date), and before July 27, 1978 (expiration date of the certification), are covered by an existing certi-

fication, continuation of this investigation would serve no purpose. Consequently, the investigation has been terminated.

Signed at Washington, D.C., this 15th day of May 1978.

MARVIN M. FOOKS,
Director, Office of Trade
Adjustment Assistance.

[4510-28]

[TA-W-1559T]

LEEMAR KNITTING MILLS, INC., LONG ISLAND CITY, N.Y.

Termination of Certification of Eligibility To
Apply for Worker Adjustment Assistance

In accordance with section 223(d) of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-1559T: Investigation regarding termination of certification of eligibility to apply for worker adjustment assistance as prescribed in section 223(d) of the Act.

On July 26, 1977, workers engaged in employment related to the production of ladies' knit suits of Leemar Knitting Mills, Inc., Long Island City, N.Y., were certified as eligible to apply for trade adjustment assistance. The notice of determination was published in the FEDERAL REGISTER on August 2, 1977 (42 FR 39166).

The investigation regarding termination of certification was initiated on March 27, 1978, to determine whether the group of workers specified above continue to meet the group eligibility requirements of section 222 of the Act. The notice of investigation was published in the FEDERAL REGISTER on April 21, 1978 (43 FR 17082).

During the course of the investigation, information was obtained primarily from Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is impor-

tant but not necessarily more important than any other cause.

Whenever it becomes evident that any one of the above criteria is no longer met, the certification as issued should be revised to include a termination date. The termination date would apply only with respect to total or partial separations occurring after this date as specified in the revised certification. The investigation reveals that the third criterion is no longer being met with respect to workers at the Leemar Knitting Mills, Inc., Long Island City, N.Y.

During the course of the termination investigation, it was established that in 1977 imports declined to 384,000 dozen, a 5.9 percent decline from the previous year. Imports in 1976 were 408,000 dozen, which was a 1 percent decline from 1975. On preliminary data, the import-to-production ratio declined in 1977 to 10.2 percent down from 11.6 percent in 1976. Therefore, the certification is being terminated because the increased import test is no longer met, either on an absolute or relative basis.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that total or partial separations of workers engaged in the production of ladies' knit suits at Leemar Knitting Mills, Inc., Marlee Trim, Inc., and Winmore Knitting Mills, Ltd., Long Island City, N.Y., are no longer attributable to the conditions specified in section 222 of the Trade Act of 1974. In accordance with section 223(d) of the Act, I hereby revise the certification of July 26, 1977, to read as follows:

All workers engaged in employment related to the production of ladies' knit suits at Leemar Knitting Mills, Inc., Marlee Trim, Inc., and Winmore Knitting Mills, Ltd., Long Island City, N.Y., who became or will become totally or partially separated on or after December 19, 1975, and before June 1, 1978, be certified eligible to apply for trade adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974. All employees who became or will become totally or partially separated from employment related to the production of ladies' knit suits at Leemar Knitting Mills, Inc., Marlee Trim, Inc., and Winmore Knitting Mills, Ltd., Long Island City, N.Y., on or after June 1, 1978, are denied certification of eligibility to apply for adjustment assistance.

Signed at Washington, D.C., this 11th day of May 1978.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.

[TA-W-2945]

MALDEN KNITTING MILLS, INC., MALDEN, MASS.

Negative Determination Regarding Eligibility
To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2945: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 23, 1978 in response to a worker petition received on January 9, 1978, which was filed on behalf of workers and former workers producing men's sweaters at the Malden, Mass. plant of Malden Knitting Mills, Inc.

The notice of investigation was published in the FEDERAL REGISTER on February 3, 1978 (43 FR 4696). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Malden Knitting Mills, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met.

that sales or production, or both, of such firm or subdivision have decreased absolutely;

The Department's investigation revealed that sales and production of sweaters at the Malden, Mass. plant of Malden Knitting Mills, Inc. increased in 1976 compared to 1975, and increased in 1977 compared to 1976.

CONCLUSION

After careful review, I conclude that all workers at the Malden, Mass. plant of Malden Knitting Mills, Inc. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of May 1978.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.

[4510-28]

[TA-W-3368]

MARSHALL RAY CORP., TROY, N.Y.

Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on March 20, 1978 in response to a worker petition received on February 21, 1978 which was filed by the Amalgamated Clothing and Textile Workers Union on February 16, 1978 on behalf of workers and former workers producing men's sportcoats at the Marshall Ray Corp., Troy, N.Y.

The notice of investigation was published in the FEDERAL REGISTER on April 7, 1978 (43 FR 14776). No public hearing was requested and none was held.

On July 27, 1976, the Department certified as eligible to apply for adjustment assistance all workers at the Marshall Ray Corp., Troy, N.Y. (TA-W-686). Since workers newly separated, totally or partially, at such plant on or after March 8, 1975 (impact date) and before July 27, 1978 (expiration date of the certification) are covered by an existing certification, continuation of this investigation would serve no purpose. Consequently, the investigation has been terminated.

Signed at Washington, D.C., this 15th day of May 1978.

MARVIN M. FOOKS,
Director, Office of
Trade Adjustment Assistance.

[TA-W-2979]

NATIONAL STEEL CORP., GRANITE CITY STEEL DIVISION, GRANITE CITY, ILL.

Negative Determination Regarding Eligibility
To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2979: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 30, 1978 in response to a worker petition received on January 10, 1978 filed by the United Steelworkers of America on behalf of workers and former workers producing coke, iron, steel and flat rolled products at National Steel Corp., Granite City Steel Division, Granite City, Ill. The investigation revealed that the Granite City Steel Division produced cold rolled, hot rolled and galvanized flat rolled steel products.

The Notice of Investigation was published in the FEDERAL REGISTER on February 17, 1978 (43 FR 7069). No

public hearing was requested and none was held.

Workers at National Steel Corp., Granite City Steel Division were denied eligibility to apply for adjustment assistance in a previous notice of Determination issued on May 16, 1977 (TA-W-1502).

The information upon which the determination was made was obtained principally from officials of National Steel Corp., the United Steelworkers of America, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met the following criterion has not been met.

That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated.

Average hourly employment at Granite City Steel Division increased from 1975 to 1976 and increased from 1976 to 1977. Average hourly employment increased in each quarter of 1977 compared to the same quarter of the previous year. Under the contract negotiated with the United Steelworkers of America, Granite City Steel Division is obligated to lay off employees rather than schedule work less than 40 hours per week.

CONCLUSION

After careful review I conclude that all workers at National Steel Corp., Granite City Steel Division, Granite City, Ill. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of May 1978.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.

[4510-28]

[TA-W-3105]

NATIONAL STEEL CORP. MIDWEST STEEL DIVISION, PORTAGE, IND.

Negative Determination Regarding Eligibility
To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3105: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on February 9, 1978 in response to a worker petition received on January 10, 1978, which was filed by the United Steelworkers of America on behalf of workers and former workers producing flat rolled sheet steel at National Steel Corp., Midwest Steel Division, Portage, Ind.

The Notice of Investigation was published in the FEDERAL REGISTER on February 24, 1978 (43 FR 7743). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Midwest Steel, the United Steelworkers of America, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met the following criterion has not been met.

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Aggregate imports of tanned and finished sheepskin rose from 12,690 thousand square feet in 1975 to 18,744 thousand square feet in 1976. Imports decreased from 15,322 thousand square feet in the first three quarters of 1976 to 12,946 thousand square feet for the same period in 1977, a decrease of 15.5 percent. The ratio of imports to domestic production for tanned and finished sheepskin increased from 15.5 percent in 1975 to 23.4 percent in 1976 and then decreased from 24.6 percent in the first three quarters of 1976 to 23.1 percent for the same period in 1977.

The United States is a large exporter of tanned and finished sheepskin. In the first 9 months of 1977, exports represented 97 percent of U.S. production of sheepskin. Imports of sheepskin, which had declined each year from 1972 to 1975, before increasing in 1976, fell 15.5 percent in the first 9 months of 1977 compared to the same period in 1976. U.S. consumption of sheepskin fell sharply in the first 9 months of 1977, decreasing 58.2 percent compared to the same period in 1976. This is primarily due to a shift to less expensive leather and non-leather substitutes.

A survey of customers that purchased tanned sheepskin produced by Hawthorne Tanners revealed that most did not purchase imports. Most of those that reduced purchases from

Hawthorne shifted to other domestic sources. Some reduced purchases because of a decrease in demand for sheepskin leather garments.

CONCLUSION

After careful review, I conclude that all workers at Hawthorne Tanners, Inc., Salem, Mass. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of May 1978.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.

(TA-W-3154)

NEIMAN TOOL AND MACHINE, SULLIVAN,
MO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3154: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on February 13, 1978 in response to a worker petition received on January 13, 1978 filed on behalf of former workers performing precision machining for the atomic energy and guided missile programs at Neiman Tool and Machine, Sullivan, Mo. During the course of the Department's investigation it was revealed that Neiman Tool and Machine also did machining for other programs.

The notice of investigation was published in the FEDERAL REGISTER on March 3, 1978 (43 FR 8862). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Neiman Tool and Machine, its customers, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threats thereof, and to the absolute decline in sales or production.

A survey of customers for whom Neiman Tool and Machine did con-

tract work was conducted by the Department. All customers reported that due to the nature of their work (i.e. atomic energy, defense or aerospace related projects) they could not, by law, purchase any imported components.

CONCLUSION

After careful review I conclude that all workers at Neiman Tool and Machine, Sullivan, Mo. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of May 1978.

HARRY J. GILMAN,
Acting Director, Office of
Foreign Economic Research.

(TA-W-2768)

OMEGA LAST CO., ST. LOUIS, MO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2768: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 12, 1977 in response to a worker petition received on December 5, 1977, which was filed on behalf of workers and former workers producing heels, soles and lasts at Omega Last Co., St. Louis, Mo.

The notice of investigation was published in the FEDERAL REGISTER on December 30, 1977 (42 FR 65306). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from the Omega Last Co., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

A survey of the footwear manufacturer whose purchases from Omega

Last constituted nearly all of Omega Last's sales and production indicated that this customer purchased soles, heels and lasts from Omega Last exclusively and did not purchase these items from any other domestic or foreign source. The decline in sales and production at Omega Last in the latter part of 1977 was due to the decrease in purchases by this footwear manufacturer and the subsequent shutdown of this manufacturer's production facilities. There is no corporate relationship between this manufacturer and Omega Last Co. Imports of footwear are not like or directly competitive with soles, heels and lasts within the meaning of section 222(3) of the Trade Act of 1974.

CONCLUSION

After careful review I conclude that all workers at Omega Last Co. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 10th day of May 1978.

HARRY J. GILMAN,
Acting Director, Office of
Foreign Economic Research.

(TA-W-3388)

PHILADELPHIA, BETHLEHEM & NEW ENGLAND
RAILROAD CO., BETHLEHEM, PA.

Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on March 21, 1978 in response to a worker petition received on March 6, 1978 which was filed by the United Transportation Union on behalf of workers and former workers engaged in transporting materials for Bethlehem Steel Corp. at the Philadelphia, Bethlehem & New England Railroad Co., Bethlehem, Pa.

Notice of the investigation was published in the FEDERAL REGISTER on March 28, 1978 (43 FR 12967). No public hearing was requested and none was held.

During the course of the investigation, it was established that all workers of Philadelphia, Bethlehem & New England Railroad Co. were previously certified eligible to apply for adjustment assistance on August 27, 1976 (See Notice of Determination in "Bethlehem Steel Corporation" TA-W-924).

The existing certification will expire on August 27, 1978 unless terminated by the Secretary of Labor. Since workers newly separated, totally or partially, are covered by the existing certification provided such separations occurred on or after the impact date

(May 15, 1975) and before the certification expiration date (August 27, 1978) a new investigation would serve no purpose; consequently the investigation has been terminated.

Signed at Washington, D.C., this 2nd day of May 1978.

MARVIN M. FOOKS,
Director, Office of
Trade Adjustment Assistance.

[4510-28]

(TA-W-2752)

PULLMAN STANDARD, BUTLER, PA.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2752: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 8, 1977 in response to a worker petition received on November 28, 1977, which was filed on behalf of workers and former workers producing railroad freight cars at Pullman Standard, Butler, Pa.

The notice of investigation was published in the FEDERAL REGISTER on December 30, 1977 (42 FR 65307). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from Pullman Standard, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The investigation revealed that Pullman Standard produced only hopper freight cars. Imports of freight cars were negligible from 1972 through 1976. In the first 9 months of 1977, imports increased due to the action of one U.S. railroad, ordering, from Mexico, gondola and box cars, which are not like or directly competitive with hopper cars. Subtracting this railroad's order from U.S. imports shows that imports of other types of

freight cars, including hopper cars, remained negligible for the first three quarters of 1977, as compared to the same period of 1976.

Furthermore, the workers at Pullman Standard are seeking trade adjustment assistance benefits for unemployment experienced during the first 6 months of 1978. Section 223(b)(1) of the Trade Act of 1974 denies benefits to workers separated more than 1 year prior to the date of the petition. The petition was dated November 21, 1977.

The petitioners allege that imports of welding rods, welding flux, wheels and air brake parts used in the production of hopper cars contributed to the separations at the Butler plant. Such parts were never manufactured at Butler but were purchased from outside sources for use in the production of hopper cars.

CONCLUSION

After careful review I conclude that all workers at Pullman Standard are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of May 1978.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.

[4510-28]

(TA-W-2641)

REED FOREST PRODUCTS, INC.
CHEEKTOWAGA, N.Y.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2641: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on November 21, 1977 in response to a worker petition received on November 10, 1977 which was filed on behalf of workers and former workers producing wallpaper at Reed Forest Products, Inc., Cheektowaga, N.Y.

The Notice of Investigation was published in the FEDERAL REGISTER on December 16, 1977 (42 FR 61696). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Reed Forest Products, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. The investigation has revealed that all of the requirements have been met.

Imports of wallpaper increased from 19.8 million dollars in 1975 to 33.8 million dollars in 1976 and 40.3 million dollars in 1977.

The ratio of imports of wallpaper to domestic production increased from 10.6 percent in 1975 to 16.3 percent in 1976.

The Cheektowaga plant supplements its domestic line with imported wallpaper. The plant has increased its import purchases in recent years. Imports of finished wallpaper as a percentage of total plant sales increased from 4 percent in value in 1975 to 19 percent in 1976 and 22 percent in 1977.

Customers of the Cheektowaga plant who were surveyed indicated that they are increasing purchases of imported wallpaper. Purchases from other domestic sources as well as from Reed are also supplied by foreign sources.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with wallpaper produced by Reed Forest Products, Inc., Cheektowaga, N.Y. contributed importantly to the decline in sales and production and to the total or partial separations of workers at that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Reed Forest Products, Inc., Cheektowaga, N.Y. who became totally or partially separated from employment on or after November 4, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of May 1978.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.

[4510-28]

(TA-W-2574)

REGENCY ELECTRONICS, INC., INDIANAPOLIS,
IND.

Certification Regarding Eligibility To Apply For Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2574: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on November 7, 1977 in response to a worker petition received on October 31, 1977 which was filed by the International Union of Electrical, Radio and Machine Workers on behalf of workers and former workers producing transceivers and scanners at Regency Electronics, Inc., Indianapolis, Ind.

The Notice of Investigation was published in the FEDERAL REGISTER on November 18, 1977 (42 FR 59584). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Regency Electronics, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. The investigation has revealed that all of the requirements have been met.

Imports of scanners increased from 190 thousand units in 1976 to 213 thousand units in 1977.

Customers of Regency Electronics who were surveyed indicated they increased purchases of imports of scanners in 1976 and 1977 while decreasing purchases from Regency Electronics during the same period. Several customers indicated that a large proportion of the scanners purchased from domestic supplies were manufactured offshore.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with scanners produced by Regency Electronics, Inc., Indianapolis, Ind. contributed importantly to the decline in sales and production and to the separation of workers of that firm. In accordance with the provisions of the Trade Act of 1974, I make the following certification.

All workers of Regency Electronics, Inc., Indianapolis, Ind. who became totally or partially separated from employment on or after October 26, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of May 1978.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.

[4510-28]

(TA-W-2958)

RELIABLE COAT CO., INC., SOMERSET, N.J.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2958: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 25, 1978 in response to a worker petition received on January 9, 1978, which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats at the Reliable Coat Co., Inc., Somerset, N.J.

The notice of investigation was published in the FEDERAL REGISTER on February 17, 1978 (43 FR 7068). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Reliable Coat Co., Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of women's, misses' and children's coats and jackets increased from 1,517,000 dozen in 1975 to 2,252,000 dozen in 1976. U.S. imports increased from 1,680,000 dozen in the first nine months of 1976 to 2,081,000 dozen in the first nine months of 1977.

The ratio of imported women's, misses' and children's coats and jackets to domestic production increased from 38.9 percent in 1975 to 57.5 percent in 1976.

A survey of the sole manufacturer that contracted work to Reliable Coat indicated that this manufacturer increased purchases of imported ladies' coats in 1977 while decreasing contract work with Reliable Coat.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with ladies' coats produced by the Reliable Coat Co., Inc., Somerset, N.J. contributed importantly to the decrease in sales and production and to the total or partial separation of workers at that firm. In accordance with the provisions of the Act, I make the following certification:

All workers at the Reliable Coat Co., Inc., Somerset, N.J. who became totally or partially separated from employment on or after January 4, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of May 1978.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.

(FR Doc. 78-14195 Filed 5-22-78; 8:45 am)

[4510-28]

(TA-W-2862)

ROBERT SHOE CO., INC., LANCASTER, N.H. AND SOMERSWORTH, N.H.

Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2862: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 5, 1978 in response to a worker petition received on that date which was filed on behalf of workers and former workers producing suede boots and athletic shoes at the Lancaster, N.H. plant of the Robert Shoe Co., Inc.

The Notice of Investigation was published in the FEDERAL REGISTER on January 20, 1978 (43 FR 2952-3). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Robert Shoe Co., Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, National Footwear Manufacturers' Association, and Department files.

During the course of the investigation, the Department determined that the Lancaster, N.H. plant of the Robert Shoe Co., Inc. does not manufacture finished footwear but stitches uppers used in the construction of finished footwear at the Somersworth, N.H. plant of the Robert Shoe Co., Inc. and, as such, was part of an integrated production process. This petition is expanded to cover workers engaged in employment related to the production of warm-lined boots and athletic footwear at the Somersworth, N.H. plant of the Robert Shoe Co., Inc.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met.

That increases of imports of articles like or directly competitive with articles produced by the firm or subdivision have contributed importantly to the total or partial separation, or threat thereof, and to the absolute decline in sales or production.

Imports of women's boots are included in the market basket women's non-rubber footwear, except athletic. Imports of women's non-rubber footwear, except athletic remained constant from 1975 to 1976 and decreased 8.9 percent in the first 9 months of 1977 compared to the like period in 1976. The ratios of imports to domestic production and consumption increased from 119.9 percent and 54.5 percent respectively, in the first nine months of 1976 to 124.9 percent and 55.5 percent, respectively, in the first 9 months of 1977.

Imports of athletic footwear increased 106.6 percent from 1975 to 1976 and increased 55.2 percent in the first 9 months of 1977 compared to the like period in 1976. The ratios of imports to domestic production and consumption increased from 345.3 percent and 77.5 percent respectively, in the first 9 months of 1976 to 522.1 percent and 83.9 percent, respectively, in the first 9 months of 1977.

The import data are not reflective of the footwear produced by Robert Shoe. Warm-lined boots, which account for approximately 90 percent of total production of Robert Shoe, constitute a minor portion of the market basket "Women's Nonrubber Footwear, Except Athletic." According to a company official, Robert Shoe's boots are in competition with European-produced boots which are subject to labor costs comparable to those of domestic manufacturers and don't enjoy labor cost advantages of foreign producers in other footwear lines.

Beginning in 1974, Robert Shoe has, within the athletic footwear portion of its product mix which represents about 10 percent of production, shifted from low-priced to higher priced lines of athletic footwear. Import competition at the low-priced end of the market from imported sneakers and deck shoes led Robert Shoe to produce higher-priced lines of athletic footwear such as baseball, basketball and bowling shoes.

The Department surveyed customers of Robert Shoe who purchased women's warm-lined boots and athletic footwear. Respondents to the survey did not purchase imported warm-lined boots or athletic footwear in 1977.

Further, the average number of production workers of Robert Shoe Co. increased in 1976 compared to 1975 and in 1977 compared to 1976. Average weekly hours worked increased in 1976 over the previous year and declined by less than 5 percent in 1977 compared to 1976.

CONCLUSION

After careful review, I conclude that all workers at the Lancaster, N.H., and Somersworth, N.H., plants of the Robert Shoe Co., Inc., are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of May 1978.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.

(TA-W-2502)

VESUVIUS CRUCIBLE CO., SWISSVALE, PA.

Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2502: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on October 25, 1977 in response to a worker petition received on October 17, 1977 which was filed by the United Steelworkers of America on behalf of all workers producing refractory and graphite refractory products including crucibles and stopper heads at the Swissvale, Pa. plant of Vesuvius Crucible Co.

The Notice of Investigation was published in the FEDERAL REGISTER on November 8, 1977 (42 FR 58209). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Vesuvius Crucible Co., the National Labor Relations Board, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met the following criterion has not been met.

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threats thereof, and to the absolute decline in sales or production.

The date of the petition is October 1, 1977 and the earliest possible impact date would be October 1, 1976. The Department's investigation revealed

that there were no separations at the plant during October 1976. The investigation further revealed that all separations beginning November 1, 1976 to date, were caused by a strike of workers at the Swissvale plant.

CONCLUSION

After careful review, I conclude that all workers at the Swissvale Pa. plant of Vesuvius Crucible Co. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of May 1978.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.

(TA-W-2505)

ARMCO STEEL CORP., ZANESVILLE, OHIO

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2505: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on October 26, 1977 in response to a worker petition received on October 18, 1977, which was filed on behalf of workers and former workers producing silicon steel sheet and strip at the Zanesville, Ohio plant of Armco Steel Corp.

The notice of investigation was published in the FEDERAL REGISTER on November 15, 1977 (42 FR 59133). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Armco Steel Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met.

Without regard to whether any of the other criteria have been met, the following criterion was not met:

that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The Office of Trade Adjustment Assistance conducted a survey of some of

the customers of the Zanesville plant that purchased silicon steel sheet and strip. Those customers who reduced purchases of silicon steel sheet and strip from this plant and increased purchases of imported silicon steel sheet and strip accounted for less than one percent of Zanesville sales in the first three quarters of 1977. Most customers reported that they did not buy imported silicon steel.

Further, sales, production, and employment increased from 1976 to 1977.

CONCLUSION

After careful review I conclude that all workers at the Zanesville, Ohio plant of Armco Steel Corp. are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 17th day of May 1978.

HARRY J. GILMAN,
Acting Director, Office of
Foreign Economic Research.

[TA-W-3255; TA-W-3256]

CLASSY LEATHER GOODS CORP.,
MIDDLETOWN, N.Y., NEW YORK, N.Y.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3255 and TA-W-3256: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on February 27, 1978 in response to a worker petition received on February 14, 1978 which was filed on behalf of workers and former workers producing ladies' handbags at Classy Leather Goods Corp., Middletown, N.Y. (TA-W-3255) and New York, N.Y. (TA-W-3256).

The Notice of Investigation was published in the FEDERAL REGISTER on March 14, 1978 (43 FR 10648). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Classy Leather Goods Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

Imports of ladies' handbags have increased both absolutely and relative to domestic production from 1975 through 1977. The ratio of imports to domestic production was 73.5 percent in 1975, increasing to 111.1 percent in 1976 and 119.7 percent in 1977.

A customer survey conducted by the U.S. Department of Commerce revealed that customers who decreased purchases from Classy Leather Goods Corp. increased purchases of imported handbags.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with ladies' handbags produced at Classy Leather Goods Corp., Middletown, N.Y. and New York, N.Y. contributed importantly to the decline in sales and production and to the separation of workers at that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Classy Leather Goods Corp., Middletown, N.Y. and New York, N.Y. who became totally or partially separated from employment on or after February 10, 1977 are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 17th day of May 1978.

HARRY J. GILMAN,
Acting Director, Office of
Foreign Economic Research.

[4510-28]

[TA-W-2876]

CLEMO COAT CO., CLEMENTON, N.J.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2876: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 9, 1978 in response to a worker petition received on December 12, 1977 which was filed by the International Ladies Garment Workers' Union on behalf of workers and former workers producing children's garment's at Clemo Coat Co. of Clementon, N.J. The investigation revealed that the garments produced consisted of children's coats.

The notice of investigation was published in the FEDERAL REGISTER on January 27, 1978 (43 FR 3778). No public hearing was requested and none was held.

The information upon which the determination was made was obtained

principally from officials of Clemo Coat Co. and its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

United States imports of the category including women's, misses' and children's coats and jackets increased from 1,517 thousand dozen in 1975 to 2,252 thousand dozen in 1976, then increased 20.9 percent to 2,723 thousand dozen in 1977. The ratio of imports to domestic production increased from 38.9 percent in 1975 to 57.5 percent in 1976.

Clemo Coat Co. produces children's coats under contract exclusively for one manufacturer of juniors' and girls' coats. Purchases of coats from the subject firm by this manufacturer decreased in the fourth quarter of 1977 compared with the fourth quarter of 1976. Customers of this manufacturer increased imports in 1976 compared with 1975 and in 1977 this manufacturer began purchasing children's coats from foreign sources.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with the children's coats produced by Clemo Coat Co. of Clementon, N.J. contributed importantly to the total or partial separation of workers at that firm. In accordance with the provisions of the Act, I make the following certification:

All workers at Clemo Coat Co. of Clementon, N.J. who became totally or partially separated from employment on or after October 14, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.

[4510-28]

[TA-W-2651]

CLIFT MANUFACTURING CO., ET AL. BOSTON AND ORANGE, MASS.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2651: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on November 23, 1977, in response to a worker petition received on November 14, 1977, which was filed on behalf of workers of Clift Manufacturing Co., Boston, Mass. The investigation was expanded to include B. & C. Manufacturing Co., Boston, Mass. and B. & S. Manufacturing Co., Orange, Mass. both wholly-owned subsidiaries of Clift Manufacturing Co. The three plants are engaged in the production of men's all-weather coats.

The Notice of Investigation was published in the FEDERAL REGISTER on December 8, 1977 (42 FR 61695). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Clift Manufacturing Co.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

that a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

The average number of production workers at Clift Manufacturing increased 7 percent from 1976 to 1977. Employment increased in each quarter from the fourth quarter of 1976 through the third quarter of 1977. Employment declined 2 percent from the third quarter of 1977 to the fourth. Average weekly hours increased 3 percent from 1976 to 1977.

The average number of production workers at B. & S. Manufacturing increased 14 percent from 1976 to 1977. Employment either increased or remained the same in each quarter from the fourth quarter of 1976 through the fourth quarter of 1977. Average weekly hours remained the same from 1976 to 1977.

The average number of production workers at B. & C. Manufacturing remained the same from 1975 to 1976 and increased 13 percent from 1976 to 1977. Employment either increased or remained the same in each quarter from the fourth quarter of 1976 through the fourth quarter of 1977. Average weekly hours increased 3 percent from 1976 to 1977.

The three plants; Clift, B. & S., and B. & C. have not experienced any layoffs of production workers in recent years and no layoffs are anticipated.

CONCLUSION

After careful review, I determine that workers of Clift Manufacturing

Co., Boston, Mass., B. & C. Manufacturing Co., Boston, Mass., and B. & S. Manufacturing Co., Orange, Mass., are denied eligibility to apply for adjustment assistance under title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 17th day of May 1978.

HARRY J. GILMAN,
Acting Director, Office of
Foreign Economic Research.

[TA-W-3306]

HAAS TAILORING CO., BALTIMORE, MD.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3306: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on March 7, 1978, in response to a worker petition received on February 21, 1978, which was filed by the Amalgamated Clothing and Textile Workers' Union on behalf of workers and former workers producing men's tailored clothing at the Haas Tailoring Co., Baltimore, Md.

The Notice of Investigation was published in the FEDERAL REGISTER on March 17, 1978 (43 FR 11277). No public hearing was requested and none was held.

On December 15, 1975, the Department issued a certification of eligibility to apply for adjustment assistance for all workers at Haas Tailoring Co.; the certification expired December 15, 1977.

The information upon which the determination was made was obtained principally from officials of the Haas Tailoring Co., the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision, thereof, have become totally or partially separated, or are threatened to become totally or partially separated.

Average annual employment increased in 1977 compared to 1976 and in the first quarter of 1978 compared

to the same period of 1977. Employment increased in each of the last five quarters compared to the same quarter of the previous year.

Average hours worked by employees of Haas were not reduced to 80 percent or less of the employee's average weekly hours since December 1977.

There is no immediate threat to employment for the workers at Haas.

CONCLUSION

After careful review, I conclude that all workers at the Haas Tailoring Co., Baltimore, Md. are denied eligibility to apply for adjustment assistance under title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 17th day of May 1978.

HARRY J. GILMAN,
Acting Director, Office of
Foreign Economic Research.

[TA-W-2506]

HILO IRON WORKS INC., HILO, HAWAII

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2506: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on October 26, 1977, in response to a worker petition received on October 7, 1977, which was filed by the International Longshoremen and Warehousemen's Union on behalf of workers and former workers fabricating, welding and installing equipment for agricultural use on sugar plantations at Hilo Iron Works, Inc., Hilo, Hawaii.

The notice of investigation was published in the FEDERAL REGISTER on November 15, 1977 (42 FR 59133). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Hilo Iron Works, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

that articles like or directly competitive with those produced by the firm or subdivi-

sion are being imported in increased quantities, either actual or relative to domestic production; and that such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The Department's investigation revealed that imports of fabricated platework have been less than 1 percent of domestic shipments over the last 5 years.

A survey of Hilo Iron Works' customers revealed that respondents did not purchase imported agricultural equipment or sugar mill equipment and parts. The survey also revealed that customers had decreased purchases of imported miscellaneous fabricated products.

CONCLUSION

After careful review I conclude that all workers at Hilo Iron Works, Inc., Hilo, Hawaii are denied eligibility to apply for adjustment assistance under title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 17th day of May 1978.

[TA-W-2904]

KEENCAST MANUFACTURING CORP. GRIFFITH, IND.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2904: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 11, 1978 in response to a worker petition received on December 29, 1977 which was filed by the International Molders and Allied Workers Union, Local 170 on behalf of workers and former workers producing grey iron castings at Keencast Manufacturing Corp., Griffith, Ind. The investigation revealed that Keencast Manufacturing Corp. went into receivership on August 29, 1977 and the assets of the company were purchased by N and A Foundry, Inc. on October 13, 1977.

The Notice of Investigation was published in the FEDERAL REGISTER on January 27, 1978 (43 FR 3776). No public hearing was requested and none was held.

The information upon which the determination was made, was obtained principally from officials of the Keencast Manufacturing Corp., its custom-

ers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The Department conducted a survey of a sample of customers of Keencast Manufacturing Corp. Most of the customers surveyed did not purchase any imported castings in 1976 or 1977.

CONCLUSION

After careful review I conclude that all workers at Keencast Manufacturing Corp. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 17th day of May 1978.

[TA-W-3369]

MIL GARMENT CO., INC. RED BANK, N.J.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3369: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on March 20, 1978 in response to a worker petition received on February 3, 1978 which was filed by the International Ladies Garment Workers Union on behalf of workers and former workers producing women's coats at Mil Garment Co., Inc., Red Bank, N.J.

The Notice of Investigation was published in the FEDERAL REGISTER on April 7, 1978 (43 FR 14776). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Mil Garment Co., Inc., its customers, the U.S. Department of Commerce, the U.S. In-

ternational Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. It is concluded that all of the requirements have been met.

Imports of "Women's, Misses' and Children's Coats", increased absolutely and relative to U.S. production from 1975 to 1976 and continued to increase absolutely from 1976 to 1977.

Mil Garment Co. produced women's coats exclusively for one manufacturer. During the period 1976 to 1977 this manufacturer reduced its contracts with Mil Garment and increased its purchases of imported coats.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with the women's coats produced by Mil Garment Co., Inc., Red Bank, N.J. contributed importantly to the sales and production declines and to the total or partial separations of the workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Mil Garment Co., Inc., Red Bank, N.J. who became totally or partially separated from employment on or after January 26, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 17th day of May 1978.

HARRY J. GILMAN,
Acting Director, Office of
Foreign Economic Research.

[4510-28]

[TA-W-2764]

MILWAUKEE TOOL & EQUIPMENT CO., INC., MILWAUKEE, WIS.

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2764: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 12, 1977 in response to a worker petition received on December 5, 1977, which was filed by the United Steelworkers of America on behalf of workers and former workers producing vises at Milwaukee Tool & Equipment Co., Inc., Milwaukee, Wis. The investigation revealed that: clamps, jack-

screws and plumbing tools were also produced.

The notice of investigation was published in the FEDERAL REGISTER on December 30, 1977 (42 FR 65306). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Milwaukee Tool & Equipment Co., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, the Hand Tool Institute, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. With respect to workers producing clamps without regard to whether any of the other criteria have been met, the following criterion has not been met:

that sales or production, or both, of the firm or subdivision have decreased absolutely.

The Department's investigation revealed that the value of company sales of plant produced clamps increased 29.3 percent from 1976 to 1977. Production is based upon customer orders and is equivalent to company sales.

With respect to workers producing jackscrews without regard to whether any of the other criteria have been met, the following criterion has not been met:

that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threats thereof, and to the absolute decline in sales or production.

The Department's investigation revealed that imports of jackscrews are nonexistent or negligible according to U.S. Customs and industry sources.

Customers representing a substantial proportion of the subject firm's sales of jackscrews indicated no purchases of imported jackscrews.

With respect to workers producing plumbing tools without regard to whether any of the other criteria have been met, the following criterion has not been met:

that sales or production, or both, of the firm or subdivision have decreased absolutely.

The Department's investigation revealed that the value of company sales of plant produced plumbing tools increased 5.5 percent from 1976 to 1977. Production is based upon customer orders and is equivalent to company sales.

With respect to workers producing vises all of the group eligibility requirements of section 222 of the Act have been met.

Imports of vises increased in quantity from 720 thousand in 1975 to 1,449 thousand in 1976 and further increased to 1,918 thousand in 1977. The ratio of imports to domestic production increased from 157.9 percent in 1975 to 293.9 percent in 1976 and to 448.1 percent in 1977.

A survey of customers indicated that customers accounting for a substantial proportion of Milwaukee Tool's sales of vises increased purchases of imported vises while decreasing purchases from Milwaukee Tool from 1976 to 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with vises produced at Milwaukee Tool & Equipment Co., Inc. contributed importantly to the decrease in sales and to the separations of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Milwaukee Tool & Equipment Co., Inc., Milwaukee, Wisc. engaged in employment related to the production of vises who became totally or partially separated from employment on or after July 2, 1977, are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

I further conclude that workers engaged in employment related to the production of clamps, jackscrews and plumbing tools are denied eligibility to apply for adjustment assistance.

Signed at Washington, D.C. this 17th day of May 1978.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.

[4510-28]

[TA-W-2889]

NATIONAL SUPPLY CO., HOUSTON, TEX.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2889: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 9, 1978 in response to a worker petition received on December 19, 1977 which was filed by the United Steelworkers of America on behalf of workers and former workers producing wellhead control equipment at the Houston, Tex. plant of National Supply Co., a division of Armco Steel Corp.

The Notice of Investigation was published in the FEDERAL REGISTER on Jan-

uary 27, 1978 (43 FR 3778). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from National Supply Co., the U.S. Department of Commerce, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met.

Without regard to whether any of the other criteria have been met the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threats thereof, and to the absolute decline in sales or production.

No imports of oilfield and gasfield production machinery and equipment could be identified in the official trade statistics. One Mexican firm started to supply one U.S. oil producing company with "christmas tree assemblies" and pipeline valves in the autumn of 1976. An estimated \$300 thousand worth of this equipment was imported in the last four months of 1976, and about \$3 million worth in 1977. However, the 0.33 percent market share that these imports represented in 1977 is indicative of their insignificance at the present time.

No imports of oilwell and oilfield pumps could be found in the official trade statistics. This finding was verified by industry sources.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that all workers at the Houston, Tex. plant of National Supply Co. are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 15th day of May 1978.

JAMES F. TAYLOR,

[TA-W-2890]

NATIONAL SUPPLY CO., LOS NIETOS, CALIF.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2890: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 9, 1978 in response to a worker petition received on December 19, 1977 which was filed by the United Steelworkers of America on behalf of workers and former workers producing oil drilling pumps at the Los Nietos, Calif. plant of National Supply Co., a division of Armco Steel Corp.

The Notice of Investigation was published in the FEDERAL REGISTER on January 27, 1978 (43 FR 3778). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from National Supply Co., the U.S. Department of Commerce, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met.

Without regard to whether any of the other criteria have been met the following criterion has not been met:

that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threats thereof and to the absolute decline in sales or production.

No imports of oilfield and gasfield production machinery and equipment could be identified in the official trade statistics. One Mexican firm started to supply one U.S. oil producing company with "christmas tree assemblies" and pipeline valves in the autumn of 1976. An estimated \$300 thousand worth of this equipment was imported in the last four months of 1976, and about \$3 million worth in 1977. However, the 0.33 percent market share that these imports represented in 1977 is indicative of their insignificance at the present time.

No imports of oilwell and oilfield pumps could be found in the official trade statistics. This finding was verified by industry sources.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that all workers at the Los Nietos, Calif. plant of National Supply Co. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 15th day of May 1978.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.

NATIONAL SUPPLY CO., GAINESVILLE, TEX.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2888: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 9, 1978 in response to a worker petition received on December 19, 1977 which was filed by the United Steelworkers of America on behalf of workers and former workers producing triplex pumps, slush pumps, converters and cranes at the Gainesville, Tex. plant of National Supply Co., a division of Armco Steel Corp.

The Notice of Investigation was published in the FEDERAL REGISTER on January 27, 1978 (43 FR 3778). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from National Supply Co., the U.S. Department of Commerce, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met.

Without regard to whether any of the other criteria have been met the following criterion has not been met:

that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threats thereof, and to the absolute decline in sales or production.

No imports of oilfield and gasfield production machinery and equipment could be identified in the official trade statistics. One Mexican firm started to supply one U.S. oil producing company with "christmas tree assemblies" and pipeline valves in the autumn of 1976. An estimated \$300 thousand worth of this equipment was imported in the last four months of 1976, and about \$3 million worth in 1977. However, the 0.33 percent market share that these imports represented in 1977 is indicative of their insignificance at the present time.

No imports of oilwell and oilfield pumps could be found in the official trade statistics. This finding was verified by industry sources.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that all workers at the Gainesville,

Tex. plant of National Supply Co., are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 15th day of May 1978.

[TA-W-2572]

PARKVIEW CLOTHES, LOS ANGELES, CALIF.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2572: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on November 7, 1977 in response to a worker petition received on October 31, 1977, which was filed on behalf of workers and former workers producing men's suits, sport coats and slacks at Parkview Clothes, Los Angeles, Calif.

The notice of investigation was published in the FEDERAL REGISTER on November 18, 1977 (42 FR 59584). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from Parkview Clothes, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Parkview Clothes is a tailor which produces custom made men's suits. The suits are sold by Parkview's customers, which are retail merchant tailors. A survey of Parkview's customers revealed that most sell only custom made suits and do not carry imports.

CONCLUSION

After careful review I conclude that all workers at Parkview Clothes, Los Angeles, Calif. are denied eligibility to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 17th day of May 1978.

[TA-W-3441]

ROCCO HANDBAG CORP., NEWBURGH, N.Y.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3441: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on March 28, 1978 in response to a worker petition received on March 13, 1978 which was filed by the International Leather Goods, Plastics, and Novelty Workers Union on behalf of workers and former workers producing ladies' vinyl handbags at Rocco Handbag Corp., Newburgh, N.Y.

The Notice of Investigation was published in the FEDERAL REGISTER on April 11, 1978 (43 FR 15205-15206). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Rocco Handbag Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

Imports of ladies' handbags have increased both absolutely and relative to domestic production from 1975 through 1977. The ratio of imports to domestic production was 73.5 percent in 1975, increasing to 111.1 percent in 1976 and 119.7 percent in 1977.

A customer survey conducted by the U.S. Department of Commerce revealed that customers who decreased purchases from Rocco Handbag Corp. have increased purchases of imported ladies' handbags.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with ladies' handbags produced at Rocco Handbag Corp., Newburgh, N.Y. contributed importantly to declines in sales and production and to the separations of

workers at that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Rocco Handbag Corp., Newburgh, New York who became totally or partially separated from employment on or after March 9, 1977 are eligible to apply for adjustment assistance under title II, chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 17th day of May 1978.

HARRY J. GILMAN,
Acting Director, Office of
Foreign Economic Research.

[4510-28]

[TA-W-2777]

TRANSITRON ELECTRONICS CORP., WAKEFIELD, MASS.

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2777: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 14, 1977, in response to a worker petition received on December 7, 1977, which was filed on behalf of workers and former workers producing semiconductors and electronic connectors at Transatron Electronics Corp., Wakefield, Mass.

The Notice of Investigation was published in the FEDERAL REGISTER on January 10, 1978 (43 FR 1556). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Transatron Electronics Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. With respect to workers engaged in employment related to the production of connectors, without regard to whether any of the other criteria have been met the following criterion has not been met:

that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

A selected sample of customers who purchased connectors from Transatron in 1976 and in 1977 were surveyed. The

survey results indicated that customers have not purchased any connectors from foreign sources. The reason cited was that end users prefer domestically produced connectors and are willing to pay a premium to assure high quality of product.

The survey results appear consistent with the aggregate industry data. Imports of connectors while increasing in value terms in recent years have had little impact in the U.S. market. The ratio of imports to domestic production declined in 1977 compared to 1976. The apparent reason for the lack of market penetration of imported connectors is that the market is specialized. Buyers usually solicit bids for connectors manufactured to certain specifications. Unit cost savings are not possible when manufacturing to customer specifications. This factor tends to limit the amount of import activity in this product.

With respect to workers engaged in employment related to the production of semiconductors, all of the group eligibility requirements of section 222 of the Act have been met.

Semiconductors produced at Transatron included transistors, thyristors, diodes, integrated circuits, rectifiers and reference diodes. U.S. imports of transistors, diodes, rectifiers and related devices increased both absolutely and relative to domestic production from 1975 to 1976 and from 1976 to 1977.

Imports of integrated circuits, measured in value, increased absolutely from 1975 to 1976, and from 1976 to 1977, decreased relative to domestic production from 1975 to 1976 and increased relative to domestic production from 1976 to 1977.

Several customers of Transatron Electronics Corp. who were surveyed indicated that they either purchased imported semiconductors directly or that they purchase, from domestic sources, semiconductors which have been manufactured offshore.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with semiconductors produced at Transatron Electronics Corp., Wakefield, Mass. contributed importantly to the decline in sales and production and to the separation of workers engaged in employment related to such production at that firm. In accordance with the provisions of the Act, I make the following certification:

All workers engaged in employment related to the production of semiconductors at Transatron Electronics Corp., Wakefield, Mass. who became totally or partially separated from employment on or after December 2, 1977, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

I further determine that workers engaged in employment related to the production of electronic connectors at Transatron Electronics Corp., Wakefield, Mass. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 17th day of 1978.

HARRY J. GILMAN,
Acting Director, Office of
Foreign Economic Research.

[4510-28]

[TA-W-2685]

U.S. STEEL CORP., SAN FRANCISCO, CALIF.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2685: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on November 30, 1977, in response to a worker petition received on November 16, 1977, which was filed on behalf of workers engaged in administrative support functions at the Western Steel Division Headquarters and at the Western Area Corporate Headquarters of the U.S. Steel Corp. in San Francisco, Calif.

The Notice of Investigation was published in the FEDERAL REGISTER on December 16, 1977 (42 FR 63488). No Public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the U.S. Steel Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. The investigation revealed that all of the criteria have been met.

The Western Steel Division Headquarters operates the Torrance and Pittsburg Works in California and the Geneva Works in Utah. The Department has previously certified workers engaged in the production of a significant percentage of the Division's total 1976 shipments who became totally or partially separated from employment on or after November 15, 1975. See Department Notices of Determination for TA-W-1449 and TA-W-1447. The certifications for these cases will expire

in August 19, 1979, and June 29, 1979, respectively. Also, all workers whose employment is related to steel production at Corporate Headquarters in Pittsburgh, Pa. to which the Western Area Corporate Headquarters reports to, who became totally or partially separated from employment on or after October 1, 1977, have been certified eligible to apply for adjustment assistance benefits. The company's Western Area Corporate Headquarters principally provides support services necessary for the company's west coast steelmaking operations. See Department Notice of Determination for TA-W-2850.

Average employment at the Corporate and Western Division offices in San Francisco declined in 1977 compared to 1976. Layoffs of workers first began in October 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of articles like or directly competitive with the steel products produced by the U.S. Steel Corp. have contributed importantly to the total or partial separation of employees at company offices in San Francisco, Calif. as required for certification in section 222 of the Trade Act of 1974. In accordance with the provisions of the Act, I make the following certifications:

All workers of the Western Steel Division Headquarters and of the Western Area Corporate Headquarters of the U.S. Steel Corp. in San Francisco, Calif. engaged in employment related to the production of steel products who became totally or partially separated from employment on or after October 1, 1977, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 17th day of May 1978.

HARRY J. GILMAN,
Acting Director, Office of
Foreign Economic Research.

[FR Doc. 14363 Filed 5-23-78; 8:45 am]

[4510-28]

[TA-W-2510]

WEST POINT-PEPPERELL, MEXIA, TEX.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2510: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on October 26, 1977, in response to a worker petition received on October 18, 1977, which was filed on behalf of

workers and former workers producing a woven cloth called Abrasive Drill at the Mexia, Tex. plant of West Point-Pepperell.

The notice of investigation was published in the FEDERAL REGISTER on November 15, 1977 (42 FR 59133). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of West Point-Pepperell, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, the American Textile Manufacturers Institute, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criteria has not been met.

That increases of imports of articles like or directly competitive with articles produced by the firm or subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Imports of gray woven industrial cotton fabric, which includes Abrasive Drill, increased 64 percent from 1975 to 1976 and declined 41 percent from the first nine months of 1976 to the first nine months of 1977.

A survey of customers of West Point-Pepperell revealed that customers did not increase purchases of imported Abrasive Drill while decreasing purchases from the Mexia plant. Respondents reported that purchases of imports accounted for less than 2 percent of their total purchases.

CONCLUSION

After careful review, I conclude that all workers at the Mexia, Tex. plant of West Point-Pepperell are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 11th day of May 1978.

JAMES F. TAYLOR,
Director, Office of Management,
Administration, and Planning.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 78-16]

NASA ADVISORY COUNCIL, SPACE SCIENCE ADVISORY COMMITTEE

Meeting

The Space Science Advisory Committee (SSAC) will meet at the National Aeronautics and Space Administration Headquarters on June 19-21, 1978. The meeting will be open to the public. The meeting will take place from 9 a.m. to 5:45 p.m. on June 19, from 8:45 a.m. to 5 p.m. on June 20, and from 8:45 a.m. to 12:30 p.m. on June 21, 1978, in Room 5026 of Federal Office Building 6, 400 Maryland Avenue SW., Washington, D.C. 20546.

The Space Science Advisory Committee consults with and advises the Associate Administrator for the Office of Space Science with respect to plans for, work in progress on, and accomplishments of NASA's Space Science programs. Topics under discussion at this meeting will include an update of NASA's OSS activities and reviews of OSS's fiscal year 1980 New Start candidates; Gamma Ray Observatory (GRO), Upper Atmosphere Research Satellite (UARS), Venus Orbiting Imaging Radar (VOIR), and the full Shuttle Multi-User Instrument Program (MIP). The OSS Explorer Status will be reviewed and future SSAC activities will be discussed.

For further information regarding this meeting, please contact Dr. Shelby G. Tilford, Executive Secretary, at Area Code 202-755-3766, National Aeronautics and Space Administration, Washington, D.C. 20546.

Dated: May 16, 1978.

ARNOLD W. FRUTKIN,
Deputy Associate Administrator
for External Relations.

[Notice 78-17]

NASA WAGE COMMITTEE

Meeting

Pursuant to the provisions of section 10 of the Federal Advisory Committee Act (Pub. L. 92-463) notice is hereby given that a meeting of the National Aeronautics and Space Administration Wage Committee is scheduled for June 21, 1978, from 1:30 p.m. to 4:30 p.m. The meeting will be held in Room 226-b, 600 Independence Avenue SW., Washington, D.C. 20546.

The Committee's primary responsibility is to consider and make recommendations to the Director of Personnel, National Aeronautics and Space

[7590-01]

[Docket Nos. 50-295 and 50-304]

COMMONWEALTH EDISON CO. (ZION STATION, UNION NOS. 1 AND 2)

Order for Modification of License

I.

The Commonwealth Edison Co. (the licensee), is the holder of Facility Operating License Nos. DPR-39 and DPR-48 which authorize the operation of the nuclear power reactors known as Zion Station, Unit Nos. 1 and 2 (the facilities), at steady reactor power levels not in excess of 3250 megawatts thermal (rated power) per reactor. The facilities consist of Westinghouse Electric Co. designed pressurized reactors (PWR) located at the licensee's site in Zion, Illinois.

II.

In accordance with the requirements of the Commission's ECCS Acceptance Criteria 10 CFR 50.46, the licensee submitted on April 17, 1977, as supplemented June 23, 1977, an ECCS evaluation for proposed operation using 15 x 15 fuel manufactured by the Westinghouse Electric Co. This evaluation included limits on the peaking factor. The ECCS performance submitted by the licensee was based upon an ECCS evaluation developed by the Westinghouse Electric Co. (Westinghouse), the designer of the Nuclear Steam Supply System for these facilities. The Westinghouse ECCS Evaluation Model had been previously found to conform to the requirements of the Commission's ECCS Acceptance Criteria, 10 CFR Part 50.46 and Appendix K. The evaluation indicated that with the peaking factor limited as set forth in the evaluation, and with other limits set forth in the facilities' Technical Specifications, the ECCS cooling performance for the facilities would conform with the criteria contained in 10 CFR 50.46(b) which govern calculated peak clad temperature, maximum cladding oxidation, maximum hydrogen generation, coolable geometry and long-term cooling.

On March 23, 1978 Westinghouse informed the Nuclear Regulatory Commission (NRC) that an error had been discovered in the fuel rod heat balance equation involving the incorrect use of only half of the volumetric heat generation due to metal-water reaction in calculating the cladding temperature. Thus, the LOCA analyses previously submitted to the Commission by licensees of Westinghouse reactors were in error. The staff promptly determined that no immediate action was required to assure safe operation of these plants.

The error identified would result in an increase in calculated peak clad temperature, which, for some plants,

Administration, on all matters involved in the development and authorization of a wage schedule for the Cleveland, Ohio, wage area pursuant to Pub. L. 92-392.

The approved agenda of the Committee provides that it will consider wage survey data, local reports, recommendations, and statistical analyses and proposed wage schedules derived therefrom.

Since this session will be concerned with matters listed in 5 U.S.C. 552b(c)(4), it has been determined that this meeting will be closed to the public.

However, members of the public who may wish to do so, are invited to submit material in writing to the Chairman concerning matters felt to be deserving of the Committee's attention. Additional information concerning this meeting may be obtained by contacting the Chairman, National Aeronautics and Space Administration Wage Committee, Mail Stop 3-9, Lewis Research Center, NASA, 21000 Brookpark Road, Cleveland, Ohio 44135.

Dated: May 9, 1978.

KENNETH R. CHAPMAN,
Associate Administrator for
External Relations.

[7590-01]

NUCLEAR REGULATORY COMMISSION

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS, SUBCOMMITTEE ON REACTOR SAFETY RESEARCH

Meeting; Addition to Agenda

The following provision has been added to the agenda of the May 31, 1978 meeting of the ACRS Subcommittee on Reactor Safety Research: "At the conclusion of the Executive Session, one or more of the ACRS Reactor Safety Research Working Groups may hold an open meeting(s) with representatives of the NRC Staff to discuss plans for review of NRC reactor safety research."

All other items pertaining to this meeting remain the same as published in the FEDERAL REGISTER on May 16, 1978.

Dated: May 17, 1978.

JOHN C. HOYLE,
Advisory Committee
Management Officer.

[FR Doc. 78-14208 Filed 5-22-78; 8:45 am]

could result in calculated temperatures in excess of 2200° F unless the allowable peaking factor was reduced somewhat. Westinghouse identified a number of other areas in the approved model which Westinghouse indicated contained sufficient conservatism to offset the calculated increase in peak clad temperature resulting from the correction of the error noted above. Four of these areas were generic, applicable to all plants, and a number of others were plant specific. As outlined in the attached SER, the staff concurs that some of these modifications would be appropriate to offset to some extent the penalty resulting from correction of the error. The attached SER sets forth the value for each modification applicable to each facility.

Revised computer calculations correcting the error, noted above, and incorporating the modifications described in the SER have not been run for each plant. However, the various parametric studies that have been made for various aspects of the approved model over the course of time provide a reasonable basis for concluding that when final revised calculations for the facilities are submitted using the revised and corrected model, they will demonstrate that with the peaking factors set forth in the SER operation will conform to the criteria of 10 CFR 50.46(b). Such revised calculations fully conforming to 10 CFR 50.46 are to be provided for the facilities as soon as possible.

As discussed in this Order and in the SER, operation of the Zion Station, Unit Nos. 1 and 2 facilities at the peaking factor limit specified in this Order, and in accordance with the operating surveillance requirements specified in this Order, will assure that the ECCS will conform to the performance requirements of 10 CFR 50.46(b). Accordingly, such limits provide reasonable assurance that the public health and safety will not be endangered. Upon notification by the NRC staff, the licensee committed to provide a reevaluation of ECCS performance as promptly as practicable to limit operation to achieve a peaking factor not exceeding the value specified herein and submitted operating surveillance procedures to assure operation within such limits. Such procedures were submitted and the commitments confirmed by the licensee's letter of April 7, 1978 and April 17, 1978. The staff believes that the licensee's action, under the circumstances, is appropriate and that this action should be confirmed by NRC Order.

IV.

Copies of the Safety Evaluation and the following documents are available for inspection at the Commission's Public Document Room at 1717 H

Street, Washington, D.C. 20555, and are being placed in the Commission's local public document room at the Waukegan Public Library, 128 North Street, Waukegan, Ill. 60085.

(1) Letter from Westinghouse to NRC dated April 7, 1978.

(2) Letters from Commonwealth Edison Co. to Mr. A. Schwencer, Operating Reactors Branch No. 1, dated April 7, 1978, and April 17, 1978.

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's Rules and Regulations in 10 CFR Parts 2 and 50, *It is ordered*, That, Facility Operating License Nos. DPR-39 and DPR-48 are hereby amended by adding the following new provisions:

(1) As soon as possible, the licensee shall submit a reevaluation of ECCS cooling performance calculated in accordance with the Westinghouse Evaluation Model, approved by the NRC staff and corrected for the errors described herein.

(2) Until further authorization by the Commission, the Technical Specification limit for total nuclear peaking factor (F_p) for the facilities shall be limited to 2.04 if the accumulator conditions are modified as specified in the licensee's letter dated April 17, 1978 or to 1.9 if accumulator conditions are not so modified.

(3) Until further authorization by the Commission, the licensee shall conduct the operating surveillance program described in its letter of April 17, 1978 where APDM surveillance will be performed above the following power levels.

F_p Limit	Zion Unit 1 (Percent)	Zion Unit 2 (Percent)
2.04	95.8	97.6
1.90	89.3	90.9

For the Nuclear Regulatory Commission,
Dated at Bethesda, Md., this 21st day of April 1978.

VICTOR STELLO, Jr.,
Director, Division of Operating Reactors, Office of Nuclear Reactor Regulation.

(FR Doc. 78-14212 Filed 5-22-78; 8:45 am)

[7590-01]

(Docket No. 50-247)

CONSOLIDATED EDISON CO. OF NEW YORK, INC. (INDIAN POINT NUCLEAR GENERATING UNIT NO. 2)

Order for Modification of License

I.

The Consolidated Edison Co. of New York, Inc. (the licensee), is the holder of Facility Operating License No. DPR-26 which authorizes the oper-

ation of the nuclear power reactor known as Indian Point Nuclear Generating Unit No. 2 (the facility) at steady reactor power levels not in excess of 2758 megawatts thermal (rated power). The facility consists of a Westinghouse Electric Corp. designed pressurized reactor (PWR) located at the licensee's site in Westchester County, New York.

II.

In accordance with the requirements of the Commission's ECCS Acceptance Criteria 10 CFR 50.46, the licensee submitted on January 28, 1977 an ECCS evaluation for proposed operation using fuel manufactured by the Westinghouse Electric Corp. This evaluation included limits on the peaking factor. The ECCS evaluation submitted by the licensee was based upon an ECCS evaluation developed by the Westinghouse Electric Corp. (Westinghouse), the designer of the Nuclear Steam Supply System for this facility. The Westinghouse ECCS Evaluation Model had been previously found to conform to the requirements of the Commission's ECCS Acceptance Criteria, 10 CFR Part 50.46 and Appendix K. The evaluation indicated that with the peaking factor limited as set forth in the evaluation, and with other limits set forth in the facility's Technical Specifications, the ECCS cooling performance for the facility would conform with the criteria contained in 10 CFR 50.46(b) which govern calculated peak clad temperature, maximum cladding oxidation, maximum hydrogen generations, coolable geometry and long-term cooling.

On March 23, 1978, Westinghouse informed the Nuclear Regulatory Commission (NRC) that an error had been discovered in the fuel rod heat balance equation involving the incorrect use of only half of the volumetric heat generation due to metal-water reaction in calculating the cladding temperature. Thus, the LOCA analyses previously submitted to the Commission by licensees of Westinghouse reactors were in error. The staff promptly determined that no immediate action was required to assure safe operation of these plants.

The error identified would result in an increase in calculated peak clad temperature, which, for some plants, could result in calculated temperatures in excess of 2,200° F. unless the allowable peaking factor was reduced somewhat. Westinghouse identified a number of other areas in the approved model which Westinghouse indicated contained sufficient conservatism to offset the calculated increase in peak clad temperature resulting from the correction of the error noted above. Four of these areas were generic, applicable to all plants, and a number of others were plant specific. As outlined

in the attached SER, the staff concurs that some of these modifications would be appropriate to offset to some extent the penalty resulting from correction of the error. The attached SER sets forth the value for each modification applicable to each facility.

Revised computer calculations correcting the error, noted above, and incorporating the modifications described in the SER have not been run for each plant. However, the various parametric studies that have been made for various aspects of the approved model over the course of time provide a reasonable basis for concluding that when final revised calculations for the facility are submitted using the revised and corrected model, they will demonstrate that with the peaking factors set forth in the SER operation will conform to the criteria of 10 CFR 50.46(b). Such revised calculations fully conforming to 10 CFR 50.46 are to be provided for the facility as soon as possible.

As discussed in this Order and in the SER, operation of the Indian Point Unit No. 2 facility at the peaking factor limit specified in this Order, will assure that the ECCS will conform to the performance requirements of 10 CFR 50.46(b). Accordingly, this limit provides reasonable assurance that the public health and safety will not be endangered. Upon notification by the NRC staff, the licensee committed to provide a reevaluation of ECCS performance as promptly as practicable and to limit operation to achieve a peaking factor not exceeding the value specified herein. The commitments were confirmed by the licensee's letter of April 17, 1978. The staff believes that the licensee's action, under the circumstances, is appropriate and that this action should be confirmed by NRC Order.

IV.

Copies of the Safety Evaluation and the following documents are available for inspection at the Commission's Public Document Room at 1717 H Street, Washington, D.C. 20555, and are being placed in the Commission's local public document room at the Hendrick Hudson Free Library, 31 Albany Post Road, Montrose, N.Y.

(1) Letter from Westinghouse to NRC dated April 17, 1978.

(2) Letter from Consolidated Edison Co. of New York, to Mr. A. Schwencer, Operating Reactors Branch No. 1, dated April 17, 1978.

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's Rules and Regulations in 10 CFR Parts 2 and 50, *It is ordered*, That Facility Operating License No. DPR-26 is hereby amended by adding the following new provisions:

(1) As soon as possible, the licensee shall submit a reevaluation of ECCS cooling performance calculated in accordance with the Westinghouse Evaluation Model, approved by the NRC staff and corrected for the errors described herein.

(2) Until further authorization by the Commission, the Technical Specification limit for total nuclear peaking factor (F_p) for the facility shall be limited to 2.24.

Dated at Bethesda, Md. this 27th day of April 1978.

(Docket No. 50-309)

MAINE YANKEE ATOMIC POWER CO.

Issuance of Amendment to Facility Operating License and Negative Declaration

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 38 to Facility Operating License No. DPR-36, issued to Maine Yankee Atomic Power Co. (the licensee), which revised the license and its appended Technical Specifications for operation of the Maine Yankee Atomic Power Station (the facility) located in Lincoln County, Maine. The amendment is effective as of its date of issuance.

The amendment increases the licensed power level from 2440 to 2630 Mwt. while at the same time, restricting operation to 2560 Mwt until the Advisory Committee on Reactor Safeguards has reviewed and approved the power increase from 2560 to 2630 and the Commission has issued a subsequent amendment to that effect. In addition, this amendment revises Technical Specifications to reflect plant operating limits at the higher power levels. The Technical Specifications regarding total radial peaking factors have also been revised.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Notice of Proposed Issuance of Amendment to Facility Operating License in connection with the power increase was published in the FEDERAL

REGISTER on September 15, 1977 (42 FR 46428). No request for a hearing or petition for leave to intervene was filed following notice of the proposed action. Prior public notice in connection with the revised total radial peaking factors was not required since this action does not involve a significant hazards consideration.

The Commission has prepared an environmental impact appraisal for this action and has concluded that an environmental impact statement is not warranted because there will be no environmental impact attributable to this action other than that which has already been predicted and described in the Commission's Final Environmental Statement for the facility.

For further details with respect to this action, see (1) the applications for amendment dated June 24, 1977 and August 1, 1977, as supplemented December 9, 1977 and April 28, 1978, (2) Amendment No. 38 to License No. DPR-36, (3) the Commission's related Safety Evaluation issued January 17, 1978, as supplemented April 11, 1978 and May 10, 1978, and (4) the Commission's Environmental Impact appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Wiscasset Public Library Association, High Street, Wiscasset, Maine. A copy of items (2) through (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 10th day of May 1978.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors
Branch No. 4, Division of Operating Reactors.

REGULATORY GUIDES, TABLE OF CONTENTS

Issuance and Availability

The Nuclear Regulatory Commission has issued a revised Table of Contents for Regulatory Guides in Division 1, "Power Reactors." This issue presents and explains a new format to be used for future issues of tables of contents of guides in all divisions.

Previous issues of this table of contents listed only the latest revision of each regulatory guide because it represented a current NRC staff position. However, some licensing commitments were based on earlier versions of a guide; therefore, this and future issues of the table of contents will list every version of each guide with the date it

was issued. If the latest version of a guide (as of the date of this table of contents) was issued for early comment, this is so noted.

Most regulatory guides contain a section headed "Implementation," which is intended to provide information to applicants and licensees regarding the NRC staff's plans for using the guide. If a guide does not contain such a section or if detailed information is needed on the staff's plans for using a regulatory guide with respect to a specific permit or license or application therefor, requests for such information should be addressed to the appropriate licensing project manager in the Office of Nuclear Reactor Regulation or Office of Nuclear Material Safety and Safeguards.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides in specific divisions or for a copy of the Table of Contents should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

REVISION TO THE STANDARD REVIEW PLAN (NUREG-75/087)

Issuance and Availability

As a continuation of the updating program for the Standard Review Plan (SRP) previously announced (FEDERAL REGISTER notice dated December 8, 1977), the Nuclear Regulatory Commission's (NRC's) Office of Nuclear Reactor Regulation has published Revision No. 1 to Section No. 12.4 (Dose Assessment) of the SRP for the NRC staff's safety review of applications to build and operate light-water-cooled nuclear power reactors. The purpose of the plan, which is composed of 224 sections, is to improve both the quality and uniformity of the NRC staff's review of applications to build new nuclear power plants, and to make information about regulatory

matters widely available, including the improvement of communication and understanding of the staff review process by interested members of the public and the nuclear power industry. The purpose of the undating program is to revise sections of the SRP for which changes in the review plan have been developed since the original issuance in September 1975 to reflect current practice.

Copies of the Standard Review Plan for the Review of Safety Analysis Reports for Nuclear Power Plants, which has been identified as NUREG-75/087, are available from the National Technical Information Service, Springfield, Va. 22161. The domestic price is \$70.00, including first-year supplements. Annual subscriptions for supplements alone are \$30.00. Individual sections are available at current prices. The domestic price for Revision No. 1 to Section No. 12.4 is \$4.00. Foreign price information is available from NTIS. A copy of the Standard Review Plan including all revisions published to date is available for public inspection at the NRC's Public Document Room at 1717 H Street NW., Washington, D.C. 20555 (5 U.S.C. 552(a)).

Dated at Bethesda, Md., this 11th day of May 1978.

For the U.S. Nuclear Regulatory Commission,

DANIEL R. MULLER,
Deputy Director, Division of Site
Safety and Environmental
Analysis, Office of Nuclear Re-
actor Regulation.

SECURITIES AND EXCHANGE COMMISSION

(Release No. 14771; SR-Amex-78-8)

AMERICAN STOCK EXCHANGE, INC.

Order Approving Proposed Rule Change

MAY 16, 1978.

On March 21, 1978, the American Stock Exchange, Inc. ("Amex"), 86 Trinity Place, New York, N.Y. 10006, filed with the Commission, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) (the "Act") and rule 19b-4 thereunder, copies of a proposed rule change which amends section 104 of the Company Guide to eliminate the

minimum distribution requirement of three hundred (300) holders for original listing of bonds or debentures on the Exchange.¹

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission release (Securities Exchange Act Release No. 14625, April 3, 1978) and by publication in the FEDERAL REGISTER (43 FR 15208, April 11, 1978). All written statements with respect to the proposed rule change which were filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person were considered and (with the exception of those statements or communications which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552) were made available to the public at the Commission's Public Reference Room.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges, and in particular, the requirements of section 6, and the rules and regulations thereunder.²

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc. 78-14314 Filed 5-22-78; 8:45 am]

¹In the statement of purpose set forth in SR-Amex-78-8, Amex asserts that deletion of the above-mentioned distribution requirement would permit listing of quality debt issues which, by virtue of placement with institutional investors, are currently ineligible for such listing. Moreover, since market prices for debt securities are directly influenced by fluctuations in prevailing interest rates, a minimum distribution requirement is not essential to the maintenance on an exchange of a fair and orderly market in a security of this type. Finally, elimination of a distribution requirement for debt securities will conform the Amex to the New York Stock Exchange, Inc., in this respect.

²Amex rule 6(a)(1) permits a member, member firm or member corporation, acting as principal, to effect off-board transactions in debt securities admitted to dealings on the Amex where the member, member firm or member corporation, after reviewing, with due diligence, the proposed purchase or sale in the light of the factors involved, including the market existing on the Amex, the price and the size, is satisfied that the transaction can be executed more advantageously off the exchange.

[8010-01]

[Release No. 34-14766; File No. SR-Amex-78-12]

AMERICAN STOCK EXCHANGE, INC.

Self-Regulatory Organization; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on April 17, 1978, the American Stock Exchange, Inc., has filed with the Securities and Exchange Commission a proposed rule change. The American Stock Exchange has provided the Commission with the following statement of the terms of substance, basis and purpose of the proposed rule change.

EXCHANGE'S STATEMENT OF TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The American Stock Exchange, Inc. ("Amex") proposes to adopt rule 115 ("Unusual Market Exception" Rule). The text of the proposed rule is as follows:

PROPOSED RULE 115

Pursuant to SEC rule 11Ac1-1 governing the dissemination of quotations for equity securities reported on the consolidated tape, if the Exchange determines, in accordance with the procedures set forth in the commentary to this rule, that the level of trading activity or the existence of unusual market conditions is such that the Exchange cannot collect, process, and make available quotation data in a manner which accurately reflects the current state of the market on the floor of the Exchange, the Exchange shall immediately notify the persons specified in paragraph 3 of the commentary and, upon such notification, the obligation imposed upon Exchange members and the Exchange by SEC rule 11Ac1-1 shall be suspended, pending a determination by the Exchange that the unusual market activity or condition has terminated and renotification of the specified persons.

• • • Commentary

.01 Exchange Procedures for Use of "Unusual Market Exception" Provided by SEC Rule 11Ac1-1

1(a). If a specialist is unable to update his quotations on a timely basis owing to the high level of trading activity or the existence of an unusual market condition, he shall promptly notify a Floor Official. An unusual market condition affecting a specialist's ability to promptly communicate quotation data would include, but not be limited to, situations where the high level of activity in one specialty stock affects the specialist's ability

to update quotation data in any other security for which he has responsibility, or where, due to unforeseen circumstances beyond the specialist's control, he is temporarily required to assume responsibility for an unusually large number of securities assigned to his specialist unit.

1(b). Upon notification by a specialist, the Floor Official shall promptly verify the existence of the unusual market activity or condition and if, in his judgment, the specialist is unable to update his quotations on a timely basis, the Floor Official shall promptly notify the Market Operations Division of the Exchange. If a Floor Official, independent of notification by a specialist, becomes aware of any unusual market activity or condition which adversely affects a specialist's ability to promptly communicate quotation data, he shall likewise promptly advise the Market Operations Division.

2. If the Exchange (as opposed to the specialist) is unable to accurately collect, process, and/or disseminate quotation data owing to the high level of trading activity or the existence of unusual market conditions, the Market Operations Division of the Exchange, after consultation with a Floor Official, shall make a determination that this is the case. An unusual market condition affecting the Exchange's ability to disseminate quotation data would include, but not be limited to, situations where the equipment used to collect, process, and disseminate quotation data becomes inoperable, or where, due to unforeseen circumstances beyond the control of the Exchange, the number of Exchange floor personnel is inadequate to properly carry out the Exchange's collection obligation.

3. The Market Operations Division, either upon receiving notification from a Floor Official with respect to a specialist as provided in paragraph 1(b) or upon making its own determination with respect to the Exchange as provided in paragraph 2, shall notify the Securities Industry Automation Corp. (and request that it notify quotation vendors) regarding the Exchange's inability to accurately collect, process, and make available the quotation data required by SEC rule 11Ac1-1.

4. After a Floor Official has given notification with respect to a specialist as provided in paragraph 1(b) or after the Market Operations Division has made a determination with respect to the Exchange as provided in paragraph 2, the Floor Official or the Market Operations Division (as the case may be) shall monitor the unusual market activity or condition until it has terminated. Thereupon, the Market Operations Division shall immediately renotify SIAC (and request

that it renotify quotations vendors) that the Exchange is once again capable of disseminating the quotation data required by Rule SEC 11Ac1-1.

EXCHANGE'S STATEMENT OF BASIS AND PURPOSE

The Securities and Exchange Commission recently announced the adoption of rule 11Ac1-1, which will govern the dissemination of quotations for equity securities reported on the consolidated tape. The rule, which takes effect on May 1, 1978, requires exchanges and the NASD to have procedures for the collection and distribution of quotations to vendors.

Quotations covered by the rule will be required to be "firm", subject to certain exceptions. Firmness will not be required if the Exchange determines that the level of trading activity or the existence of unusual market conditions is such that the Exchange is incapable of collecting, processing, and disseminating the quotation data in a manner which accurately reflects the current state of the market. The SEC rule requires that the Exchange adopt a rule setting forth the standards and procedures to be followed when it invokes this "unusual market" exception. Proposed Rule 115 is designed to meet this requirement.

Rule 115 is proposed to enable the Exchange to comply with the provisions of SEC rule 11Ac1-1, consistent with section 6(b)(1) of the Act.

No comments were solicited or received with respect to the proposed rule change.

The Amex has determined that no burden on competition will be imposed by the proposed rule change.

On or before June 27, 1978, or within such longer period: (i) as the Commission may designate up to 90 days of such date if it finds such longer periods to be appropriate and publishes its reasons for so finding, or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file six (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-

regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before June 22, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 16, 1978.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[Release No. 34-14767; File No. SR-BSE-78-2]

BOSTON STOCK EXCHANGE, INC.

Self-Regulatory Organization; Proposed Rule Changes

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on April 17, 1978, the Boston Stock Exchange, Inc. has filed with the Securities and Exchange Commission a proposed rule change. The Boston Stock Exchange has provided the Commission with the following statement of the terms of substance, basis and purpose of the proposed rule change.

EXCHANGE'S STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGES

PROPOSED RULE CHANGES

(a) Rescind present Section 7 of Chapter II of the Rules in its entirety and substitute the following:

MAINTENANCE OF QUOTATIONS

Section 7. All bids made and all offers made shall be in accordance with Rule 11Ac1-1 of the Securities Exchange Act of 1934 which governs the dissemination of quotations for reported securities.

The following interpretations and policies pertain to all issues for which a specialist has been assigned and as to which last sale information is reported on the Consolidated Transaction Reporting System.

INTERPRETATIONS AND POLICIES

.01 Specialists shall input their current markets and sizes to the Quotation System through the key terminal at the post. These quotations shall be firm as to both price and size unless exempted under one of the conditions specified hereinafter in paragraphs .05 to .08.

.02 Alternate specialists, while at the specialist post shall input or cause to be input to the Quotation System their bids and/or offers which better

the current Boston Stock Exchange market. Such quotations shall remain in force until the alternate specialist leaves the post. Alternate specialists' quotations and accompanying sizes shall be firm unless exempted under one of the conditions specified in paragraphs .05 to .08.

.03 Floor brokers, while at the specialist post shall input or cause to be input to the Quotation System those bids or offers which better the current Boston Stock Exchange market unless the bid or offer is cancelled or withdrawn if not executed immediately. If a floor broker transfers possession of an order to a specialist, the requirement for input to the Quotation System becomes the obligation of the specialist. When a floor broker who retains possession of an order leaves the post he must withdraw or cause to be withdrawn his bid or offer from the Quotation System. Quotations and accompanying sizes shall be firm until withdrawn unless exempted under one of the conditions specified in paragraphs .05 to .08.

.04 Quotation sizes, unless otherwise specified shall be assumed to be for 100 shares. Where bids or offers are made at the same price the aggregate quotation size of such equal bids or offers shall be input into the Quotation System. Such aggregate sizes shall remain firm until withdrawn, unless exempted under one of the conditions hereinafter specified in paragraphs .05 to .08.

.05 In instances where a block trade on the Boston Stock Exchange or other market against which orders are being protected takes place outside the current Boston Stock Exchange quotation, all effective bids or offers limited to the block price or better will be executed at the more favorable block price rather than at the limit price of the affected orders.

.06 No offer shall be executed in violation of applicable short-sale rules:

Example:

BSE Market in XYZ—43¼-43¾ (short).
NYSE Market in XYZ—43¾-43¾.
Consolidated Tape Sale—43¾.

The Boston Stock Exchange offering at 43¾ may not be filled at its limit price subsequent to a sale reported on the Consolidated Tape at 43¾. However, any floor member entering a short offering into the quote system is responsible for promptly adjusting the order into conformity with applicable short sale rules.

.07 No specialist, alternate specialist or floor broker shall be obligated to effect a transaction for any security as provided for in paragraphs .01, .02, and .03 of this Rule if:

(A) Before an order sought to be executed is presented, such specialist, alternate specialist, or floor broker has input a revised bid, offer, or quotation size into the Quotation System, or

(B) At the same time an order sought to be executed is presented, such specialist, alternate specialist, or floor broker is in the process of effecting a transaction in such security and, immediately after the completion of such transaction, such specialist, alternate specialist, or floor broker inputs a revised bid, offer, or quotation size into the Quotation System.

.08 In the event of unusual market conditions as determined by two members of the Committee on Business Conduct, quotations in a particular issue will not be subject to firmness provided that the Exchange has notified the following specified persons:

- (1) Each quotation vendor;
- (2) The processor for the Consolidated System; or

(3) The processor for the Options Price Reporting Authority (in the case of a notification with respect to a reported security which is a class of security underlying options admitted to trading on any Exchange).

.09 Prior to making a determination that a particular security or securities be exempted from the firmness requirement the members of the Committee on Business Conduct shall consider:

- (1) The level of trading activity in existence at the time on the Boston Stock Exchange;
- (2) The level of trading activity in existence at the time at other Exchanges on which the particular security is traded; or
- (3) The condition of the Exchange's Quotation Dissemination System.

The Committee members who grant a request for exemption from the firmness requirement are required to monitor the activity or conditions which form the basis for such exemption and shall immediately notify the Exchange when such conditions no longer exist.

2. *Procedures of Self-Regulatory Organization.* The Board Governors approved the foregoing proposed rule changes on March 30, 1978.

3. *Exchange's Statement of Purpose of the Proposed Rule Changes.* To conform with the provisions of the Amendments to the Securities Exchange Act Rule 11Ac1-1.

4. *Exchange's Statement of Basis of the Proposed Rule Changes.* To bring the Exchange Rules into compliance with the provisions of Rule 11Ac1-1 under the Securities Exchange Act of 1934 which governs dissemination of quotations for reported securities.

5. *Comments Received from Members, Participants or Others on Proposed Rule Changes.* No comments were solicited or received.

6. *Exchange's Statement of Burden on Competition.* No burden on competition is perceived by adoption of the proposed amendments.

On or before June 27, 1978, or within such longer period (i) as the Commis-

sion may designate up to 90 days of such date, if it finds such longer period to be appropriate and published its reasons for so finding, or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule changes, or

(B) Institute proceedings to determine whether the proposed rule changes should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before June 22, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 16, 1978.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[Release No. 34-14765; File No. SR-MSE-78-8]

MIDWEST STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s (b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on April 10, 1978, the Midwest Stock Exchange, Incorporated has filed with the Securities and Exchange Commission a proposed rule change. The Midwest Stock Exchange has provided the Commission with the following statement of the terms of substance, basis and purpose of the proposed rule change.

ARTICLE XX

RECOGNIZED QUOTATIONS

Rule 8. Recognized quotations shall be public bids and offers in lots of one or more trading units or multiples thereof. Bids or offers for less than one unit of trading shall specify the number of shares of stock or the principal amount of the bonds covered by

the bid or offer. All bids made and all offers made shall be in accordance with the provisions of Rule 11Ac1-1 under the Securities Exchange Act of 1934, governing the dissemination of quotations for reported securities.

The following interpretations and policies pertain to all specialist system issues for which last sale information is reported in the consolidated transaction reporting system.

Interpretations and Policies

.01 Specialists shall input their current markets and sizes to the quotation system through the key terminal or the mark sense terminal at the post. These quotations shall be firm as to both price and size unless exempted under one of the conditions specified in paragraph 5-8 of this Rule.

.02 Market makers, while at the post, shall input to the quotation system their bids and/or offers which better the current Midwest Stock Exchange market. Such quotations shall remain in force until the market maker leaves the post. Market maker quotations and accompanying sizes shall be firm unless exempted under one of the conditions specified in paragraphs 5-8 of this Rule.

.03 Floor Brokers, while at the post, shall input to the quotation system those bids or offers which better the current Midwest Stock Exchange market unless the bid or offer is cancelled or withdrawn if not executed immediately. If a floor broker transfers possession of an order to a specialist, the requirement for input to the quotation system becomes the obligation of the specialist. When a floor broker who retains possession of an order leaves the post he must withdraw his bid or offer from the quotation system. Quotations and accompanying sizes shall be firm until withdrawn unless exempted under one of the conditions specified in paragraphs 5-8 of this Rule.

.04 Quotation sizes, unless otherwise specified, shall be assumed to be for 100 shares. Where bids or offers are made at the same price the aggregate quotation size of such equal bids or offers shall be inputted into the quotation system. Such aggregate sizes shall remain firm until withdrawn unless exempted under one of the conditions specified in paragraphs 5-8 of this Rule.

.05 In instances where a block trade on the Midwest Stock Exchange or other market against which orders are being protected, takes place outside the current Midwest Stock Exchange quotation, all effective bids or offers limited to the block price or better will be executed at the more favorable block price rather than at the limit price of the affected orders.

.06 No offer shall be executed in violation of applicable short sale rules:

Example:

MSE market in XYZ—43½-43¾ (short)
NYSE market in XYZ—43¾-43¾
Consolidated tape last sale—43¾

The Midwest Stock Exchange offering at 43¾ may not be filed at its limit price subsequent to a Consolidated Tape sale at 43¾. However, any floor member entering a short offering into the quote system is responsible for promptly adjusting the order into conformity with applicable short sale rules.

.07 No specialist, market maker or floor broker shall be obligated to execute a transaction for any security as provided for in paragraphs .01, .02, and .03 of this Rule if:

(A) Before an order sought to be executed is presented, such specialist, market maker or floor broker has inputted a revised bid, offer or quotation size into the quotation system or

(B) At the time an order sought to be executed is presented, such specialist, market maker or floor broker is in the process of effecting a transaction in such security and, immediately after the completion of such transaction, such specialist, market maker or floor broker inputs a revised bid, offer or quotation size into the quotation system.

.08 In the event of unusual market conditions as determined by two Committee on Floor Procedure members, quotations in a given issue will not be subject to firmness provided that the Exchange has notified the following specified persons:

1. Each quotation vendor;
2. The processor for the consolidated system; and

3. The processor for the Options Price Reporting Authority (in the case of a notification with respect to a reported security which is a class of securities underlying options admitted to trading on an exchange).

.09 Prior to making a determination that a particular security or securities be exempted from the firmness requirement, the Committee on Floor Procedure members shall consider:

1. The level of trading activity in existence at the time on the Midwest Stock Exchange;
2. The level of trading activity in existence at the time at other exchanges on which the particular security is traded.
3. The condition of the Exchange's quotation dissemination system.

EXCHANGE'S STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change are as follows:

The purpose of the proposed rule change is to implement, within the rules of the Exchange, the mandates contained within Rule 11Ac1-1 under the Securities Exchange Act of 1934

which governs the dissemination of quotations for reported securities.

The proposed rule change is consistent with Section 11A(c)(1) of the Securities Exchange Act of 1934, as amended, which in part requires that any information with respect to quotations in any security shall not be distributed or published in contravention of rules and regulations of the Commission.

A subcommittee of the Exchange's Committee on Floor Procedure has reviewed and approved the proposed rule change.

The Midwest Stock Exchange, Incorporated, believes that no burdens have been placed on competition.

On or before June 27, 1978, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before June 22, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 16, 1978.

[8010-01]

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 14774; File No. SR-NYSE-78-28]

NEW YORK STOCK EXCHANGE, INC.

Filing and Effectiveness of Proposed Rule Change

MAY 16, 1978.

The New York Stock Exchange, Inc. ("NYSE") submitted on May 4, 1978, a proposed rule change under Rule 19b-4 to establish a fee of \$25 for the ser-

vices of the NYSE staff in performing a pre-use review of advertising material voluntarily submitted by a member.

The foregoing rule change has become effective, pursuant to section 19(b)(3)(A) of the Securities Exchange Act of 1934. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Publication of the submission is expected to be made in the FEDERAL REGISTER during the week of May 15, 1978. In order to assist the Commission to determine whether to approve the proposed rule change or institute proceedings to determine whether the proposed rule change should be disapproved, interested persons are invited to submit written data, views and arguments concerning the submission on or before June 13, 1978. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Reference should be made to File No. SR-NYSE-78-28.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and of all written communication relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 1100 L Street NW., Washington, D.C.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[Release No. 34-14768; File No. SR-NYSE-78-27]

NEW YORK STOCK EXCHANGE, INC.

Self-Regulatory Organization; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on April 24, 1978, the New York Stock Exchange, Inc. has filed with the Securities and Exchange Commission a proposed rule

change. The New York Stock Exchange has provided the Commission with the following statement of the terms of substance, basis and purpose of the proposed rule change.

EXCHANGE'S STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The text of proposed new Rule 60 of the New York Stock Exchange is as follows:

§2060 DISSEMINATION OF QUOTATIONS

Explanatory Note re Rule 60. On January 28, 1978, the Securities and Exchange Commission adopted, effective May 1, 1978, Rule 11Ac1-1 governing the dissemination of quotations for "reported securities". This rule requires all national securities exchanges and associations to establish procedures for collecting from their members' bids, offers and quotation sizes with respect to reported securities, and for making such bids, offers and sizes available to quotation vendors. The rule also requires that quotation information made available to vendors be "firm", subject to certain exceptions. Exchange Rule 60, below, relates to SEC Rule 11Ac1-1 and the provisions thereof.

For ease of reference, the complete text of SEC Rule 11Ac1-1 is reproduced below. Further information relating to this rule is contained in SEC Release No. 34-14415, dated January 26, 1978.

SEC Rule 11Ac1-1. Dissemination of Quotations for Reported Securities.

SEC Rule 11Ac1-1 will be reproduced in its entirety here.

PROPOSED NEW RULE 60

Rule 60. (a) For purposes of this rule, the terms "responsible broker or dealer", "quotation vendor", "bid", "offer", "reported security", "quotation size", "published bid", "published offer", "published quotation size", "make available", "aggregate quotation size" and "specified persons" shall have the meaning given to them in SEC Rule 11Ac1-1.

(b) Each member who is a responsible broker or dealer on the Floor shall, in addition to meeting his obligations as set forth in paragraph (c) of the Rule 11Ac1-1, also abide by such rules and procedures adopted by the Exchange, as in effect from time to time, in order to enable the Exchange to meet its quotation dissemination requirements under paragraph (b) of Rule 11Ac1-1.

(c) Each member who is a responsible broker or dealer on the Floor shall:

(i) Promptly after making a bid and/or offer in the trading crowd for a reported security, communicate to the Reporter in such security his bid and/or offer (as made in the crowd) and

the quotation size that he wishes to disseminate to quotation vendors;

(ii) Promptly notify the Reporter in the reported security whenever his published bid, published offer or published quotation size is to be revised; and

(iii) Promptly notify the Reporter in the reported security whenever his published bid and/or published offer is to be cancelled or withdrawn.

Notwithstanding anything in Rule 117 to the contrary, if a member who is a responsible broker or dealer on the Floor leaves the trading crowd for the reported security without notifying the Reporter to cancel or withdraw his published bid or published offer and, thereafter, an order is received in the trading crowd seeking that published bid of published offer, the member shall be obligated to that order to the extent set forth in paragraph (c) of Rule 11Ac1-1.

(d) Each member who is a responsible broker or dealer in a reported security shall make a reasonable effort to assist the Reporter in assuring that the published bid, published offer, and published quotation size (or published aggregate quotation size) in such reported security accurately reflects the market on the Floor.

(e) With respect to paragraph (b) (3) of Rule 11Ac1-1, a Floor Governor (or two Floor Officials in the event a Floor Governor is not available) shall have the power to determine that the level of trading activity or the existence of unusual market conditions are such that the Exchange is incapable of collecting, processing and making available to quotation vendors bids, offers and quotation sizes with respect to one or more reported securities in a manner which accurately reflects the current state of the market on the Floor.

Whenever a Floor Governor (or Floor Officials) makes any such determination he shall immediately notify the Market Surveillance and Evaluation Division of the Exchange and the Exchange shall communicate a notification of that determination to all specified persons. Upon completion of such notification to specified persons, members on the Floor shall be relieved of their obligations under Rule 11Ac1-1 with respect to the security or securities in question.

The Floor Governor (or Floor Officials) shall monitor the activity or condition which formed the basis for his determination and he shall immediately renotify the Market Surveillance and Evaluation Division when the Exchange is once again capable of collecting, processing and making available to quotation vendors bids, offers and quotation sizes with respect to one or more reported securities in question in a manner which accurately reflects the current state of the market on the

Floor. Upon completion of such renotification to specified persons (notice of which shall be sent to the Floor) members on the Floor shall once again be obligated under Rule 11Ac1-1 with respect to the security of securities in question.

Supplementary Material.

10 If a member who is a responsible broker or dealer on the Floor leaves the trading crowd for the reported security without notifying the Reporter to cancel or withdraw his published bid or published offer, the specialist in such security shall be authorized, at his discretion, to cancel or withdraw that member's published bid or published offer provided that

(i) An order has not been received in the trading crowd seeking that member's published bid or published offer; and

(ii) At the same time the specialist cancels or withdraws a published bid or published offer, as contemplated in this paragraph, the specialist communicates a revised bid or offer, which represents the current market on the Floor in that reported security, to the Reporter for publication purposes.

20 No member shall be deemed to be a responsible broker or dealer with respect to a published bid or published offer that is erroneous as a result of an error or omission made by the Exchange or any quotation vendor. If a published bid or published offer is accurate but the published quotation size (or published aggregate quotation size, as the case may be) associated with it is erroneous as a result of an error or omission made by the Exchange or any quotation vendor, then each responsible broker or dealer with respect to the published bid or published offer shall be obligated to the extent set forth in paragraph (c) of Rule 11Ac1-1 but only to the extent of one unit of trading in the reported security in question.

EXCHANGE'S STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the proposed rule change are as follows:

PURPOSE OF PROPOSED RULE CHANGE

The purpose of proposed new Rule 60 is to assist the Exchange in implementing SEC Rule 11Ac1-1. The salient provisions of proposed new Rule 60 are summarized below, as follows:

Each member of the Exchange who is a "responsible broker or dealer" on the Floor with respect to a reported security will be required to communicate, to the Exchange Reporter assigned to that security, his bid or offer, as made in the trading crowd, and the quotation size that he wishes to have disseminated to quotation vendors. Each such member will also be required to notify the Exchange Reporter whenever his "published bid",

"published offer" or "published quotation size" is to be revised and whenever his published bid or published offer is to be canceled or withdrawn.

These provisions will assist the Exchange in fulfilling its obligations to collect, process and disseminate quotations and quotation sizes in reported securities.

A current practice on the Floor of the Exchange stemming from the provisions of Rule 117 is that if a member who makes a bid or offer in the trading crowd subsequently leaves the crowd without "turning over" an order to another member, his bid or offer is considered automatically canceled.

To reinforce the "firmness" of Exchange-published quotations, a provision has been added to proposed new Rule 60 that if a member leaves the trading crowd without notifying the Reporter to cancel or withdraw his published bid or published offer and, thereafter, an order is received in the trading crowd seeking that published bid or published offer, the member will be obligated to trade with that order notwithstanding anything in Rule 117 to be contrary. However, to avoid confusion and complications and to ensure the efficient and orderly conduct of business in the trading crowds on the Floor, a provision has also been added to Rule 60 that if a member leaves the trading crowd without notifying the Reporter to cancel or withdraw his published bid or published offer, the specialist shall be authorized to cancel or withdraw that member's published bid or published offer, subject to certain conditions which, again, are aimed at ensuring the firmness of Exchange-published quotations and also that such quotations represent the current market on the Floor in the security in question.

Proposed Rule 60 will empower an Exchange Floor Governor (or two Floor Officials in the event a Floor Governor is not available) to make the determination, as contemplated in Rule 11Ac1-1, that active or unusual market conditions exist and that the provisions of Rule 11Ac1-1 should be suspended. Any Floor Governor (or Floor Official) who makes such a determination will be required to monitor the activity or condition which formed the basis for his determination and, when the activity or condition no longer exists, he is required to take certain actions which will cause the provisions of Rule 11Ac1-1 to again apply.

Proposed Rule 60 also contains a provision to clarify that no member of the Exchange shall be responsible with respect to a published bid or published offer that is erroneous as a result of an error or omission of the Exchange or any quotation vendor.

BASIS UNDER THE ACT FOR PROPOSED RULE CHANGE

The proposed rule change relates to section 11A(a) of the Act and particularly subparagraph (1)(C)(iii) thereof which states that "It is in the public interest and appropriate for the protection of investors and the maintenance of fair and orderly markets to assure . . . the availability to brokers, dealers and investors of information with respect to quotations for and transactions in securities . . .".

As mentioned in item 3 above, the proposed rule change also relates to, and is intended to assist the Exchange in implementing the provisions of, SEC 11Ac1-1 which is presently scheduled to become effective on May 1, 1978.

Further, the proposed rule change relates to Section 6(b)(1) of the Act in that it would assist the Exchange in carrying out the purposes of the Act and to comply, and to enforce compliance by its members, with the provisions of the Act and the rules and regulations thereunder.

Finally, the proposed rule change relates to section 6(b)(5) of the Act in that it is designed to remove impediments to and perfect the mechanism of a free and open market and a national market system.

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS OR OTHERS ON PROPOSED RULE CHANGE

The Exchange has not solicited nor has it received any comments regarding the proposed rule change.

EXCHANGE'S STATEMENT OF BURDEN ON COMPETITION

The proposed rule change will not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

On or before June 27, 1978, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in

the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filings will also be available for inspection and copying at the principal offices of the above mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before June 22, 1978. For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 16, 1978.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc. 78-14308 Filed 5-22-78; 8:45 am]

[8010-01]

[Release No. 34-14770; File No. SR-PHLX 78-4]

PHILADELPHIA STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. 94-29, 16 (June 4, 1975), notice is hereby given that on May 15, 1978, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

PHLX STATEMENT OF TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The amendment provides for simplified procedures for the arbitration of claims by public customers where the amount in dispute is \$2,500 or less.

PHLX STATEMENT OF BASIS AND PURPOSE OF THE PROPOSED RULE CHANGE

The purpose of the proposed rule change is to provide investors with a simple and inexpensive procedure for the resolution of small claims against member firms. The procedures set forth in the proposed rule were developed by the Securities Industry Conference on Arbitration, which is composed of representatives of the PHLX and eight other self-regulatory organizations. The proposed rule would provide for determination by a single arbitrator knowledgeable in securities matters of disputes between brokerage firms and customers involving amounts not exceeding \$2,500. The participating self-regulatory organizations will offer hearing facilities in all areas of the country, so that a dispute can be heard in a location convenient to the claimant. A claimant will have the right to withdraw his claim without prejudice if a counterclaim in excess of his claim is interposed. The only expense will be a filing fee of \$15.

The basis under the Act for the proposed rule change is section 6(b)(5).

The proposed uniform rule applicable to small claims by public customers will provide a more effective, efficient and economical dispute resolution system for public investors with small claims and thus will protect investors and the public interest.

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS OR OTHERS

Comments were received from the members of the Securities and Exchange Commission at an open meeting held on December 8, 1977, to a Report by SICA containing an earlier version of the procedures. Based on those comments, the procedures were revised as presently submitted.

BURDEN ON COMPETITION

The PHLX has determined that no burden on competition will be imposed by the proposed rule change.

On or before June 27, 1978, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before June 13, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

MAY 16, 1978.

The text of the proposed rule change is as follows. Brackets indicate deletions; italics indicate new material.

BY-LAW 10-7

(d) Notwithstanding the provisions of Sections 10-7 (b) and (c), any dispute, claim or controversy between a public customer and a member or

member organization involving an amount not exceeding \$2,500, exclusive of attendant costs and interest, shall be subject to arbitration under the provisions of Rule 950. The procedural provisions of Rule 950 shall govern arbitration thereunder and in such case shall supersede any provisions of Sections 10-7 (b) and (c) which are inconsistent therewith.

UNIFORM RULE APPLICABLE TO SMALL CLAIMS BY PUBLIC CUSTOMERS

RULE 950(a) Any dispute, claim or controversy, arising between a public customer(s) and a member, or member organization, [required to be arbitrated] subject to arbitration under the By-Laws and Rules of the Philadelphia Stock Exchange, Inc., involving a dollar amount not exceeding \$2,500, exclusive of attendant costs and interest, shall upon demand of the customer(s) or by written consent of the parties be arbitrated as hereinafter provided.

(b) The Claimant shall file with the Arbitration Director one (1) executed Submission Agreement and one (1) copy of the Submission Agreement and one (1) copy of the Statement of Claim of the controversy in dispute, together with documents in support of the claim. The Statement of Claim shall specify the relevant facts, the remedies sought and whether or not a hearing is demanded.

(c) The Claimant shall pay the sum of \$15.00 upon filing of the Submission Agreement. The final disposition of this sum shall be determined by the arbitrator.

(d) The Arbitration Director shall endeavor to serve promptly by mail or otherwise on the Respondent(s) one (1) copy of the Statement of Claim. The Respondent(s) shall within twenty (20) calendar days from receipt of service file with the Arbitration Director one (1) executed Submission Agreement and one (1) copy of the Respondent's Answer, together with supporting documents. The Answer shall designate all available defenses to the Claim and may set forth any related Counterclaim and/or related Third Party Claim the Respondent(s) may have against the Claimant or any other person. If the Respondent(s) has interposed a Third Party Claim, the Arbitration Director shall endeavor to serve promptly by mail or otherwise a copy of same together with a copy of the Submission Agreement on such Third Party who shall respond in the manner herein provided for response to the Claim. If the Respondent(s) files a related Counterclaim exceeding \$2,500, the arbitrator may refer the Claim, Counterclaim and/or Third Party Claim, if any, to a panel of three (3) arbitrators or, he may dismiss the Counterclaim and/or Third Party

Claim without prejudice to the Counterclaimant(s) and/or Third Party Claimant(s) pursuing the Counterclaim and/or Third Party Claim in a separate proceeding. The costs to the Claimant under either proceeding shall in no event exceed \$15.00.

(e) The Arbitration Director shall endeavor to serve promptly by mail or otherwise on the Claimant a copy of the Answer, Counterclaim, Third Party Claim or other responsive pleading, if any. The Claimant, if a Counterclaim is asserted against him, shall within ten (10) calendar days either (1) file a Reply to any Counterclaim with the Arbitration Director who will serve a copy of the Reply on the Respondent(s) or (2) if the amount of the Counterclaim exceeds the Claim shall have the right to file a statement withdrawing the Claim. If the Claimant withdraws the Claim, the proceedings will be discontinued without prejudice to the rights of the parties.

(f) The dispute, claim or controversy shall be submitted to a single arbitrator knowledgeable in the securities industry selected by the Arbitration Director. Unless the public customer demands or consents to a hearing, or the arbitrator(s) calls a hearing, the arbitrator shall decide the dispute, claim or controversy solely upon the pleadings and evidence filed by the parties. If a hearing is necessary, such hearing shall be held as soon as practicable at a locale selected by the Arbitration Director.

(g) The Arbitration Director may grant extensions of time to file any pleading upon a showing of good cause.

(h) The arbitrator shall be authorized to require the submission of further documentary evidence as he in his sole discretion deems advisable.

(i) Upon the request of the arbitrator, the Arbitration Director shall appoint two (2) additional arbitrators to a panel which shall decide the matter in controversy.

(j) In any case where there is more than one (1) arbitrator, the majority will be public arbitrators.

(k) In his discretion, the arbitrator may, at the request of any party, permit such party to submit additional documentation relating to the pleadings.

(l) Except as otherwise provided herein, the general arbitration rules of the Philadelphia Stock Exchange, Inc. shall be applicable to proceedings instituted under this Rule.

[8010-01]

[Release No. 34-14789; File No. SR-PHLX 78-8]

PHILADELPHIA STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on April 17, 1978, the Philadelphia Stock Exchange, Incorporated has filed with the Securities and Exchange Commission a proposed rule change. The Midwest Stock Exchange has provided the Commission with the following statement of the terms of substance, basis and purpose of the proposed rule change.

RULE 105—RECOGNIZED QUOTATIONS

The Philadelphia Stock Exchange proposes to amend Rule 105, "Recognized Quotations". (Italics indicate new language.)

The recognized quotations shall be public bids and offers in lots of one trading unit of stocks or bonds or multiples thereof. All bids made and all offers made shall be in accordance with the provisions of Rule 11Ac1-1 under the Securities Exchange Act of 1934, governing the dissemination of quotations for reported securities.

Supplementary Material

.01 In the event of unusual market conditions as determined by the Committee on Floor Procedure, quotations in a given issue will not be subject to firmness provided that the Exchange has notified the following specified persons:

1. Each quotation vendor;
2. The processor for the consolidated system;
3. The processor for the Options Price Reporting Authority (in the case of a notification with respect to a reported security which is a class of securities underlying options admitted to trading on any exchange).

.02 Prior to making a determination that a particular security or securities be exempted from the firmness requirement, the Committee on Floor Procedure shall consider:

1. The level of trading activity in existence at the time on the Philadelphia Stock Exchange.
2. The level of trading activity in existence at the time at other exchanges on which the particular security is traded.
3. The condition of the Exchange's quotation dissemination system.

EXCHANGE'S STATEMENT OF BASIS AND PURPOSE

The purpose of the proposed rule change is to implement, within the rules of the Exchange, the mandates

contained within Rule 11Ac1-1 under the Securities Exchange Act of 1934 which governs the dissemination of quotations for reported securities.

The proposed rule change is consistent with Rule 11Ac1-1 of the Securities Exchange Act of 1934, as amended, which in part requires that any information with respect to quotations in any security shall not be distributed or published in contravention of rules and regulations of the Commission.

No comments on the proposed rule change have been solicited or received. The Philadelphia Stock Exchange, Inc. believes that no burdens have been placed on competition.

On or before June 27, 1978, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before June 22, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 16, 1978.

GEORGE A. FITZSIMMONS,
Secretary.

[8025-01]

[Proposed License No. 02/02-03481]

CANNON CAPITAL CORP.

Application for a License To Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under the Small Business Investment Act of 1958, as amended (Act) (15 U.S.C. 661 et seq.), has been filed by Cannon Capital Corp. (the Applicant), with the Small Business Administration (SBA), pursuant to 13 CFR 107.102.

The Applicant, with its place of business at 665 Fifth Avenue, New York, N.Y. 10022, will begin operations with approximately \$1,782,700 of paid-in capital and surplus which will be sold to approximately 35 stockholders in a non-public offering. Its stock will consist of 35 units each comprised of 1,500 shares of class A and 25,000 shares of class B common stock for a unit price of \$50,000.

The officers and directors of the Applicant will be as follows:

Name	Title
Harris F. Epstein	President, Director
12 A Heritage Drive New City, N.Y. 10956	
Herbert S. Cannon	Chairman of the Board, Treasurer
480 Park Avenue New York, N.Y. 10022	
Marvin J. Goldstein	Secretary, Director, Counsel

These individuals will each own 13.88 percent of the Applicant's class A common voting stock. Mr. Epstein is currently a vice president of another SBIC, MDC capital corporation; from which he will resign upon licensing of the Applicant.

Investors will own shares of class B stock representing 100 percent of the class B stock outstanding, and shares of class A stock representing 58 1/4 percent of class A stock outstanding. The

balance of Cannon's class A common stock, 41 1/2 percent will be sold to Messrs. Herbert Cannon, Harris Epstein, and Marvin Goldstein at an individual cost of \$15,000.

Mr. Marvin Goldstein has also been credited \$10,000 toward the purchase price of class A stock for legal services performed on behalf of Cannon.

Cannon intends to provide funds to eligible small businesses primarily in New York, New Jersey, and Connecticut. In addition to providing capital funds, the Applicant will offer technical assistance, advisory and counseling services to small companies.

Matters involved in SBA's consideration of the Applicant include the general business reputation and character of the proposed owners and management, and the probability of successful operation of the Applicant under their management, including adequate profitability and financial soundness, in accordance with the Act and the SBA rules and regulations.

Any person may, on or before June 7, 1978, submit to SBA written comments on the proposed Licensee. Any such communications should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in New York City.

CAPITAL FORMATION MESBIC, INC.

License Surrender

Notice is hereby given that Capital Formation MESBIC, Inc., 2112 Broadway, Suite 401, New York, N.Y. 10023, has surrendered its license to operate as a small business investment company under section 301(d) of the Small Business Investment Act of 1958, as amended (the Act).

The company was licensed by the Small Business Administration on September 23, 1971.

Under the authority vested by the Act and pursuant to 13 CFR 107.105 (1978), the surrender by Capital Formation MESBIC, Inc., of its license is hereby approved.

Accordingly, all rights, privileges and franchises derived from the license are hereby terminated.

[8025-01]

[Proposed License No. 06/06-02011]

CAPITAL MANAGEMENT & RESOURCES, INC.

Application for a License To Operate as a Small Business Investment Co.

Notice is hereby given that an application has been filed with the Small Business Administration (SBA) pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1977)), under the name of Capital Management & Resources, Inc., Suite 203, 4664 Jamestown Avenue, Baton Rouge, La. 70808, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended (the Act), and the Rules and Regulations promulgated thereunder.

The proposed officers, directors and shareholders are as follows:

Warren S. Orlando, President, Director, 20 percent shareholder, 720 Coco Plum Circle, Plantation, Fla. 33317.
Jan W. Dugger, Vice President, Director, 20 percent shareholder, 401 Kenilworth Parkway, Baton Rouge, La. 70808.
Phillip W. Preks, Secretary, Director, 20 percent shareholder, 8810 Norfolk Drive, Baton Rouge, La. 70809.
Eddie C. Bartee, Treasurer, Director, 20 percent shareholder, 1913 Hermadel Drive, Baton Rouge, La. 70816.
Doris Gates Rankin, Director, 20 percent shareholder, 7857 Highland Road, Baton Rouge, La. 70808.

There will be two classes to stock: voting common stock with 500,000 shares authorized, and non-voting preferred stock with 500,000 shares authorized. The voting common stock will be owned by the five individuals named above. The preferred stock will be offered and sold to large corporations, institutional investors, pension funds and trusts.

The Applicant Licensee proposes to commence operations with private capital of \$1,051,000, consisting of \$1,000 in common stock and \$1,050,000 in preferred stock.

While the Applicant's principal office will be in Baton Rouge, it intends to establish a branch office in Fort Lauderdale, Fla. It will conduct its operations principally in the States of Louisiana and Florida and in other areas within the United States as may from time to time be approved by SBA.

Matters involved in SBA's consideration of the application include the general business reputation and character of shareholders and management, and the probability of successful operation of the new company in accordance with the Act and Regulations.

Notice is further given that any person may, not later than June 7, 1978, submit to SBA, in writing, comments on the proposed licensing of this company. Any such communications should be addressed to: Associate Administrator for Finance and Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

A copy of this notice shall be published by the Applicant in newspapers of general circulation in Baton Rouge, La. and Fort Lauderdale, Fla.

(Catalog of Federal Domestic Assistance Program, No. 59.011, Small Business Investment Companies.)

Dated: May 16, 1978.

[Proposed License No. 06/06-02021]

FIRST CAPITAL CORP. OF NEW MEXICO

Application for a License to Operate as a Small Business Investment Co.

Notice is hereby given that an application has been filed with the Small Business Administration (SBA) pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1977)), under the name of First Capital Corp. of New Mexico, 2625 Pennsylvania NE., Albuquerque, N. Mex. 87110, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended (the Act), and the Rules and Regulations promulgated thereunder.

The proposed officers, directors and stockholder of the Applicant are as follows:

Melvin I. Hertz, President, Director, 3314 Linda Vista SE., Albuquerque, N. Mex. 87107.

Horace G. Pickard, Jr., Chairman of the Board, Secretary-Treasurer (100 percent ownership), 4608 Glenwood Hills Dr. NE., Albuquerque, N. Mex. 87111.

There will be one class of stock authorized, 3,000,000 shares of common stock with a par value of \$1 per share.

The Applicant Licensee proposes to begin operations with private capital of \$304,000. It is represented that the private capital will be increased to at

least \$500,000 within 1 year of the date of licensing. Applicant proposes to conduct its operations principally within the State of New Mexico.

Matters involved in SBA's consideration of the application include the general business reputation and character of shareholders and management, and the probability of successful operation of the new company in accordance with the Act and Regulations.

Notice is further given that any person may, not later than June 7, 1978, submit to SBA, in writing, comments on the proposed licensing of this company. Any such communications should be addressed to: Associate Administrator for Finance and Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

A copy of this notice shall be published by the Applicant in a newspaper of general circulation in Albuquerque, N. Mex.

[8025-01]

[Application No. 03/03-51351]

FULCRUM VENTURE CAPITAL CORP.

Application for a License To Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under section 301(d) of the Small Business Investment Act of 1958, as amended (Act) (15 U.S.C. 661 et seq.) has been filed by Fulcrum Venture Capital Corp. (applicant) with the Small Business Administration (SBA) pursuant to 13 CFR 107.102 (1977).

The officers, directors and stockholders are as follows:

Steven L. Lilly, President and Director, 2021 K Street NW., Suite 701, Washington, D.C. 20006.

David L. Jameson, Secretary and Director, 2021 K Street NW., Suite 701, Washington, D.C. 20006.

John G. Gloster, Treasurer and Director, 2021 K Street NW., Suite 701, Washington, D.C. 20006.

The applicant, a District of Columbia corporation, will maintain an office at 2021 K Street NW., Suite 701, Washington, D.C. 20006 and will begin operations with \$2,000,000 of paid-in capital and paid-in surplus derived from the Sale of 1,500 shares of common stock to Opportunity Fund-

ing Corporation and 500 shares of common stock to Cooperative Assistance Fund.

The applicant intends to follow a diversified investment policy by not specializing in any particular industry but making investments in any small business concern permitted by the Small Business Administration's regulations.

As a small business investment company under section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Act, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the applicant include the general business reputation and character of the proposed owners and management and the probability of successful operations of the applicant under this management, including adequate profitability and financial soundness, in accordance with the Act and SBA Rules and Regulations.

Any person may, not later than June 7, 1978, submit to SBA written comments on the proposed applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, 1441 L Street NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Washington, D.C.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: May 16, 1978.

[Proposed License No. 06/06-02001]

SAVINGS VENTURE CAPITAL CORP.

Application for a License To Operate as a Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration (SBA) pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1977)), under the name of Savings Venture Capital Corporation, 6001 Financial Plaza, Shreveport, La. 71102, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business In-

vestment Act of 1958, as amended (the Act), and the Rules and Regulations promulgated thereunder.

The proposed officers, directors and shareholders are as follows:

Herman K. Beebe, Chairman of the Board, 458 Rallsback Road, Shreveport, La. 71106.

Dale A. Anderson, President, Director, 2518 Benton Road, Bossier City, La. 71111.

Charles D. Gray, Jr., Vice President, Director, 510 Yolanda Lane, Shreveport, La. 71105.

Clarice A. Huckabee, Secretary, Director, P.O. Box 163, Greenwood, La. 71033.
Savings Life Insurance Co., 100 Percent, 6001 Financial Plaza, Shreveport, La. 71103.

There is only one class of stock with one million shares of common stock authorized. Initially, only 500,000 of these will be issued. Savings Life Insurance Co. is a wholly owned subsidiary of AMI, Inc., which is owned 53 percent by Herman K. Beebe. No other shareholder owns as much as 10 percent of AMI, Inc.

The Applicant Licensee proposes to begin operations with private capital of \$1,000,000. Applicant proposes to conduct its operations principally within the States of Louisiana, Arkansas, Texas and Mississippi.

Matters involved in SBA's consideration of the application include the general business reputation and character of shareholders and management, and the probability of successful operation of the new company in accordance with the Act and Regulations.

Notice is further given that any person may, not later than June 7, 1978, submit to SBA, in writing, comments on the proposal licensing of this company. Any such comments should be addressed to: Associate Administrator for Finance and Investment, Small Business Administration, 1441 "L" Street NW., Washington, D.C. 20416.

SMALL BUSINESS INVESTMENT CAPITAL, INC.

Filing of Application for Approval of Conflict of Interest Transaction Between Associates

Notice is hereby given that Small Business Investment Capital, Inc. (the

Licensee), 10003 New Benton Highway, Little Rock, Ark. 72203, a Federal Licensee under the Small Business Investment Act of 1958, as amended (the Act), has filed with the Small Business Administration (SBA), an application pursuant to § 107.1004 of the Regulations governing small business investment companies (13 CFR 107.1004 (1977)), for approval of a conflict of interest transaction.

The Licensee was licensed by SBA on March 6, 1975, and is wholly owned by Shur-Valu Stamps, Inc., 10003 New Benton Highway, Little Rock, Ark. 72203.

It is proposed that the Licensee loan Mr. Paul Bone a certain amount of money to remodel his retail grocery store in Clinton, Ark. Mr. Bone is on the board of directors of Shur-Valu Stamps, Inc., and therefore he is considered to be an Associate of the Licensee as defined by Section 107.3(c) of SBA's Rules and Regulations.

Notice is further given that any person may, not later than June 7, 1978 submit to SBA, in writing, comments on this transaction. Any such comments should be addressed to: Associate Administrator for Finance and Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Clinton, Ark. and in Little Rock, Ark.

[License No. 02/02-0339]

Issuance of License To Operate as a Small Business Investment Company

On October 31, 1977, a notice of application for a license as a small business investment company was published in the FEDERAL REGISTER (42 FR 57999) stating that a notice had been filed with the Small Business Administration (SBA) pursuant to § 107.102 of the regulations governing small business investment companies (13 CFR 107.102 (1977)) for a license as a small business investment company (SBIC) by Sprout Capital Corp., 140 Broadway, New York, N.Y. 10005.

Interested parties were given until the close of business November 15, 1977, to submit their comments to SBA. No comments were received.

Notice is hereby given that, pursuant to section 301(c) of the Small Business

Investment Act of 1958, as amended, after having considered the application and the facts with regard thereto, SBA on May 2, 1978, issued License No. 02/02-0339 to Sprout Capital Corp. to operate as an SBIC.

DEPARTMENT OF THE TREASURY

Office of the Secretary

TREASURY SMALL BUSINESS ADVISORY COMMITTEE

Subcommittee Meeting

Pursuant to the Federal Advisory Committee Act, Pub. L. 92-463, notice is hereby given that a meeting of the Subcommittee on Tax Policy of the Treasury Small Business Advisory Committee will be held on June 7, 1978.

The Subcommittee will meet from 9:30 a.m. to 12 p.m. and from 1:30 p.m. to approximately 5 p.m. The meeting will be in room 4426 of the Main Treasury Building, 15th and Pennsylvania Avenue N.W., Washington, D.C. 20220.

The Treasury Small Business Advisory Committee was formed to provide a means of communication between the small business community and Treasury officials on numerous economic issues, including capital formation, tax policy, tax administration and governmental regulations. The Tax Policy subcommittee will focus on the following subjects: (1) Accumulated earnings tax; (2) accounting for inventories; (3) President's proposal to allow small business to use a simplified method of depreciation; (4) relief from estimated tax for rapidly developing small businesses.

The meeting will be open to the public. A limited number of seats will be available. In order to facilitate admittance, persons interested in attending are asked to call 566-5487 so that confirmation of space and access procedures can be provided.

Interested persons may file a written statement with the Subcommittee before, during or after the meeting. The Subcommittee Chairman will, as time permits, entertain oral comments from members of the public attending the meeting. Persons interested in making oral statements are asked to call 566-5487 before 5 p.m. on June 2.

Minutes of the meeting will be available on request from the Treasury Small Business Advisory Committee.

Inquires may be directed to Frederic H. Sweet, Special Assistant to the secretary (Consumer Affairs) Department of the Treasury, Main Treasury Building, Room 4453, 15th and Pennsylvania Avenue NW., Washington, D.C. 20220, telephone 202-566-5487.

Dated: May 17, 1978.

ROBERT CARSWELL,
Deputy Secretary.

[4010-22]

TRIGGER BASE PRICES AND "EXTRAS" FOR IMPORTED STEEL MILL PRODUCTS

I am hereby announcing trigger base prices and extras for wire nails and heavy carbon steel rails to be used by the Treasury Department in monitoring imports of these products under the trigger price mechanism. I am also republishing a number of pages in the Steel Trigger Price Handbook to correct typographical and other errors made in prior announcements. A description of the trigger price mechanism may be found in the "Background" to the final rulemaking which amended regulations to require the filing of a Special Summary Steel Invoice (SSSI) with all entries of imported steel mill products (43 FR 6065).

These base prices and extras are based upon evidence made available to the Treasury Department by the Japanese Ministry of International Trade and Industry (MITI), as well as other information available to the Department. The methodology used in developing these trigger prices is essentially the same as that described in the FEDERAL REGISTER notice of January 9, 1978 (43 FR 1464). However, these trigger prices are based upon the production costs of the smaller Japanese fabricating mills, rather than the six integrated Japanese steel mills.

The trigger prices being announced today for wire nails and heavy carbon steel rails will be used by the Customs Service to collect information at the time of entry on all shipments of the products covered which are exported after the date of publication of this notice. However, the following rules will be applied to entries of these products covered by contracts with fixed price terms concluded before the publication date of this notice:

1. Contracts with fixed price terms between unrelated parties: If the importer documents at or before the time of entry that the shipment is being imported under such a contract with an unrelated party, the entry will not trigger an investigation even if the sales price is below the trigger price, provided that entry is made on or before June 30, 1978. However, failure to initiate

an investigation will not diminish the right of affected interested persons to file a complaint with respect to such imports under the established procedures for antidumping cases.

2. Contracts between related parties: If the importer documents at the time of entry that the shipment is being imported under a contract with a related party and the shipment is to be resold to an unrelated purchaser in the United States under a contract with fixed price terms concluded before the publication date of this notice, the entry will not trigger an investigation even if the sales price is below the trigger price, provided that delivery is made on or before June 30, 1978.

While these sales will not as a rule trigger a self-initiated antidumping investigation, information concerning such sales will be kept as a part of the information in the monitoring system and will be available in the event that an antidumping petition is filed with respect to such products sold by that producer or the Treasury Department decides to self-initiate an antidumping investigation of such products based upon subsequent sales.

The quarterly revisions in trigger prices announced by the Treasury De-

partment on May 5, 1978 will also apply to wire nails and heavy carbon steel rails. As with other fabricated products referred to in section C of the Treasury Department notice, a 5.5 percent revision will be applied to the trigger base price plus extras for these products, effective for shipments exported on or after July 1, 1978.

Dated: May 16, 1978.

W. MICHAEL BLUMENTHAL,
Secretary of the Treasury.

(Notice No. 665)

ASSIGNMENT OF HEARINGS

MAY 18, 1978.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 140768 (Sub-No. 13), American Trans-Freight, Inc., now assigned June 1, 1978 at Washington, DC, is postponed indefinitely.

No. MC 143450 (Sub-No. 1), Ambassador Coach Lines, Inc., now assigned June 5,

1978, at Parsons, KS is postponed to June 12, 1978 (1 week), at Parsons, KS in a hearing room to be later designated.

No. MC 28536 (Sub-No. 16), Fox & Ginn, Inc. and MC 108473 (Sub-No. 39), St. Johnsbury Trucking Co., Inc. are now assigned for hearing on the following dates and at the following locations: June 5, 1978 (2 weeks) at the Ramada Inn, 225 McClellan Hwy, East Boston, MA; July 17, 1978 (1 week) at the Americana, 660 Albany Shaker Road, Albany, NY; July 24, 1978 (1 week) at Boston, MA, at a location to be later designated; August 21, 1978 (1 week) at the Swamp Fox Inn, South Main Street, Presque Isle, ME; and September 18, 1978 (2 weeks) at Essex House, 160 Central Park South, New York, NY. (Hearing previously assigned for MC 108473 (Sub-No. 39), St. Johnsbury Trucking Co., Inc., on July 10, 1978 at Burlington, VT, is canceled; and MC 108473 (Sub-No. 39) is now consolidated for hearing with MC 28536 (Sub-No. 16) as shown in the above hearing schedule.)

MC 127738 (Sub-No. 7), Yellowstone Park Lines, Inc., now assigned June 14, 1978, at Billings, MT is canceled and transferred to Modified Procedure.

MC 136371 (Sub-No. 24), Concord Trucking Co., Inc. is assigned for hearing June 5, 1978 at New York, NY, and will be held at room E-2220 Federal Building, 26 Federal Plaza.

MC 118377 (Sub-No. 7), Richard R. Johncox is assigned for hearing June 6, 1978 at New York, NY, and will be held at room E-2220 Federal Building, 26 Federal Plaza.

MC 136285 (Sub-No. 29), Southern Intermodal Logistics, Inc. now assigned June 6, 1978 at Atlanta, GA is cancelled.

No. MC 115841 (Sub-No. 553), Colonial Refrigerated Transportation, now assigned June 7, 1978, at Atlanta, GA will be held in room 305, 1252 West Peachtree Street NW.

No. MC 103926 (Sub-No. 8M1), W. T. Mayfield Sons Trucking Co., now assigned June 6, 1978, at Atlanta, GA will be held in room 305, 1252 West Peachtree Street NW.

No. MC 123407 (Sub-No. 429), Sawyer Transport, Inc. and MC 124947 (Sub-No. 78), Machinery Transports, Inc., now assigned June 12, 1978, at Atlanta, GA will be held in room 305, 1252 West Peachtree Street NW.

H. G. HOMME, Jr.,
Acting Secretary.

(Notice No. 79)

MOTOR CARRIER TEMPORARY AUTHORITY
APPLICATIONS

MAY 18, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official

named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, DC, and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 2095 (Sub-No. 14TA), filed April 27, 1978. Applicant: KEIM TRANSPORTATION, INC., 420 North Sixth, R.F.D. 2, Box 10, Sabetha, KS 66534. Applicant's representative: Clyde N. Christey, Kansas Credit Union Building, 1010 Tyler Street, Suite 1101, Topeka, KS 66612. No. MC 138328 (Sub-No. 62TA), filed March 15, 1978, and published in the *FEDERAL REGISTER* issue of April 12, 1978, and republished as corrected this issue. Applicant: CLARENCE L. WERNER d.b.a. WERNER ENTERPRISES, I-80 and Highway 50, P.O. Box 37308, Omaha, NE 68137. Applicant's representative: Donna Ehrlich (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Metal buildings*, knocked down or in sections, and *materials, equipment, and supplies* used in the installation and sale of metal buildings, *steel studs; tracks and channels; metal roof trim and guttering; and lathing*, from the facilities of the Ceco Corp., at Broadview, IL to points in CO, IN, IA, KS, MS, MN, MO, MT, NE, ND, OH, PA, SD, WI, and WY, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): D. R. D'Argento, traffic manager, the Ceco Corp., 5601 West 26th Street, Chicago, IL 60650. Send protests to: Carroll Russell, District Supervisor, Interstate Commerce Commission, suite 620, 110 North 14th Street, Omaha, NE 68102. The purpose of this republication is to add a commodity description, that was previously omitted.

No. MC 139039 (Sub-No. 1TA), filed April 26, 1978. Applicant: A. MARIAN- NI'S, SONS, INC., 3301 Tulip Street, Philadelphia, PA 19134. Applicant's representative: Alan Kahn, Suite 1920, Two Penn Center Plaza, Philadelphia, PA 19102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Scrap metals in containers and empty containers on return*, between the facilities of Crown Cork & Seal Co., Inc., in Philadelphia, PA, on the one hand, and, on the other, Sparrows Point, MD, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Crown Cork & Seal Co., Inc., 9300 Ashton Road, Philadelphia, PA 19136. Send protests to: T. M. Esposito, Transportation Assistant, 600 Arch Street, Room 3238, Philadelphia, PA 19106.

No. MC 139269 (Sub-No. 13TA), filed March 22, 1978. Applicant: C. P. CRASKA, INC., 10422 Cosby Manor Road, Utica, NY 13502. Applicant's representative: Murray J. S. Kirshtein, Esq., 118 Bleeker Street, Utica, NY 13501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods* in vehicles equipped with mechanical refrigeration, from the facilities of General Foods Corp. at Avon, NY to points in MA and CT, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days

of operating authority. Supporting shipper(s): General Foods Corp., 250 North Street, White Plains, NY 10625. Send protests to: Interstate Commerce Commission, U.S. Courthouse and Federal Building, 100 S. Clinton Street, Room 1259, Syracuse, NY 13260.

No. MC 140024 (Sub-No. 108TA), filed May 3, 1978. Applicant: J. B. MONTGOMERY, INC., 5565 East 52nd Avenue, Commerce City, CO 80022. Applicant's representative: John F. DeCock (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs* (except in bulk), in vehicles equipped with mechanical refrigeration, from Seabrook, NJ, to points in CA, CO, IL, IN, IA, KS, KY, MI, IO, NV, OH, and PA, for 180 days. No tack—no interline. Supporting shipper(s): Seabrook Farms Division—Seabrook Foods, Inc., Parsonage Road, Seabrook, NJ 08302. Send protests to: Roger L. Buchanan, District Supervisor, Interstate Commerce Commission, 721 19th Street, 492 U.S. Customs House, Denver, CO 80202.

No. MC 140024 (Sub-No. 109TA), filed May 3, 1978. Applicant: J. B. MONTGOMERY, INC., 5565 East 52nd Avenue, Commerce City, CO 80022. Applicant's representative: John F. DeCock (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs* (except in bulk), from Jersey City, NJ, to points in OH and MI, for 180 days. No tack—no interline. Supporting shipper(s): C. F. Mueller Co., 180 Baldwin Avenue, Jersey City, NJ. Send protests to: Roger L. Buchanan, District Supervisor, Interstate Commerce Commission, 721 19th Street, 492 U.S. Customs House, Denver, CO 80202.

No. MC 141054 (Sub-No. 5TA), filed May 2, 1978. Applicant: B & B PACKING TRANSPORT, LTD., 2001 Spring Road, Suite 225, Oak Brook, IL 60521. Applicant's representative: J. Michael May, Suite 508, 1447 Peachtree Street, SE., Atlanta, GA 30309. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Meat and packinghouse products*, from Council Bluffs, IA, to points in the United States (except AL and HT), under a continuing contract, or contracts, with Great Plains Beef Co., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Great Plains Beef Co., Robert Pierce, Traffic Manager, 2700 23d Avenue, Council Bluffs, IA. Send protests to: Patricia A. Roscoe, Transportation Consumer Specialist, Interstate Commerce Commission, Everett McKinley

Dirksen Building, 219 S. Dearborn St., Room 1386, Chicago, IL 60604.

No. MC 141346 (Sub-No. 2TA), filed April 24, 1978. Applicant: DONAVON CREIGHTON AND KERON L. CAIN, d.b.a. K. L. CAIN, TRUCKING CONTRACTOR, R.R. No. 2, Potomac, IL 61865. Applicant's representative: Robert T. Lawley, 300 Reisch Building, Springfield, IL 62701. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Plastic motorcycle windshields, fairings, and accessories*, from Rantoul, IL, to San Luis Obispo, CA, for the account of Vetter Fairing Co., Rantoul, IL, under a continuing contract, or contracts, with Vetter Fairing Co., for 180 days. RAILROAD CONTRACT RATES

Proposed Change of Policy

AGENCY: Interstate Commerce Commission.

ACTION: Issuance of Policy Statement.

SUMMARY: The Commission proposes to issue a general policy statement permitting the filing in tariff form of railroad contract rates. The

Commission believes that there is nothing inherently unlawful in railroads and shippers voluntarily entering into long-term commitments for the transportation of a specified volume of freight at agreed rates. The acceptance for filing of tariffs containing contract rates by railroads represents a change in policy. Accordingly, interested persons will be permitted to file comments before a final policy statement is adopted and issued.

COMMENTS: All interested persons are invited to comment. Comments should be filed with the Section of Rates, Office of Proceedings, Room 5342, Interstate Commerce Commission, Washington, D.C. 20423.

DATES: Comments must be received on or before June 22, 1978.

FOR FURTHER INFORMATION CONTACT:

Janice M. Rosenak or Harvey Gobetz, Interstate Commerce Commission, Washington, D.C. 20423, 202-275-7693.

SUPPLEMENTARY INFORMATION: The Commission's prior position on the lawfulness of contract rates was expressed in two cases decided in 1961. *Contract Rates, Rugs and Carpeting from Amsterdam, N.Y.*, 313 ICC 247 (1961), aff'd sub nom., *N.Y. Central R. Co. v. United States*, 194 F. Supp. 947 (S.D.N.Y., 1961), aff'd per curiam, 368 U.S. 349 (1962); *Guaranteed Rates from Sault St. Marie, Ontario, Canada, to Chicago*, 315 ICC 311 (1961). The prevailing view in these cases was that the contract rates in question would eliminate intermodal carrier competition during the contract period, and that such a rate would therefore be a destructive competitive practice contrary to the National Transportation Policy. Dictum in the *Guaranteed Rates* case stated that "contract rates and agreed charges are deemed unlawful per se." 315 ICC at 323.

On the other hand, the Commission has previously approved arrangements where railroads offer reduced rates conditioned on shipments of a requisite annual volume. See, *Coal from Ky., Va., and W. Va., to Virginia*, 308 ICC 99 (1959) (annual volume rates to meet competition from a potential mine mouth generator); *Coal from Ill., Ind., and Ky., to Illinois and Indiana*, 308 ICC 673 (1959) (reduced rates on multiple car shipments to meet barge competition); *Coal to New York Harbor Area*, 311 ICC 355 (1960) (reduced rates to meet competition from oil and gas); *Huron Portland Co. v. B. & O. R. Co.*, 332 ICC 655 (1968), affirmed sub nom., *Natural Gypsum Co. v. United States*, 353 F. Supp. 941 (W.D.N.Y., 1973) (rates to meet competition from possible construction of coal slurry pipeline).

The Commission believes that contract rates are not unlawful per se and that each rate proposal with exclusive dealing aspects (whether described as "contract" rates, "annual volume" rates, or otherwise) should be evaluated on its own merits.

The considerations that resulted in the disapproval of the rail proposals at issue in *Contract Rates* and *Guaranteed Rates*, supra, may be absent or significantly altered under certain circumstances, or outweighed by other considerations. The policy of the Commission in the future will be to consider any rate proposal which commits (or tends to commit) traffic exclusively to a particular carrier for a time period on an individual case-by-case basis. This policy does not prejudice the lawlessness or change any evidentiary burden regarding a proposed contract rate.

The factors to be considered by the Commission in determining the lawfulness of a contract rate by a rail common carrier will include, but not be limited to, the following: (1) duration of the proposed agreement or commitment (explicit or implicit) underlying the contract rate; (2) whether the cars involved in the rail movement subject to the proposed rate are those of the railroad; (competitive circumstances surrounding the traffic to be moved under the proposed rate; (4) effect on car utilization; (5) special considerations of the shipper and the railroads, e.g., the need for utilities to be assured of a steady and ample supply of coal at a given rate; and (6) whether the requirements under the rate proposal involve percentages of the traffic to be moved or a fixed annual volume amount.

Comments by any interested party regarding the aforementioned factors, the appropriate procedures for filing a proposed contract rate, and the propriety of restricting contract rates by a rail common carrier to a specific commodity and volume requirement are requested by the Commission.

Dated: May 11, 1978.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

ATCHISON, TOPEKA AND SANTA FE RAILWAY CO.

Abandonment Between Cushing and Shawnee in Payne, Lincoln and Pottawatomie Counties, OK., Notice of Findings

Notice is hereby given pursuant to section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by

a decision entered on September 21, 1977, and the decision of the Commission, Division 1, acting as an Appellate Division, served April 26, 1978, affirmed, the decision of the Administrative Law Judge, which is administratively final, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Oregon Short Line R. Co.—Abandonment—Goshen*, 354 ICC 76 (1977), the present and future public convenience and necessity permit the abandonment of operation by the Atchison, Topeka and Santa Fe Railway Co. of that portion of its branch line of railroad extending from railroad milepost 84+4,500' near Cushing to railroad milepost 123+2,000' near Shawnee, OK, a distance of 38.5 miles, in Payne, Lincoln and Pottawatomie Counties, OK, including stations at Kendrick, Davenport and Meeker, OK. A certificate of abandonment will be issued to the Atchison, Topeka and Santa Fe Railway Co. based on the above-described finding of abandonment, June 22, 1978, unless on or before June 22, 1978, the Commission further finds that:

- (1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and
- (2) It is likely that such proffered assistance would:

- (a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or
- (b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line, and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691, as amended by publication of May 10, 1978 at 43 FR 20072. All interested persons are advised to follow the

instructions contained therein as well as the instructions contained in the above-referenced decision.

H. G. HOMME, Jr.,
Acting Secretary.

[Docket No. AB-12 (Sub-No. 54)]

SOUTHERN PACIFIC TRANSPORTATION CO.

Abandonment Between Springfield and Brownsville in Lane and Linn Counties, Ore.; Notice of Findings

Notice is hereby given pursuant to section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by a decision entered on April 6, 1978, a finding, which is administratively final, was made by the Commission, Review Board Number 5, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in Oregon Short Lines—Abandonment—Goshen, 354 ICC 76 (1977), the present and future public convenience and necessity permit abandonment by the Southern Pacific Transportation Co. of the portion of its line of railroad from milepost 644.889 near Springfield in a northerly direction to milepost 655.3 near Wilkins in Lane County, OR, provided that (1) SP shall not sell, lease, exchange, or otherwise dispose of the right-of-way underlying the track for a period of 120 days following the issuance of the certificate, (2) that a subsequent purchaser of the property shall submit plans for future use of the property including bridge structures to the Commission and the Historic Preservation Council, and (3) in the event the bridge crossing the McKenzie River near Coburg, is eventually demolished, the subsequent purchaser will, prior to demolition, insure that appropriate measures are taken to adequately record the structure according to the standards prescribed by the Historic American Engineering Record. A certificate of abandonment will be issued to the Southern Pacific Transportation Co. based on the above-described finding of abandonment, June 22, 1978, unless on or before June 22, 1978, the Commission further finds that:

- (1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and
- (2) It is likely that such proffered assistance would:
 - (a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or
 - (b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such a person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691, as amended by publication of May 10, 1978 at 43 FR 20072. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced decision.

[Docket No. AB-7 (Sub-No. 53F)]

STANLEY E. G. HILLMAN, TRUSTEE OF THE PROPERTY OF CHICAGO, MILWAUKEE, ST. PAUL & PACIFIC RAILROAD CO., DEBTOR

Abandonment Near Bedford and Seymour, in Lawrence and Jackson Counties, Ind.; Notice of Findings

Notice is hereby given pursuant to Section 1a of the Interstate Commerce Act (49 U.S.C. 1a) that by an Certificate and Decision dated May 9, 1978, a finding, which is administratively final, was made by the Commission, Review Board Number 5, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in Oregon Short Line R. Co.—Abandonment—Goshen, 354 ICC 76 (1977) and for public use as set forth in said decision, the present and future public convenience and necessity permit the abandonment Stanley E. G. Hillman, Trustee of the Property of the Chicago, Milwaukee, St. Paul & Pacific Railroad Co. of a line of railroad known as the Bedford to Seymour Branch extending from railroad milepost 262.5 near Bedford in an easterly direction to railroad milepost 300.0 near Seymour, a distance of 37.5 miles, in Lawrence and Jackson Counties, IN. A cer-

tificate of public convenience and necessity permitting abandonment was issued to Stanley E. G. Hillman, Trustee of the Property of the Chicago, Milwaukee, St. Paul & Pacific Railroad Co. Since no investigation was instituted, the requirement of § 1121.38(a) of the Regulations that publication of notice of abandonment decisions in the FEDERAL REGISTER be made only after such a decision becomes administratively final was waived.

Upon receipt by the carrier of an actual offer of financial assistance, the carrier shall make available to the offeror the records, accounts, appraisals, working papers, and other documents used in preparing Exhibit I (Section 1121.45 of the Regulations). Such documents shall be made available during regular business hours at a time and place mutually agreeable to the parties.

The offer must be filed and served no later than June 7, 1978. The offer, as filed, shall contain information required pursuant to § 1121.38(b) (2) and (3) of the Regulations. If no such offer is received, the certificate of public convenience and necessity authorizing abandonment shall become effective July 7, 1978.

H. G. HOMME, Jr.,
Acting Secretary.

[Docket No. AB-19 (Sub-No. 20)]

WASHINGTON COUNTY RAILROAD CO. AND THE BALTIMORE & OHIO RAILROAD CO.

Abandonment Portion Hagerstown Branch Between Weverton and Hagerstown, Also Portion of the Antietam Branch Near Security, all in Washington County, Md.; Notice of Findings

Notice is hereby given pursuant to section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by a decision entered on October 26, 1977, and the decision of the Commission, Division 2, acting as an Appellate Division, served April 27, 1978, affirmed the decision of the Administrative Law Judge, which is administratively final, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in Oregon Short Line R. Co.—Abandonment—Goshen, 354 ICC 76 (1977), the present and future public convenience and necessity permit abandonment by the Washington County Railroad Company of the portion of its Hagerstown Branch between Valuation Station 0+00 at Weverton, Md., and Valuation Station 980+00 at or near Roxbury, Md., and the portion of its Security Branch between Valuation Stations 65+71 and 130+00 at or near Se-

curity, Md., and that the present and future public convenience and necessity permit the abandonment by The Baltimore & Ohio Railroad Co. of operations over said lines of railroad, provided that (1) Washington County Railroad Co. and The Baltimore & Ohio Railroad Co. shall not sell, lease, exchange, or otherwise dispose of the right-of-way underlying the track, all bridges, and all culverts on the line for a period of 120 days following issuance of the certificate unless said property has first been offered upon reasonable terms, to responsible persons interested in acquiring the property for public use and (2) in the event that a public or private organization interested in acquisition of the right-of-way does not come forward within the above-specified 120-day period, then applicant shall include in any contract for sale of the abandonment property the following: (a) that the subsequent purchaser of said property submit plans for future use of the property, including bridge structures, to the Commission and the Historic Preservation Council for review; and (b) that in the event the bridge is eventually demolished, the subsequent purchaser will, prior to demolition, ensure that appropriate measures are taken to adequately record the structure according to standards prescribed by the Historic American Engineering Record. A certificate of abandonment will be issued to the Washington County Railroad Co. and The Baltimore & Ohio Railroad Co. based on the above-described finding of abandonment, June 22, 1978, unless on or before June 22, 1978, the Commission further finds that:

- (1) A financially responsible person (including a government entity) has offered financial assistance (in the form of rail service continuation payment) to enable the rail service involved to be continued; and
 - (2) It is likely that such proffered assistance would:
 - (a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or
 - (b) Cover the acquisition cost of all or any portion of such line of railroad.
- If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the

Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691, as amended by publication of May 10, 1978 at 43 FR 20072. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced decision.

[Docket No. AB-126]

WELLSVILLE, ADDISON & GALETON RAILROAD CORP.

Abandonment of Entire Line in Potter and Tioga Counties, Pa.; Notice of Findings

Notice is hereby given, pursuant to section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)), that by a decision entered on September 30, 1977, and the decision of the Commission, Division 2, served April 5, 1978, as amplified, adopted the decision of the Commission, Review Board No. 5, which is administratively final, stating that, subject to the conditions for the protection railway employees prescribed by the Commission in Oregon Short Line R. Co.—Abandonment—Goshen, 354 ICC 76 (1977), the present and future public convenience and necessity permit the abandonment by the Wellsville, Addison & Galeton Railroad Corp. of its entire line of railroad extending from Galeton, in Potter County to Elkland, in Tioga County, a distance of approximately 31.5 miles, and from Gaines Junction to Ansonia, in Tioga County, a distance of approximately 8.5 miles, together with approximately 6,500 feet of siding, all in the State of Pennsylvania. A certificate of abandonment will be issued to the Wellsville, Addison & Galeton Railroad Corp., based on the above-described finding of abandonment, June 22, 1978, unless on or before June 22, 1978, the Commission further finds that:

- (1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and
- (2) It is likely that such proffered assistance would:
 - (a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691, as amended by publication of May 10, 1978 at 43 FR 20072. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced decision.

H. G. HOMME, Jr.,
Acting Secretary.

[Ex Parte No. 347]

WESTERN COAL INVESTIGATION

Guidelines for Railroad Rate Structure

In accordance with the Commission finding in Ex Parte No. 270 (Sub-No. 4), *Investigation of Railroad Freight Rate Structure—Coal*, 345 ICC 493, 533 (1976), regarding the desirability of developing guidelines of reasonableness in connection with present and prospective western coal rates by rail, an investigation into appropriate rate guidelines for western coal movements originating in the Rocky Mountain—Upper Missouri River region will be instituted. Oral hearings within this region may be held if further development of the record is warranted.

The principal focus of this proceeding will be the determination of appropriate levels of minimum and/or maximum rates for large-volume movements of bituminous and lignite coal from origins in coal producing districts 16 through 22, with the exception of points in the State of California, to all destinations in the continental United

¹Coal producing districts number 16 through 22, excluding the State of California, include the States of Montana, North and South Dakota, Colorado, Wyoming, Utah, Arizona, and New Mexico.

States. It is contemplated that the guidelines determined in this proceeding will apply only in instances where it is found that a proponent carrier has market dominance. Statements of facts and arguments by interested parties should primarily be directed to the following issues:

(1) The appropriate basis upon which a zone of reasonableness should be defined, e.g. percentage of class rates, percentage of commodity rates, distance scales, ratios of rates to variable or fully-allocated costs, or some other basis or market condition pertinent to the emerging western coal market;

(2) The appropriate level at which to set a rate range for maximum and/or minimum rates;

(3) The proper weight to be given general guidelines in individual rate proceedings, and whether such guidelines should affect evidentiary burdens or decisions on whether or not to suspend rate increase proposals;

(4) The effect any western coal rate guidelines may have on the existing coal rate structure in the east;

(5) The application of guidelines to capital incentive rates filed under section 15(19) of the Interstate Commerce Act;

(6) Whether the Commission should incorporate into its guidelines the cost of prospective capital investments in determining the cost of service for western coal movements;

(7) The application of guidelines to any contract rates on large-volume coal movements, filed in accordance with the Commission's General Policy Statement on Railroad Contract Rates, issued May 11, 1978;

(8) The integration of guidelines with market dominance determinations and the standards enunciated in Ex Parte No. 338, Standards and Procedures for the Establishment of Adequate Railroad Revenue Levels, ICC _____ served February 3, 1978; and

(9) Any other pertinent issues which will not unduly broaden this proceeding.

The Commission intends to promulgate guidelines or standards after the completion of this investigation based on its findings and conclusions. Furthermore, the Commission contem-

plates that the matters under consideration in this proceeding may constitute a major Federal action significantly affecting the quality of the human environment. In this regard, an Environmental Impact Statement will be drafted as required by section 102(2)(c) of the National Environment Policy Act of 1969, 42 U.S.C. 4321 et seq. Any person desiring to express any views, arguments, or comments, regarding the environmental amenities involved in this proceeding is invited to participate by filing appropriate statements in accordance with the schedule set forth below; and such statements should comply with the Commission's regulations (49 CFR 1108 et seq.) regarding the filing of environmental pleadings.

It is ordered:

(1) Under the authority of the National Transportation Policy (49 U.S.C. preceding section 1) and part I of the Interstate Commerce Act, an investigation is instituted for the determination of appropriate levels of minimum and/or maximum rates for large-volume movements of bituminous and lignite coal from origins in coal producing districts 18 through 22, with the exception of points in the State of California, by railroads subject to the Interstate Commerce Act, and that said railroads to the extent they participate in the transportation of such coal are hereby made respondents.

(2) Any person interested in this proceeding shall file with the Interstate Commerce Commission, Office of Proceedings, Room 5354, Washington, D.C. 20423, on or before May 30, 1978, the original and two copies of a statement of his interest to participate. Inasmuch as the Commission desires wherever possible (a) to conserve time, (b) to avoid unnecessary expense to the public, and (c) to serve the pleadings of parties in this proceeding only upon those who intend to take an active part in the proceeding, the statement of intention to participate shall include a detailed specification of the extent of such person's interest, including (1) whether such interest extends merely to receiving Commission releases in this proceeding, (2) whether the party genuinely wishes to participate by receiving or filing evidence, (3) if the party desires to participate

as described in (2), whether he will consolidate or is capable of consolidating his interest with those of other interested parties by filing joint statements in order to limit the number of copies of pleadings that need be served, such consolidation of interests being strongly urged by the Commission, and (4) any other pertinent information which will aid in limiting the service list to be used in this proceeding; that the Commission shall then prepare and make available to all such persons a list containing the names and addresses of all parties desiring to participate in this proceeding for the purposes specified in (2) above; and that persons not timely filing a statement of intention by May 30, 1978, will not be permitted to participate except upon a showing of good cause for such late participation and leave granted.

(3) This proceeding shall be handled under modified procedure as provided by the Commission's Rules of Practice, except that 20 copies of all statements submitted shall be filed with the Commission, and the filing and service of pleadings to be as follows:

(a) An opening statement of facts and argument may be submitted by any party to the proceeding on or before July 20, 1978.

(b) A statement or statements limited to rebuttal to any opening statement filed in (a) above may be submitted by any party to the proceeding on or before August 22, 1978. The opening statement to which the rebuttal statement is directed must be specifically identified.

(4) The evidence submitted in the statements filed (opening and rebuttal) must be served on all parties on the service list.

(5) Notice of this order shall be given to the general public by depositing a copy in the Commission's Office of the Secretary and by filing a copy with the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER.

Decided May 11, 1978.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

(M-130, Amdt. 1)

CIVIL AERONAUTICS BOARD

Notice of addition and deletion of items to the May 19, 1978, meeting.

TIME AND DATE: 10 a.m., May 19, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: Delete: 16. New low fares proposed by Northwest (BPDA). Addition: 11a. Air France: Application for blind sector traffic rights under Part 216 of the Board's Economic Regulations. (Memo No. 7970, BPDA, BIA.)

STATUS: 1-27—Open, 28—Closed.

PERSON TO CONTACT: Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: Item 16 was inadvertently added to the May 19, 1978, meeting agenda twice. (See Item 12.) Item 11a. requires action because the authority at issue is an extension of existing authority which expires May 18. If the Board does not act promptly, there could be retaliatory action by the French Government against U.S. carriers. Accordingly, the following Members have voted that agency business requires the deletion of Item 6 and the addition of Item 18a and that no earlier announcement of these changes was possible:

Chairman, Alfred E. Kahn
Vice Chairman, G. Joseph Minetti
Member, Lee R. West
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey

[S-1078-78 Filed 5-19-78; 8:45 am]

SUNSHINE ACT MEETINGS

NATIONAL RAILROAD PASSENGER CORPORATION.

BOARD OF DIRECTORS MEETING

In accordance with rule 4a. of Appendix A of the By-laws of the National Railroad Passenger Corporation, notice is given that the Board of Directors will meet on May 31, 1978.

A. The meeting will be held on Wednesday, May 31, 1978, in the Columbia A Room of the Hyatt Regency Hotel, 400 New Jersey Avenue NW., Washington, D.C. beginning at 10:15 a.m.

B. The meeting will be open to the public at 11:15 a.m. beginning with agenda item no. 3, as described below.

C. The agenda items to be discussed at the meeting follow:

AGENDA

NATIONAL RAILROAD PASSENGER CORPORATION MEETING OF THE BOARD OF DIRECTORS—MAY 31, 1978

10:15—Closed session

1. Internal personnel matters.
2. Litigation matters.

Open Session

3. Approval of minutes of regular meeting of April 25, 1978.

4. Route restructuring.

5. Commitment approval requests:

78-46: Construction of 12.6 miles of track, post road Rensselaer (release of Board hold).

78-95: Rehabilitation and modernization—on board service support facility—Penn Station, N.Y.

78-96: Roof rehabilitation—New Orleans Union Passenger Terminal.

78-101: Adjustment of commitment approval request authorized amounts—More than \$100,000 (facilities and other).

78-107: Adjustment of commitment approval request authorized amounts—More than \$100,000 (major equipment).

78-106: Emergency track improvements—Northeast Corridor.

6. Board Committee reports:

A. Organization and compensation.

B. Equipment: (1) Young President's organization study; (2) Preseasoning air-conditioning report; (3) Report on disc brakes; (4) Superliner delivery schedule; (5) Head-end power conversion; and (6) Metroliner 1½.

C. Northeast Corridor improvement project: (1) Status of 1978 work program; (2) Status of concrete tie program; (3) Status of Southwest Corridor Project; (4) FRA slow orders in Northeast Corridor; (5) FRA legal department problem; and (6) Status of labor situation.

D. Planning and finance.

7. President's reports:

A. Operations: (1) National operations; (2) Operations support; (3) Northeast Corridor Operations; and (4) Corporate functions.

B. Marketing.

C. Government affairs.

NUCLEAR REGULATORY COMMISSION.

TIME AND DATE: Thursday, May 25, 1978.

PLACE: Commissioners' Conference Room, 1717 H Street NW., Washington, D.C.

STATUS: Open and closed.

MATTERS TO BE CONSIDERED:

9:30 A.M.

1. Discussion of OIA/OGC inquiry in testimony of the executive director for operations (continued from May 11, 1978). (Approximately 1½ hours—closed—Exemption 1.)

2. Discussion of personnel matter (postponed from May 18, 1978). (Approximately 1 hour—Closed—Exemption 6.)

2:00 P.M.

1. Briefing on reactor licensing schedules. (Approximately 1 hour—Public meeting.)

2. Briefing on neutron radiation exposures. (Approximately 30 minutes—Public meeting.)

3. Affirmation items. (Approximately 10 minutes—Public meeting.) a. FOIA appeal by S. Klein (tentative).

CONTACT PERSON FOR MORE INFORMATION:

Walter Magee, 202-634-1410.

WALTER MAGEE,

Office of the Secretary.

MAY 18, 1978.

CIVIL SERVICE COMMISSION

IMPROVING COMMISSION REGULATIONS

Draft Report on Implementation of Executive Order 12044

AGENCY: United States Civil Service Commission.

ACTION: Request for public comment.

SUMMARY: The Civil Service Commission asks for public comment on this draft report on implementation of Executive Order 12044, Improving Government Regulations (43 FR 12661, March 24, 1978). This report outlines:

- (1) A description of the process for developing regulations;
- (2) The changes made to comply with the order;
- (3) Proposed criteria for defining significant regulations;
- (4) Reasons for not establishing criteria for determining which regulations require regulatory analyses;
- (5) Proposed criteria for selecting existing regulations for review.

DATE: Comments must be received on or before July 24, 1978.

ADDRESS: Interested persons and Federal agencies are encouraged to submit written comments or views concerning any aspect of this draft report to: Director, Bureau of Policies and Standards, U.S. Civil Service Commission, 1900 E Street NW., Washington, D.C. 20415.

FOR FURTHER INFORMATION CONTACT:

Nathaniel L. Brown, Civil Service Commission, Bureau of Policies and Standards, 1900 E Street NW., Washington, D.C. 20415, 202-632-5623.

REGULATORY PROCESS

The Civil Service Commission's regulatory process is described in the appendix to this report which is a proposed chapter in the Commission's Administrative Manual. The Commission has made the following changes in its process to comply with the Executive order:

- (1) Developed a procedure to provide an opportunity for early participation by interested parties;
- (2) Developed proposed criteria for identifying significant regulations;
- (3) Established a requirement that proposed significant regulations are to be published in the FEDERAL REGISTER for public comment in addition to its current practice of obtaining comments from Federal agencies, labor organizations, and other interested parties directly;
- (4) Developed a procedure for publishing a semiannual agenda of regulations in the FEDERAL REGISTER; and

(5) Developed proposed criteria for selecting existing regulations for review.

All of these changes are described in the appendix.

REGULATORY ANALYSIS

Section 3(a) of the Executive order requires that each agency establish criteria for determining which regulations require regulatory analysis. The Commission is the central personnel agency of the executive branch of the Government. The Commission, as directed or authorized by statute or by order of the President, serves as the personnel management staff agency of the President. In this capacity, the Commission develops and issues regulations for personnel management operations in executive agencies. The Commission believes that it would be unlikely that a statute, Executive order, or civil service rule would require the Commission to develop and issue regulations that would have the effect on the general economy that would make a regulatory analysis appropriate. However, the Commission may, at its discretion, prepare a regulatory analysis on any proposed regulation. For these reasons it is determined that section 3 of the Executive order is not applicable to the Commission's regulations.

REVIEW OF EXISTING REGULATIONS

The Commission has established criteria for review of existing regulations. Those criteria are described in section 4 of the appendix. Because the proposed Civil Service Reform Act of 1978 is presently under consideration in the Congress, the Commission is not publishing a list of existing regulations for initial review at this time. When congressional action is completed, it may be necessary for the Commission to review and revise all of its regulations to comply with the provisions of the statute. The Commission therefore has decided that it is neither desirable nor efficient to undertake a separate review of regulations at this time.

The Commission invites interested persons to make suggestions on which regulations should be revised and on which regulations should be revised first. Suggestions will be considered when the review of existing regulations is begun. The Commission's regulations appear in Title 5 of the Code of Federal Regulations.

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant
to the Commissioners.

APPENDIX

PROCEDURES FOR DEVELOPING, SIMPLIFYING AND REVIEWING REGULATIONS

1. Purpose. The purposes of this chapter are to establish policy and ob-

jectives for simplifying and improving the quality of regulations; prescribe procedures for issuing new regulations; and for reviewing existing regulations; and to assign responsibility for ensuring that the objectives of Executive Order 12044 are achieved.

2. Policy. It is the policy of the Commission that regulations shall be as clear and simple as possible and shall be developed through a process which ensures that:

- a. The need for and purposes of the regulations are clearly established;
- b. The regulations are clear, precise, and understandable;
- c. The regulations have been coordinated with all offices which have a program interest in them;
- d. An opportunity exists for early participation and comment by Federal agencies and other interested parties;
- d. An opportunity exists for early participation and comment by Federal agencies and other interested parties;
- e. Relevant issues are considered and analyzed;
- f. Compliance costs, paperwork and other burdens on those who may be affected are minimized; and
- g. comments are considered and adequate response is prepared.

3. Responsibilities of the Initiating Offices.

a. "Initiating office" means each Commission office or organization which has responsibility for developing regulations for issuance by the Commission.

b. The head of each initiating office has primary responsibility for:

- (1) Preparing a brief summary, early in the regulatory process, for the Commission on the issues and alternatives involved in the matter requiring regulation;
- (2) Developing proposed regulations in accordance with the policy stated in this chapter;
- (3) Ensuring that the public has an early and meaningful opportunity to participate in the development of regulations through a variety of ways;
- (4) Ensuring that the public is given at least 60 days to comment on significant regulations unless circumstances require a shorter review period;
- (5) Providing a brief statement of the reasons for a shorter time period when it is not possible to give the public at least 60 days to comment on significant regulations;
- (6) Establishing and carrying out a systematic procedure for reviewing and revoking or revising existing regulations; and
- (7) Informing the Commission on proposed or final regulations of the:
 - (a) Reason and legal authority for the regulation;
 - (b) Objective(s) of the regulation;
 - (c) Relevant issues involved and the alternatives explored for achieving the objectives of the regulation;

(d) Probable reporting requirements; and
(e) Opportunities for interested parties to participate in the regulatory process.

4. *Reviewing Existing Regulations.*
a. Each initiating office shall establish procedures for periodically reviewing all their existing regulations and revoking or revising those regulations which it determines are not achieving their intended purpose.

b. Identifying existing regulations for review and possible revocation or revision and in determining the order in which they are to be reviewed, each initiating office shall consider:

(1) The nature and extent of complaints or suggestions about operations under the regulations;

(2) The continued need for the regulation;

(3) The need for eliminating conflicts and inconsistencies in its own regulations or those of other initiating offices;

(4) The length of time since the regulations have been evaluated or the degree to which the factors resulting in a need for regulation have changed;

(5) The burdens imposed on those directly or indirectly affected by the regulations; and

(6) The need to simplify or clarify the language of the regulations.

5. *Significant Regulations.* Each initiating office shall use the following criteria in identifying which regulations are significant regulations.

a. A significant regulation is a regulation in which:

(1) A statute, Executive order or civil service rule to be implemented provides substantial discretion to the Commission over the practices, procedures or standards for achieving what is required;

(2) The coverage of State or local governments or individuals is on a national basis; or

(3) There is a substantial or recurring reporting requirement.

b. Editorial changes to significant regulations such as a change in an office address, references cited, or changes made to simplify or clarify the language are not themselves significant regulations. However, an amendment which changes a practice, procedure, or standard of significant regulations may itself be a significant regulation.

c. When a regulation does not meet the criteria for a significant regulation, the initiating office shall include a statement to that effect at the time the regulations are proposed.

6. *Semiannual Agenda of Significant Regulations.*

a. Each initiating office shall submit to the Issuance System Manager an agenda of significant regulations under development or review by May 1 and November 1 of each year.

b. The agenda shall describe the regulations being considered, the reason and legal basis for the action being taken, and the status of regulations previously listed on the agenda.

c. Each item on the agenda shall include the name and telephone number of a knowledgeable official.

d. The agenda also shall include existing regulations scheduled for review.

e. The Issuance System Manager shall prepare the regulatory agenda and submit it to the Commission for consideration and approval.

f. The Executive Assistant to the

Commissioners shall publish the regulatory agenda in the **FEDERAL REGISTER** by June 1 and December 1 of each year.

7. *Process for Developing Significant Regulations.* The following is a brief description of the process for developing and issuing significant regulations. The items listed are the minimum steps necessary for compliance with Executive Order 12044.

a. Prior to developing draft regulations the initiating office prepares a brief summary early in the regulatory process to the Commission on the issues and alternatives involved in the matter requiring regulation.

b. The initiating office discusses the problems, statute, civil service rule, or Executive order with appropriate IAG Committees, labor organizations, or other interested parties for suggestions and recommendations.

c. The initiating office prepares draft regulations and circulates them among Commission offices and appropriate IAG Committees who have a program interest for comments and suggestions.

d. The initiating office forwards the draft regulations to the Commission for consideration and approval to publish in the **FEDERAL REGISTER** for public comment and additional consultation with Federal agencies, State and local governments as appropriate, labor organizations, or other interested parties.

e. The initiating office forwards the final version of the regulations with its response to the major issues raised in the public comments to the Commission for approval and publication in the **FEDERAL REGISTER** as final regulations.

ENVIRONMENTAL PROTECTION AGENCY

NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

Water Programs

for public review

[6560-01]

Title 40—Protection of Environment

(FRL 887-2)

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER D—WATER PROGRAMS

PART 124—STATE PROGRAM ELEMENTS NECESSARY FOR PARTICIPATION IN THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

PART 125—NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This rule revises parts 124 and 125 of EPA regulations. The purpose of this revision is to: conform the regulations to the requirements of a consent decree approved by the U.S. District Court; and to clarify the procedures and criteria which EPA will use in exercising its power to object to (veto) the issuance of State national pollutant discharge elimination system (NPDES) permits. Both of these proposed changes are necessary to assure national consistency in water pollution control efforts, particularly with respect to toxic and hazardous pollutants.

EFFECTIVE DATE: May 23, 1978.**FOR FURTHER INFORMATION CONTACT:**

Edward A. Kramer (EN-336), Office of Water Enforcement, Environmental Protection Agency, Washington, D.C. 20460, 202-755-0750.

SUPPLEMENTARY INFORMATION:**THE PROPOSED RULE**

On January 6, 1978, EPA published a proposed rule revising EPA's regulations governing State NPDES programs (43 FR 1256). The stated purpose of this revision was to conform the regulations to the requirements of the Settlement Agreement approved by the U.S. District Court for the District of Columbia and issued on June 8, 1976, in *Natural Resources Defense Council v. Train* (hereafter the Consent Decree) 8 ERC 2120 (D.D.C. 1976), and to clarify the procedures under which EPA will exercise its power to object to (veto) the issuance of State NPDES permits. A 30 day comment period was provided, and the Agency received over 60 written comments.

Minor editorial changes have been made in all sections of the final rule. In addition, the EPA response to significant comments is described below.

RULES AND REGULATIONS

THE EFFECT OF THE CLEAN WATER ACT OF 1977

A majority of commenters noted the failure of the proposed regulations to reflect the 1977 amendments (Pub. L. 95-217) to the Clean Water Act (hereafter CWA or the Act, also known as the Federal Water Pollution Control Act). While EPA was aware of the CWA amendments when the regulations were prepared for proposal, the exact content and status of the amendments were uncertain at that time. Nevertheless, a delay in proposal pending enactment was rejected for two reasons: because the amendments being considered by Congress were generally consistent with the proposed regulations, and because of the pressing need for regulations to assure national consistency in water pollution abatement and increased control of toxic pollutants.

The final regulations have been rewritten to reflect the language of the CWA as amended. Although some commenters suggested withdrawal and reproposal to enable EPA to explain the effect of the CWA on the regulations, we believe that this is unnecessary. The enactment of the CWA prior to the publication of the proposed regulations constitutes adequate public notice of its provisions, as evidenced by the large number of comments addressing the CWA.

Contrary to the position taken by some commenters, the amendments to the CWA have not rendered the proposed regulations unnecessary. Rather, the proposed regulations in general are consistent with the amendments in the CWA of 1977 to sections 307(a) and 402(d). New section 307(a) reflects the Consent Decree in authorizing promulgation of effluent limitations for toxic pollutants under sections 301(b)(2) (C) and (D) and 304(b)(2) and requiring EPA to list as toxic those pollutants covered by the Consent Decree (Table 1 of Committee Print No. 95-30, House Committee on Public Works and Transportation). Thus, the amendments indicate Congressional approval of the Consent Decree, not withdrawal of it. While the amendments do not alter the need for regulations to ensure continued progress in the control of toxic pollutants, § 124.46 has been revised to reflect the new authorities under section 307(a).

Similarly, despite the procedural amendments to sections 402(d) (2) and (4), there is still a need for regulations clarifying the method of EPA review of State issued permits. Section 402(d)(2) as amended requires EPA to make objections in writing, including a statement of the reasons for the objections and the effluent limitations and conditions EPA would incorporate if it were to issue the permit. New section 402(d)(4) allows the State to request

an EPA public hearing within 90 days of an objection. If the State fails to request a hearing or does not resubmit a revised permit within 30 days of the public hearing, EPA may issue a permit in accordance with the guidelines and requirements of the Act. These amendments are reflected in § 124.48 of the final regulations with three clarifications.

First, even where the Regional Administrator has agreed with the State under § 124.47(a) to a lesser period of review than the 90 days allotted by the Act, EPA is authorized to use some or all of the full 90-day period: (1) to make a detailed explanation of the basis for its objection, and (2) to provide the State with alternative effluent limitations and permit conditions which would be acceptable under the Act. While EPA must still notify the State of its general objection within the lesser period, the development and calculation of alternative limitations and conditions cannot realistically be limited to periods which may run as short as 30 days. Second, if the State submits a revised permit to EPA within the 90-day period following objection but does not request a public hearing, EPA will not exercise its authority to issue the permit. Finally, any permit issued by EPA under section 402(d)(4) would be subject to certification by the State under section 401.

STATE TRANSMISSION OF TENTATIVE DETERMINATIONS AND DRAFT PERMITS

Under proposed §§ 124.31 (c) and (d), States would have been required to transmit tentative determinations and draft permits to the Regional Administrator for review prior to public notice. The purposes underlying these regulations were to enable EPA and the State to work together in formulating permits and their supporting records; to resolve EPA-State differences as early in the permit process as possible; and, most importantly, to allow an opportunity for public participation through the State comment and hearing process on any unresolved differences which might constitute grounds for EPA objection to permit issuance.

The first and second purposes—EPA and the State "working together" and attempting to resolve differences—were criticized by many commenters because they believed the EPA role was too intrusive, was in some instances violative of EPA agreements with the State, and would only cause further delays in permit issuance. EPA did not intend to establish an expanded role in State permit issuance under the regulations. Instead, EPA's role was to be identical to its present role, and would chiefly involve assistance to the State in interpreting Federal guidelines and requirements. However, we did find the comments concerning

delay in permit issuance persuasive, particularly where State law establishes a limited time period from receipt of a permit application to issuance of a public notice.

As stated earlier, §§ 124.31 (c) and (d) and 124.48(c)(4) were intended to provide an opportunity for public comment on the grounds for a potential EPA Objection to a State permit. Rather than establishing an additional EPA comment opportunity and further delay following State transmittal of a proposed permit to EPA, the regulations attempted to provide that opportunity in the course of the State permit process through early involvement by the Regional Administrator. (This purpose was not understood by some commenters, who suggested that EPA be required to provide a separate opportunity for comment under § 124.48(c)(3).) To ensure that this opportunity for public comment was adequate, the regulations provided that the Regional Administrator could not, as a rule, consider any data or information not before the Director in connection with the proposed permit.

However, the hearing opportunity now provided under section 402(d)(4) of the CWA and § 124.48(d) of the regulations allows sufficient public participation in cases where the Regional Administrator objects to the issuance of a permit, i.e., through the ability of the State or any interested person to request a public hearing following an EPA objection and through the ability of any interested person to participate in the EPA issuance of a permit to which it has objected. In addition, § 124.48(c)(3) of the regulations allows the Regional Administrator, in his or her discretion, to solicit public comment from interested persons prior to objection.

Therefore, in consideration of comments concerning delays in permit issuance, in the interest of not disrupting existing EPA-State arrangements concerning review of permits, and in view of the CWA, §§ 124.31 (c) and (d) and 124.48(c)(4) have been withdrawn from the final regulations. The withdrawal of these sections does not indicate EPA disapproval of any existing relationships for early transmittal of draft permits that Regional Administrators and States may have already established.

Although these final regulations incorporate the State hearing opportunity following EPA objection under new section 402(d)(4), the Regional Administrator's discretion to provide for additional public comments prior to objection under § 124.48(c)(3) has been retained as proposed. We believe that the discretion afforded under § 124.48(c)(3) is necessary in view of the time constraints on EPA action in reviewing proposed State permits. EPA is limited to a 90 day statutory

RULES AND REGULATIONS

period and in many cases has agreed to a shorter period to minimize delays in permit issuance. However, in response to comments suggesting that EPA provide a broader opportunity for public participation new § 124.48(d) allows any interested person to request an EPA public hearing within the 90 day period following an objection. Such a hearing is mandatory if requested by the State under section 402(d)(4) of the CWA. A public hearing will then be held wherever warranted by significant public interest.

THE CONSENT DECREE

Section 124.46 of the proposed regulations implemented the requirements of the Consent Decree in *NRDC v. Train*. The Consent Decree established a new program for, among other actions, the review and promulgation by EPA of effluent limitations guidelines, new source performance standards, and pretreatment standards in 21 major categories of industries, focusing on 65 classes of pollutants of particular concern. Paragraph 10(a) of the Consent Decree contains the specific requirement that all permits issued after January 1, 1978, be revised or modified to assure the prompt application of these guidelines and standards to all dischargers as they are issued or approved.

Some commenters suggested that the provisions of § 124.46 were improper, particularly in view of the CWA of 1977. We disagree. As noted above, it is EPA's position that the amendments do not supersede the "modification or revocation" requirement of the Consent Decree, but instead indicate tacit approval of it. Moreover, the provisions of § 124.46 do not otherwise exceed EPA's legal authority. EPA has broad authority in section 402(a)(1) of the Act to include in permits any conditions necessary to carry out the provisions of the Act; these provisions would include new requirements for best available technology economically achievable for toxic pollutants. Both the Act (section 402(b)(1)(C)) and EPA regulations (40 CFR 124.45(b)) also indicate that permits may be modified or revoked for cause. Section 402(k) of the Act, relating to the effect of compliance with a permit, in no way alters this explicit authority, a view recently affirmed by the U.S. Court of Appeals for the Seventh Circuit in *Inland Steel v. EPA*, — F.2d —, No. 77-1648 (7th Cir. March 3, 1978).

In *Inland Steel* also, the Court emphasized EPA's broad discretion to choose the means for carrying out responsibilities under section 307(a) of the Act, extending to the promulgation of necessary regulations under section 501(a). It is EPA's position that "cause" exists for permit modification and revocation to reflect new effluent limits on toxic pollutants

when they are promulgated, particularly in view of the 1984 statutory deadline for their achievement and the potential for harm to the public health and the environment from discharges of these pollutants. Thus, we disagree with those commenters who felt that control of toxic pollutants does not warrant a change from EPA's standard policy of permit finality.

A few commenters indicated confusion as to how the reopener clause would operate. As a result, some further explanation is warranted. First, upon permit modification or reissuance, the permittee will be subject to all requirements under the Clean Water Act then applicable, including effluent limitations for all pollutants covered in the applicable guideline, best conventional pollutant control technology limitations and best management practices for ancillary industrial activities. The new or modified permit would not be restricted to additional coverage of toxic pollutants only. § 124.46 has been revised to clarify this point.

Second, new or modified permits will not require immediate compliance with new effluent limitations. Rather, these permits will contain a schedule of compliance for achievement of effluent limitations consistent with statutory deadlines.

Third, permittees affected by the reopener clause will be afforded all procedural rights which are generally available for permit modification and reissuance, including the right to request hearings under the regulations. Absent unusual circumstances, permit revocation should not result in a lapse of permit coverage and a resulting "no discharge" requirement pending reissuance, because revocation would be simultaneous with issuance of the new permit.

Fourth, the regulation has been revised to clarify that the modification/revocation requirement is applicable: (1) where new toxic pollutants are listed under section 301(b)(2)(D); (2) where EPA reviews and "approves" existing applicable effluent guidelines for the control of toxic pollutants under section 301(b)(2)(C), as well as when EPA issues new effluent guidelines under that section; and (3) where EPA is the permit issuing authority.

Finally, new regulations are being proposed today under a separate heading to explain the use of short term vs. long term permits containing the reopener clause.

GROUND FOR OBJECTIONS TO PERMITS

Under § 124.48(b) of the proposed regulations, EPA sought to clarify the grounds on which a permit may be "outside the guidelines and requirements" of the Act under section 402(d)(2). One or more of these grounds would serve as the basis for

the Regional Administrator's objection to a proposed permit, and would be contained and perhaps further explained in the written objection required under the CWA and § 124.48(a) of the regulations.

While some commenters supported some or all of the listed grounds for objection, others viewed them as unauthorized expansions of EPA's "veto" role. Specifically, a number of commenters felt that EPA was improperly intruding into State factual determinations, i.e., matters not falling within the "guidelines and requirements" review of section 402(d)(2). Many cited the recent case of *Ford Motor Co. v. EPA*, 567 F.2d 661, 11 ERC 1018 (6th Cir. 1977) in support of their contentions that the regulations were excessively broad. Under *Ford Motor Co.*, an EPA objection was found to be outside the scope of section 402(d)(2) when based solely upon failure of the State to conform to EPA policy guidance issued after objection and absent a specific requirement of the Act or regulations.

No expansion of existing EPA review authority is contemplated by the regulations. We believe that the listing of grounds under section 124.48(b) falls well within the scope of section 402(d)(2) of the Act and is consistent with the *Ford Motor Co.* case. While many of the listed grounds require some consideration of State factual determinations, these factual determinations are reviewed by EPA only to the extent of ensuring compliance with the "guidelines and requirements" of the Act. This is a purely "legal" review; the Regional Administrator must evaluate the factual record in order to determine whether the terms and conditions of the proposed permit comply with the requirements of the Act and regulations promulgated under the Act.

EPA recognizes that reasonable persons may differ as to what the Act and regulations require. In close cases, EPA should defer to the judgment of the State, e.g., where there is a minor numerical difference between the State and EPA evaluation of what constitutes the requisite technology-based effluent limitation in a "pre-guidelines" permit. Nevertheless, because of its statutory mandate, EPA must ensure that State permits impose the minimum permit terms and conditions required by the Act. (The States of course retain full authority to impose requirements more stringent than those contained in the Act.) The exercise of EPA judgment in subparagraphs (2), (4), (5), and (6) of § 124.48(b) is implicit in EPA's review of permits for consistency with the law and is essential to protect against clear abuses by the States in applying the requirements of the Act and regulations. Such abuses have not been fre-

quent; in fact, only 88 out of 23,000 permits issued by States have been objected to by EPA. These regulations are not expected to increase the numbers or percentage of permits to which EPA objects, but to provide a framework for regularity in the exercise of existing authority. The following examples based on actual EPA experience illustrate the importance of some EPA judgment in exercising its review authority and assessing the adequacy of State permits:

1. A State might propose to issue a permit disregarding final statutory deadlines for achievement of required levels of treatment, "interpreting" the CWA to authorize such a permit despite clear language to the contrary.

2. A State might propose to issue a permit which postpones steps toward compliance with a final statutory deadline until such a late date that the required treatment technology could not realistically be expected to be installed by the discharger and operating in time.

3. A State might propose to issue a permit containing "pre-guidelines" determinations of technology-based effluent limitations which the State developed without adequate consideration of the factors listed in section 304(b) of the Act.

4. A State might propose to issue a permit which disregards an applicable effluent limitations guideline, by finding the guideline non-applicable despite clear evidence to the contrary.

EPA should be able to object to the issuance of State permits as being outside the guidelines and requirements of the Act in these and other situations. To allow unrestricted State discretion in these instances, as some commenters have recommended, would constitute dereliction of the responsibility established by Congress under section 402(d)(2). Thus, proposed § 124.48(b) has been retained in the final regulations.

Proposed § 124.48(b) (4) and (5) have been merged into new § 124.48(b) (4), however, to clarify that EPA's concerns relate to the application of the interpretation of the CWA and regulations and the application of the CWA and regulations to the facts.

RECOMMENCEMENT OF REVIEW PERIOD

Section 124.48(c)(2) of the proposed regulations authorized the recommencement of the 90 day review period under section 402(d)(2) of the Act where the State permit record is inadequate for EPA review. Some commenters objected to the delays that would be caused by this provision, while others felt that EPA was bound by the 90 day period regardless of the adequacy of the State record.

We have not changed the final regulations to reflect the latter comment, since an absolute time limit which dis-

regards the adequacy of the State record would effectively allow a State to avoid the Regional Administrator's objection to a proposed permit by submitting an incomplete record. However, in response to the former comment, § 124.48(c)(2) of the final regulations has been revised to require EPA notification to the State of an inadequate record within thirty days of receipt of the State submittal under § 124.47. This should minimize any delays attributable to EPA actions while ensuring sufficient time for the Regional Administrator's review after an adequate record has been submitted by the State.

APPLICATION OF EFFLUENT STANDARDS AND LIMITATIONS AND OTHER REQUIREMENTS

Section 124.42(a)(6) of the proposed regulations clarified that the determination of permit conditions under that subparagraph was not in the sole discretion of the Director. Some commenters objected, believing that the Director's discretion should be unreviewable by EPA. Although we have no lack of confidence in the capabilities of the States, we must disagree, for the reasons described under "Grounds for Objection to Issuance of Permits."

However, in response to comments, an error in § 124.42(a)(6) has been corrected, and that subparagraph has been revised in the final regulations to conform to section 402(a)(1) of the Act.

Because of their importance for permits being issued in the near future, EPA finds that good cause exists to make these regulations effective without the 30 day waiting period prescribed under 5 U.S.C. 553(d)(3). Accordingly, they will become effective May 23, 1978.

NOTE.—The Environmental Protection Agency has determined that this document does not constitute a major regulation requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and under OMB Circular A-107.

Dated: May 10, 1978.

DOUGLAS M. COSTLE,
Administrator.

1. Subpart E table of contents is revised to read as follows:

Subpart E—Terms and Conditions of NPDES Permits

Sec.

124.42 Application of effluent standards and limitations, water quality standards, and other requirements.

124.46 Requirements under Section 307(a)(2) of the Act.

124.47 Transmission to Regional Administrator of proposed NPDES permits.

124.48 Objection to proposed permits.

Sec.

124.49 Transmission to Regional Administrator of issued NPDES permits.
Appendix D—Point source categories.

Subpart E—Terms and Conditions of NPDES Permits

2. Section 124.42 is amended by revising paragraph (a)(6) to read as follows:

§ 124.42 Application of effluent standards and limitations, water quality standards and other requirements.

(a) * * *

(6) Prior to promulgation by the Administrator of applicable effluent standards and limitations under sections 301, 302, 306, 307, and 403, such conditions as are necessary to carry out the provisions of the Act.

3. Section 124.47 is renumbered as § 124.49 and § 124.46 is deleted and replaced by new §§ 124.46, 124.47 and 124.48 as follows:

§ 124.46 Requirements under Section 307(a)(2) of the Act.

(a) Any permit issued to a discharger within any industrial category listed in Appendix D of this Part shall apply, and assure compliance with, all applicable effluent standards and limitations promulgated under sections 301(b)(2) (C) and (D), 304(b)(2), and 307(a)(2) of the Act. Where applicable standards or limitations have not yet been issued, the Director shall include in the permit a condition stating that if an applicable effluent standard or limitation is issued or approved under sections 301(b)(2) (C) and (D), 304(b)(2), and 307(a)(2), and such effluent standard or limitation is more stringent than any effluent limitation in the permit, or controls a pollutant not limited in the permit, the permit shall be promptly modified or, alternatively, revoked and reissued in accordance with such effluent standard or limitation and any other requirements of the Act then applicable.

[Comment: The following language is an acceptable permit condition for the purposes of this section:

This permit shall be modified, or alternatively, revoked and reissued, to comply with any applicable effluent standard or limitation issued or approved under sections 301(b)(2) (C), and (D), 304(b)(2), and 307(a)(2) of the Clean Water Act, if the effluent standard or limitation so issued or approved:

(1) Contains different conditions or is otherwise more stringent than any effluent limitation in the permit; or

(2) Controls any pollutant not limited in the permit.

The permit as modified or reissued under this paragraph shall also contain any other requirements of the Act then applicable.]

(b) Where the Director follows the procedures set forth in paragraph (a)

of this section for an NPDES permit, and an applicable effluent standard or limitation under sections 301(b)(2) (C) and (D), 304(b)(2), and 307(a)(2) is issued or approved which is more stringent than any effluent limitation in the permit, or controls a pollutant not limited in the permit, the Director shall promptly modify or, alternatively, revoke and reissue the permit under § 124.72(a) of this Part in accordance with such effluent standard or limitation.

[Comment: The requirements of this section are intended to assure compliance with the 1984 statutory deadline for the achievement of best available technology economically achievable for pollutants now listed under section 307(a)(1) of the Act. Although this section does not require modification or revocation of permits where promulgated effluent limitations are not issued or do not cover section 307(a)(1) pollutants, such action nevertheless may be necessary under 402(b)(1) in order to assure compliance with their statutory deadlines (e.g., for the achievement of best conventional pollutant control technology and best available technology economically achievable for "non-conventional" pollutants). Where the Director proposes to issue a permit extending beyond a statutory deadline or not requiring the achievement of required effluent limitations by applicable statutory deadlines, the Regional Administrator will object to the issuance of the permit for its failure to adequately assure compliance with the Act.]

§ 124.47 Transmission to Regional Administrator of proposed NPDES permits.

(a) Any State or interstate agency participating in the NPDES shall transmit to the Regional Administrator copies of NPDES permits proposed to be issued by such agency in such manner as the Director and Regional Administrator shall agree upon. Any agreement between the State or interstate agency and the Regional Administrator shall be consistent with the requirements of this section.

(b) The Director shall transmit to the Regional Administrator all terms, conditions, requirements or documents that are a part of any proposed permit or that affect the authorization by the proposed permit of the discharge of pollutants.

(c) The Director shall transmit to the Regional Administrator a copy of any significant comments presented in writing pursuant to the public notice and a summary of any significant comments presented at any hearing, for any NPDES application if:

(1) The Regional Administrator requests this information; or

(2) The proposed permit contains requirements different from or less stringent than those contained in the

tentative determination and draft permit; or

(3) Significant comments adverse to the tentative determination and draft permit have been presented at the hearing or in writing pursuant to the public notice.

(d) Within 90 days following receipt of the proposed permit, or such lesser time as the Regional Administrator and the Director may agree upon, the Regional Administrator, pursuant to the right to object provided in section 402(d)(2) of the Act and § 124.48 of this subpart, may comment upon, object to, or make recommendations with respect to the proposed permit.

(e) The Regional Administrator may, by agreement with the State waive rights to receive, review, object to, or comment upon proposed NPDES permits for classes, types or sizes of discharges within any category of point sources, including the right to receive information under subsections (b) and (c) of this section.

(f) No waivers granted under sections 402(e) or 402(f) of the Act prior to the effective date of this subsection, nor any such waivers which may thereafter be granted, shall apply to any permit which is subject to § 124.46(a) of this Part, and which does not comply with that subsection.

[Comment: This paragraph, in effect, modifies any existing agreement between EPA and the State which is inconsistent with its provisions.]

§ 124.48 Objections to Proposed Permits.

(a) (1) Within the period of time provided under § 124.47(d) of this subpart, the Regional Administrator shall notify the Director of any objection to issuance of the proposed permit. This notification shall set forth in writing the general nature of the objection.

(2) Within 90 days following receipt of the proposed permit, the Regional Administrator shall also set forth in writing and transmit to the Director:

(i) A statement of the reasons for the objection (including the section of the Act or regulations that support the objection), and

(ii) The actions that must be taken by the Director in order to eliminate the objection (including the effluent limitations and conditions which the permit would include if it were issued by the Regional Administrator).

[Comment: This paragraph, in effect, modifies any existing agreement between EPA and the State which provides less than 90 days for review. This modification is necessary under the CWA amendments of 1977, which require EPA to provide detailed information concerning acceptable permit terms and conditions.]

(b) The Regional Administrator may object to the issuance of a proposed permit as being outside the guidelines

and requirements of the Act. This objection must be based upon one or more of the following grounds:

(1) The permit fails to apply, or to ensure compliance with, any applicable requirement of sections 301, 302, 304, 306, 307, 308 and 403, or of any applicable regulations promulgated under those sections;

[Comment: Under the provisions of this paragraph, a permit extending beyond a final statutory compliance date or not requiring the achievement of required effluent limitations by applicable statutory deadlines, shall be subject to objection by the Regional Administrator.]

(2) In the case of any proposed permit for which notification to the Administrator is required under section 402(b)(5) of the Act, the written recommendations of an affected State have not been accepted by the permitting State and the Regional Administrator finds the reasons for nonacceptance inadequate;

(3) The procedures followed in connection with formulations of the proposed permit failed in a material respect to comply with procedures required by the Act or regulations and guidelines thereunder or required by any agreement between the State or interstate agency and the Regional Administrator;

(4) Any finding made by the Director in the proposed permit misinterprets the Act or any guidelines or regulations under the Act, or misapplies them to the facts.

(5) Any provisions of the proposed permit relating to the maintenance of records, reporting, monitoring, sampling, or the provision of any other information by the permittee are inadequate, in the judgment of the Regional Administrator, to assure compliance with the effluent standards and limitations required by the Act, by the guidelines and regulations issued under the Act, or by the proposed permit;

(6) In the case of any proposed permit with respect to which applicable effluent standards and limitations under sections 301, 302, 306, 307, and 403 of the Act have not yet been promulgated by the Agency, the proposed permit, in the judgment of the Regional Administrator, fails to carry out the provisions of the Act; or any regulations issued under the Act, including the requirements of sections 301 through 304.

[Comment: The provisions of this paragraph also apply to best management practices under section 304(e) of the Act, which must be incorporated into permits as requirements under section 301, 302, 306, 307, or 403, as the case may be.]

(7) Issuance of the proposed permit would in any other respect be outside

the requirements of the Act, or regulations and guidelines issued under the Act.

(c) Prior to notifying the Director of an objection based upon any of the grounds set forth in paragraph (b) of this section, the Regional Administrator:

(1) Shall consider all data transmitted pursuant to §§ 124.33 and 124.47;

(2) Shall, if the information provided is inadequate to determine whether the proposed permit meets the guidelines and requirements of the Act, request the Director to transmit to the Regional Administrator the complete record of the permit proceedings before the State, or any portions of the record that the Regional Administrator determines are necessary for review. This request shall be made within thirty days of receipt of the State submittal under § 124.47. It shall constitute an interim objection to the issuance of the permit, and the full period of time specified in accordance with section 124.47(d) for the Regional Administrator's review shall start over when the Regional Administrator has received such record or portions;

(3) May, in his/her discretion and to the extent feasible within the period of time available under § 124.47(d), afford to every interested person an opportunity to comment on the basis for an objection;

(d) Within 90 days of receipt by the Director of an objection under this section, the State or interstate agency participating in the NPDES or any interested person may request that a public hearing be held by the Regional Administrator on the objection. Following a request, the Regional Administrator shall provide public notice and hold a public hearing in accordance with the procedures of 40 CFR 125.32 and 125.34 if warranted by significant public interest. A request by the State or the interstate agency shall be deemed to indicate significant public interest warranting a public hearing under this paragraph.

(e) A public hearing held under paragraph (d) shall be conducted by an EPA panel in an orderly and expeditious manner. Members of this panel shall include but not be limited to the Regional Administrator, the Assistant Administrator for Enforcement, the General Counsel, or their respective representatives. Any person may submit oral or written statements concerning the EPA objection, although reasonable limits may be set upon the time allowed for statements; and the submission of statements in writing may be required.

(f) At the conclusion of the public hearing the Regional Administrator shall:

(1) Reaffirm the original objection;

(2) Modify the terms of the objection;

or (3) Withdraw the objection, and shall notify the State of this decision.

(g) Where the Regional Administrator has objected to a proposed permit under this section, he/she may issue the permit in accordance with 40 CFR Parts 123 and 125 and any other guidelines and requirements of the Act in the following circumstances:

(1) If no public hearing is held under paragraph (d) and the State does not resubmit a permit revised to meet the Regional Administrator's objection within 90 days of receipt of the objection; or

(2) If a public hearing is held under paragraph (d) and the State does not resubmit a permit revised to meet the Regional Administrator's objection or modified objection within 30 days of the date of the Regional Administrator's notification under paragraph (f) of this section.

§ 124.49 [Redesignated from § 124.47]

4. Part 124 is amended by adding a new Appendix D as follows:

APPENDIX D—POINT SOURCE CATEGORIES

1. TIMBER PRODUCTS PROCESSING

SIC 2411—Logging camps and logging contractors (camps only).
SIC 2421—Saw mills and planing mills, general.
SIC 2426—Hardwood dimension and flooring mills.
SIC 2429—Special purpose sawmills, not elsewhere classified.
SIC 2431—Millwork.
SIC 2434—Wood kitchen cabinets.
SIC 2435—Hardwood veneer and plywood.
SIC 2436—Softwood veneer and plywood.
SIC 2439—Structural wood members, not elsewhere classified.
SIC 2491—Wood preserving.
SIC 2499—Wood products, not elsewhere classified (furniture mills).
SIC 2661—Building paper and building board mills (hardboard only).

2. STEAM ELECTRIC POWER PLANTS

SIC 4911—Electric service (limited to steam-electric power plants).

3. LEATHER TANNING AND FINISHING

SIC 31—Leather and leather products.

4. IRON AND STEEL MANUFACTURING

SIC 3312—Blast furnaces (including coke ovens steel works and rolling mills).
SIC 3313—Electrometallurgical products.
SIC 3315—Steel wire drawing and steel nails and spikes.
SIC 3316—Cold rolled steel sheet, strip and bars.
SIC 3317—Steel pipe and tubes.

5. PETROLEUM REFINING

SIC 2911—Petroleum refining (including (1) topping plant; (2) topping and cracking plants; (3) topping, cracking and petroleum plants; (4) integrated plants; and (5) integrated and petrochemical plants).

6. INORGANIC CHEMICALS MANUFACTURING

SIC 2812—Alkalies and chlorine.
SIC 2813—Industrial gasses.

SIC 2816—Inorganic pigments.

SIC 2819—Industrial inorganic chemicals, not elsewhere classified.

7. TEXTILE MILLS

SIC 22—Textile mill products.
SIC 23—Apparel and other finished products made from fabrics and similar materials.

8. ORGANIC CHEMICALS MANUFACTURING

SIC 2865—Cyclic (coal tar) crudes, and cyclic intermediates, dyes, and organic pigments (lakes and toners).
SIC 2869—Industrial organic chemicals, not elsewhere classified.

9. NONFERROUS METALS MANUFACTURING

SIC 2819—Industrial inorganic chemicals, not elsewhere classified (bauxite refining only).
SIC 3331—Primary smelting and refining of copper.
SIC 3332—Primary smelting and refining of zinc.
SIC 3333—Primary smelting and refining of lead.
SIC 3334—Primary production of aluminum.
SIC 3339—Primary smelting and refining of nonferrous metals, not elsewhere classified.
SIC 3341—Secondary smelting and refining of nonferrous metals.

10. PAVING AND ROOFING MATERIALS (TARS AND ASPHALT)

SIC 2951—Paving mixtures and blocks.
SIC 2952—Asphalt felts and coatings.
SIC 3996—Linoleum asphalted-felt-base, and other hard surface floor coverings, not elsewhere classified.

11. PAINT AND INK FORMULATION AND PRINTING

SIC 2711—Newspapers: Publishing, publishing and printing.
SIC 2721—Periodicals: Publishing, publishing and printing.
SIC 2731—Books: Publishing, publishing and printing.
SIC 2732—Book printing.
SIC 2741—Miscellaneous publishing.
SIC 2751—Commercial printing, letterpress and screen.
SIC 2752—Commercial printing, letterpress and lithographic.
SIC 2753—Engraving and plate printing.
SIC 2754—Commercial printing, gravure.
SIC 2761—Manifold business forms.
SIC 2771—Greeting card publishing.
SIC 2793—Photoengraving.
SIC 2794—Electrotyping and stereotyping.
SIC 2795—Lithographic platemaking and related services.
SIC 2851—Paints, varnishes, lacquers, enamels, and allied products.
SIC 2993—Printing ink.
SIC 3951—Pens, mechanical pencils, and parts and stamp pads (inked materials only).
SIC 3952—Lead pencils, crayons, and artists' materials.
SIC 3955—Carbon paper and inked ribbons.

12. SOAP AND DETERGENT MANUFACTURING

SIC 2841—Soap and other detergents, except specialty cleaners.

13. AUTO AND OTHER LAUNDRIES

SIC 7211—Power laundries, family and commercial.
SIC 7213—Linen supply.

SIC 7214—Diaper service.

SIC 7215—Coin-operated laundries and dry cleaning.

SIC 7216—Dry cleaning plants, except rug cleaning.

SIC 7217—Carpet and upholstery cleaning.

SIC 7218—Industrial Laundries.

SIC 7219—Laundry and garment services, not elsewhere classified.

SIC None—Auto wash establishments.

14. PLASTIC AND SYNTHETIC MATERIALS MANUFACTURING

SIC 282—Plastic materials and synthetic resins, synthetic and other manmade fibers, except glass.

15. PULP AND PAPERBOARD MILLS AND CONVERTED PAPER PRODUCTS

SIC 2611—Pulp Mills.
SIC 2621—Paper mills, except building paper mills.
SIC 2631—Paperboard mills.
SIC 2641—Paper coating and glazing.
SIC 2642—Envelopes.
SIC 2643—Bags, except textile bags.
SIC 2645—Die-cut paper and paperboard and cardboard.
SIC 2646—Pressed and molded pulp goods.
SIC 2647—Sanitary paper products.
SIC 2648—Stationery, tablets, and related products.
SIC 2649—Converted paper and paperboard products, not elsewhere classified.
SIC 2651—Folding paperboard boxes.
SIC 2652—Set-up paperboard boxes.
SIC 2653—Corrugated and solid fiber boxes.
SIC 2654—Sanitary food containers.
SIC 2655—Fiber cans, tubes, drums, and similar products.
SIC 2661—Building paper and building board mills.
SIC 2782—Blankbooks, looseleaf binders and devices.

16. RUBBER PROCESSING

SIC 2822—Synthetic rubber (vulcanizable elastomers).
SIC 2891—Rubber cement.
SIC 3011—Tires and inner tubes.
SIC 3021—Rubber and plastics footwear (rubber only).
SIC 3031—Reclaimed rubber.
SIC 3041—Rubber and plastics hose and belting (rubber only).
SIC 3069—Fabricated rubber products, not elsewhere classified.
SIC 3293—Gaskets, packing, and sealing devices (rubber packing only).

17. MISCELLANEOUS CHEMICALS

SIC 2831—Biological products.
SIC 2833—Medicinal chemicals and botanical products.
SIC 2834—Pharmaceutical preparations.
SIC 2861—Gum and wood chemicals.
SIC 2879—Pesticides and agricultural chemicals, not elsewhere classified.
SIC 2891—Adhesive and sealants.
SIC 2892—Explosives.
SIC 2895—Carbon black.
SIC 2899—Chemicals and chemical preparation, not elsewhere classified.
SIC 3861—Photographic equipment and supplies.

18. MACHINERY AND MECHANICAL PRODUCTS MANUFACTURING

SIC 3021—Rubber and plastics footwear (balance).
SIC 3041—Rubber and Plastics hose and belting (balance).

SIC 3079—Miscellaneous plastics products.
SIC 3293—Gaskets, packing, and sealing devices (balance).

SIC 3321—Gray iron foundries.

SIC 3322—Malleable iron foundries.

SIC 3324—Steel investment foundries.

SIC 3325—Steel foundries, not elsewhere classified.

SIC 3351—Rolling, drawing, and extruding of copper.

SIC 3353—Aluminum sheet, plate, and foil.

SIC 3354—Aluminum extruded products.

SIC 3355—Aluminum rolling and drawing, not elsewhere classified.

SIC 3356—Rolling, drawing, and extruding of nonferrous metals, except copper and aluminum.

SIC 3357—Drawing and insulating of nonferrous wire.

SIC 3361—Aluminum foundries (castings).

SIC 3362—Brass, bronze, copper, copper base alloy foundries (castings).

SIC 3369—Nonferrous foundries (castings), not elsewhere classified.

SIC 3398—Metal heat treating.

SIC 3399—Primary metal products, not elsewhere classified.

SIC 3411—Metal cans.

SIC 3412—Metal shipping barrels, drums, kegs, and pails.

SIC 3421—Cutlery.

SIC 3423—Hand and edge tools, except machine tools and hand saws.

SIC 3425—Hand saws and saw blades.

SIC 3429—Hardware, not elsewhere classified.

SIC 3431—Enameled iron and metal sanitary ware.

SIC 3432—Plumbing fixture fittings and trim (brass goods).

SIC 3433—Heating equipment, except electric and warm air furnaces.

SIC 3441—Fabricated structural metal.

SIC 3442—Metal doors, sash, frames, molding, and trim.

SIC 3443—Fabricated platework (boiler shops).

SIC 3444—Sheet metal work.

SIC 3446—Architectural and ornamental metal work.

SIC 3448—Prefabricated metal buildings and components.

SIC 3449—Miscellaneous metal work.

SIC 3451—Screw machine products.

SIC 3452—Bolts, nuts, screws, rivets, and washers.

SIC 3462—Iron and steel forgings.

SIC 3463—Nonferrous forgings.

SIC 3465—Automotive stampings.

SIC 3466—Crowns and closures.

SIC 3469—Metal stampings, not elsewhere classified.

SIC 3482—Small arms ammunition.

SIC 3483—Ammunition, except for small arms, not elsewhere classified.

SIC 3484—Small arms.

SIC 3489—Ordinance and accessories, not elsewhere classified.

SIC 3493—Steel springs, except wire.

SIC 3494—Valves and pipe fittings, except plumbers' brass goods.

SIC 3495—Wire springs.

SIC 3486—Miscellaneous fabricated wire products.

SIC 3497—Metal foil and leaf.

SIC 3498—Fabricated pipe and fabricated pipe fittings.

SIC 3499—Fabricated metal products, not elsewhere classified.

SIC 3511—Steam, gas, and hydraulic turbines and turbine generator set units.

SIC 3519—Internal combustion engines, not elsewhere classified.

SIC 3523—Farm machinery and equipment.
 SIC 3524—Garden tractors and lawn and garden equipment.
 SIC 3531—Construction machinery and equipment.
 SIC 3532—Mining machinery and equipment, except oil field machinery and equipment.
 SIC 3533—Oil field machinery and equipment.
 SIC 3534—Elevators and moving stairways.
 SIC 3535—Conveyors and conveying equipment.
 SIC 3536—Hoists, industrial cranes, and monorail systems.
 SIC 3537—Industrial trucks, tractors, trailers, and stackers.
 SIC 3541—Machine tools, metal cutting types.
 SIC 3542—Machine tools, metal forming types.
 SIC 3544—Special dies and tools, die sets, jigs and fixture and industrial molds.
 SIC 3545—Machine tool accessories and measuring devices.
 SIC 3546—Power driven hand tools.
 SIC 3547—Rolling mill machinery and equipment.
 SIC 3549—Metal working machinery, not elsewhere classified.
 SIC 3551—Food products machinery.
 SIC 3552—Textile machinery.
 SIC 3553—Woodworking machinery.
 SIC 3554—Paper industries machinery.
 SIC 3555—Printing trades machinery and equipment.
 SIC 3559—Special industry machinery, not elsewhere classified.
 SIC 3561—Pumps and pumping equipment.
 SIC 3562—Ball and roller bearings.
 SIC 3563—Air and gas compressors.
 SIC 3564—Blowers and exhaust and ventilation fans.
 SIC 3565—Industrial patterns.
 SIC 3566—Speed changes, industrial high speed drives, and gears.
 SIC 3567—Industrial process furnaces and ovens.
 SIC 3568—Mechanical power transmission equipment, not elsewhere classified.
 SIC 3569—General industrial machinery and equipment, not elsewhere classified.
 SIC 3572—Typewriters.
 SIC 3573—Electronic computing equipment.
 SIC 3574—Calculating and accounting machines, except electronic computing equipment.
 SIC 3576—Scales and balances, except laboratory.
 SIC 3579—Office machines, not elsewhere classified.
 SIC 3581—Automatic merchandising machines.
 SIC 3582—Commercial laundry, dry cleaning and pressing machines.
 SIC 3585—Air conditioning and warm air heating equipment and commercial and industrial refrigeration equipment.
 SIC 3586—Measuring and dispensing pumps.
 SIC 3589—Service industry machines, not elsewhere classified.
 SIC 3592—Carburetors, pistons, piston rings, and valves.
 SIC 3599—Machinery, except electrical, not elsewhere classified.
 SIC 3612—Power distribution, and specialty transformers.
 SIC 3613—Switchgear and switchboard apparatus.
 SIC 3621—Motors and generators.
 SIC 3622—Industrial controls.
 SIC 3623—Welding apparatus, electric.
 SIC 3624—Carbon and graphite products.
 SIC 3629—Electrical industrial apparatus, not elsewhere classified.
 SIC 3631—Household cooking equipment.

SIC 3632—Household refrigerators and home and farm freezers.
 SIC 3633—Household laundry equipment.
 SIC 3634—Electric housewares and fans.
 SIC 3635—Household vacuum cleaners.
 SIC 3639—Household appliances, not elsewhere classified.
 SIC 3641—Electric lamps.
 SIC 3643—Current-carrying wiring devices.
 SIC 3644—Noncurrent-carrying wiring devices.
 SIC 3645—Residential electric lighting fixtures.
 SIC 3646—Commercial, industrial, and institutional electric lighting fixtures.
 SIC 3647—Vehicular lighting equipment.
 SIC 3648—Lighting equipment, not elsewhere classified.
 SIC 3651—Radio and television receiving sets, except communication types.
 SIC 3652—Phonograph records and prerecorded magnetic tape.
 SIC 3661—Telephone and telegraph apparatus.
 SIC 3662—Radio and television transmitting, signaling, and detection equipment and apparatus.
 SIC 3671—Radio and television receiving type electron tubes, except cathode ray.
 SIC 3672—Cathode ray television picture tubes.
 SIC 3673—Transmitting, industrial, and special purpose electron tubes.
 SIC 3674—Semiconductors and related devices.
 SIC 3675—Electronic capacitors.
 SIC 3676—Resistors, for electronic applications.
 SIC 3677—Electronic coils, transformers, and other inductors.
 SIC 3678—Connectors, for electronic applications.
 SIC 3679—Electronic components, not elsewhere classified.
 SIC 3691—Storage batteries.
 SIC 3692—Primary batteries, dry and wet.
 SIC 3693—Radiographic X-ray, fluoroscopic X-ray, therapeutic X-ray, and other X-ray apparatus and tubes, electromedical and electrotherapeutic apparatus.
 SIC 3694—Electrical equipment for internal combustion engines.
 SIC 3699—Electrical machinery, equipment, and supplies, not elsewhere classified.
 SIC 3711—Motor vehicles and passenger car bodies.
 SIC 3713—Truck and bus bodies.
 SIC 3714—Motor vehicle parts and accessories.
 SIC 3715—Truck trailers.
 SIC 3721—Aircraft.
 SIC 3724—Aircraft engine and engine parts.
 SIC 3728—Aircraft part and auxiliary equipment, not elsewhere classified.
 SIC 3731—Ship building and repairing.
 SIC 3732—Boat building and repairing.
 SIC 3743—Railroad equipment.
 SIC 3751—Motorcycles, bicycles, and parts.
 SIC 3761—Guided missiles and space vehicles.
 SIC 3764—Guided missile and space vehicle propulsion units and propulsion unit parts.
 SIC 3769—Guided missile and space vehicle parts and auxiliary equipment, not elsewhere classified.
 SIC 3792—Travel trailers and campers.
 SIC 3795—Tank and tank components.
 SIC 3799—Transportation equipment, not elsewhere classified.
 SIC 3811—Engineering, laboratory, scientific, and research instruments and associated equipment.
 SIC 3822—Automatic controls for regulating residential and commercial environments and appliances.

SIC 3823—Industrial instruments for measurement, display, and control of process variables; and related products.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 124]

[FRL 887-3]

NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

Proposed Rule

AGENCY: Environmental Protection Agency.

SUMMARY: Proposed Rule.

SUMMARY: EPA is proposing to revise final regulations published today. The final regulations facilitate compliance with the treatment deadlines for toxic pollutants under the Clean Water Act, by requiring permit modification or reissuance when new effluent guidelines covering those pollutants are promulgated or approved by EPA. However, these final regulations raise the question of how compliance will, in fact, be ensured when: (1) Permits are issued which do not expressly require achievement of future treatment deadlines, and (2) permit modification or revocation to incorporate such requirements is not triggered (e.g., where, for various reasons, new guidelines covering toxic pollutants are not or do not become available). In this document, EPA proposes to answer this question, indicating that permits may reflect a continuation of 1977 treatment requirements under the Act only if set to expire no later than 18 months from the scheduled date of effluent guideline promulgation (i.e., 1980-81). Permits set to expire after that time must provide for compliance with 1984 treatment requirements.

DATES: All comments received on or before June 22, 1978, will be considered.

ADDRESSES: Interested persons may participate in this proposed rulemaking by submitting comments to Mr. Edward A. Kramer, Permits Division (EN-336), Office of Water Enforcement, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. A copy of all public comments will be available for inspection and copying at EPA Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Edward A. Kramer (EN-336), Office of Water Enforcement, Environmental Protection Agency, Washington, D.C. 20460, 202-755-0750.

SUPPLEMENTARY INFORMATION: On January 6, 1978, EPA published a proposed rule revising EPA's regula-

tions governing the NPDES programs (43 FR 1256). One of the stated purposes of this revision was to conform the regulations to the requirements of the Consent Decree in *NRDC v. Train*, 8 ERC 2120 (D.D.C. 1976). Specifically, the proposed regulations required that permits issued in 21 industrial categories be reissued or modified, through the use of a "reopener clause," to assure the prompt application of effluent guidelines and standards covering toxic pollutants. With minor modification, final regulations reflecting this requirement (40 CFR 124.46) are being published today. However, comments on the proposed rule questioning the operation of the reopener clause have led to this proposal to supplement the final rule.

In a June 20, 1977, memorandum of Administrator Costle, EPA required EPA Regional offices and encouraged NPDES States to issue short-term permits to dischargers in the 21 industrial categories. These permits were to expire shortly after applicable "best available technology economically achievable" (BAT) effluent guidelines are scheduled to be promulgated under the Consent Decree; they were to reflect the continuation of the conditions in the expiring permit, making any necessary adjustments, and were also to contain the reopener clause. Under this approach, new permits would be issued to reflect BAT limitations after the promulgation of the effluent guidelines and upon the expiration of the short term permits.

Although EPA has not required NPDES States to follow the short term permit approach, they must nevertheless assure compliance with the statutory deadlines in the Clean Water Act. NPDES States can fulfill this obligation either (1) through the issuance of short term permits (with the reopener clause) reflecting a continuation of existing permit conditions, or (2) through the issuance of long term permits (with the reopener clause) which require compliance with the statutory deadlines for the achievement of "best conventional pollutant control technology" (BCT) and BAT (including BAT for toxic pollutants).

NPDES States cannot fulfill this obligation through the issuance of long term permits which incorporate the reopener clause but which do not go beyond existing permit conditions toward compliance with BCT and BAT. Unlike short term permits—which will be reissued in 1980-81 to reflect compliance with BCT and BAT in the event that the reopener clause is not triggered—long term permits reflecting existing permit conditions cannot ensure compliance with statutory deadlines in the event that effluent guidelines for toxic pollutants under sections 301(b)(2) and (C) and

(D) are not or do not become available. In that case, the permit would not automatically be subject to modification. At the same time, it would not incorporate conditions designed to result in compliance with BCT and non-toxic BAT requirements. Such permits are clearly outside the guidelines and requirements of the Act, even absent these regulations, and are therefore subject to EPA objections under section 402(d) and 40 CFR 124.48.

For the purposes of the proposed regulation, short term permits are those with expiration dates no later than 18 months after the scheduled dates for effluent guideline promulgation under the Consent Decree, whereas long term permits are those set to expire after that time. The 18 month period was selected to aid EPA Regional offices and NPDES States in their permit issuance efforts, since 18 months will provide a reasonable time for permit reissuance once effluent guidelines are promulgated or approved, taking into account the possibility of minor delays in scheduled promulgation dates.

The proposed regulations formally establish the short term and long term options described above for the issuance of NPDES permits in the 21 industrial categories. Nevertheless, it remains EPA's position that the issuance of short term permits is the preferred option absent exceptional circumstances, due to the costly and time-consuming nature of case-by-case BCT and BAT determinations where effluent guidelines are not available.

Interested persons may participate in this proposed rulemaking by submitting comments or suggestions to Mr. Edward A. Kramer, Permits Division (EN-336), Office of Water Enforcement, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. Each person submitting a comment should include his or her name and address and give reasons for any recommendations. A copy of all public comments will be available for inspection and copying at EPA Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street SW., Washington, D.C. 20460. The EPA information regulation (40 CFR Part 2) provides that a reasonable fee may be charged for copying.

NOTE.—The Environmental Protection Agency has determined that this document does not constitute a major regulation requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and under OMB Circular A-107.

Dated: May 10, 1978.

DOUGLAS M. COSTLE,
Administrator.

Subpart E—Terms and Conditions of NPDES Permits
 Sec. 124.46 Requirements under section 307(a)(2) of the act.

Appendix D—Point source categories and permit expiration dates.

Subpart E—Terms and Conditions of NPDES Permits

1. Section 124.46 is proposed to be amended by adding a new paragraph (c) as follows:

§ 124.46 Requirements under section 307(a)(2) of the act.

(c) No permit issued to a discharger within an industrial category listed in Appendix D of this part, prior to the applicable date listed in appendix D, may be extended beyond that date, unless:

(1) Effluent limitations and standards applicable to the discharger have been promulgated or approved under sections 301(b)(2) (C) and (D), 304(b)(2), and 307(a)(2) of the Act; or

(2) The permit incorporates:

(i) The "reopener clause" required by paragraph (a) of this section;

(ii) Effluent limitations and a compliance schedule to meet the requirements of sections 301(b)(2)(A)-(F) of the Act; and

(iii) Any other terms and conditions necessary to carry out the provisions of the Act.

[Comments: (1) NPDES States are urged to issue permits expiring on or before the dates listed in appendix D. This approach is the simplest means of ensuring that all appropriate provisions of the Act, including time deadlines, are met. Even if the procedure authorized in paragraph (c)(2) is followed, dischargers must clearly understand that they will be required to meet all applicable requirements of the Act, including compliance with EPA effluent guidelines defining "best conventional pollutant control technology" (BCT) and "best available technology economically achievable" (BAT) by the statutory deadlines.

(2) A determination that a particular discharger falls within a given industrial category for purposes of setting a permit expiration date under paragraph (c) is not conclusive as to the discharger's inclusion in that industrial category, and does not prejudice any rights to challenge or change that inclusion at the time that effluent standards and limitations are determined to be applicable.]

PROPOSED RULES

2. Appendix D of this Part is proposed to be amended as follows:

APPENDIX D—POINT SOURCE CATEGORIES AND PERMIT EXPIRATION DATES

Timber Products Processing (Permit Expiration Date: September 30, 1980).

2. Steam Electric Power Plants (Permit Expiration Date: September 30, 1980).

3. Leather Tanning and Finishing (Permit Expiration Date: September 30, 1980).

4. Iron and Steel Manufacturing (Permit Expiration Date: September 30, 1980).

5. Petroleum Refining (Permit Expiration Date: September 30, 1980).

6. Inorganic Chemicals Manufacturing (Permit Expiration Date: March 31, 1981).

7. Textile Mills (Permit Expiration Date: March 31, 1981).

8. Organic Chemicals Manufacturing (Permit Expiration Date: March 31, 1981).

9. Nonferrous Metals Manufacturing (Permit Expiration Date: December 31, 1980).

10. Paving and Roofing Materials (TAR AND ASPHALT) (Permit Expiration Date: December 31, 1980).

11. Paint and Ink Formulation and Printing (Permit Expiration Date: December 31, 1980).

12. Soap and Detergent Manufacturing (Permit Expiration Date: June 30, 1981).

13. Auto and Other Laundries (Permit Expiration Date: June 30, 1981).

14. Plastic and Synthetic Materials Manufacturing (Permit Expiration Date: March 31, 1981).

15. Pulp and Paperboard Mills and Converted Paper Products (Permit Expiration Date: March 31, 1981).

16. Rubber Processing (Permit Expiration Date: March 31, 1981).

17. Miscellaneous Chemicals (Permit Expiration Date: June 30, 1981).

18. Machinery and Mechanical Products Manufacturing (Permit Expiration Date: June 30, 1981).

19. Electroplating (Permit Expiration Date: June 30, 1981).

20. Ore Mining and Dressing (Permit Expiration Date: December 31, 1980).

21. Coal Mining (Permit Expiration Date: December 31, 1980).

(Secs. 301(b)(a), 304(i), 307(a), 402(b), 501(a), Pub. L. 92-500, 86 Stat. 818, as amended by Pub. L. 95-217, 91 Stat. 217, (33 USC 1251 et seq.).)

PRIVACY ACT ISSUANCES, 1977 COMPILATION

The 1977 Compilation of Privacy Act Issuances has been printed in six volumes and may be purchased by using the order form below.

Volumes I through V contain the systems of records and access regulations that were published in the **FEDERAL REGISTER** during September, 1977, by the various government departments and agencies. Volume VI contains the same information for those government departments and agencies that published at a time other than during September, 1977. For a list of agencies in each volume, consult the October-December **FEDERAL REGISTER** Index.

The date(s) in parentheses following Volumes I through VI indicates the 1977 **FEDERAL REGISTER** issue dates that comprise that volume.

Quantity	Volume	Federal Register Issue Dates	Price	Amount
_____	Volume I—(Sept. 19, 20, 21, 22)		\$6.50	\$_____

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
	CSC			CSC
	LABOR			LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Rules Going Into Effect Today

FCC—Network program exclusivity protection by cable television systems 16337; 4-18-78
Interior/NPS—Hawaii Volcanoes National Park; backcountry camping registration required 17356; 4-24-78
NRC—Nuclear power plants and components; codes and standards 17337; 4-24-78

Next Week's Deadlines for Comments On Proposed Rules

AGRICULTURAL DEPARTMENT

Agricultural Marketing Service—
Posted stockyards; schedules of rates and charges and changes in existing charges; comments by 5-30-78. 13488; 3-30-78
Animal and Plant Health Inspection Service—
Animal welfare; horse protection regulations; comments by 5-30-78 18514; 4-28-78

Commodity Credit Corporation—
Determinations for 1978 rice price support program; comments by 5-30-78. 17964; 4-27-78
Terms and conditions of farm storage loans and purchases for 1978 and subsequent peanut crops; comments by 5-30-78 17964; 4-27-78

Food Safety and Quality Service—
Cooking requirements for cooked beef roast; comments by 6-1-78 18681; 5-2-78

Meat and poultry products; net weight labeling; comments extended to 6-2-78 8807; 3-3-78
[Originally published at 42 FR 61279, 12-2-77]

Mozzarella cheeses; study draft U.S. standards for grades; comments by 6-1-78 11204; 3-17-78

CIVIL AERONAUTICS BOARD
Protection of charter participants' funds; supplemental notice of proposed rulemaking; reply comments by 5-29-78 3285; 1-24-78

COMMERCE DEPARTMENT
Economic Development Administration—
Economic development districts; private citizen representation; comments by 5-31-78 18541; 5-1-78

National Oceanic and Atmospheric Administration—
Atlantic groundfish (cod, haddock, yellowtail flounder); landings; comments by 6-2-78 17361; 4-24-78

Atlantic fisheries; haddock, cod, yellowtail flounder; emergency regulations; comments by 6-2-78 20505; 5-12-78

Commercial and recreational salmon fisheries off the Washington, Oregon and California coasts; comments by 6-1-78 18219; 4-28-78
Litigation not involving U.S.; disclosure of information and employee testimony; comments by 5-30-78 16745; 4-20-78
Salmon fishery; management plan for coasts of Washington, Oregon, and California; comments by 6-1-78 15629; 4-14-78

COMMODITY FUTURES TRADING COMMISSION

Futures commission merchants; minimum financial requirements; comments by 6-1-78 15072; 4-10-78

ENERGY DEPARTMENT

Federal Energy Regulatory Commission—
Alaska natural gas transportation system; incentive rate of return; comments by 5-31-78 20241; 5-11-78

ENVIRONMENTAL PROTECTION AGENCY

Air quality implementation plans, various states:
New Hampshire; comments period extended to 5-30-78 13902; 4-3-78
[Originally published at 43 FR 8161, 2-28-78]

New Jersey; revision comments by 5-30-78 18216; 4-28-78
Control of organic chemical contaminants in drinking water; comments by 5-31-78 5756; 2-9-78

FEDERAL COMMUNICATIONS COMMISSION
Amateur radio service; simplification of licensing and call sign assignment systems; comments by 6-2-78 7332; 2-22-78

FM broadcast stations; table of assignments: Burlington and Newport, Vt.; reply comments by 6-1-78 12346; 3-24-78
Las Vegas, Nev.; comments by 5-30-78 16354; 4-18-78

Princeton, Ill.; comments by 5-30-78 15341; 4-12-78
Rhinelander and Wausau, Wisc.; reply comments by 5-29-78 10944; 3-16-78

FM broadcast translator stations; comments by 6-2-78 19695; 5-8-78
Telephone service; use of recording devices; comments by 6-1-78 11719; 3-21-78

FEDERAL HOME LOAN BANK BOARD
Federal Home Loan Bank System:
Additional nondiscrimination in Federally assisted programs; comments by 5-30-78 16190; 4-17-78

Reduction and simplification of regulations; comments by 6-1-78 14505; 4-6-78

HEALTH, EDUCATION, AND WELFARE DEPARTMENT
Food and Drug Administration—
Alginates; affirmation of GRAS status; extension of comment period; comments by 5-30-78 13584; 3-31-78

Insulin product certification requirements; comments by 5-30-78 13585; 3-31-78
Medical devices; impact resistant lenses in eyeglasses and sunglasses; comments extended to 6-1-78 18699; 5-2-78
[Originally published at 43 FR 1106, Jan. 6, 1978]

Public information, disclosure of existence; comments by 5-30-78 (2 documents). 12869; 3-28-78 13587; 3-31-78

Sulfuric acid, and ammonium, calcium, potassium and sodium sulfates; comments by 5-30-78 12874; 3-28-78

Public Health Service—
Grants for residency training in the general practice of dentistry; comments by 5-30-78 18217; 4-28-78

HOUSING AND URBAN DEVELOPMENT DEPARTMENT

Office of the Secretary—
Relocation payments and assistance and real property acquisition; comments by 5-30-78 13836; 3-31-78

INTERIOR DEPARTMENT

Fish and Wildlife Service—
Endangered and threatened wildlife and plants; endangered status and critical habitat for five fishes; comments by 5-30-78 13404; 3-30-78

Endangered species list; removal of the Mexican duck; comments by 5-30-78 13592; 3-31-78

Indian Affairs Bureau—
San Carlos Indian Irrigation Project, Ariz.; revision of rates; comments by 5-30-78 18213; 4-28-78

Office of the Secretary—
Preservation of American antiquities; definition of "object of antiquity"; comments by 5-28-78 14976; 4-10-78

INTERSTATE COMMERCE COMMISSION

Motor common carriers of property routes and service; gateways and tacking; comments by 5-31-78 18581; 5-1-78

SECURITIES AND EXCHANGE COMMISSION

Accounting practices—oil and gas producers; comments by 5-31-78 19668; 5-8-78

Registered investment companies, prevention of unlawful activities; comments by 5-30-78 19669; 5-8-78

Securities transactions by members of National Securities Exchanges; comments by 6-1-78 18557; 5-1-78

Simplified registration and reporting requirements for small issuers; comments by 6-1-78 00000; 0-00-00

SUSQUEHANNA RIVER BASIN COMMISSION

Groundwater development; establishment of standards; comments by 5-31-78. 12724; 3-27-78

TENNESSEE VALLEY AUTHORITY

Nondiscrimination with respect to handicap in programs receiving Federal financial assistance; comments by 5-31-78 ... 18693; 5-2-78

TRANSPORTATION DEPARTMENT

Coast Guard—
President's Cup Regatta, Washington, D.C.; water safety regulations; comments by 5-31-78 ... 18571; 5-1-78
Federal Aviation Administration—
Domestic, flag, and supplemental air carriers, commercial operators and air travel clubs; flight and duty time limitations and rest requirements for flight crewmembers; comments by 5-30-78 ... 8070; 2-27-78
National Highway Traffic Safety Administration—
Passenger automobile average fuel economy standards; exemption to Avanti Motor Corp.; comments by 5-31-78 ... 18575; 5-1-78

TREASURY DEPARTMENT

Customs Service—
Foreign repairs to and equipment purchased for American vessels; comments extended to 6-2-78 ... 19417; 5-5-78 [Originally published at 43 FR 14060, 4-4-78]

Title 3—The President

Memorandum of May 18, 1978

Assistance to Zaire

[Presidential Determination No. 78-111]

Memorandum for the Secretary of State

THE WHITE HOUSE,
Washington, May 18, 1978.

Pursuant to the authority vested in me by section 25 of the International Security Assistance Act of 1977, I hereby determine that:

(a) The furnishing to Zaire of not to exceed \$2,500,000 in international military education and training for the fiscal year 1978 under chapter 5 of part II of the Foreign Assistance Act of 1961, the extension to and utilization by Zaire of not to exceed \$17,500,000 for the fiscal year 1978 in credit under the Arms Export Control Act, and the utilization by Zaire of the uncommitted balance of credit extended to Zaire under the Arms Export Control Act in any prior fiscal year, are important to the national security interests of the United States; and

(b) Such assistance should be furnished to Zaire in the national security interests of the United States.

You are requested on my behalf to report this determination to the Congress, as required by law. You are also requested to keep the Congress fully and currently informed on the specific details of how the assistance to Zaire is utilized.

This determination shall be published in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

(Peach Reg. 1, Amdt. 2)

PART 918—FRESH PEACHES GROWN IN GEORGIA

Grade and Size Requirements

AGENCY: Agricultural marketing Service, USDA.

ACTION: Amendment to final rule.

SUMMARY: This action extends by 4 days the period during which 1½ inch Georgia peaches may be shipped. Such action is designed to promote orderly marketing in the interest of producers and consumers.

EFFECTIVE DATE: May 19, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: *Findings.* Pursuant to the marketing agreement, as amended, and Order No. 918, as amended (7 CFR Part 918), regulating the handling of peaches grown in Georgia, effective under the Agricultural marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendation and information submitted by the Industry Committee, established under this marketing order, and upon other information, it is found that the limitation of handling of peaches, as hereafter provided, will tend to effectuate the declared policy of the act.

The committee met on May 17, 1978, to consider crop and market conditions and other factors affecting the need for further amending the current amended regulation, and recommended extending the period during which peaches at least 1½ inches in diameter could be shipped through May 26, 1978. The committee reports that abnormally cold weather has delayed the normal size development of the peach crop, and as a result the earlier maturing varieties, which normally mature at smaller sizes than later maturing

varieties, are not expected to meet the 1½ inch requirement which would become effective May 23, under the amended regulation currently in effect.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this amendment is based and the effective date necessary to effectuate the declared policy of the act. This amendment relieves restrictions on the handling of peaches. It is necessary to effectuate the declared purposes of the act to make this regulatory provision effective as specified, and handlers have been apprised of such provision and the effective time.

Paragraphs (a)(2) and (3) in § 918.320 Peach Regulation 1 (43 FR 18642; 20476), are hereby amended to read:

§ 918.320 Peach Regulation 1.

(a) No handler shall ship, except peaches in bulk to destinations in the adjacent markets, any peaches which:

(1) . . .

(2) During the period May 3 through May 26, 1978, are smaller than 1½ inches in diameter, except that not more than 10 percent, by count, of such peaches in any bulk lot or any lot of packages, and not more than 15 percent, by count, of such peaches in any container in such lot, may be smaller than 1½ inches in diameter.

(3) During the period May 27 through August 31, 1978, are smaller than 1½ inches in diameter, except that not more than 10 percent, by count, of such peaches in any bulk lot or any lot of packages, and not more than 15 percent, by count, of such peaches in any container in such lot, may be smaller than 1½ inches in diameter.

(Secs. 1-19, 48 Stat. 31, as amended; (7 U.S.C. 601-674).)

Dated: May 19, 1978, to become effective May 19, 1978.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

Title 10—Energy

CHAPTER I—NUCLEAR REGULATORY COMMISSION

PART 20—STANDARDS FOR PROTECTION AGAINST RADIATION

Removal or Defacing of Radioactive Materials Labels on Empty Containers

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission is amending its regulations establishing standards for protection against radiation hazards arising out of NRC licensed activities to require the removal or the defacing of radioactive labels on empty, uncontaminated containers prior to disposal. The action is taken in response to a petition from the Department of Military Affairs, State of Alaska and is designed to reduce the number of required investigations concerning radioactive containers disposed of improperly.

EFFECTIVE DATE: June 23, 1978.

FOR FURTHER INFORMATION CONTACT:

Dr. Lewis Battist, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, 301-443-6900.

SUPPLEMENTARY INFORMATION: In response to a petition from the Department of Military Affairs, Alaska Disaster Office, the Commission is hereby amending its rules, specifically 10 CFR Part 20, to require licensees to obliterate or mutilate the radioactive symbols or labels from empty radioactive material containers prior to disposal or clearly indicate that the container no longer contains radioactive

material. In the event such action is not feasible, then a placard or label bearing the word "empty" should be attached.

Notice of the petition for rulemaking (Docket Number PRM 20-8) was published in the *FEDERAL REGISTER* on February 22, 1977 (42 FR 10377) and public comment solicited. The Commission after considering the proposed rule published its intent to adopt this rule on July 14, 1977 (42 FR 36268) and invited public comment. A total of 10 comments were received in response to this *FEDERAL REGISTER* notice. Seven of these comments were in favor of this rule.

Two of the replies that were in favor of the proposed rule requested NRC to establish a residual activity or contamination limit to be applied to containers for uncontrolled disposal. The establishment of residual activity levels is beyond the scope or intent of the petition under consideration. One respondent expressed concern over the volume of labels that they would have to deface or destroy and stated that they would petition the NRC to accept compaction as a viable alternative to defacing or destroying the radioactive materials label. Compaction is an acceptable method for disposal, provided that any subsequently visible labels are removed or defaced.

Three of the replies were not in favor of the proposed rule. The concern expressed or implied in these comments was that full containers bearing radioactive materials labels would have the labels removed and then be discarded as ordinary trash. Such improper behavior could not be prevented by rulemaking. The negative respondent further expressed the desire that those individuals who dispose of improperly labelled containers be tracked down and cited. At the present time containers bearing the radioactive materials label, but not containing any radioactive material, may be disposed of in any manner. It is these empty containers that have been found in the environment. Promulgation of this rule is intended to eliminate this practice which resulted in responding to false alarms and to establish regulatory authority where-by violators can be cited.

Overlooked by the negative respondents is that the rule pertains to "empty uncontaminated containers." This requires a determination or knowledge of this fact on the part of the licensee at the time of disposal that these conditions have been met which further reduces the likelihood that contaminated containers will get into the surplus container trade.

The rule primarily pertains to shipping and other outer containers that do not ordinarily come into contact with radioactive materials. Present regulations, § 20.205 of 10 CFR Part

20, requires licensees to inspect and survey, upon receipt, packages containing radioactive materials. Any packages that are contaminated or have excessive radiation levels require notification of the shipper and the NRC. Any necessary action is taken at the time to prevent improper disposal practices and insure that the health and safety of the public are protected. Implementation of this rule requires a knowledge on the part of a licensee that the container being discarded is "empty and uncontaminated".

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and sections 552 and 553 of Title 5 of the United States Code, the following amendment of Title 10, Chapter I, Code of Federal Regulations, Part 20, is published as a document subject to codification.

1. Paragraph (f) of § 20.203 of 10 CFR Part 20 is amended by adding a new subparagraph (4) to read as follows:

§ 20.203 Caution signs, labels, signals, and controls

(f) Containers. . . .

(4) Each licensee shall, prior to disposal of an empty uncontaminated container to unrestricted areas, remove or deface the radioactive material label or otherwise clearly indicate that the container no longer contains radioactive materials.

(Sec. 161 Pub. L. 83-703, 68 Stat. 948 (42 U.S.C. 2201); sec. 201, Pub. L. 93-438, 88 Stat. 1242 (42 U.S.C. 5841).)

Dated at Washington, D.C., this 15th day of May 1978.

For the Nuclear Regulatory Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

[Revis. 13; Amdt. 21]

PART 121—SMALL BUSINESS SIZE STANDARDS

Definition of Small Business for the Purpose of SBA Loan Guarantees—Women's and Children's Nightwear Manufacturing

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: This final rule establishes a temporary loan size standard for firms primarily engaged in manufacturing products in SIC-23413 (women's and children's nightwear, made from woven or purchased knit fabrics). It is necessary because of the market structure of this segment of the women's and children's underwear and nightwear industry (SIC-2341), and the special nature of the Government's ban on the use of the flame retardant chemical TRIS in children's nightwear. This rule is intended to result in the increased eligibility of firms in SIC-23413 for SBA financial assistance.

EFFECTIVE DATE: May 24, 1978.

FOR FURTHER INFORMATION CONTACT:

Harvey D. Bronstein, 202-653-6373.

SUPPLEMENTARY INFORMATION: On March 20, 1978, the *FEDERAL REGISTER* published a proposed rule to adopt a temporary 500-employee loan size standard for firms primarily engaged in SIC-23412. The Agency has received one comment on this proposal from a representative of an industry group.

The comment from the Independent Cutters and Sewers of Children's Sleepwear stated that the industry's problems are permanent, not temporary; that the size standard for SIC-2341 should be permanently changed to match that of SIC-2321 (men's shirts and nightwear) at 500 employees; and that SIC's 2321 and 2341 should be merged with respect to their nightwear portions to have its own size standard as if it were one industry. In addition, the comment said that we failed to consider our own rules in formulating the size standard (13 CFR 121.3-1(b)(3)) and that, since our rules state that the Standard Industrial Classification Manual is advisory and not mandatory, we should not use the manual's definition and instead create a new definition for the men's and women's nightwear industries.

The SBA position is that the financial difficulties created by the TRIS ban are temporary; that the size standard of SIC-2321 is not an issue here; that SIC's 2321 and 2341 are not the same industry, and that we are reluctant to use any industry definitions not recognized in the Standard Industrial Classification Manual, because all of our industrial structure data are based on it. The SIC Manual gives rather precise industry definitions and we are hesitant to use special definitions. We note that the SBA took the unusual step of going to a 5-digit SIC definition in this case. Furthermore, we considered all of the factors in § 121.3-1(b)(3) and many others, but chose to emphasize the percent of in-

dustry sales covered under the proposed size standard in our explanation in the proposed rule.

Accordingly, 13 CFR part 121.3-10(b) is hereby amended by adding a new subparagraph (4), which reads as follows:

§ 121.3-10 Definition of small business for SBA loans.

(b)

(4) As small if it is primarily engaged in manufacturing products in SIC Code 23413 (women's and children's nightwear, made from woven or purchased knit fabrics), has suffered substantial economic injury which makes it eligible for assistance under section 7(b)(5) of the Small Business Act, files an application for such assistance by (insert date 6 months from the effective date of the regulation), and has an average number of employees not to exceed 500.

Dated: May 16, 1978.

A. VERNON WEAVER,
Administrator.

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY

[T.D. 78-139]

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

Special Tonnage Tax and Light Money

AGENCY: United States Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This rule adds the German Democratic Republic and the United Arab Emirates to the list of nations whose vessels are exempted from the payment of higher tonnage duties than are applicable to vessels of the United States and from the payment of light money. It also extends the exemption previously afforded Great Britain to include the Cayman Islands. Satisfactory evidence has been obtained by the Department of State that no discriminating duties of tonnage or impost are imposed in ports of the German Democratic Republic, the United Arab Emirates, and the Cayman Islands upon vessels belonging to citizens of the United States or on their cargo.

EFFECTIVE DATE: The exemption became effective for the German Democratic Republic and the Cayman Islands, on January 1, 1977, and for the United Arab Emirates on October 25, 1975.

FOR FURTHER INFORMATION CONTACT:

Patrick J. Casey, Carriers, Drawback and Bonds Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, 202-566-5706.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Generally, the United States imposes regular and special tonnage taxes, and a duty of a specified amount per ton, known as "light money," on all foreign vessels which enter United States ports (46 U.S.C. 121, 128). However, vessels of a foreign nation may be exempted from the payment of special tonnage taxes and light money upon presentation of proof satisfactory to the President that no discriminatory duties of tonnage or imposts are imposed by that foreign nation on United States vessels or their cargo (46 U.S.C. 141). The President has delegated the authority to grant this exemption to the Secretary of the Treasury. Section 4.22 of the Customs Regulations (19 CFR 4.22) lists those nations whose vessels have been exempted from the payment of any higher tonnage duties than are applicable to vessels of the United States and from the payment of light money.

On December 29, 1976, the Department of State advised the Department of the Treasury that satisfactory evidence has been obtained from the Government of Great Britain that no discriminating duties of tonnage or impost are imposed or levied in ports of the Cayman Islands upon vessels wholly belonging to citizens of the United States, or upon the produce, manufacturers, or merchandise imported into the Cayman Islands in such vessels from the United States or from any foreign country.

On June 3, 1977 and October 26, 1977, the Department of State similarly advised that satisfactory evidence has been obtained from the Governments of the German Democratic Republic and the United Arab Emirates, respectively, that no discriminating duties of tonnage or impost are imposed or levied in ports of those countries upon vessels wholly belonging to citizens of the United States, or upon the produce, manufactures, or merchandise imported into those countries in those vessels.

In its communications, the Department of State advised no discriminating duties of tonnage or impost were imposed or levied upon vessels wholly

belonging to citizens of the United States, or upon the produce, manufactures, or merchandise, imported into ports of the Cayman Islands and the German Democratic Republic from January 1, 1977, and into ports of the United Arab Emirates from October 25, 1975.

DECLARATION

Therefore, by virtue of the authority vested in the President by section 4228 of the Revised Statutes, as amended (46 U.S.C. 141), and delegated to the Secretary of the Treasury by Executive Order No. 10289, September 17, 1951, as amended by Executive Order No. 10882, July 18, 1960 (3 CFR, 1959-1963 Comp., Ch. II), and pursuant to the authorization provided by Treasury Department Order No. 190, Rev. 15 (43 FR 11884), I declare that the foreign discriminating duties of tonnage and import within the United States are suspended and discontinued, in respect to vessels of the Cayman Islands, the German Democratic Republic, and the United Arab Emirates, and the produce, manufactures, or merchandise imported into the United States in such vessels from the Cayman Islands, the German Democratic Republic, and the United Arab Emirates, or from any other foreign country.

This suspension and discontinuance shall take effect from January 1, 1977, in respect to vessels of the Cayman Islands and the German Democratic Republic, and from October 25, 1975 in respect to vessels of the United Arab Emirates, and shall continue for so long as the reciprocal exemptions of vessels wholly belonging to citizens of the United States and their cargoes shall be continued and no longer.

AMENDMENT TO THE REGULATIONS

In accordance with this declaration, § 4.22 of the Customs Regulations (19 CFR 4.22) is amended by adding "(including the Cayman Islands)" after "Great Britain", and inserting "German Democratic Republic", and "United Arab Emirates" in the appropriate alphabetical sequence in the list of nations whose vessels are exempted from the payment of any higher tonnage duties than are applicable to vessels of the United States and from the payment of light money.

(R.S. 251, as amended, 4219, as amended, 4225, as amended, 4228, as amended, sec. 3, 23 Stat. 119, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624, 46 U.S.C. 3, 121, 128, 141).)

Because this amendment merely implements a statutory requirement, notice and public procedure thereon are found to be unnecessary and good cause exists for dispensing with the delayed effective date provisions of 5 U.S.C. 553.

DRAFTING INFORMATION

The principal author of this document was Todd J. Schneider, Regulations and Legal Publications Division, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other offices of the Customs Service and the Department of State participated in developing the document, both on matters of substance and style.

Dated: May 16, 1978.

RICHARD J. DAVIS,
Assistant Secretary of the
Treasury.

(FR Doc. 78-14550 Filed 5-23-78; 8:45 am)

[4810-22]

(T.D. 78-141)

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADE

Persons Boarding and Leaving Vessels Without Customs Permission

AGENCY: United States Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations by defining the categories of individuals who may board or leave vessels arriving from outside the Customs territory of the United States without Customs permission before Customs formalities are completed and by clarifying the activities permitted to be performed by these individuals while on board.

EFFECTIVE DATE: June 23, 1978.

FOR FURTHER INFORMATION CONTACT:

Donald H. Reusch, Carriers, Drawback and Bonds Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, 202-566-5706.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Section 4.1(c) of the Customs Regulations (19 CFR 4.1(c)) provides that with certain exceptions, no person shall board or leave a vessel arriving from outside the Customs territory of the United States without the permission of a Customs officer before the vessel has been taken in charge by Customs. The exceptions include a pilot, officer of Customs or the Coast Guard, immigration officer, health officer, agent of the vessel, or consular officer.

It had been brought to the attention of the Customs Service that some vessel agents who board a vessel before Customs formalities are completed may solicit business from the master or purchasing officer for the

vessel's stores, in addition to attending to Customs formalities. As a result, it was contended, other suppliers, who cannot board the vessel until after Customs formalities are completed, are placed at a competitive disadvantage because the vessel agents on board have already solicited the business.

After determining that the claim had merit, on May 7, 1975, the Customs Service published a notice of proposed rulemaking in the *FEDERAL REGISTER* (40 FR 19830) to amend § 4.1(c) to clarify and limit the activities to be performed by the individuals who may board or leave a vessel without Customs permission before Customs formalities are completed. The notice emphasized that these individuals are authorized to board without Customs permission solely to aid in the navigation of the vessel or to aid in or perform Customs or certain other Government business, and not to conduct commercial or private business while on board.

Interested persons were given until June 6, 1975, to submit relevant data, views, or arguments. After consideration of the comments received, the Customs Service has decided to make the changes set forth in the document.

DISCUSSION OF COMMENTS

Although the proposal included a specific exception for a "pilot in connection with the navigation of a vessel," one commenter suggests that a similar provision was needed to permit a person who is not a pilot to board an unmanned barge without Customs permission to assist in its navigation. Inasmuch as this comment has merit, the proposed amendment has been revised to include the suggestion.

Another commenter supports the proposal provided container handling begins as soon as possible after the vessel arrives and the Customs officer reviews the ship's papers. By further defining the categories of individuals who may board the vessel without Customs permission, the proposed amendment will aid the Customs officer to attend to his duties, thereby ensuring prompt commencement of cargo handling.

The Animal and Plant Health Inspection Service of the U.S. Department of Agriculture suggests that its inspectors be specifically included within the category of Government officers authorized to board and leave a vessel without Customs permission to perform its Government business. The suggestion has been adopted and the proposed amendment revised accordingly.

DISCUSSION OF OTHER CHANGES

It is intended that the excepted categories of individuals may both board

and leave a vessel without Customs permission. However, as proposed, the second sentence of the amendment is unclear in that it may be interpreted to provide that except for the purpose of reporting the arrival of the vessel, no person, including the excepted categories of individuals, may leave the vessel without Customs permission before Customs formalities are completed. Therefore, the language of the proposed amendment has been revised to make it clear that the excepted categories of individuals may both board and leave a vessel without customs permission.

The proposed amendment, modified to include these changes, is adopted as set forth below.

DRAFTING INFORMATION

The principal author of this document was Charles D. Ressin, Regulations and Legal Publications Division, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other offices of the Customs Service participated in developing the document both on matters of substance and style.

AMENDMENT TO THE REGULATIONS

Paragraph (c) of § 4.1 of the Customs Regulations (19 CFR 4.1(c)) is amended to read as follows:

§ 4.1 Boarding of vessels; cutter and dock passes.

(c)(1) No person, with or without the consent of the master, except a pilot in connection with the navigation of the vessel, personnel from another vessel in connection with the navigation of an unmanned barge, an officer of Customs or the Coast Guard, an immigration or health officer, an inspector of the Animal and Plant Health Inspection Service of the U.S. Department of Agriculture, or an agent of the vessel or consular officer exclusively for purposes relating to Customs formalities, shall go on board any vessel arriving from outside the Customs territory of the United States without permission of the district director or the Customs officer in charge until the vessel has been taken in charge by a Customs officer.

(2) A person may leave the vessel for the purpose of reporting its arrival as required by law (see § 4.2), but no other person, except those designated in paragraph (c)(1) of this section, shall leave any vessel arriving from outside the Customs territory of the United States, with or without the consent of the master, without the permission of the district director of Customs or the Customs officer in charge until the vessel has been properly inspected by Customs and

COMMENTS

Eight comments were received in response to the notice of proposed amendment, six of which supported the proposal.

One commenter suggested that Customs Automated Bond Information System (ABIS) be programmed to list separately the additional amount of the bond riders on the ABIS printout. This suggestion has been adopted.

One commenter stated that the proposal does not provide any way for the surety to limit its accelerated drawback liability to a specific dollar amount under the general term bond. This commenter urged that the bonds on Customs Forms 7609 and 7611 continue to be used to cover accelerated drawback liability in all cases.

As stated in the proposal, this method of securing bond coverage for accelerated payment of drawback claims is an alternative to the present procedure, which may continue to be used. If the new procedure is used, a rider stipulating that the principal and surety assume the additional liability for refund of excess accelerated drawback payments would be attached to the General Term Bond for Entry of Merchandise (Customs Form 7595) at the time the general term bond is filed. The amount of the general term bond would be increased to include the added coverage for drawback claims. The liability of the surety would be limited to the specific dollar amount of the general term bond plus the estimated amount of drawback to be claimed during the term of the bond.

AMENDMENT TO THE REGULATIONS

After consideration of all the comments received, it has been determined that the proposed amendment should be adopted without change, as set forth below.

DRAFTING INFORMATION

The principal author of this document was Paul G. Hegland, Regulations and Legal Publications Division, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other offices of the Customs Service participated in its development.

Approved: May 11, 1978.

G. R. DICKERSON,
Acting Commissioner
of Customs.

RICHARD J. DAVIS,
Assistant Secretary
of the Treasury.

Section 22.20a of the Customs Regulations (19 CFR 22.20a) is amended by adding the following between the second and third sentences therein:

brought into the dock or anchorage at which cargo is to be unladen and until all passengers have been landed from the vessel."

(3) Every person permitted to go on board or to leave without the consent of a Customs officer under the provisions of this paragraph shall be subject to Customs and quarantine regulations.

(4) The master of any vessel shall not authorize the boarding or leaving of his vessel by any person in violation of this paragraph.

(R.S. 251, as amended, sections 1-3, 31 Stat. 58, section 624, 46 Stat. 759 (19 U.S.C. 66, 1624, 46 U.S.C. 163.)

G. R. DICKERSON,
Acting Commissioner
of Customs.

Approved: May 11, 1978.

RICHARD J. DAVIS,
Assistant Secretary of the
Treasury.

(T.D. 78-140)

PART 22—DRAWBACK

Accelerated Payment of Drawback Claims

AGENCY: United States Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: To obtain accelerated payment of a drawback claim, the claimant now must submit a bond with each claim, guaranteeing the refund of any excess payment made to him by Customs. This document amends the Customs Regulations to provide that, as an alternative, a claimant may attach a rider that assumes the additional liability for the refund of any excess accelerated drawback payment to a general term bond at the time the general term bond is filed.

EFFECTIVE DATE: June 23, 1978.

FOR FURTHER INFORMATION CONTACT:

Donald F. Beach, Carriers, Drawback and Bonds Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, 202-566-5856.

SUPPLEMENTARY INFORMATION:

BACKGROUND

"Drawback" denotes a situation in which a duty or tax, lawfully collected, is refunded or remitted, wholly or partially, because of a particular use made of the merchandise on which the duty or tax was collected. One of the more common types of drawback is that allowed upon the exportation of articles manufactured or produced in the United States with the use of

imported merchandise (section 313(a), Tariff Act of 1930 (19 U.S.C. 1313(a))). Part 22 of the Customs Regulations (19 CFR Part 22) contains provisions regarding drawback claims.

Under § 22.20a of the Customs Regulations (19 CFR 22.20a), a drawback claimant may receive payment for his claim before it is liquidated. To obtain accelerated payment the claimant must file a bond on either Customs Form 7609 or 7611, guaranteeing the refund of any excess payment made to him by Customs, together with the request for accelerated payment.

Notice of a proposal to amend § 22.20a was published in the *FEDERAL REGISTER* on November 10, 1976 (41 FR 49646). The notice proposed an alternative to the procedure provided in § 22.20a for guaranteeing the refund of any excess payment made on a drawback claim. Under the alternative procedure, a bond rider (that is, a supplemental clause) stating that the principal and surety agree to assume the additional liability for the refund of any excess payment of accelerated drawback may be attached to the General Term Bond for Entry of Merchandise (Customs Form 7595) at the time the general term bond is filed. If this rider is attached to the general term bond, the amount of that bond would be increased to include the added coverage for drawback claims so that the overall amount of protection given customs would not be reduced. The rider, with its alphabetical designation, is approved for use in the Customs Automated Bond Information System (ABIS). Several minor changes have been made to the sample rider published with the proposal. A sample rider, as revised, follows:

RIDER TO A GENERAL TERM BOND FOR ACCELERATED PAYMENT OF DRAWBACK CLAIMS

P-ACCELERATED PAYMENT OF DRAWBACK CLAIMS—TO BE ADDED TO CUSTOMS FORM 7595

In addition to the conditions appearing in the bond dated _____, in the amount of _____, executed by _____, as principal, and by _____, as surety, to which this stipulation relates, it is hereby expressly agreed by the principal and surety thereon that the following additional condition shall apply:

And if the above-bounded principal, in consideration of the receipt of accelerated payment of drawback the amount of which is based upon the principal's own computations, shall, upon demand, refund to the Customs Service the excess of the accelerated payment over the amount actually established to be due upon liquidation of the claim (it being understood and agreed that for purposes of this bond the amount due on a claim as determined by liquidation shall be binding on all parties to this obligation).

Witness our hand and seals this _____ day of _____ 19____.

_____(SEAL)
(Principal)

_____(SEAL)
(Surety)

§ 22.20a Accelerated payment of drawback claims.

*** In lieu of filing Customs Form 7609 or 7611, a claimant may provide appropriate coverage by executing and attaching an approved rider to a General Term Bond for Entry of Merchandise, Customs Form 7595, at the time of filing Customs Form 7595. When a rider is to be attached to Customs Form 7595, the amount of the bond shall be increased by the estimated amount of accelerated drawback to be claimed during the term of the bond. If actual accelerated drawback claims exceed the estimated amount of accelerated drawback, additional bond coverage shall be required. ***

(R.S. 251, as amended, sections 313, 623, 624, 46 Stat. 693, as amended, 759, as amended (19 U.S.C. 66, 1313, 1623, 1624).)

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[FRL 899-2; PAP 6H5111/T34]

SUBCHAPTER E—FOOD AND FOOD PRODUCTS

PART 193—TOLERANCES FOR PESTICIDES IN FOOD ADMINISTERED BY THE ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER 3—ANIMAL FEEDS, DRUGS, AND RELATED PRODUCTS

PART 561—TOLERANCES FOR PESTICIDES IN ANIMAL FEEDS ADMINISTERED BY THE ENVIRONMENTAL PROTECTION AGENCY

O-Ethyl *O*-[4-(methylthio)phenyl] *S*-propyl phosphorodithioate

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule extends the expiration date for food and feed additive regulations related to the experimental use of the insecticide *O*-ethyl *O*-[4-(methylthio)phenyl] *S*-propyl phosphorodithioate on cotton plants. The extension was requested by Chemagro Agricultural Division. This rule will permit the marketing of the by-products derived from treated cottonseed while further data are collected on the subject pesticide.

EFFECTIVE DATE: Effective on May 24, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. James G. Touhey, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M Street SW., Washington, D.C. 20460, 202-755-4851.

SUPPLEMENTARY INFORMATION: On June 10, 1977, the EPA announced (42 FR 29857) that in response to a petition (PAP 6H5111) submitted by Chemagro Agricultural Division, Mobay Chemical Corp., P.O. Box 4913, Kansas City, Mo. 64120, 21 CFR 193.212 and 561.233 were being established to permit the use of the insecticide *O*-ethyl *O*-[4-(methylthio)phenyl] *S*-propyl phosphorodithioate and its cholinesterase-inhibiting metabolites on growing cotton with tolerance limitations of 1 part per million (ppm) in cottonseed oil and cottonseed hulls, respectively, in accordance with an experimental use permit that was being issued concurrently under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973, 89 Stat. 751; 7 U.S.C. 136(a) et seq.). This experimental program will expire June 3, 1978.

Chemagro Agricultural Division, Mobay Chemical Corp., has requested a one-year extension of these temporary tolerances both to permit continued testing to obtain additional data and to permit the marketing of food commodities affected by the application of the insecticide to the growing raw agricultural commodity cotton.

The scientific data reported and other relevant material have been evaluated, and it has been determined that the pesticide may be safely used in accordance with the provisions of the experimental use permit which is being issued concurrently under FIFRA. It has further been determined that since residues of the pesticide may concentrate in cottonseed oil and hulls from the agricultural use provided for in the experimental use permit, the food and feed additive regulations should be extended along with the tolerance limitations. (A related document concerning the extension of temporary tolerances for residues of the subject pesticide in or on cottonseed; the meat, fat, and meat byproducts of cattle, goats, hogs, horses, poultry, and sheep; milk; and eggs appears elsewhere in today's FEDERAL REGISTER.)

Accordingly, food and feed additive regulations are established as set forth below.

Any person adversely affected by this regulation may, on or before June 22, 1978, file written objections with the Hearing Clerk, EPA, Rm. M-3708, 401 M St. SW., Washington, D.C. 20460. Such objections should be submitted in triplicate and specify the provisions of the regulation

deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by the grounds legally sufficient to justify the relief sought.

Effective on May 24, 1978, 21 CFR Parts 193 and 561 are amended as set forth below.

Dated: May 15, 1978.

(Sec. 409(c)(1), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348(c)(1)).)

EDWIN L. JOHNSON,
Deputy Assistant Administrator
for Pesticide Programs.

§ 193.212 [Amended]

1. In 21 CFR 193.212, at the end of paragraph (a) the date is changed from "June 3, 1978" to "June 3, 1979."

§ 561.233 [Amended]

2. In 21 CFR 561.233, at the end of paragraph (a), the date is changed from "June 3, 1978" to "June 3, 1979."

[4910-22]

Title 23—Highways

CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER G—ENGINEERING AND TRAFFIC OPERATIONS

PART 646—RAILROADS

Railroad-Highway Insurance Protection; Amendment

AGENCY: Federal Highway Administration, DOT.

ACTION: Amendment to final rule.

SUMMARY: This document amends the regulation on railroad-highway insurance protection by providing for an increased amount of coverage of a combined \$2 million per occurrence for bodily injury, death, and property damage. The current maximum limits of coverage now permitted are not compatible with claim amounts and awards and are inconsistent with types of insurance coverage presently being utilized in the railroad industry.

EFFECTIVE DATE: May 24, 1978.

FOR FURTHER INFORMATION CONTACT:

James A. Carney, Railroads and Utilities Branch, 202-426-0104; or Lee J. Burstyn, Attorney, Office of the Chief Counsel, 202-426-0786, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C.

20590. Office hours are from 7:45 a.m. to 4:15 p.m. ET., Monday through Friday.

SUPPLEMENTARY INFORMATION: This amendment has the effect of modifying the dollar amount of railroad-protective insurance costs which are to be reimbursed from Federal funds for damages resulting from highway construction activities. The current maximum limits of coverage now permitted are not compatible with claim amounts and awards and are inconsistent with types of insurance coverage presently being utilized in the railroad industry. The existing regulation, in paragraph (a) of § 646.111, provides separate amounts of coverage per occurrence for bodily injury, death, and property damage. The new simplified coverage would increase the maximum coverage to a combined \$2 million per occurrence. Paragraph (b) of the same section allows greater amounts of coverage in cases involving appreciably higher risks. The financial impact of this revision on the Federal-aid highway program is minimal.

The matters affected relate to grants, benefits, or contracts within the purview of 5 U.S.C. 553(a)(2); therefore, general notice of proposed rulemaking is not required.

NOTE.—The Federal Highway Administration has determined that this document does not contain a major proposal according to the criteria established by the Department of Transportation pursuant to E.O. 12044.

In consideration of the foregoing, the Federal Highway Administration is amending Chapter I of Title 23, Code of Federal Regulations, § 646.111(a) to read as follows:

§ 646.111 Amount of coverage.

(a) The maximum dollar amounts of coverage to be reimbursed from Federal funds, with respect to bodily injury, death, and property damage, is limited to a combined amount of \$2 million per occurrence, except as provided in paragraph (b) of this section.

(b) ***

(23 U.S.C. 315; 49 CFR 1.48(b).)

Issued on: May 11, 1978.

KARL S. BOWERS,
Acting Federal Highway
Administrator.

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-3363]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATIONS AND JUDICIAL REVIEW

Final Flood Elevation Determinations for the Town of Manderson, Big Horn County, Wyo.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the Town of Manderson, Big Horn County, Wyo. These base ((100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the Town of Manderson, Wyo.

ADDRESS: Maps and other information showing the detailed outline of the flood-prone areas and the final elevations for the Town of Manderson, Big Horn County, Wyo., are available for review at Town Hall, Manderson, Wyo.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the Town of Manderson, Wyo.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)).

An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Big Horn River	U.S. Highway No. 20	3,897
	Railroad bridge	3,892
Nowood River	Marshall St. Bridge	3,893

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: April 12, 1978.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

[Docket No. FI-4017]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the City of Franklin, Venango County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final Base (100-year) flood elevations are listed below for selected locations in the City of Franklin, Venango County, Pa. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the City of Franklin, Venango County, Pa.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the city of Franklin, Venango County, Pa., are available for review at the City Hall, 430 13th Street, Franklin, Pa.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the City of Franklin, Venango County, Pa.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Allegheny River....	Downstream corporate limits (extended).....	973
	4th St. (extended).....	974
	U.S. Route 322 bridge.....	976

[Docket No. FI-1080]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the Borough of Huntingdon, Huntingdon County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the borough of Huntingdon, Huntingdon County, Pa. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the borough of Huntingdon, Huntingdon County, Pa.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the borough of Huntingdon, Huntingdon County, Pa., are available for review at the bulletin board in the lobby of the Borough Building, 10th and Moore Streets, Huntingdon, Pa.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the borough of Huntingdon, Huntingdon County, Pa.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974.).

Issued: April 12, 1978.

GLORIA M. JIMENEZ,
Federal Insurance Administrator
[FR Doc. 78-13796 Filed 5-23-78; 8:45 am]

[Docket No. FI-4005]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the Township of Lawrence Park, Erie County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the township of Lawrence Park, Erie County, Pa. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the township of Lawrence Park, Erie County, Pa.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the township of Lawrence Park, Erie County, Pa., are available for review at the 2d floor of the Township Fire Hall, 4102 Main Street, Erie, Pa.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the township of Lawrence Park, Erie County, Pa.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Four Mile Run	Confluence with Lake Erie.	577
	Private drive (2,800 ft downstream of East Lake Rd.).	594
	Private drive (2,000 ft downstream of East Lake Rd.).	598
	Upstream of East Lake Rd.	630
	Footbridge (700 ft downstream of footbridge).	643
	Main St.	654
	Footbridge (1,500 ft upstream of Main St.).	669
	East Erie Commercial RR.	672
	Upstream of ConRail tracks.	681

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
McDaniel Run	Confluence with Lake Erie.	577
	Corporate limits	617
	Franklin Ave.	665
	Inlet to culvert (800 ft upstream of Franklin Ave.).	673
	ConRail	676
Lake Erie	Shoreline within community.	577

(National Flood Insurance Act of 1968 (title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: April 12, 1978.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Township of Wilkens, Allegheny County, Pa., are available for review at the Wilkens Municipal Building, 110 Peffer Road, Turtle Creek, Pa.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the Township of Wilkens, Allegheny County, Pa.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Thompson Run	Downstream corporate limits.	754
	Jones St.	757
	Union RR. (western-most bridge).	766
	Union RR. (eastern)	769
	Buena Vista Dr.	767
	Newton Rd.	808
	William Penn Highway (route 22).	828
	Union RR. (downstream).	829
	Union RR. (upstream)	836
	Upstream corporate limits.	838
Chalfant Run	Larimer Ave.	790
	Baker St.	808

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
	Rodi Rd.	856
	U.S. Route 22	857
Sawmill Run	Downstream corporate limits.	789
	Ivy St.	832
	Moss St.	840
	Private Rd. (2,200 ft. upstream of Moss St.).	895
	Private road (near Lucinda Rd.).	931
	Buelah Rd.	981

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 43 FR 7719.)

Issued: April 12, 1978.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the City of Georgetown, Georgetown County, S.C.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the city of Georgetown, Georgetown County, S.C. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the city of Georgetown, Georgetown County, S.C.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the city of Georgetown, Georgetown County, S.C., are available for review at the lobby of the Municipal Building, 1114 Front Street, Georgetown, S.C.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Ad-

ministrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the city of Georgetown, Georgetown County, S.C.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, above mean sea level
Atlantic Ocean	Fogel St.	13
(Winyah Bay,	Poplar St.	12
Sampit and	Meeting St.	12
Pee Dee Rivers).	Fraser St.	11
	Collins St.	11

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: April 12, 1978.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the City of Manassas Park, Prince William County, Va.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the city of Manassas Park, Prince William County, Va. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the city of Manassas Park, Prince William County, Va.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the city of Manassas Park, Prince William County, Va., are available for review at the Office of the City Clerk, 103 Manassas Drive, Manassas Park, Va.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determination of flood elevations for the city of Manassas Park, Prince William County, Va.

This final rule is issued in accordance with section 110 of the Flood Dis-

aster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Tributary to Bull Run.	Blooms Dr. (upstream)...	244
Tributary No. 1 to Flat Branch.	Manassas Dr. (downstream)...	268
	Downstream corporate limits.	166
	Manassas Dr. (downstream)...	184
	Manassas Dr. (upstream)...	189
	6,500 ft upstream of mouth of tributary.	209
	Upstream corporate limits.	232
Tributary A to Flat Branch tributary No. 1.	Denver Dr. (Downstream)...	185

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for Pulaski County, Va.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in Pulaski County, Va.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for Pulaski County, Va.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for Pulaski County, Va., are available for review at the County Administration Building, 3 Street, Pulaski, Va.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for Pulaski County, Va.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Peak Creek.....	State Route 99.....	1,888
	ulaski corporate limits.....	1,899
Pond Lick Branch.	State Route 674.....	1,957
	Service road (570 ft upstream of State Route 674).	1,964
Track Fork.....	State Route 674.....	1,956
	State Route 640 (1,325 ft upstream of State Route 674).	1,961
	State Route 640 (5,700 ft upstream of State Route 674).	1,966

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
	State Route 640 (6,600 ft upstream of State Route 674).	1,990
Tributary A.....	Confluence of Pond Lick Branch.	1,957
	Confluence of tributary B.	1,981
Tributary B.....	Confluence with tributary A.	1,981

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: April 11, 1978.

RULES AND REGULATIONS

[4210-01]

[Docket No. FI-3983]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATIONS AND JUDICIAL REVIEW

Final Flood Elevation Determination for the City of Shelton, Fairfield County, Conn.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the City of Shelton, Fairfield County, Conn. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the City of Shelton, Fairfield County, Conn.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of Shelton are available for review at the City-Town Clerk's Office, City Hall, 54 Hill Street, Shelton, Conn.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the City of Shelton, Fairfield County, Conn.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in

flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Housatonic River..	Confluence of Far Mill River.	15
	Confluence of Ivy Brook	17
	6,000 ft upstream of confluence of Ivy Brook.	19

[Docket No. FI-3803]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATIONS AND JUDICIAL REVIEW

Final Flood Elevation Determinations for the City of Winter Garden, Orange County, Fla.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the city of Winter Garden, Orange County, Fla. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the city of Winter Garden, Fla.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the city of Winter Garden, are available for review at City Hall, Winter Garden, Fla.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 7th Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the city of Winter Garden, Fla.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Winter Garden Co-op ditch	Fuller's Crossing Highway 72 in culvert (upstream side).	76
	Seaboard Coast Line RR. (downstream side).	91
Lake Apopka	From a point 530 ft west along Division St. from the center of the intersection of Division St. and Lakeview Ave. west to the shoreline.	69

(National Flood Insurance Act of 1968 (title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: April 12, 1978.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the Village of Bourbonnais, Kankakee County, Ill.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the village of Bourbonnais, Kankakee County, Ill. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the village of Bourbonnais, Kankakee County, Ill.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the village of Bourbonnais, Kankakee County, Ill., are available for review at the Municipal Building, P.O. Box 141, Bourbonnais, Ill.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator

gives notice of his final determinations of flood elevations for the village of Bourbonnais, Kankakee County, Ill.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided, and the Administrator has resolved the appeals presented by the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Bourbonnais Creek.	Balsillon Ave	644
	River St. culvert	657
	Main St. culvert	684
	Spencer Ct.	666
	Greenwood Ave.	667
North Branch Soldier Creek.	Tomogene Rd.	669
Kankakee River	Armour Rd.	676
	Corporate limits (southwest corner).	686

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: April 12, 1978.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the City of Farmington, San Juan County, N. Mex.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for

a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
San Juan River.....	Approximately 500 ft downstream of State Hwy 371.	5,242
LaPlata River.....	Just upstream of U.S. Hwy 550.	5,230
Animas River.....	Just downstream of South Miller Ave. Approximately 100 ft downstream of State Hwy 17.	5,281
	Confluence of Porter Arroyo.	5,301
	Confluence of Porter Arroyo.	5,360
Farmington Glade.....	Just downstream of U.S. Hwy 550.	5,260
	Just upstream of West Apache St.	5,294

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 43 FR 7719.)

Issued: April 12, 1978.

[Docket No. FI-3918]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the Town of Marilla, Erie County, N.Y.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the Town of Marilla, Erie County, N.Y. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the Town of Marilla, Erie County, N.Y.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Town of Marilla, Erie County, N.Y., are available for review at the Marilla Town Office, South 1740 Two Road, Marilla, N.Y.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the Town of Marilla, Erie County, N.Y.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Cayuga Creek.....	Corporate limit (downstream).	839
	Clinton St. (Route 354 Bridge).	859
	Clinton St. Dam (upstream).	875
	Corporate limit (upstream).	899
Buffalo Creek.....	Porterville Rd.....	833
Little Buffalo Creek.	Confluence with tributary.	819
	Two Rod Rd. Bridge.....	832
	Bulls Rd. Bridge.....	841
	East Ave. Bridge.....	856
Tributary to Little Buffalo Creek.	Confluence with Little Buffalo Creek.	819
	Bulls Rd.....	845

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33

individuals to appeal this determina-
tion to or through the community for
a period of ninety (90) days has been
provided. No appeals of the proposed
base flood elevations were received
from the community or from individ-
uals within the community.

The Administrator has developed
criteria for flood plain management in
flood-prone areas in accordance with
24 CFR part 1910.

The final base (100-year) flood eleva-
tions for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Ohio River	Intersection of 2d and Mill Sts.	576
	Intersection of Elm and Broadway Sts.	576

(National Flood Insurance Act of 1968 (title
XIII of Housing and Urban Development
Act of 1968), effective January 28, 1969 (33
FR 17804, November 28, 1968), as amended
(42 U.S.C. 4001-4128); and Secretary's dele-
gation of authority to Federal Insurance

Administrator, 34 FR 2880, February 27,
1969, as amended (39 FR 2787, January 24,
1974).)

Issued: April 12, 1978.

[Docket No. FI-3927]

PART 1917—APPEALS FROM FLOOD
ELEVATION DETERMINATION AND
JUDICIAL REVIEW

Final Flood Elevation Determination
for the Village of Neville, Clermont
County, Ohio

AGENCY: Federal Insurance Adminis-
tration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year)
flood elevations are listed below for se-
lected locations in the village of Ne-
ville, Clermont County, Ohio. These
base (100-year) flood elevations are
the basis for the flood plain manage-
ment measures that the community is
required to either adopt or show evi-
dence of being already in effect in
order to qualify or remain qualified
for participation in the National Flood
Insurance Program (NFIP).

EFFECTIVE DATE: The date of issu-
ance of the Flood Insurance Rate Map
(FIRM), showing base (100-year) flood
elevations, for the village of Neville,
Clermont County, Ohio.

ADDRESS: Maps and other informa-
tion showing the detailed outlines of
the flood-prone areas and the final
elevations for the village of Neville,
Clermont County, Ohio, are available
for review at the Neville Village Hall,
Forest Avenue, Neville, Ohio.

FOR FURTHER INFORMATION
CONTACT:

Mr. Richard Krimm, Assistant Ad-
ministrator, Office of Flood Insur-
ance, 202-755-5581 or toll free line
800-424-8872, Room 5270, 451 Sev-
enth Street SW., Washington, D.C.
20410.

SUPPLEMENTARY INFORMATION:
The Federal Insurance Administrator
gives notice of his final determinations
of flood elevations for the village of
Neville, Clermont County, Ohio.

This final rule is issued in accord-
ance with section 110 of the Flood Dis-
aster Protection Act of 1973 (Pub. L.
93-234), 87 Stat. 980, which added sec-
tion 1363 to the National Flood Insur-
ance Act of 1968 (Title XIII of the
Housing and Urban Development Act
of 1968 (Pub. L. 90-448), 42 U.S.C.
4001-4128, and 24 CFR Part 1917.4(a)).

An opportunity for the community or
individuals to appeal this determina-
tion to or through the community for
a period of ninety (90) days has been
provided. No appeals of the proposed
base flood elevations were received
from the community or from individ-
uals within the community.

The Administrator has developed
criteria for flood plain management in
flood-prone areas in accordance with
24 CFR Part 1910.

The final base (100-year) flood eleva-
tions for selected locations are:

Source of flooding	Location	Elevation in feet, above mean sea level
Ohio River	Between upstream and downstream corporate limits.	508

(National Flood Insurance Act of 1968 (Title
XIII of Housing and Urban Development
Act of 1968), effective January 28, 1969 (33
FR 17804, November 28, 1968), as amended;
42 U.S.C. 4001-4128; and Secretary's dele-
gation of authority to Federal Insurance Ad-
ministrator, 34 FR 2680, February 27, 1969,
as amended (39 FR 2787, January 24, 1974).)

Issued: April 12, 1978.

enth Street SW., Washington, D.C.
20410.

SUPPLEMENTARY INFORMATION:
The Federal Insurance Administrator
gives notice of his final determinations
of flood elevations for the unincorpor-
ated areas of Trumbull County, Ohio.

This final rule is issued in accord-
ance with section 110 of the Flood Dis-
aster Protection Act of 1973 (Pub. L.
93-234), 87 Stat. 980, which added sec-
tion 1363 to the National Flood Insur-
ance Act of 1968 (title XIII of the
Housing and Urban Development Act
of 1968 (Pub. L. 90-448), 42 U.S.C.
4001-4128, and 24 CFR part 1917.4(a)).
An opportunity for the community or
individuals to appeal this determina-
tion to or through the community for
a period of ninety (90) days has been
provided. No appeals of the proposed
base flood elevations were received
from the community or from individ-
uals within the community.

The Administrator has developed
criteria for flood plain management in
flood-prone areas in accordance with
24 CFR part 1910.

The final base (100-year) flood eleva-
tions for selected locations are:

Source of flooding	Location	Elevation in feet national geodetic vertical datum
Mahoning River	Downstream of McDonald Highway.	859
	Downstream of West Park Ave.	865
	Downstream of State Route 422.	888
	Downstream of the Ohio Turnpike.	898
West branch of the Mahoning River.	Approximately 500 ft downstream of Newton Falls corporate limits.	901

[Docket No. FI-4013]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the Township of Bristol, Bucks County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the township of Bristol, Bucks County, Pa. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the township of Bristol, Bucks County, Pa.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the township of Bristol, Bucks County, Pa., are available for review at the township hall, 2501 Oxford Valley Road, Levittown, Pa.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Ad-

ministrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the township of Bristol, Bucks County, Pa.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Delaware River	Downstream corporate limits.	11
	Burlington-Bristol Bridge.	11
	Borough of Bristol corporate limits (upstream and downstream).	11

[Docket No. FI-3879]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for Doylestown Township, Bucks County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in Doylestown Township, Bucks County, Pa. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for Doylestown Township, Bucks County, Pa.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for Doylestown Township, Bucks County, Pa., are available for review at the Doylestown Township Building, 425 Wells Road, Doylestown, Pa.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for Doylestown, Township, Bucks County, Pa.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Neshaminy Creek	Corporate limits	185
	Easton Rd.	199
	Lower State Rd.	217

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Central tributary	Confluence with Mill Creek	222
	Edison Rd.	201
	Saurman Rd.	230
	U.S. 202 bypass (upstream)	258
Mill Creek	East Rd. (upstream)	206
	Corporate limits	293
	Confluence with Neshaminy Creek	222
	Bristol Rd.	225
Pine Run	Old Iron Hill Rd.	257
	Pine Run Rd. (upstream)	261

[6820-24]**Title 41—Public Contracts and Property Management****CHAPTER 101—FEDERAL PROPERTY MANAGEMENT REGULATIONS****SUBCHAPTER E—SUPPLY AND PROCUREMENT**

[FPMR Amdt. E-221]

PART 101-26—PROCUREMENT SOURCES AND PROGRAMS**Miscellaneous Changes**

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: This regulation contains changes in selected sections of the Federal Property Management Regulations to update references and to include minor editorial and procedural changes.

EFFECTIVE DATE: May 24, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. John I. Tait, Director, Regula-

tions and Management Control Division, Office of the Executive Director, Federal Supply Service, General Services Administration, Washington, D.C. 20406, 703-557-1914.

Subpart 101-26.1—General

Section 101-26.105(a) is revised as follows:

§ 101-26.105 Justification to support negotiated procurement by GSA for other agencies.

(a) When the requisition is for items to be procured under § 1-3.202 (public exigency), civilian agencies shall use FEDSTRIP priority designator codes 03 or 06. DOD requisitioning activities, under the Uniform Materiel Movement and Issue Priority System (UMMIPS), shall use priority designator codes 01 through 06.

NOTE.—A requisition which cites a priority designator above 06 may justify negotiation under this or other negotiation authority, but in such instances the request must be accompanied by a justification setting forth specific circumstances sufficient to support the findings and determination to be made by the GSA contracting officer.

Subpart 101-26.3—Procurement of GSA Stock Items

1. Section 101-26.303 is revised as follows:

§ 101-26.303 Out-of-stock items.

Generally, it is more advantageous to agencies if GSA backorders requisitions for out-of-stock items rather than cancels requisitions. Unless notified by agencies not to backorder a requisition, through FEDSTRIP advice codes 2C or 2J, a back order will be established. The agency will be notified of the estimated date that shipment will be made. Upon receipt of the status transaction, the agency shall determine if the estimated shipping date will meet its needs and, as appropriate: (a) accept the back order, (b) request a suitable substitute item, or (c) request cancellation in accordance with § 101-26.309.

2. Section 101-26.304 is revised as follows:

§ 101-26.304 Substitution policy.

In filling a requisition from GSA stock, GSA may supply an interchangeable item, without prior notice, unless notified by agencies through FEDSTRIP advice codes 2B or 2J not to substitute. When the proposed substitute is not an interchangeable item, agencies will be offered the substitute in a status transaction, if applicable, or contacted by telephone, mail, or message.

3. Section 101-26.306 is revised as follows:

§ 101-26.306 Planned requisitioning for GSA stock items.

In preparing requisitions for GSA stock items, agencies shall follow schedules or cyclical plans for replenishment of stocks so as to reduce the number of repetitive requisitions required while adjusting ordering frequency to comply with the economic order quantity principle. (See § 101-27.102.)

4. Section 101-26.308 is revised as follows:

§ 101-26.308 Obtaining filing cabinets.

Each agency head, after taking actions prescribed in § 101-25.302-2, shall determine agency requirements for filing cabinets. When additional filing cabinets are required, requisitions shall be submitted in FEDSTRIP format to the GSA region supporting the geographic area in which the requisitioning agency is located.

Subpart 101-26.4—Purchase of Items From Federal Supply Schedule Contracts

1. Section 101-26.406-1(a) is revised as follows:

§ 101-26.406-1 General.

(a) Standard Form 149, U.S. Government National Credit Card (illustrated in § 101-26.4901-149), is authorized for use by Federal agencies in obtaining authorized services and delivery of supplies at service stations dispensing supplies of contractors listed in Defense Fuel Supply Center Contract Bulletin DSA600-3.33. Activities requiring copies of the bulletin should submit requests to: Commander, Defense Fuel Supply Center, Attention: DFSC:OD, Cameron Station, Alexandria, Va. 22314.

2. Section 101-26.406-5 is revised as follows:

§ 101-26.406-5 Methods of obtaining Standard Form 149, U.S. Government National Credit Card.

(a) *Orders for 50 or more.* (1) Agency purchase orders for 50 or more embossed Standard Forms 149 shall be forwarded to the embossing contractor as provided in Federal Supply Schedule, FSC Group 75, part VII.

(2) The embossing contractor will bill ordering agencies directly.

(3) The type font to be used when embossing Standard Form 149 shall conform with the requirements of the Federal Supply Schedule contract.

(b) *Requisitions for 49 or fewer.* (1) Agency requisitions for 49 or fewer

embossed Standard Forms 149 shall be forwarded to the Federal Supply Service, Motor Equipment Services Division, at the GSA regional office providing supply support to the requesting activity.

(2) Each agency shall furnish the billing code, billing address, and when appropriate, the vehicle tag or registration number for each Standard Form 149 requisitioned. This information shall accompany the requisition and shall be limited to five lines with no more than 22 characters (including spaces) per line. When appropriate, the expiration date and the agency series mark shall also be included on the requisition.

(3) Each requisition for a Standard Form 149 shall include an expiration date for the form not to exceed 2 years from the date of embossing.

(4) GSA will bill requisitioning agencies or will accept cash payment.

(5) The type font to be used when embossing Standard Form 149 shall conform with the requirements of the Federal Supply Schedule contract.

3. Section 101-26.407-2 is revised as follows:

§ 101-26.407-2 Applicability.

The provisions of this § 101-26.407 apply only to the purchase of security equipment under a GSA procurement program by fixed-price prime contractors and lower tier subcontractors under any type of contract. These provisions do not apply to the purchase of security equipment by cost-reimbursement type prime contractors; however, such purchases are subject to the provisions of subpart 1-5.9.

4. Section 101-26.408-3 is amended to revise paragraphs (a), the introductory sentence in (b), (b)(1), (b)(5), and (b)(6)(i) as follows:

§ 101-26.408-3 Justifications.

(a) Justifications for purchases made at prices other than the lowest delivered price available should be based on specific or definitive needs which are clearly associated with the achievement of program objectives. Mere personal preference cannot be regarded as an appropriate basis for a justification. Justifications should be clear and fully expressed. Recital of or reference to one of the factors set forth in paragraph (b) of this § 101-26.408-3 is not sufficient.

(b) The following are examples of factors that may be used in support of justifications when used with assertions that are fully set forth and documented.

(1) Special features of one item not provided by comparable items are required in effective program performance.

(5) Time of delivery in terms of actual need cannot be met by a contractor offering a lower price.

(6)
(i) Probable life of the item selected as compared with that of a comparable item at a lower cost is sufficiently greater so that the additional purchase price is economically warranted.

Subpart 101-26.5—GSA Procurement Programs

1. Section 101-26.505 is revised as follows:

§ 101-26.505 Office and household furniture and furnishings.

Requirements for new office and household furniture and furnishings as described in this § 101-26.505 shall be satisfied from GSA stock or Federal Supply Schedule contracts to the extent that agencies are required to use these sources. Requirements for items not obtainable from these sources may be satisfied by any Federal agency through GSA special buying services upon agency request pursuant to the provisions of § 101-26.102. Before initiating a procurement action for new items, items on hand should be redistributed, repaired, or rehabilitated, as feasible, pursuant to § 101-26.101.

2. Section 101-26.505-7 is revised as follows:

§ 101-26.505-7 GSA assistance in selection of furniture and furnishings.

The Customer Service Representative in each GSA regional office will, upon request, furnish agencies with information on the types, styles, finishes, coverings, and colors of office and household furniture and furnishings available through the GSA purchase program. (See § 101-26.506.)

3. Section 101-26.506-2(b) is revised as follows:

§ 101-26.506-2 Limitations.

(b) Furniture and furnishings to be obtained in connection with interior planning and design services furnished by GSA shall be acquired, to the extent available, from GSA stock or through Federal Supply Schedules in accordance with the provisions of §§ 101-26.301 and 101-26.401.

4. Section 101-26.509-1 is revised as follows:

§ 101-26.509-1 Requirements available from Federal Supply Schedule contracts.

Federal Supply Schedule, FSC Group 75, part VIII, includes contracts for tabulating cards applicable to elec-

trical and mechanical contact tabulating machines, including aperture cards and copy cards. Federal agencies shall submit their requirements for these cards in accordance with the provisions of the current schedule. Requirements not exceeding the maximum order limitation of the Federal Supply Schedule but ordered direct by activities located outside the geographical delivery areas specified in the schedule shall be ordered by submitting requisitions to the General Services Administration (2FF), 26 Federal Plaza, New York, N.Y. 10007, in FEDSTRIP format using routing identifier code GNO.

5. Section 101-26.509-2 is amended by revising paragraphs (a) and (b) as follows:

§ 101-26.509-2 Requirements not available from Federal Supply Schedule contracts.

(a) Requirements for tabulating machine cards covered by Federal Supply Schedule contracts which exceed the maximum order limitation of the schedule shall be forwarded in FEDSTRIP format using routing identifier code GNO to the General Services Administration (2FF), 26 Federal Plaza, New York, N.Y. 10007, for purchase action.

(b) Requirements for tabulating machine cards not covered by Federal Supply Schedule contracts shall be submitted to GSA for purchase action if the dollar value of the requirements exceeds or is estimated to exceed \$2,500. However, regardless of the amount involved (including requirements estimated to be \$2,500 or less), purchase action shall not be taken by GSA or an agency unless a waiver of the requirement for the use of tabulating cards available from Federal Supply Schedule contracts has been furnished in accordance with § 101-26.100-2. Requests for waivers shall be submitted to the Commissioner, Federal Supply Service, General Services Administration, Washington, D.C. 20406. The requests shall fully describe the items required and state the reasons the tabulating machine cards covered by the Federal Supply Schedule contracts will not adequately serve the end-use purpose. GSA will notify the requesting agency in writing of the action taken on the waiver request. To reduce leadtime, requisitions may be submitted in FEDSTRIP format with the requests for waiver. A requisition for items for which a waiver has first been obtained shall be submitted with a copy of the waiver to the appropriate GSA activity prescribed in § 101-26.509-1. GSA will either arrange for procurement to satisfy the requirements or authorize the requesting agency to procure the items.

RULES AND REGULATIONS

(Sec. 205(e), 63 Stat. 390 (40 U.S.C. 486(e)).)

Dated: May 17, 1978.

JAY SOLOMON,
Administrator of General Services.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 19995; RM-2275]

PART 76—CABLE TELEVISION SERVICE

Network Program Exclusivity Protection by Cable Television Systems; Order Extending Time for Filing Responses to Petitions for Reconsideration

AGENCY: Federal Communications Commission.

ACTION: Extension of time, responses to petitions for reconsideration.

SUMMARY: An extension of time has been granted for filing responses to petitions for reconsideration in Docket 19995, which concerns deletion by cable television systems of duplicating network programs on local television signals.

DATES: Responses to petitions for reconsideration will be due on or before June 20, 1978.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, D.C. 20554.

FOR FURTHER INFORMATION:

Contact Tom Hendrickson, Cable Television Bureau, 202-632-6468.

SUPPLEMENTARY INFORMATION: Adopted: May 17, 1978.

Released: May 18, 1978.

Order. In the matter of amendment of subpart F of part 76 of the Commission's rules and regulations with respect to network program exclusivity protection by Cable Television Systems, Docket No. 19995 RM-2275.

1. Several petitions have been filed asking the Commission to reconsider its decision in Memorandum Opinion and Order in Docket 19995, FCC 78-217 43 FR 16337, April 18, 1978. Other parties have officially noticed their intention to file additional timely petitions for reconsideration. Section 1.429 of the Commission's rules states that oppositions to petitions for reconsideration must be filed within 15 days after notice of the petition's filing is published in the FEDERAL REGISTER. The rule has caused some confusion in this case since the time for responding

to the first filed petition expires May 17, 1978, even though other original petitions may be filed as late as May 18 with responses not due for several weeks thereafter.

2. In order to avoid the necessity that separate responses be filed to each petition for reconsideration, the time for responding to all such petitions is being extended, on our own motion, to June 20, 1978. This should roughly correspond to the normal filing deadline for the last timely filed petition for reconsideration.

This action is taken pursuant to authority delegated to the Chief, Cable Television Bureau under § 0.288(a) of the Commission's rules.

FEDERAL COMMUNICATIONS COMMISSION,
PHILIP L. VERVEER,
Chief, Cable Television Bureau.

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S. O. No. 1327]

PART 1033—CAR SERVICE

Brillion & Forest Junction Railroad Co. Authorized to Operate Over Tracks Abandoned by Chicago & North Western Transportation Co.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order Service Order No. 1327.

SUMMARY: The Chicago & North Western (CNW), in Docket AB-1 Sub. No. 52 has been authorized to abandon its line between Rosemer, Wis., and Forest Junction, Wis. A new railroad, the Brillion & Forest Junction, has been formed by a group of shippers located in Brillion, Wis., to acquire and operate that portion of the line abandoned by the CNW between Brillion & Forest Junction. Service Order No. 1327 authorizes the Brillion & Forest Junction to commence operation of that portion of the line effective on the date of abandonment of operations by the CNW in order to provide uninterrupted rail service to shippers located at Brillion.

DATES: Effective 12:01 a.m., June 1, 1978; Expires 11:59 p.m., January 15, 1979.

Title 50—Wildlife and Fisheries

CHAPTER II.—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 230—WHALING

Taking of Bowhead Whales by Indians, Aleuts, or Eskimos for Subsistence Purposes

AGENCY: National Marine Fisheries Service.

ACTION: Final rule.

SUMMARY: Pursuant to the authority granted by the Whaling Convention Act, the National Oceanic and Atmospheric Administration (NOAA) promulgated regulations on April 3, 1978, with respect to native subsistence whaling for bowhead whales for 1978 (43 FR 13883). The regulations provide a village by village allocation of the bowhead whales that may be taken by native subsistence whalers during the year. Paragraph 230.74(c) of those regulations provides for the reassignment of quotas among native villages by the Administrator but does not allow for such assignment if, at the time, any other whaling village has exceeded its quota. This emergency amendment would permit an assignment in such case by the Administrator unless he determines that the assignment is likely to result in exceeding the overall quota for native whaling villages of twelve whales landed or eighteen struck.

DATES: This amendment is effective May 24, 1978.

ADDRESSES: Assistant Administrator for Fisheries, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, 3300 Whitehaven Street NW., Washington, D.C. 20235.

FOR FURTHER INFORMATION CONTACT:

William P. Jensen, Marine Mammal and Endangered Species Division, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C. 20235, phone 202-634-7461.

SUPPLEMENTARY INFORMATION: At a special meeting on December 6-8, 1977, the International Whaling Commission adopted an amendment to the Schedule to the International Whaling Convention (Convention) which al-

and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: The Order is printed in full below.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 16th day of May 1978.

The Chicago & North Western Transportation Co. (CNW) has been authorized by the Commission, in Docket AB-1 Sub. No. 52, to abandon its line between Rosemer, Wis., and Forest Junction, Wis., subject to a requirement that the portion of the line between Brillion, Wis., and Forest Junction be offered for sale to any responsible purchaser for continued operation as a common carrier by railroad. Such an offer has been made by the AFW Realty Co., Inc., (AFW), an association of shippers served by the affected portion of this line and has been accepted by CNW.

The offer is conditioned upon a grant of operating authority by the Commission to the Brillion & Forest Junction Railroad Co. (BFJ) which has been granted a lease of the line by AFW. The shippers who have formed AFW are solely dependent upon the continued operation of this line for essential railroad services. It is the opinion of the Commission that an emergency exists; that operation by the BFJ over these tracks abandoned by the CNW is necessary in the interest of the public and the commerce of the people; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1327 Service Order No. 1327.

(a) *Brillion & Forest Junction Railroad Co. authorized to operate over tracks abandoned by Chicago & North Western Transportation Co.* The Brillion & Forest Junction Railroad Co. (BFJ) is authorized to operate over tracks abandoned by the Chicago & North Western Transportation Co. (CNW) and owned by AFW Realty Co., Inc., between former CNW milepost 98.5 at Brillion, Wis., and milepost 105.2 at Forest Junction, Wis., pending disposition of an application of the BFJ seeking permanent authority for operation of this line.

(b) Application: The provisions of this order shall apply to intrastate, interstate, and foreign traffic.

(c) Rates applicable: Inasmuch as this operation by the BFJ over tracks previously operated by the CNW is

deemed to be due to carrier's disability, the rates applicable to traffic moved over these lines shall be the rates applicable to traffic routed to, from, or via these lines which were formerly in effect on such traffic when routed via the CNW, until tariffs naming rates and routes specifically applicable via the BFJ become effective.

(d) In transporting traffic over these lines the BFJ and all other common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(e) Effective date: This order shall become effective at 12:01 a.m., June 1, 1978.

(f) Expiration date: The provisions of this order shall expire at 11:59 p.m., January 15, 1979, unless otherwise modified, changed, or suspended by order of this Commission.

(49 U.S.C. 1(10-17).)

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members, Joel E. Burns, Robert S. Turkington, and John R. Michael. Member Joel E. Burns not participating.

H. G. HOMME, Jr.,
Acting Secretary.

[FR Doc. 78-14532 Filed 5-23-78; 8:45 am]

lowed a limited taking of bowhead whales from the Bering Sea stock: 12 whales landed or 18 struck, whichever occurs first. This amendment was published in the FEDERAL REGISTER on March 8, 1978, (43 FR 9481), as provided by section 916k of the Whaling Convention Act (16 U.S.C. 916a-1), and became binding on persons subject to the jurisdiction of the United States. On April 3, 1978, (43 FR 13883) NOAA further implemented the Schedule provisions by promulgating regulations which subdivided the overall quota among the native whaling villages of Alaska. The regulations authorize village quotas to be reassigned from one village to another, provided that no other whaling village has exceeded its quota at the time of the reassignment. The purpose of the proviso was to restrain the total take to the overall quota level.

The Spring hunt is rapidly approaching a conclusion. The season is likely to end within the next two weeks, and opportunities for whaling are rapidly disappearing from some villages. Whaling has already ceased in several villages. To date, all affected whalers, the Alaska Eskimo Whaling Commission and the entire Eskimo community have cooperated in seeking to abide by the regulations. Although one village has exceeded its quota by one whale as the result of a bona fide misunderstanding of the regulations, several villages are under their quota. The threefold purpose of the regulations—to prevent taking in excess of the limits imposed by the Schedule to the Convention, to distribute the overall quota equitably, and to provide for the critical nutritional need of the villages—would not be served by absolutely prohibiting reassignments at this point in the season due to the overage in one village.

In view of the foregoing, I find that immediate amendment of the regulations is necessary, notice and public comment thereon are impractical and contrary to the public interest, and

good cause exists for making this amendment effective immediately.

§ 230.74 [Amended]

Accordingly, 50 CFR Part 230 is amended by revising § 230.74(c) to read as follows:

(c) If for any reason the landing or struck quota for a whaling village is not reached, the part of the quota which remains may be reassigned by the Administrator, upon request of such village, to a second whaling village: *Provided*, That if any other whaling village has exceeded its quota at the time the reassignment is requested, the Administrator shall not reassign the quota if he determines that it is likely to result in the total number of whales landed or struck exceeding 12 or 18, respectively. In making such reassignment, the Administrator shall consult with representatives of as many whaling villages as time reasonably permits.

Dated: May 19, 1978.

JAMES P. WALSH,
Acting Administrator.

CHAPTER VI—FISHERY CONSERVATION AND MANAGEMENT, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 661—SALMON FISHERY

Emergency Regulations Repromulgated

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Emergency regulations.

SUMMARY: This rule extends the emergency regulations for the commercial and recreational salmon fisheries off the coast of Washington, Oregon, and California for an additional 45 days from 0001 P.d.s.t., May 29, 1978, to 2400 P.d.s.t., July 13, 1978. The emergency situation described in the initial FEDERAL REGISTER publication (43 FR 15629) on April 14, 1978, continues to exist.

EFFECTIVE DATE: May 29, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Donald R. Johnson, Director, Northwest Region, National Marine Fisheries Service, 1700 Westlake Avenue North, Seattle, Wash. 98109, telephone, 206-442-7575.

SUPPLEMENTARY INFORMATION: On April 14, 1978, the Deputy Director of the National Marine Fisheries Service, published emergency regulations in the FEDERAL REGISTER (43 FR 15629) to implement the fishery management plan for commercial and recreational salmon fisheries off the coasts of Washington, Oregon, and California prepared by the Pacific Fishery Management Council and approved by the Secretary of Commerce. The Secretary has determined that the current regulations must be continued for an additional 45-day period as authorized by section 305(e)(2) of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265; 16 U.S.C. 1801-1882).

Therefore the emergency regulations adopted on April 14, 1978, are continued in effect from 0001 hours Pacific daylight saving time May 29, 1978, to 2400 hours P.d.s.t. July 13, 1978, unless sooner amended or terminated by appropriate action and public notice.

Signed this 17th day of May, 1978, at Washington, D.C.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.
[FR Doc. 78-14450 Filed 5-23-78; 8:45 am]

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[7590-01]

NUCLEAR REGULATORY COMMISSION

[10 CFR Part 70]

DOMESTIC LICENSING OF SPECIAL NUCLEAR MATERIAL

General License Requirements For Any Person Who Possesses Special Nuclear Material (SNM) In Transit

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: Based on the Commission decision to provide a comparable level of protection for special nuclear material in the transportation sector as is now provided for special nuclear material at fixed sites, the Nuclear Regulatory Commission is considering amendments to its regulations to require any person who possesses, or who exercises control over, formula quantities of special nuclear material in transit to be responsible for assuring that the special nuclear material is protected against theft and sabotage by a security system which is implemented in accordance with a Transportation Security Plan that has received prior NRC approval. Implementation of the rule would bring persons who possess or control formula quantities of special nuclear material in transit directly under NRC physical protection regulations.

DATES: Comments must be received on or before June 23, 1978.

ADDRESSES: Comments or suggestions for consideration in connection with the proposed amendments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C., 20555, Attention: Docketing and Service Branch. Copies of comments received may be examined at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Mr. R. J. Jones, Chief, Materials Protection Standards Branch, Division of Siting, Health and Safeguards Standards, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, 301-443-6973.

SUPPLEMENTARY INFORMATION: In light of the criteria that shipments

of formula quantities of special nuclear material should be protected in the interest of national security and public health and safety, the Commission believes that carriers, and other persons presently exempt from licensing under 10 CFR 70.12 should, while in actual physical possession of strategic special nuclear material be licensed while performing the vital role of transporting formula quantities of special nuclear material. Under the present system the NRC has no legal basis for inspecting shipments in transit in the absence of a license or other formal means although such inspection is now carried out on a voluntary basis. The commission believes that the authority for inspection of common or contract carrier vehicles, aircraft, ships, carrier of shipper agents' facilities, and all mode transfer and temporary storage points associated with strategic special nuclear material shipments should be given a firm regulatory basis.

Accordingly, the Commission proposes to amend its regulation in § 70.12 of 10 CFR Part 70, that grants an exemption from regulatory requirements for carriers and other persons who may possess or control strategic special nuclear material in transit. Section 70.12 would be revised to remove the exemption from the regulations as to carriers and other persons who possess or control formula quantities of special nuclear material, subject to the physical protection requirements of 10 CFR Part 73, for the purpose of transport, or to provide storage incident to transport. A new § 70.20a would be added to Part 70 granting a general license to any person who possesses or controls formula quantities of special nuclear material in transit. The general license would be limited to possession only and would be effective during the course of a shipment. The exemption remains in effect for all other special nuclear material shipments. The general license would be subject to certain enumerated sections of Part 70 and a transportation security plan would have to be submitted and receive NRC approval before being able to possess strategic special nuclear material under the license.

The amendments proposed only codify practices and procedures presently conducted on a voluntary basis and will not require the filing of applications with the Commission or the issuing of licensing documents to particular persons by the Commission. The promulgation of the amendments will

not result in any activity that affects the environment. Accordingly, the Commission has determined under the National Environmental Policy Act, the Council of Environmental Quality guidelines, and the criteria of 10 CFR Part 51.5(d)(3), that neither an environmental impact statement or environmental impact appraisal to support a negative declaration for the proposed amendments to 10 CFR Part 70 is required.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and Section 553 of title 5 of the United States Code, notice is hereby given that adoption of the following amendments to Title 10, Chapter I, Code of Federal Regulations, Part 70 is contemplated.

1. Revision of § 70.12 to read as follows:

§ 70.12 Carriers.

Common and contract carriers, freight forwarders, warehousemen, and the U.S. Postal Service are exempt from the regulations in this part to the extent that they transport or store special nuclear material in the regular course of carriage for another or storage incident thereto. This exemption does not apply to special nuclear material subject to §§ 73.30 through 73.36 and 73.70(g) of Part 73 of this chapter and transported under the general license issued under § 70.20a.

2. Addition of a new § 70.20a to read as follows:

§ 70.20a General license is hereby issued to possess special nuclear material for transport.

A general license is hereby issued to possess special nuclear material of the types and quantities subject to the requirements of §§ 73.30 through 73.36 and 73.70(g) of Part 73 of this chapter, for the purpose of transport and storage incident thereto. The general license is subject to the provisions of §§ 70.32, 70.42, 70.52, 70.55, 70.61, 70.62, and 70.71. Any person who possesses special nuclear material for the purpose of transport under this general license:

(a) Shall have submitted and received approval of his transportation security plan. The security plan shall outline the procedures that will be used to meet the requirements of §§ 73.30 through 73.36 and 73.70(g) of Part 73 of this chapter including a

plan for the selection, qualification, and training of armed escorts, or the specification and design of a specially designed truck or trailer as appropriate.

(b) Shall assure that the transportation is in accordance with the applicable physical protection requirements of Part 73 of this chapter and the applicable approved transportation security plan.

Dated at Washington, D.C., this 17th day of May, 1978.

For the Nuclear Regulatory Commission.

SAMUEL J. CHILK, Secretary of the Commission.

[7590-01]

[10 CFR Parts 70, 73, 150]

SPECIAL NUCLEAR MATERIAL OF MODERATE AND LOW STRATEGIC SIGNIFICANCE

Safeguard Requirements

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission is considering amendments to its regulations for physical protection of plants and materials, including nonpower reactors. These amendments would require physical protection measures against theft of

Consideration is also being given to the development of additional and supplemental safeguard requirements designed specifically for nonpower reactors. These proposed requirements will be published at a later date for public comment.

special nuclear material of moderate and low strategic significance. The amendments are proposed in the interest of common defense and security. The measures proposed are designed to provide a level of protection equivalent to that recommended in Information Circular/225 (INFCIRC/225) published by the International Atomic Energy Agency (IAEA). The amendment would specify protection requirements for nuclear materials used at fixed sites, including nonpower reactors, and for nuclear materials in transit. Physical protection requirements for independent spent fuel storage installations and nuclear power reactors are presently covered under 10 CFR 73.40, 73.50, and 73.55 and therefore are not included in these amendments.

DATES: Comments must be received on or before June 23, 1978.

ADDRESSES: Comments or suggestions for consideration in connection with the proposed amendments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch. Copies of comments received may be examined at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C.

FOR INFORMATION INFORMATION CONTACT:

Mr. R. J. Jones, Chief, Material Protection Standards Branch, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, 301-443-6973, or Mr. C. K. Nulsen, Requirements Analysis Branch, Division of Safeguards, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, 301-427-4043.

SUPPLEMENTARY INFORMATION: The Nuclear Regulatory Commission

is considering amendments to its regulations in 10 CFR part 73, "Physical Protection of Plants and Materials." These amendments would require physical protection measures against theft of special nuclear material of moderate and low strategic significance.

The proposed amendments are designed to protect against the theft of special nuclear material of a type and quantity that is not directly useable in the manufacture of a nuclear weapon but which nevertheless could be of substantial assistance in such a project. The proposed amendments would provide a level of protection equivalent to that recommended for categories II and III material in information circular 225 bulletin published by the IAEA as shown in table 1. Physical protection of unirradiated SNM in categories II and III is justified on the basis of enhancing domestic protection of such materials by providing theft detection and deterrence capabilities and demonstrating U.S. willingness to accept international physical security standards.

The publication of recommended physical security measures for materials of moderate and low strategic importance by the IAEA, in information circular/225 (INFCIRC/225), was accompanied by assessments of domestic safeguards needs relative to those materials. It is the staff's judgment that the proposed requirements are technically justified and are necessary, even without taking into account the general desirability of U.S. acceptance of internationally recommended standards developed and promulgated with full U.S. participation. In the absence of protection measures, an adversary could obtain a formula quantity or more of plutonium, uranium-233 or high enriched uranium through multiple thefts of quantities of materials of moderate or low strategic significance.

TABLE 1.—IAEA categorization of nuclear material*

Material	Form	Category		
		I	II	III
1. Plutonium*	Unirradiated*	2 kg or more	Less than 2 kg but more than 500 g.	500 g or less.*
2. Uranium-235*	Unirradiated:			
	Uranium enriched to 20 pct ²³⁵ U or more	5 kg or more	Less than 5 kg but more than 1 kg.	1 kg or less.*
	Uranium enriched to 10 pct ²³⁵ U but less than 20 pct.		10 kg or more	Less than 10 kg.*
	Uranium enriched above natural, but less than 10 pct ²³⁵ U.			10 kg or more.
3. Uranium-233	Unirradiated*	2 kg or more	Less than 2 kg but more than 500 g.	500 g or less.*

*All plutonium except that with isotopic concentration exceeding 80 pct in plutonium-238.

*Material not irradiated in a reactor or material irradiated in a reactor but with a radiation level equal to or less than 100 rd/hr at 1 m unshielded.

*Less than a radiologically significant quantity should be exempted.

*Natural uranium, depleted uranium, and thorium and quantities of uranium enriched to less than 10 pct not falling in category III should be protected in accordance with prudent management practice.

*Irradiated fuel should be protected as category I, II, or III nuclear material depending on the category of the fresh fuel. However, fuel which by virtue of its original fissile material content is included as category I or II before irradiation should only be reduced one category level, while the radiation level from the fuel exceeds 100 rd/h at 1 m unshielded.

*The State's competent authority should determine if there is a credible threat to disperse plutonium malevolently. The State should then apply physical protection requirements for category I, II, or III of nuclear material, as it deems appropriate and without regard to the plutonium quantity specified under each category herein, to the plutonium isotopes in those quantities and forms determined by the State to fall within the scope of the credible dispersal threat.

In addition, quantities of uranium enriched to less than 20 percent in the uranium-235 (U-235) isotope could be diverted, without timely detection, to other countries for additional enrichment or for plutonium production.

The proposed amendments differ in substance from the IAEA categorization in that:

1. A lower limit of 15 grams for plutonium, high enriched uranium-235, or uranium-233 is set for special nuclear material of low strategic significance (category III).

2. A lower limit of 1,000 grams for uranium-235 (contained in uranium enriched to 10 percent or more but less than 20 percent in the U-235 isotope) is set for special nuclear material of low strategic significance (category III).

3. Physical protection is also explicitly required for the combination of plutonium, high enriched uranium, or uranium-233 for special nuclear material of moderate strategic significance (category II) and low strategic significance (category III), and

4. Independent spent fuel storage installations are presently covered under 10 CFR 73.40 and 73.50 and therefore are not included in these amendments.

Basically the proposed physical protection measures for special nuclear material of moderate strategic significance require:

1. Using and storing the material in a controlled access area,

2. Limiting access to the material only to authorized individuals whose trustworthiness has previously been determined,

3. Continuously monitoring the area to detect unauthorized activities, and

4. Transporting the material under controlled and planned conditions.

The proposed physical protection measures for special nuclear material of low strategic significance basically require:

1. Using and storing the material in a controlled access area,

2. Continuously monitoring the controlled access area to detect unauthorized activities, and

3. Transporting the material under controlled and planned conditions.

The proposed amendments would apply to licensees authorized to possess, use transfer, import, and export certain quantities of special nuclear material. Licensees possessing special nuclear material of low strategic significance who are licensed under the agreement states requirements of part 150 of this chapter will be required to

meet the requirements of these proposed amendments pursuant to section 274m of the Atomic Energy Act of 1954, as amended.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and section 553 of title 5 of the United States Code, notice is hereby given that adoption of the following amendments to title 10, chapter I, Code of Federal Regulations, parts 70, 73, and 150 is contemplated.

PART 70—SPECIAL NUCLEAR MATERIAL

§ 70.22 [Amended]

1. Section 70.22(g) of 10 CFR part 70 is revised as follows:

(g) Each application for a license which would authorize the transport, export, or delivery to a carrier for transport of special nuclear material in an amount specified in § 73.1(b)(2) of this chapter shall include a description of the plan for the physical protection of special nuclear material in transit in accordance with §§ 73.30 through 73.36, 73.47 (a) and (e), 73.74(g) for 10 Kg or more of special nuclear material of low strategic significance, and 73.70(g) of this chapter including a plan for the selection, qualification, and training of armed escorts, or the specification and design of a specially designed truck or trailer as appropriate.

2. Section 70.22(h) of 10 CFR part 70 is revised as follows:

(h) Each application for a license to possess or use at any site or contiguous sites subject to control by the licensee uranium-235 (contained in uranium enriched to 20 percent or more in the uranium-235 isotope), uranium-233, or plutonium alone or in any combination in a quantity of 5,000 grams or more computed by the formula, grams=(grams contained in U-235)+2.5 (grams U-233+grams plutonium), other than a license for possession or use of such material in the operation of a nuclear reactor license pursuant to part 50 of this chapter, shall include a physical security plan, consisting of two parts. Part I shall address vital equipment, vital areas, and isolation zones, and shall demonstrate

how the applicant plans to meet the requirements §§ 73.40, 73.50, 73.60, 73.70, and 73.71 of this chapter in the conduct of the activity to be licensed. Part II shall list tests, inspections, and other means to demonstrate compliance with such requirements.

3. A new § 70.22(j) is added to 10 CFR part 70 to read as follows:

(j) Each application for a license to possess or use at any site or contiguous sites subject to control by the licensee special nuclear material moderate strategic significance or 10 Kg or more of special nuclear material of low strategic significance as defined under §§ 73.2 (z) and (aa) of this chapter, other than a license for possession or use of such material in the operation of a nuclear power reactor licensed pursuant to part 50 of this chapter, shall include a physical security plan which shall demonstrate how the applicant plans to meet the requirements of § 73.47 (c) and (d) of part 73 of this chapter.

PART 73—PHYSICAL PROTECTION OF PLANTS AND MATERIALS

4. Section 73.1(b) of 10 CFR part 73 is revised to read as follows:

§ 73.1 Purpose and scope.

(b) Scope. (1) This part prescribes requirements for: (i) the physical protection of production and utilization facilities licensed pursuant to part 50 of this chapter; (ii) the physical protection of plants in which activities licensed pursuant to part 70 of this chapter are conducted, and (iii) the physical protection of special nuclear material, by any person who pursuant to the regulations in part 70 of this chapter possesses or uses at an any site or contiguous sites subject to the control by the licensee, formula quantities of strategic special nuclear material² or special nuclear material of moderate strategic significant of special nuclear material of low strategic significance.

(2) This part prescribes requirements for the physical protection of special nuclear material in transportation by any person who is licensed pursuant to the regulations in part 70 of

this chapter who imports, exports, transports, delivers to a carrier for transport in a single shipment, or takes delivery of a single shipment free on board where it is delivered to a carrier, formula quantities of strategic special nuclear material² or special nuclear material of moderate strategic significance or special nuclear material of low strategic significance.

5. Section 73.2 of 10 CFR part 73 is amended by adding new paragraphs (z) and (aa) to read as follows:

§ 73.2 Definitions.

(z) "Special nuclear material of moderate strategic significance" means:

(1) Less than formula quantities of strategic special nuclear material, but in a quantity of more than 1,000 grams of uranium-235 (contained in uranium enriched to 20 percent or more in the U-235 isotope) or more than 500 grams of uranium-233 or plutonium or in a combined quantity of more than 1,000 grams when computed by the equation, $\text{grams} = (\text{grams contained U-235}) + 2 (\text{grams U-233} + \text{grams plutonium})$, or

(2) 10,000 grams or more of uranium-235 (contained in uranium enriched to 10 percent or more but less than 20 percent in the U-235 isotope).

(aa) "Special nuclear material of low strategic significance" means:

(1) Less than an amount of strategic special nuclear material of moderate strategic significance, as defined in § 73.2(z)(1) of this part, but more than 15 grams of uranium-235 (contained in uranium enriched to 20 percent or more in the U-235 isotope) or 15 grams of Uranium-233 or 15 grams of plutonium or the combination of 15 grams when computed by the equation, $\text{grams} = \text{grams contained U-235} + \text{grams plutonium} + \text{grams U-233}$, or

(2) Less than 10,000 grams but more than 1,000 grams of uranium-235 (contained in uranium enriched to 10 percent or more but less than 20 percent in the U-235 isotope), or

(3) 10,000 grams or more of uranium-235 contained in uranium enriched above natural but less than 10 percent in the U-235 isotope.

6. A new § 73.47 is added to 10 CFR part 73 to read as follows:

§ 73.47 Licensee fixed site and in transit requirements for the physical protection of special nuclear material of moderate and low strategic significance.

(a) General performance objectives. (1) Each licensee who possesses, uses, or transports strategic nuclear materi-

al of low or moderate strategic significance shall establish and maintain a physical protection system that will achieve the following objectives:

(i) Minimize the possibilities for unauthorized removal of special nuclear material consistent with the potential consequences of such actions; and

(ii) Facilitate the location and recovery of missing special nuclear material.

(2) To achieve these objectives, the physical protection system shall:

(i) Detect and assess unauthorized access and materials introduction into, or unauthorized activities within the vicinity of special nuclear material;

(ii) Detect and assess unauthorized removal of special nuclear material;

(iii) Assure proper placement and transfer of custody of special nuclear material; and

(iv) Respond to indications of unauthorized removal of special nuclear material and communicate to appropriate response forces in order to facilitate its recovery.

(b) A licensee is exempt from the requirements of this section to the extent that he possesses, uses, or transports special nuclear material which is not readily separable from other radioactive material and which has a total external radiation dose rate in excess of 100 rems per hour at a distance of 3 feet from any accessible surface without intervening shielding.

(c) Each licensee who possesses, uses, or transports special nuclear material of moderate strategic significance or 10 Kg or more of special nuclear material of low strategic significance shall submit by (date 60 days from publication in effective form in FEDERAL REGISTER) a security plan or an amended security plan describing how the licensee will comply with all the requirements of § 73.47 (c), (d), (e), and (f), including schedules of implementation.

(d) Fixed site requirements for special nuclear material of moderate strategic significance.—Each licensee who possesses, stores, or uses quantities and types of special nuclear material of moderate strategic significance at fixed sites, except those who are licensed to operate a nuclear power reactor pursuant to part 50, shall:

(1) Store or use such material only within a controlled access area which is illuminated sufficient to allow detection and surveillance of unauthorized penetration or activities,

(2) Store such material within a vault, vault-type room, or GSA approved security cabinet,

(3) Continuously monitor with an intrusion alarm or other devices or procedures the controlled access area to detect unauthorized penetration or activities,

(4) Conduct preemployment screening to determine that trustworthiness

of employees having access to the material,

(5) Develop and maintain a controlled badging and lock system to identify and limit access to the controlled access area to authorized individuals,

(6) Limit access to the controlled area to authorized individuals who require such access in order to perform their duties,

(7) Assure that all visitors to the controlled access area are under the constant escort of an individual who has been authorized unescorted access to the area,

(8) Establish a security organization consisting of at least one watchman per shift able to assess and respond to any security incidents in the controlled access area,

(9) Provide a communication capability between the security organization and appropriate response force,

(10) Search on a random basis vehicles and packages entering or leaving the controlled access area, and

(11) Establish and maintain contingency plans for dealing with threats of thefts or thefts of such material.

(e) In transit requirements for special nuclear material of moderate strategic significance.—(1) Each licensee who transports, exports, or who delivers to a carrier for transport special nuclear material of moderate strategic significance shall:

(i) Provide advance notification to the receiver of any planned shipments specifying the mode of transport, estimate time of arrival, location of the nuclear material transfer, name of carrier and flight number, if applicable,

(ii) Receive confirmation from the receiver prior to the commencement of the planned shipment that the receiver will be ready to accept the shipment at the planned time and location and acknowledges the specified mode of transport,

(iii) Transport the material in a locked or sealed container, and

(iv) Check the integrity of the containers, locks, and seals prior to shipment.

(2) Each licensee who receives special nuclear material of moderate strategic significance shall:

(i) Check the integrity of the containers, locks, and seals upon receipt of the shipment, and

(ii) Notify the shipper of receipt of the material as required in § 70.54 of part 70 of this chapter.

(3) Each licensee who arranges for the physical protection of special nuclear material of moderate strategic significance while in transit or who takes delivery of such material free on board (f.o.b.) the point at which it is delivered to a carrier for transport shall:

(i) Arrange for a telephone or radio communications capability between

the carrier of the material and the shipper or receiver,

(ii) Minimize the time that the material is in transit by reducing the number and duration of nuclear material transfers and by routing the material in the most safe and direct manner,

(iii) Conduct preemployment screening of all licensee employees involved in the transportation of the material to determine the trustworthiness of the individual entrusted with transportation duties,

(iv) Establish and maintain contingency plans for dealing with threats of thefts or thefts of such material,

(v) Make arrangements to be notified immediately of the arrival of the shipment at its destination, or of any such shipment that is lost or unaccounted for after the estimated time of arrival at its destination, and

(vi) Conduct immediately a trace investigation of any shipment that is lost or unaccounted for after the estimated arrival time and report to the Nuclear Regulatory Commission as specified in § 73.71 and to the shipper or receiver as appropriate. The licensee who made the physical protection arrangements shall also immediately notify the Director of the appropriate Nuclear Regulatory Commission Inspection and Enforcement Regional Office listed in appendix A of the action being taken to trace the shipment.

(4) Each licensee who exports special nuclear material of moderate strategic significance shall comply with the requirements specified in § 73.47 (c) and (e) (1) and (3) up to the first point where the shipment is offloaded outside the United States.

(5) Each licensee who imports special nuclear material of moderate strategic significance shall:

(i) Comply with the requirements specified in § 73.47 (c) and (e) (2) and (3) from the first point where the shipment is picked up inside the United States, and

(ii) Notify the exporter who delivered the material to a carrier for transport of the arrival of such material.

(f) Fixed site requirements for special nuclear material of low strategic significance.—Each licensee who possesses, or uses special nuclear material of low strategic significance at fixed sites except those who are licensed to operate a nuclear power reactor pursuant to part 50 of this chapter, shall:

(1) Store or use such material only within a controlled access area,

(2) Continuously monitor with an intrusion alarm or other devices or procedures the controlled access area to detect unauthorized penetrations or activities,

(3) Assure that a guard, watchman, or offsite response force will respond

to all unauthorized penetrations or activities, and

(4) Establish and maintain contingency plans for dealing with threats of thefts or thefts of such material.

(g) In transit requirements for special nuclear material of low strategic significance.—(1) Each licensee who transports or who delivers to a carrier for transport special nuclear material of low strategic significance shall:

(i) Provide advance notification to the receiver of any planned shipments specifying the mode of transport, estimated time of arrival, location of the nuclear material transfer, name of carrier and flight number, if applicable,

(ii) Receive confirmation from the receiver prior to commencement of the planned shipment that the receiver will be ready to accept the shipment at the planned time and location and acknowledges the specified mode of transport,

(iii) Transport the material in locked or sealed containers, and

(iv) Check the integrity of the containers, locks, and seals prior to shipment.

(2) Each licensee who receives quantities and types of special nuclear material of low strategic significance shall:

(i) Check the integrity of the containers, locks, and seals upon receipt of the shipment, and

(ii) Notify the shipper of receipt of the material as required in § 70.54 of part 70 of this chapter.

(3) Each licensee who arranges for the physical protection of special nuclear material of low strategic significance while in transit or who takes delivery of such material free on board (f.o.b.) the point at which it is delivered to a carrier for transport shall:

(i) Establish and maintain contingency plans for dealing with threats of thefts or thefts of such material,

(ii) Make arrangements to be notified immediately of the arrival of the shipment at its destination, or of any such shipment that is lost or unaccounted for after the estimated time of arrival at its destination, and

(iii) Conducted immediately a trace investigation of any shipment that is lost or unaccounted for after the estimated arrival time and report to the Nuclear Regulatory Commission as specified in § 73.71 and to the shipper or receiver as appropriate. The licensee who made the physical protection arrangements shall also immediately notify the Director of the appropriate Nuclear Regulatory Commission Inspection and Enforcement Regional Office listed in appendix A of the action being taken to trace the shipment

(4) Each licensee who exports special nuclear material of low strategic significance shall comply with the appropriate requirements specified in § 73.47

(c) and (g) (1) and (3) up to the first point where the shipment is offloaded outside the United States.

(5) Each licensee who imports special nuclear material of low strategic significance shall:

(i) Comply with the requirements specified in § 73.47 (c) and (g) (2) and (3) from the first point where the shipment is picked up inside the United States, and

(ii) Notify the person who delivered the material to a carrier for transport of the arrival of such material.

7. Section 73.71(a) of 10 CFR part 73 is changed as follows:

§ 73.71 Reports of unaccounted for shipments, suspected theft, unlawful diversion, or industrial sabotage.

(a) Each licensee who conducts a trace investigation of a lost or unaccounted for shipment pursuant to § 73.36(f), § 73.47(e)(3)(vi), or § 73.47(g)(3)(iii) shall immediately report to the appropriate NRC Regional Office listed in appendix A of this part the details and results of his trace investigation and shall file within a period of fifteen (15) days a written report to the appropriate NRC Regional Office setting forth the details and results of the trace investigation. A copy of such written report shall be sent to the Director of Inspection and Enforcement, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

8. Section 73.72 of 10 CFR part 73 is amended as follows:

§ 73.72 Requirement for advance notice of shipment of special nuclear material.

Each licensee who plans to import, export, transport, deliver to a carrier for transport in a single shipment, or take delivery at the point where it is delivered to a carrier, formula quantities of strategic special nuclear material shall notify the Director of the appropriate Nuclear Regulatory Commission Inspection and Enforcement Regional Office listed in appendix A by U.S. Mail, postmarked at least 7 days in advance of the shipping date. The following information shall be furnished in the advance notice: shipper, receiver, carrier(s), estimated date and time of departure and arrival, transfer point(s), and mode(s) of shipment. The Director of the appropriate Nuclear Regulatory Commission Inspection and Enforcement Regional Office shall also be notified by telephone 7 days in advance of the shipping date that an advance shipping notice has been sent by mail, and of any changes to the shipment itinerary prior to the shipment date. Road shipments or transfers with one way transit times of 1 hour or less in duration

²As defined in § 73.2 (t) and (u) of the proposed rule published in 42 FR 34310 dated July 5, 1977.

between installations of a licensee are exempt from the requirements of this section.

PART 150—EXEMPTIONS AND CONTINUED REGULATORY AUTHORITY IN AGREEMENT STATES UNDER SECTION 274

9. A new § 150.14 of 10 CFR part 150 is added to read as follows:

§ 150.14 Commission regulatory authority for physical protection.

Persons in Agreement States possessing, using, or transporting special nuclear material of low strategic significance, that is, in quantities greater than 15 grams of plutonium or uranium-233 or uranium-235 (enriched to 20 percent or more in the U-235 isotope) or any combination greater than 15 grams when computed by the equation grams=grams plutonium+grams uranium-233+grams uranium-235 (enriched to 20 percent or greater in the U-235 isotope), shall meet the physical protection requirements of § 73.47 of 10 CFR part 73.

Dated at Washington, D.C., 12th day of May 1978.

For the Nuclear Regulatory Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

COMMODITY FUTURES TRADING COMMISSION

[17 CFR Parts 1 and 17]

REPORTING OMNIBUS ACCOUNTS ON A GROSS BASIS

Proposed Rulemaking

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rulemaking.

SUMMARY: In the December 9, 1977, FEDERAL REGISTER (see 42 FR 62147) the Commodity Futures Trading Commission ("the Commission") proposed to amend its regulations to require that omnibus accounts be carried and reported on a gross basis. Because of the wording of the proposal, many of the commentators misinterpreted the amendments to mean that a futures commission merchant or foreign broker must carry and report the futures position of individual accounts that are traded through the omnibus account.

The proposal, however, was meant to require that only the total position of all of the individual accounts traded through the omnibus account need be carried and reported on a gross basis. The Commission at this time wishes to clarify the language in its previous proposal in order to accurately assess the impact of its proposed regulation.

PROPOSED RULES

DATES: Comments must be received on or before June 23, 1978.

ADDRESS: Comments on the proposal should be sent to: Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581. Attention: Secretariat.

FOR FURTHER INFORMATION CONTACT:

Lamont L. Reese, Office of Chief Economist, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581, telephone 202-254-7446.

SUPPLEMENTARY INFORMATION: On December 9, 1977, the Commission proposed changes to Parts 1 and 17 of the regulations under the Commodity Exchange Act which would require FCM's to carry and report the aggregate gross long and gross short futures positions of all individual accounts traded through an omnibus account. The primary purpose for proposing these changes was to insure the availability of gross position information on a more timely and expeditious basis for market surveillance.

From the comments received by the Commission, it was apparent that, for the most part, this proposal was misunderstood. As the proposal was stated in the FEDERAL REGISTER, it was possible for persons to interpret it to require that positions in individual accounts which traded through the omnibus account be carried and reported on an individual basis. The intent of the proposal, however, was to require that the total position of all individual accounts trading through the omnibus account be carried and reported on an aggregate gross long and short basis by the FCM carrying the omnibus account. The Commission is therefore changing the language of its proposed § 1.33b.

Some FCM's who asked for and received clarification of the December 9, 1977, proposal indicated that, since omnibus accounts that traded futures contracts offered on the New York Mercantile Exchange and Chicago Mercantile Exchange were carried and reported on a gross basis, all omnibus accounts which they carried were carried and reported on a gross basis. Another FCM, however, noted that if this proposal were adopted they would be required to maintain a manual system for reporting (in addition to their computer system) at considerable expense and effort. In order to weigh the costs that would be imposed by adoption of the proposed changes, the Commission is particularly interested in receiving estimated cost figures from interested persons. Numbers of omnibus accounts that are carried by an FCM would also be helpful in this respect.

In consideration of the foregoing, the Commission, pursuant to its au-

thority contained in sections 4g(1), 4g(3), 4g(4), and 8a(5) of the Commodity Exchange Act, 7 U.S.C. 6g(1), 6g(3), 6g(4), and 12a(5) (Supp. V, 1975), hereby proposes to amend Parts 1 and 17 of Chapter I of Title 17 of the Code of Federal Regulations as follows:

PART 1—GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

1. A new § 1.33b is added to read as follows:

§ 1.33b Record of Positions in Omnibus Account.

Each futures commission merchant who carries an account for another futures commission merchant, foreign broker, member of a contract market or other person on an omnibus basis shall record and maintain a daily record of the total of all long open contracts and the total of all short open contracts in each future carried at the close of the market each day for individual accounts which are traded through the omnibus account. Such gross positions shall be reported to the Commission for each business day in accordance with the requirements of Part 17 of this chapter.

PART 17—REPORTS BY FUTURES COMMISSION MERCHANTS AND FOREIGN BROKERS

2. Add a new § 17.04 to read as follows:

§ 17.04 Reporting Positions in Omnibus Accounts.

When submitting reports required in § 17.00(a) of these regulations respecting omnibus accounts, each futures commission merchant shall show gross positions (i.e., the total long contracts and the total short contracts for all individual accounts included in any such omnibus account) in any commodity.

Issued in Washington, D.C., on May 19, 1978, by the Commission.

WILLIAM T. BAGLEY,
Chairman, Commodity Futures Trading Commission.

[6570-06]

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

[29 CFR Part 1601]

706 AGENCIES

Proposed Designations

AGENCY: Equal Employment Opportunity Commission.

ACTION: Proposed rule.

SUMMARY: The Equal Employment Opportunity Commission proposes to amend its regulations on designation

of certain State and local agencies so that they may handle employment discrimination charges filed with the Commission. Proposed are State and local agencies that requested deferral designation as provided under the authority of Title VII of the Civil Rights Act of 1964, as amended. The proposal would authorize the agencies listed to process charges deferred to them by the Commission.

DATES: Comments must be received by June 8, 1978.

ADDRESS: Comments should be sent to: Equal Employment Opportunity Commission, Office of Field Services (State and Local), 2401 E Street NW., Washington, D.C. 20506.

FOR FURTHER INFORMATION CONTACT:

Richard A. Grossman, Coordinator, telephone, 202-634-6040, Equal Opportunity Commission, Office of Field Services (State and Local), 2401 E Street NW., Washington, D.C. 20506.

SUPPLEMENTARY INFORMATION: Pursuant to § 1601.71, Title 29, Chapter XIV of the Code of Federal Regulations as revised and published in the FEDERAL REGISTER, 42 FR 55388, October 14, 1977, the Equal Employment Opportunity Commission (hereinafter referred to as the Commission) proposes that each of the agencies listed below be designated as a "706 Agency", § 1601.70(a). Three (3) purposes for such designation are as follows: First, that the agencies receive charges deferred by the Commission pursuant to Section 706(c) and (d) of Title VII of the Civil Rights Act of 1964, as amended; second, that the Commission accord "substantial weight" to the final findings and orders of the agencies pursuant to Section 706(b) of Title VII of the Civil Rights Act of 1964, as amended; and third, to commence the 15 day period within which any person or organization may file written comments as provided for under § 1601.71(1).

At the expiration of the 15 day period, the Commission may effect designation of the agencies by publishing them as an amendment to § 1601.74(a).

With the limitations set forth in the Footnotes below, the proposed "706 Agencies" are as follows:

Lincoln (Nebraska) Commission on Human Rights.¹

¹The Lincoln (Nebraska) Commission on Human Rights has been proposed as a 706 agency for all charges except (1) charges by any "applicant for membership" alleging a violation of 703(c)(2) of Title VII; (2) charges alleging that a "joint labor-manage-

ment committee" has violated § 704(a) of Title VII; (3) charges alleging that a "joint labor-management committee" has violated § 704(b) of Title VII; and (4) charges by any "applicant for employment alleging a violation of § 703(a)(2) of Title VII. For these types of charges, it shall be deemed a "Notice Agency," pursuant to 29 CFR 1601.71(3).

²The Commission of Puerto Rico Department of Labor has been proposed as a 706 agency for all charges except (1) charges alleging a violation of Title VII on the basis of national origin; (2) charges alleging a "labor union" has violated Title VII; (3) charges alleging an "employment agency" has violated Title VII; (4) charges alleging violations of Title VII by agencies or instrumentalities of the Government of Puerto Rico when they are not operating as private businesses or enterprises; and (5) charges alleging violation of § 704(a) of Title VII. For these types of charges it shall be deemed a "Notice Agency," pursuant to 29 CFR 1601.71(3).

³The Augusta-Richmond County (Ga.) Human Relations Commission has been proposed as a 706 agency for all charges except charges alleging a violation of Title VII by a government, government agency, or political subdivision of the State of Texas. For these types of charges it shall be deemed a "Notice Agency," pursuant to 29 CFR 1601.71(3).

⁴The Austin (Texas) Human Relations Commission has been proposed as a 706 agency for all charges except charges alleging a violation of Title VII by a government, government agency, or political subdivision of the State of Texas. For these types of charges it shall be deemed a "Notice Agency," pursuant to 29 CFR 1601.71(3).

⁵The Florida Commission on Human Relations has been proposed as a 706 agency for all charges except charges alleging a violation of Title VII by a government, government agency, or political subdivision of the State of Texas. For these types of charges it shall be deemed a "Notice Agency," pursuant to 29 CFR 1601.71(3).

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Delayed Compliance Order For St. Joe Paper Co., Port St. Joe, Fla.

AGENCY: Environmental Protection Agency.

ACTION: Proposed Rule.

SUMMARY: EPA proposes to issue a Delayed Compliance Order (DCO) to St. Joe Paper Co. The DCO requires St. Joe Paper Co. to bring power boiler No. 4 at its Port St. Joe, Fla., facility into compliance with certain regulations contained in the Federally approved Florida State Implementation Plan (SIP). Because St. Joe Paper Co. is unable to comply with these regulations at this time, the proposed DCO would establish an expeditious schedule requiring final compliance on July 15, 1978. If issued by EPA, the DCO would alter the rights of persons to bring judicial actions against the source for violations of the SIP. The purpose of this notice is to invite public comment and to offer an opportunity to request to public hearing on this proposed DCO.

DATES: Written comments and requests for a public hearing must be received on or before June 22, 1978. All requests for a public hearing should be accompanied by a statement as to why the hearing would be beneficial and a text or summary of any proposed testimony to be offered at the hearing. If necessary, a hearing will be held and the public will be notified thirty days in advance.

ADDRESS: Comments and request for a public hearing should be submitted to Paul J Traina, Director, Enforce-

ment Division, EPA, Region IV, 345 Courtland Street, Atlanta, Ga. 30308. Material supporting the Delayed Compliance Order and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Wayne Aronson, Air Enforcement Branch, Enforcement Division, EPA, Region IV, 345 Courtland Street, NE., Atlanta, Ga. 30308, telephone number 404-881-4253.

SUPPLEMENTARY INFORMATION: St. Joe Paper Co. located in Port St. Joe, Fla., was issued a Consent Order on January 20, 1976, by the Florida Department of Environmental Regulation (DER) containing a compliance schedule for power boiler No. 4 final compliance was not achieved by the date contained in that said order.

Pursuant to Section 113(a)(1) of the Act, 42 U.S.C. 1857-c-8, (now 42 U.S.C. 7413(a)(1)), the Environmental Protection Agency issued a Notice of Violation to St. Joe Paper Co. of the finding that power boiler No. 4 was operating in violation of Chapter 17-2.04(2), Air Pollution Rules for the State of Florida, dealing with the control of particulate emissions from process sources. This regulation is part of the Federally approved State Implementation Plan. This Notice was issued on August 1, 1977.

On November 29, 1976, the Florida DER filed first interrogatories against St. Joe Paper Co. with the Judicial Circuit and on July 13, 1977, the Judge of the 14th Judicial Circuit upheld the company's claim of a "force majeure" incident and the validity of the "force majeure" clause contained in the January 20, 1976, DER Consent Agreement. Since EPA's policy mandates that a "force majeure" situation does not release a source from its legal obligation to achieve compliance with applicable air pollution regulations, appropriate enforcement action is required.

This Agency believes that the Delayed Compliance Order satisfies the applicable requirements of Section 113(d) of the Act. The Delayed Compliance Order requires final compliance with Chapter 17-2.04(2) by July 15, 1978, and the source has consented to its terms. The source has agreed to meet the Delayed Compliance Order's increments during the period of this informal rulemaking. If the Delayed Compliance Order is issued, source compliance with its terms would preclude further EPA enforcement action under Section 113 of the Act against this source for violations of the regulation covered by the Delayed Compliance Order during the period the Delayed Compliance Order is in effect.

Enforcement against the source under the citizen suit provision of the Act (section 304) would be similarly precluded. Comments received by the date specified above will be considered in determining whether EPA should issue the Delayed Compliance Order. Testimony given at any public hearing concerning the Delayed Compliance Order will also be considered. After the public comment period, and after EPA has reviewed any comments received in response to this notice, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the Order in 40 CFR Part 65.

The provisions of 40 CFR Part 65 will be promulgated by EPA soon, and will contain the procedures for EPA's issuance, approval, or disapproval of a Delayed Compliance Order under Section 113(d) of the Act. In addition, Part 65 will contain sections listing or including orders issued, approved, or disapproved by EPA. A prior notice proposing regulations for Part 65, published at 40 FR 14876 (April 2, 1975), will be withdrawn, and replaced by a notice promulgating these new regulations.

Dated: April 27, 1978.

JOHN C. WHITE,
Regional Administrator.

In consideration of the foregoing, it is proposed to amend Part 65 of Chapter I, Title 40, Code of Federal Regulations as follows:

PART 65—DELAYED COMPLIANCE ORDERS

1. By adding § 65.140 to read as follows:

§ 65.140 Federal delayed compliance orders issued under Section 113(d) (1), (3), and (4) of the Act.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

[Docket No. DCO-78-1]

DELAYED COMPLIANCE ORDER

In the matter of St. Joe Paper Co., Port St. Joe, Fla., proceeding under Section 113(d) Clean Air Act, as amended.

This Delayed Compliance Order is issued this date pursuant to Section 113(d) of the Clean Air Act, as amended, 42 U.S.C. 7413(d) (hereinafter referred to as the "Act"). This Delayed Compliance Order contains a schedule for compliance, interim requirements, and monitoring and reporting requirements. Public notice, opportunity for a public hearing, and thirty days notice to the State of Florida have been provided pursuant to Section 113(d)(1) of the Act.

FINDINGS

On August 1, 1977, Mr. John A. Little, Acting Regional Administrator, Region IV, United States Environmental Protection Agency, pursuant to authority delegated to him by the administrator, issued a Notice to St. Joe Paper Co. (hereinafter referred to as the "Company"), that power boiler No. 4

was found to be in violation of the Air Pollution rules of the State of Florida Department of Environmental Regulation, Chapter 17-2.04(2), dealing with the control of particulate emissions from process sources. Said violations have continued beyond the 30th day after receipt of the Regional Administrator's notification to the Company.

After a thorough investigation and analysis of all relevant facts including the fact that the Company could not comply immediately and installation of control equipment is necessary to facilitate compliance with the applicable Florida air pollution regulation, EPA has determined that compliance in accordance with the schedule hereinafter set forth is reasonable and as expeditious as practicable.

ORDERED

I.—*Abatement Program.* That the attached Appendix governing an abatement program is incorporated into and made a part of this Delayed Compliance Order for the control of particulate emissions at St. Joe Paper Co. located in Port St. Joe, Fla.

The Appendix is designated as follows:

Appendix A: Power Boiler No. 4.

II.—*Reporting—Addresses.* That all submissions of source performance test results, reports and other items required by this Delayed Compliance Order be made to Paul J. Traina, Director, Enforcement Division, United States Environmental Protection Agency, 345 Courtland Street, Atlanta, Ga. 30308 (hereinafter referred to as the "Director"), with copies to the Secretary, Florida Department of Environmental Regulation, 2600 Blair Stone Road, Twin Towers Office Building, Tallahassee, Fla. 32301 (hereinafter referred to as the "Secretary").

III.—*Progress Reports and Milestone Certification.* That the Company submit, no later than five (5) days after the end of each month, commencing with April 1, 1978, a monthly progress report for the emission point specified in Part I. These reports shall contain specific information on the progress toward each milestone in Part I. If any delay is anticipated in meeting said milestones, the Company shall immediately notify the Director in writing of the anticipated delay and reasons therefor. Notification to EPA of any anticipated delay shall not excuse the delay. In addition, the Company shall submit, no later than five (5) days after the deadline for completing each milestone required by Part I, certification to the Director, and Secretary whether such milestone has been met.

IV.—*Notice of Tests.* That the Company provide the Director and Secretary with twenty (20) days notice prior to the conducting of any performance tests as required by Part I in order to afford an opportunity to evaluate the test procedure and to have an observer present at such testing.

V.—*Malfunctions and Breakdowns.* That the Company shall perform operation and maintenance practices on all sources as necessary to prevent breakdowns or malfunctions and to reduce emissions in excess of regulations to the maximum extent practicable. When emissions due to sudden and unforeseen malfunction of the affected facility are or may be in excess of the maximum allowable as set forth in this Delayed Compliance Order, for greater than four (4) hours, the owner or operator shall notify this office and the appropriate state or local air pollution control agency by telephone or telegram as promptly as possible, and in no event later than twelve (12) hours following

the start of such malfunction, and shall cause written notice to be sent to the Director and the Secretary, no later than the end of the next working day following the start of such malfunction. Such notices shall specify the name of the affected facility, its location, the address and telephone number of the person responsible for the affected facility, the nature and cause of the malfunction, the date and time when such malfunction was first observed, the expected duration, and an estimate of the physical and chemical composition, rate, and concentration of the emission. The Company shall remedy the malfunction or breakdown as soon as possible thereafter and shall take reasonable steps to reduce emissions in excess of the interim emission limits during the malfunction or breakdown.

The Regional Administrator shall have the authority during a breakdown or malfunction to require the Company to take specific steps to reduce emissions, including process equipment modifications and/or reductions, or termination if necessary. Within ten (10) days after the termination of a breakdown or malfunction requiring the above notification, the owner shall submit:

(1) The time the excess emission began and ended;

(2) The time of the beginning and end of the breakdown or malfunction which is asserted to be the cause of the excess emission;

(3) An estimate of the physical and chemical composition, rate, and concentration of emissions which occurred, and where continuous monitoring is required or is in effect (including visible emission detector), the strip charts with plots of all emissions monitored versus time, including a summary of the monitoring instruments' written record expressed in units of the applicable standards;

(4) An explanation and, where appropriate, an engineering analysis of the cause of the malfunction or breakdown;

(5) A description of those operating and/or maintenance procedures and practices in use prior to and during the occurrence, which were designed to prevent or minimize the extent and duration of the malfunction or breakdown;

(6) Any other steps taken to minimize the extent or duration of the malfunction or breakdown;

(7) An analysis of what steps will be taken to prevent or minimize similar occurrences in the future; and

(8) Such additional information as the Regional Administrator may require.

VI.—*Interim Limits.* At no time shall (1) the particulate emissions from the No. 4 power boiler exceed 5,600 pounds per day or, (2) the visible emissions from the No. 4 power boiler exceed 40 percent opacity, prior to attainment of the last milestone. These interim emission limitations shall be effective immediately. The Company shall take all necessary precautions to assure that its emissions will not cause or contribute to a violation or violations of ambient air quality standards. The applicable State emission limitation shall apply after attainment of the last milestone.

VII.—*Continuous Monitoring.* That the Company, as part of the control strategy and pursuant to Section 113(a) and 114 of the Act, shall on or before May 1, 1978, submit a plan for the installation, calibration, maintenance, and operation of monitoring devices which (1) continuously meas-

ure and permanently record the total pressure drop across the process scrubbing system, and (2) continuously measure and permanently record mass flow of wood waste fed to the boiler as identified in Part I. As a minimum, the plan shall include the following: (1) Operation, calibration, maintenance, accuracy, and operating range of the continuous monitoring equipment; (2) a time schedule for installation of the continuous monitoring equipment for the boiler identified in Part I of this Delayed Compliance Order with final installation no later than July 15, 1978. Said monitoring plan shall be subject to review, modification, and approval by the Director. Upon approval, the monitoring and recording plan will be incorporated into and become enforceable as part of this Delayed Compliance Order.

VIII.—*Compliance Responsibility.* Nothing herein shall affect the responsibility of the source to comply with all applicable Federal, State or local regulations.

IX.—*Termination of Order.* This Delayed Compliance Order shall be terminated in accordance with Section 113(d)(8) of the Act if the Administrator determines on the record after notice and hearing, that an inability to comply with Chapter 17-2.04(2) no longer exists.

X.—*Violation of Requirements.* Violation of any requirement of Parts I through XIII of this Delayed Compliance Order shall result in one or more of the following actions:

(a) Enforcement of such requirement through the commencement of a civil action for injunctive relief and the assessment of civil penalties pursuant to Section 113(b) of the Act, or a criminal prosecution pursuant to Section 113(c) of the Act, or both;

(b) Revocation of this Delayed Compliance Order, after notice and opportunity for a public hearing, and subsequent enforcement of Chapter 17-2.04(2) in accordance with Sections 113(b) and/or (c) of the Act.

XI.—*Noncompliance Penalty.* Failure by the Company to achieve and certify compliance by July 15, 1978, and maintain compliance thereafter, shall result in one or more of the actions identified in Part X(a). In addition, noncompliance beyond July 1, 1979, will subject the Company to an Administrative assessed noncompliance penalty pursuant to the requirements of Section 120 of the Act and any rules and regulations promulgated pursuant thereto, unless the Company is exempted by Section 120(a)(2)(B) or (C) of the Act. In the event of noncompliance after July 1, 1979, the Company will be formally notified of its noncompliance pursuant to Section 120(b)(3) of the Act.

XII.—*Waiver of Rights.* That by consenting to the terms and conditions of this Delayed Compliance Order, the Company waives any and all rights it may have to seek a stay of enforcement of this Delayed Compliance Order in connection with any judicial review of the Florida State Implementation Plan or portion thereof.

XIII.—*Effective Date.* This Delayed Compliance Order will have full force and effect upon execution.

APPENDIX A.—U.S. ENVIRONMENTAL PROTECTION AGENCY

DELAYED COMPLIANCE ORDER¹

The St. Joe Paper Co. shall complete the following acts with respect to control of par-

¹This appendix is attached to and incorporated by reference into a Delayed Compli-

ment Division, EPA, Region IV, 345 Courtland Street, Atlanta, Ga. 30308. Material supporting the Delayed Compliance Order and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

1. April 30, 1978—Complete delivery of all necessary materials for the installation of the air pollution control equipment at the facility.

2. June 30, 1978—Complete installation and start-up of the air pollution equipment to control particulate emissions from power boiler No. 4.

3. July 15, 1978—Complete shake-down operations and performance tests on power boiler No. 4; also, achieve compliance with the Air Pollution Rules of the State of Florida, Chapter 17-2.04(2) and certify such compliance to the Director.

CONSENT²

St. Joe Paper Co. acknowledges that the particulate emissions from its power boiler No. 4 located at its facility in Port St. Joe, Fla., are in violation of the applicable emission limitations contained in the federally approved Florida State Implementation Plan. St. Joe Paper Co. has reviewed this Delayed Compliance Order, believes it to be a reasonable and expeditious means to achieve compliance with the applicable particulate emission limiting regulations as contained in the federally approved Florida State Implementation Plan, and consents to all of the requirements and terms of this Delayed Compliance Order.

Furthermore, St. Joe Paper Co. acknowledges the necessity of complying with the interim emission limitations and abatement procedures contained herein which are designed to ensure the attainment and maintenance of National Ambient Air Quality Standards for particulates and consents to said interim emission limitations and abatement procedures in order to protect the public health and welfare.

St. Joe Paper Co. hereby represents that it has full corporate authority and the necessary corporate approval to enter into and perform in accordance with the terms and provisions of this Delayed Compliance Order. The signatory below represents that he has the requisite corporate authority to execute this Consent of behalf of St. Joe Paper Co.

Dated March 29, 1978.

J. C. BELIN, PREIDENT,
St. Joe Paper Co.

[FR Doc. 78-14445 Filed 5-23-78; 8:45 am]

ance Order issued to St. Joe Paper Co. on — pursuant to Section 113(d) of the Clean Air Act, 42 U.S.C. 7413(d).

²This Consent is hereby attached to and incorporated by reference into a Delayed Compliance Order issued to the St. Joe Paper Co. on — Pursuant to Section 113(d) of the Clean Air Act, 42 U.S.C. 7413(d).

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 17]

ENDANGERED AND THREATENED WILDLIFE
AND PLANTSProposed Determination of Critical habitat for
the Hawksbill Sea TurtleAGENCY: Fish and Wildlife Service,
Interior.

ACTION: Critical Habitat proposal.

SUMMARY: The Service hereby proposes Critical Habitat for the hawksbill sea turtle (*Eretmochelys imbricata*) in the Commonwealth of Puerto Rico. This proposal would make these areas subject to full protection under section 7 of the Endangered Species Act of 1973 and is being taken to insure the integrity of beaches on Isla Mona and Culebra Island, areas which contain a significant nesting aggregation of hawksbill sea turtles.

DATES: Comments from the public must be received by July 23, 1978. Comments from the Governor of the Commonwealth of Puerto Rico must be received by August 22, 1978.

ADDRESSES: Submit comments to Director (OES), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240. Comments and materials received will be available for public inspection during normal business hours at the Service's Office of Endangered Species, Suite 1100, 1612 K Street NW., Washington, D.C.

FOR FURTHER INFORMATION
CONTACT:

Mr. Keith M. Schreiner, Associate Director—Federal Assistance, Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240, 202-343-4646.

SUPPLEMENTARY INFORMATION:

BACKGROUND

The hawksbill sea turtle is a rare and critically endangered reptile throughout the world and has been officially listed as Endangered since 1970. Much of the hope for the survival and recovery of this species depends upon the maintenance of suitable and undisturbed nesting beaches. The Service recognizes that areas containing such beaches may qualify for recognition as Critical Habitat as referred to in Section 7 of the Act.

Hawksbill sea turtles are known to nest on all of Mona Island's 7.2 kilometers of beaches. The offshore areas

PROPOSED RULES

appear to support a somewhat stable and resident population. In addition, green sea turtles also nest on Mona. The entire island of Mona is already Critical Habitat for the listed yellow-shouldered blackbird, Mona ground iguana, and Mona boa.

Nesting of hawksbill sea turtles occurs on suitable sandy beaches on the north shore of Culebra Island, as well as the nearby islands of Cayo Norte and Isla Culebrita. Turtles are known to feed on the rich offshore reefs around these islands. In addition to hawksbills, occasional nesting has been reported for leatherback, loggerhead, and green sea turtles on these beaches. The Critical Habitat for the Endangered giant anole barely overlaps the proposed Critical Habitat of the hawksbill on Playa Resaca.

The hawksbill sea turtle is a tropicopolitan species. It occurs in waters off the east coast of the continental United States, the U.S. Virgin Islands, mainland Puerto Rico, the Hawaiian Islands, Pacific Trust Territory, American Samoa, Guam, and Territory of the Northern Marianas. Nesting is known to occur in Florida and the Virgin Islands and probably elsewhere in areas under United States jurisdiction. However, not enough information is presently available on these areas to include specific nesting beaches in this present proposal. As information becomes available, additional areas may be proposed as Critical Habitat for this species in the future.

EFFECT OF THE RULEMAKING

The effects of this determination are involved primarily with Section 7 of the Act, which states:

The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to section 4 of this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of such endangered species and threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected States, to be critical.

A definition of the term "Critical Habitat" was published by the Fish and Wildlife Service and the National Marine Fisheries Service in the FEDERAL REGISTER of January 4, 1978 (43 FR 870-876) and is reprinted below:

"Critical habitat" means any air, land, or water area (exclusive of those existing man-

made structures or settlements which are not necessary to the survival and recovery of a listed species) and constituent elements thereof, the loss of which would appreciably decrease the likelihood of the survival and recovery of a listed species or a distinct segment of its population. The constituent elements of critical habitat include, but are not limited to: Physical structures and topography, biota, climate, human activity, and the quality and chemical content of land, water, and air. Critical habitat may represent any portion of the present habitat of a listed species and may include additional areas for reasonable population expansion.

As specified in the regulations for Interagency Cooperation, as published in the January 4, 1978, FEDERAL REGISTER (43 FR 870), the Director will consider the physiological, behavioral, ecological, and evolutionary requirements for survival and recovery of listed species in determining what areas or parts of habitat are critical. These requirements include, but are not limited to:

- (1) Space for individual and population growth and for normal behavior;
- (2) Food, water, air, light, minerals, or other nutritional or physiological requirements;
- (3) Cover or shelter;
- (4) Sites for breeding, reproduction, or rearing of offspring; and generally,
- (5) Habitats that are protected from disturbances or are representative of the geographical distribution of listed species.

In accordance with the July 18, 1977, Memorandum of Understanding between the Fish and Wildlife Service and National Marine Fisheries Service, the Fish and Wildlife Service was given the responsibility for sea turtles while on land. Such responsibility includes the determination of Critical Habitat. Since the only time sea turtles leave the water to come onto beaches in the Commonwealth of Puerto Rico is to lay eggs, the areas included in this proposal are areas where hawksbill sea turtles nest. All the beaches in this proposed rulemaking provide sites for the incubation of eggs and are known to provide proper sand size, moisture, and temperature conditions for successful development and hatching.

There may be many kinds of actions which can be carried out within the Critical Habitat of a species which would not be expected to adversely affect that species.

This point has not been well understood by some persons. There has been widespread and erroneous belief that a Critical Habitat designation is something akin to establishment of a wilderness area or wildlife refuge, and automatically closes an area to most human uses. Actually, a Critical Habitat designation applies only to Federal

agencies, and essentially is an official notification to these agencies that their responsibilities pursuant to section 7 of the Act are applicable in a certain area.

A Critical Habitat designation must be based solely on biological factors. There may be questions of whether and how much habitat is critical, in accordance with the above interpretation, or how to best legally delineate this habitat, but any resultant designation must correspond with the best available biological data. It would not be in accordance with the law to involve other motives; for example, to enlarge a Critical Habitat delineation so as to cover additional habitat under section 7 provisions, or to reduce a delineation so that actions in the omitted area would not be subject to evaluation.

There may indeed be legitimate questions of whether, and to what extent, certain kinds of actions would adversely affect listed species. These questions, however, are not relevant to the biological basis of Critical Habitat delineations. Such questions should, and can more conveniently, be dealt with after Critical Habitat has been designated. In this respect the Service, in cooperation with other Federal agencies, has drawn up a set of regulations which, in part, establish a consultation and assistance process for helping to evaluate the possible effects of actions on Critical Habitat. The regulations for Interagency Cooperation were published on January 4, 1978, in the FEDERAL REGISTER (43 FR 870-876) to assist Federal agencies in complying with section 7 of the Endangered Species Act of 1973.

PUBLIC COMMENTS SOLICITED

The Director intends that the rules finally adopted will be as accurate as possible in delineating the Critical Habitat of the hawksbill sea turtle. The Director, therefore, desires to obtain the comments and suggestions of the public, other concerned governmental agencies, the scientific commu-

nity, or any other interested party on these proposed rules.

Final promulgation of Critical Habitat regulations will take into consideration the comments received by the Director. Such comments and any additional information received may lead the Director to adopt final regulations that differ from this proposal.

An environmental assessment has been prepared in conjunction with this proposal. It is on file in the Service's Office of Endangered Species, 1612 K Street NW., Washington, D.C., and may be examined during regular business hours or can be obtained by mail. A determination will be made at the time of final rulemaking as to whether this is a major Federal action which would significantly affect the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969.

The Primary author of this proposed rule is Dr. C. Kenneth Dodd, Jr., Office of Endangered Species (202-343-7814).

REGULATIONS PROMULGATION

Accordingly, the Service proposes to amend §17.95(c) by adding Critical Habitat of the hawksbill sea turtle before that of the leatherback sea turtle as follows:

(c) Reptiles. * * *

HAWKSBILL SEA TURTLE

(Eretmochelys imbricata)

Puerto Rico—(1) *Isla Mona*. All areas of beachfront on the west, south, and east sides of the island from mean high tide inland to a point .1 mile from shore. This includes all 7.2 kilometers of beaches on Isla Mona. (2) *Culebra Island*. All areas of beachfront on the north shore of the island from mean high tide inland to a point .1 mile from shore. This includes the following beaches: Playa Blanca, Playa Flamenco, Playa Resaca, Playa Brava, and Playa Larga. (3) *Cayo Norte*. South beach, from mean high tide inland to a point .1 mile from shore. (4) *Isla Culebrita*. All beachfront areas on the southwest facing shore, east facing shore, and northwest facing

shore of the island from mean high tide inland to a point .1 mile from shore.

NOTE.—The Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107

Dated: May 16, 1978.

LYNN A. GREENWALT,
Director,
Fish and Wildlife Service.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

COMMITTEE ON RULEMAKING AND PUBLIC INFORMATION

Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Committee on Rulemaking and Public Information of the Administrative Conference of the United States, to be held at 10:45 a.m., June 8, 1978 in Hearing Room A of the Interstate Commerce Commission, 12th and Constitution Avenue NW., Washington, D.C.

The Committee will meet to discuss alternatives to current APA rulemaking requirements.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify this office at least two days in advance. The Committee Chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the Committee before, during or after the meeting.

For further information concerning this Committee meeting, contact Joseph B. Scott 202-254-7020. Minutes of the meeting will be available on request.

Dated: May 19, 1978.

RICHARD K. BERG,
Executive Secretary.

ACTION

[Announcement No. 78-011]

COMPETITIVE FAMILY VIOLENCE DEMONSTRATION GRANT

The Office of Policy and Planning of ACTION announces the availability of funds for fiscal year 1978 for a demonstration grant under the Special Volunteer Programs authorized by the Domestic Volunteer Service Act of 1973, as amended (Pub. L. 93-113, Title I, Part C, 42 U.S.C. 4992).

Applications are due by close of business on June 26, 1978. All applications received by that date, or postmarked

five (5) days before that date by the U.S. Postal Service, will be considered. Applications received by the closing date, which are complete and conform to the requirements of this program announcement, will be competitively reviewed for the award of a grant of national significance which focuses on the provision of voluntary assistance to victims of family violence.

A. OBJECTIVES OF THIS SPECIAL VOLUNTEER PROGRAM

To strengthen and supplement efforts to meet a range of human and social needs, particularly those of battered women and other victims of family violence, by encouraging and enabling persons from all walks of life and from all age groups to perform meaningful and constructive volunteer service in agencies and organizations where the application of human talent and dedication may help to meet the needs of victims of family violence.

B. ELIGIBLE APPLICANTS

Non-federal governmental agencies or private non-profit organizations with expertise in family support systems, volunteer recruitment, placement, and training, especially in the areas of psychological and physical violence.

Experience in management of multiple unit, geographically dispersed demonstration or voluntary projects should be noted and described in the grant application.

C. AVAILABLE FUNDS

1. An amount not to exceed \$300,000 will be available in fiscal year 1978 for the following:

(a) Grantee costs for project administration, including full-time volunteer allowances and part-time volunteer out-of-pocket expenses, data collection, technical assistance, and preparation of materials.

Reimbursements of out-of-pocket expenses, such as those for meals and transportation, may be made to one of more part-time community volunteers at each of ten (10) pilot centers under the grant. Volunteers may be used as organizers, outreach workers, victim counselors, etc., but they may neither function as nor replace staff members of the pilot centers.

(b) The grant will be awarded for a period of fifteen (15) months to allow for planning and implementation.

2. An amount not to exceed \$150,000 may be made available at ACTION's discretion in fiscal year 1979 for the following:

(a) Conduct by the pilot centers of regional conferences to enable other voluntary programs to learn about and benefit from the activities and accomplishments of this program.

(b) Preparation of materials.

D. APPLICATION REVIEW PROCESS

Acceptable applications will be reviewed and rated by a panel composed of a minimum of three (3) ACTION and/or other Federal agency reviewers having expertise in family violence programs and needs. The highest rated applications will be submitted to the Assistant Director for Policy and Planning for final selection. The grant award will be made by the Chief of the Grants Branch, Contracts and Grants Management.

E. DESCRIPTION OF GRANT PROGRAM

1. The grant will be made for the purpose of:

(a) Identifying and supporting voluntary programs responding to the needs of battered women and other victims of family violence;

(b) Developing contacts between these programs and other voluntary programs responsive to other family crisis needs;

(c) Reviewing existing resources and producing additional materials on the causes and treatment of family violence that will aid volunteers and voluntary organizations in their service to the needs of families in stress.

2. To accomplish this purpose, the grantee will:

(a) Identify a potential pilot volunteer center in each of ACTION's ten (10) regions. Each center will receive a small sub-grant from the grantee's funds to recruit, train, reimburse the out-of-pocket expenses of one or more part-time community volunteers and pay the allowances of one or more full-time community volunteers; and improve its programs by expanding methods of providing volunteer services and by encouraging wider volunteer participation;

(b) Provide to each center, as necessary, technical assistance for its volunteer programs, including, but not limited to fundraising techniques, mobilization of resources, and recruitment and training of volunteers.

3. If an additional grant is made in fiscal year 1978, its purpose will be to permit the grantee to:

(a) Assist each center in the planning and conduct of a two-day conference designed to compile materials to help volunteers and voluntary organizations in the field of family violence;

(b) Collect, integrate, and edit all materials from the conferences and prepare them in camera-ready form as manuals and brochures for printing and distribution by ACTION.

F. AVAILABILITY OF APPLICATION FORMS

To be eligible for consideration, an application must be submitted on ACTION Form A-263, "Federal Assistance", in accordance with the instructions set forth in the application kit. An application kit containing application forms, instructions, and program guidelines and information may be obtained from William A. Stockman, ACTION, Chief of Grants Branch, Office of Contracts and Grants Management, Room P-200, 806 Connecticut Avenue, NW., Washington, D.C. 20525.

To expedite requests, please furnish a self-addressed gummed label, including the RGA No. 78-01 at the bottom of the label. Telephone requests will not be honored.

G. APPLICATION SUBMISSION

One signed original and two (2) copies of all completed applications must be submitted to William A. Stockman, Chief of Grants Branch, at the above address.

UNACCEPTABLE APPLICATIONS

Applications which do not conform to this announcement, are received late, or are incomplete, will not be accepted for review.

Dated: May 18, 1978.

IRENE TINKER,
Assistant Director,
Policy and Planning.

DEPARTMENT OF AGRICULTURE

Forest Service

TIMBER MANAGEMENT PLAN; CHEQUAMEGON NATIONAL FOREST

Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement on the Timber Management Plan for the Chequamegon National Forest, USDA-FS-R9-DES-(ADM)-77-01.

The environmental statement concerns a proposed plan for managing

the timber resources on the Chequamegon National Forest for the period Oct. 1, 1976 through Sept. 30, 1986. The Chequamegon National Forest is located in parts of Ashland, Bayfield, Sawyer, Price, Taylor, and Vilas Counties, Wis.

This final environmental statement was transmitted to EPA on May 15, 1978.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3231, 12th St. and Independence Ave., SW., Washington, D.C. 20250.

USDA, Forest Service, Eastern Region, 633 West Wisconsin Avenue, Milwaukee, Wis. 53203.

USDA, Forest Service, Chequamegon National Forest, Federal Building, Park Falls, Wis. 54552.

A limited number of single copies are available upon request to Forest Supervisor, Chequamegon National Forest, Federal Building, Park Falls, Wis. 54552.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ Guidelines.

Public input will become a matter of record subject to release under the Freedom of Information Act.

Dated: May 15, 1978.

L. K. KELLEY,
Acting Director Planning,
Programming and Budgeting.

Office of the Secretary

PRIVACY ACT OF 1974

Deletion of Systems of Records

Notice is hereby given that the Department of Agriculture, in accordance with 5 U.S.C. 552a(e) (4) and (11), proposes to delete a system of records where the program has been discontinued. The deleted system is USDA/ASCS-25, Producer Record for Pre-Pilot Counties. The system was initially established as a result of a pre-pilot program. The program never became operational. Therefore, the system was discontinued. The system notice was previously republished on September 30, 1977 in 42 FR 53190 and 42 FR 53200 respectively. The deletion will be effective May 24, 1978.

Dated: May 17, 1978.

NOTICES

[6320-01]

CIVIL AERONAUTICS BOARD

INTERNATIONAL AIR TRANSPORT ASSOCIATION

[Docket No. 30332; Agreement C.A.B. 27258; Order 78-5-60]

Order Regarding Specific Commodity Rates

Issued under delegated authority May 12, 1978.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various U.S. and foreign member air carriers of the International Air Transport Association (IATA). The agreement was adopted at the 19th Meeting of the TC3 Specific Commodity Rates Board held in Los Angeles on March 13-14, 1978.

The agreement would add, cancel and change certain specific commodity rates to/from Guam as well as make various changes to specific commodity descriptions as shown in the attachments and establish specific commodity rates for several items to apply between various world markets outside of air transportation. We will approve the new rates to/from Guam and the descriptions which have general application within air transportation as defined by the Act but will disclaim jurisdiction with respect to the new rates which involve points solely outside of air transportation.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14:

1. It is not found that the specific commodity rates listed in the attachment, as well as the new specific commodity descriptions incorporated in Agreement C.A.B. 27258, which have general application in air transportation as defined by the Act, are adverse to the public interest or in violation of the Act.

2. It is not found that the specific commodity rates incorporated in Agreement C.A.B. 27258 which involve transportation solely between foreign points affect air transportation within the meaning of the Act.

Accordingly, it is ordered, That: 1. Those portions of Agreement C.A.B. 27258 set forth in the attachment which have general application in air transportation as defined by the Act, be and hereby are approved, provided that (a) approval shall not constitute approval of the specific commodity descriptions contained therein for purposes of tariff publications; (b) tariff filings shall be marked to become effective on not less than 30 days' notice from the date of filings; and (c) where a specific commodity rate is published for a specified minimum weight at a level lower than the general commod-

ity rate applicable for such weight, and where a general commodity rate is published for a greater minimum weight at a level lower than such specific commodity rate, the specific commodity rate shall be extended to all such greater minimum weights at the applicable general commodity rate level; and

2. Jurisdiction be and hereby is disclaimed with respect to that portion of Agreement C.A.B. 27258 described in finding paragraph 2 above.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14

CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

[Docket 32376; Docket 32576; Order 78-5-99]

SAN ANTONIO—DENVER ROUTE PROCEEDING
Western Air Lines, Inc.; Order

Issued under delegated authority May 17, 1978.

By Order 78-4-30, dated April 7, 1978, the Board instituted the *San Antonio-Denver Route Proceeding* to consider the need for new non-stop authority in this market. The order consolidated the application of Frontier Airlines for nonstop authority in the market. Western Air Lines, Inc., has moved to consolidate its application in Docket 32576 into this proceeding. No answers have been received.

Since Western's application fully conforms to the scope of this proceeding, the motion to consolidate will be granted, and Western will be made a party to this investigation.

Pursuant to authority duly delegated by the Board in Order 78-4-30, IT IS ORDERED THAT:

1. The application of Western Air Lines, Inc., in Docket 32576 be consolidated into the *San Antonio-Denver Route Proceeding*, Docket 32376.

2. Western Air Lines, Inc., be made a party to this proceeding.

Persons entitled to petition the Board for review of this order pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period unless before that date a petition for review thereof is filed, or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

By KATHERINE A. KENT,
Administrative Law Judge.
PHYLLIS T. KAYLOR,
Secretary.

COMMUNITY SERVICES
ADMINISTRATION
EMERGENCY ENERGY ASSISTANCE PROGRAM
Funding Declarations

The Director of the Community Services Administration (CSA) has found, based on criteria indicated in column¹

¹All references to "column" refer to Appendix A to this notice.

(5) of Appendix A that energy related emergencies have existed since the dates indicated in column (3).

Therefore, eligible grantees who cover those areas indicated in column (2) will proceed as follows:

Grantees who receive funds by letter of credit may withdraw and expend funds in the amount approved in column (4) or that portion of that amount which have been granted to them under program account 80, Emergency Energy Assistance Program; or

Grantees who normally receive checks are being informed that their checks are being forwarded by the Treasury Department for the total amount of the EEAP grant. However, these grantees immediately may begin obligating funds against this grant in the amount appropriated in column (4) and from the date indicated in column (3).

Column (3) contains the earliest date to our knowledge which provided the

basis for a finding by the Director of CSA that an energy related emergency existed. However, any eligible grantee within those areas covered in column (2) may submit evidence to support the existence of energy related emergencies which existed between December 31, 1977, and the date given in column (3) for a finding by the Director of CSA. (See CSA Notice 6143-7, section 4 or § 1061.51-3 in the FEDERAL REGISTER (43 FR 9476).

Request for supplemental (additional) funds shall be made in accordance with the provisions of section 11.c. of CSA Notice 6143-7.

FRANK N. JONES,
Acting Director.

MANAGEMENT-LABOR TEXTILE ADVISORY
COMMITTEE

Public Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (1976 ed.), notice is hereby given that a meeting of the Management-Labor Textile Advisory Committee will be held on June 14, 1978 at 1:30 p.m. in Room 4833, Department of Commerce, 14th and Constitution Avenue NW., Washington, D.C. 20230.

The Committee was established by the Secretary of Commerce on October 18, 1961 to advise U.S. Government officials on problems and conditions in the textile and apparel industry and furnish information on world trade in textiles and apparel.

The agenda for the meeting will be as follows:

1. Review of import trends.
2. Implementation of textile agreements.
3. Report on conditions in the domestic market.
4. Other business.

A limited number of seats will be available to the public on a first-come basis. The public may file written statements with the Committee before or after each meeting. Oral statements may be presented at the end of the meeting to the extent time is available.

Copies of the minutes of the meeting will be made available on written request addressed to the DIBA Freedom of Information Officer, Freedom of Information Control Desk, Room 3012, U.S. Department of Commerce, Washington, D.C. 20230.

Telephone requests for the minutes of the meetings and requests for further information concerning the Committee may be directed to Arthur Garel, Director, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202-377-5078.

Dated: May 19, 1978.

ROBERT E. SHEPHERD,
Deputy Assistant Secretary
for Domestic Business Development.

CARIBBEAN FISHERY MANAGEMENT COUNCIL

Public Meeting

The Caribbean Fishery Management Council, established under Section 302

of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265), will meet June 20-22, 1978, at the Grapetree Beach Hotel, Saint Croix, V.I. The meeting starts at 9 a.m. on June 20, and will adjourn at about noon on June 22.

Proposed Agenda: (1) Status Report on the Fishery Management Plan (FMP) for Shallow-Water Reef Fish; (3) Status Report on the FMP for Migratory Coastal Pelagics; (4) Development of new FMP for Mollusks; (5) Progress Report of the Education and Information Committee; (6) Japan Government Fishing Permit Applications for Billfish and Sharks in the Atlantic, the Caribbean, and the Gulf of Mexico; (7) Audit Report of the Caribbean Fishery Management Council; (8) Administrative Matters; (9) Other Business.

Meeting is open to public. For information on seating, changes to the agenda, and/or written comments, contact Mr. Omar Munoz-Roure, Executive Director, Caribbean Fishery Management Council, P.O. Box 1001, Hato Rey, P.R. 00919, telephone 809-733-4926.

Dated: May 18, 1978.

COASTAL ZONE MANAGEMENT ADVISORY
COMMITTEE

Public Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. V, 1975), notice is hereby given of the meeting of the Coastal Zone Management Advisory Committee (the "Committee") on Thursday and Friday, June 8-9, 1978. The meeting will commence at 9 a.m. on June 8 and 8:45 a.m. on June 9 in The Penthouse, Page Building I, 2001 Wisconsin Avenue NW., Washington, D.C.

The meeting will be open to public observation and approximately 25 seats will be available. Interested persons are invited to attend and participate in the meeting, subject to the procedures which follow. From approximately 11:45 a.m. until 12:15 p.m. on June 8 and from 11 a.m. until 11:15 a.m. on June 9, persons will be permitted to make oral statements to the Committee which are relevant to topics on the agenda. The Chairman retains the prerogative to place limits on the duration of oral statements and discussions. Persons wishing to make oral statements should notify the Executive Secretary in advance of the meeting. A written version of an oral statement or a written statement may

be mailed within five days to: Office of Coastal Zone Management, National Oceanic and Atmospheric Administration, 3300 Whitehaven Street NW., Washington, D.C. 20235 (Attn: Dr. Richard Keating, Executive Secretary, CZM Advisory Committee). All statements received in typewritten form will be distributed to the Committee for consideration with the minutes of the meeting. Inquiries may be directed to the Committee Staff at 202-634-4250.

The items for Committee discussion at the meeting will include the following:

June 8

- 9:00 a.m.—Call to order.
- 9:15 a.m.—Coastal Zone Management program update and legislative review.
- 10:00 a.m.—"Beneficial Effects of Coastal Zone Management Programs: Case Studies," Office of Coastal Zone Management.
- 11:00 a.m.—Discussion of committee report.
- 11:45 a.m.—Oral statements (if any) from interested persons.
- 12:15 p.m. Lunch.
- 2:00 p.m. Panel presentation. "The Electric Utilities Industry and CZM," Donald Allen, Chairman.
- 3:30 p.m.—Committee discussion of CZM and electric utilities industry and tentative recommendations to the recommendations to the Administrator of National Oceanic and Atmospheric Administration.
- 4:00 p.m.—Formation of task forces.
- 4:15 p.m.—Agenda, date, and location of next meeting.
- 4:30 p.m.—Adjourn.

June 9

- 8:45 a.m.—Call to order.
- 9:00 a.m.—Panel presentation, "Balanced Growth, Coastal Zone Management and the Administration's Urban Package," Ann Jennings, Chairwoman.
- 10:30 a.m.—Committee discussion of balanced growth issues and tentative recommendations to administrator of National Oceanic and Atmospheric Administration.
- 11:00 a.m.—Oral statements (if any) from interested persons.
- 11:15 a.m.—Depart for Main Commerce Building.
- 11:30 a.m.—Presentation of committee report to Secretary of Commerce (tentative).
- 12:30 p.m.—Return to Page Building and lunch.
- 2:00 p.m.—Presentation on Oceans Management, Office of Oceans Management.
- 3:00 p.m.—Adjourn.

Dated: May 19, 1978.

T. P. GLEITER,
Assistant Administrator for Ad-
ministration, National Ocean-
ic and Atmospheric Adminis-
tration.

GOVERNMENT-OWNED INVENTIONS

Notice of Availability for Licensing

The inventions listed below are owned by the U.S. Government and

are available for domestic and possibly foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of the patents cited are available from the Commissioner of Patents and Trademarks, Washington, D.C. 20231, for \$5.00 each. Requests for copies of patents must include the patent number.

Copies of the patent applications can be purchased from the National Technical Information Service (NTIS), Springfield, Va. 22161 for \$4.00 (\$8.00 outside North American Continent). Requests for copies of patent applications must include the PAT-APPL number. Claims are deleted from patent application copies sold to the public to avoid premature disclosure in the event of an interference before the Patent and Trademark Office. Claims and other technical data will usually be made available to serious prospective licensees by the agency which filed the case.

Requests for licensing information on a particular invention should be directed to the address cited for the agency-sponsor.

National Telecommunications and Information Administration

FREQUENCY MANAGEMENT ADVISORY COUNCIL

Open Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), notice is hereby given that the Frequency Management Advisory Council will meet from 9:30 a.m. to 3:30 p.m. on June 16, 1978, in Room 712A at the National Telecommunications and Information Administration, 1800 "G" Street NW., Washington, D.C. (Public entrance to the building is on "G" Street, between 18th Street and 19th Street NW.)

The Council was established on July 19, 1965. The objective of the Council is to advise the Secretary of Commerce on radio frequency spectrum allocation matters and means by which the effectiveness of Federal Government frequency management may be enhanced. The Council consists of 11 members whose knowledge of telecommunications is balanced in the functional areas of manufacturing, analysis and planning, operations, research, academia and international negotiations.

The agenda for the meeting is:

(1) Briefing on the organization, functions and responsibilities of the National Telecommunications and Information Administration (NTIA);

(2) Discussion of the Federal Communications Commission's 8th Notice of Inquiry concerning preparation of the U.S. Position for the 1979 World Administrative Radio Conference (WARC 1979);

(3) Report on Status of preparation for the special meeting of the International Radio Consultative Committee (CCIR) preparatory to WARC 1979;

(4) Report on foreign coordination for WARC 1979; and

(5) Nomination of new members of the Council.

The meeting will be open to public observation; and a period will be set aside for oral comments or questions by the public which do not exceed 10 minutes each. More extensive questions or comments should be submitted in writing before June 14. Other public statements regarding Council affairs may be submitted at any time before or after the meeting. Approximately 15 seats will be available for the public on a first-come first-served basis.

Copies of the minutes will be available on request 30 days after the meeting.

Inquiries may be addressed to the Council Control Officer, Mr. Charles L. Hutchison, National Telecommunications and Information Administration, Room 298, 1325 "G" Street NW., Washington, D.C. 20005, telephone 202-724-3307.

Dated: May 18, 1978.

CLOYD C. DODSON,
Committee Liaison Officer, National Telecommunications and Information Administration.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

CERTAIN WOOL AND MAN-MADE FIBER TEXTILE PRODUCTS FROM THE SOCIALIST REPUBLIC OF ROMANIA

Import Levels Under the New Textile Category System

MAY 19, 1978.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Establishing import restraint levels for certain wool and man-made fiber textile products from Romania during the twelve-month period which began on January 1, 1978, pursuant to the amended wool and man-made fiber textile agreement.

SUMMARY: The Governments of the United States and the Socialist Republic of Romania have exchanged notes amending the Bilateral Wool and Man-Made Fiber Textile Agreement of June 17, 1977 to provide for the changeover to the new textile category system, which became effective on January 1, 1978. The agreement, as amended, establishes levels of restraint for certain specified categories of wool and man-made fiber textile products, produced or manufactured in Romania and exported to the United States during the twelve-month period which began on January 1, 1978. In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to limit to the designated levels of restraint the amounts of wool and manmade fiber textile products in Categories 433/434, 435/444, 443, 459, 465, 610, 611, 612, 613, 614, 633, 634, 638/639, 640, 643/644, 645/646, 648, 659, and 666, produced or manufactured in Romania, which may be entered into the United States for consumption, or withdrawn from warehouse for consumption, during the twelve-month period which began on January 1, 1978 and extends through December 31, 1978. The levels of re-

straint have not been adjusted to reflect any imports after December 31, 1977. As the data become available, adjustments will be made to account for imports during the period beginning on January 1, 1978 and extending through the effective date of this action. (A detailed description of the categories in terms of T.S.U.S.A. Numbers was published in FEDERAL REGISTER on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 3421) and March 3, 1978 (43 FR 8828).

EFFECTIVE DATE: May 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Edmond C. Callahan, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230, 202-377-5423.

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Domestic Business Development.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS,
May 19, 1978.

Commissioner of Customs,
Department of the Treasury,
Washington, D.C. 20229.

DEAR MR. COMMISSIONER: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Wool and Man-Made Fiber Textile Agreement of June 17, 1977, as amended, between the Governments of the United States and the Socialist Republic of Romania; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on May 30, 1978 and for the twelve-month period beginning on January 1, 1978 and extending through December 31, 1978, entry into the United States for consumption and withdrawal from warehouse for consumption of wool and man-made fiber textile products in the following categories in excess of the indicated levels of restraint:

Category and Twelve-Month Level of Restraint¹

433/434—225,000 square yards equivalent.

435/444—83,333 numbers.

443—88,022 numbers.

459—75,000 pounds.

465—1,500,000 square feet.

610—2,000,000 square yards.

611—2,000,000 square yards.

612—2,000,000 square yards.

613—4,000,000 square yards.

614—1,500,000 square yards.

633—41,436 dozen.

634—53,289 dozen of which not more than 36,320 dozen shall be in T.S.U.S.A. numbers 380.0405, 380.8101, 380.8109, 380.8111, and 791.7460 and not more than 16,949 dozen shall be in the remaining T.S.U.S.A. numbers in Category 634.

¹The levels of restraint have not been adjusted to account for any imports after December 31, 1977.

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Domestic Business Development.

DEPARTMENT OF DEFENSE

Office of the Secretary

DEFENSE SCIENCE BOARD TASK FORCE ON NATIONAL/TACTICAL INTERFACE

Advisory Committee meeting

The Defense Science Board Task Force on the National/Tactical Interface will meet in closed session on June 14-16, 1978 in Washington, D.C.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on overall research and engineering policy and to provide long-range guidance to the Department of Defense in these areas.

The Task Force is continuing its analyses of the major issues concerning the interface between national and tactical intelligence systems and the potential for satisfying the requirements of tactical/theater military commanders and those of national authorities and agencies.

In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Task Force meeting concerns matters listed in Section 552b(c) of Title 5 of the United States Code, specifically subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

May 19, 1978.

MAURICE W. ROCHE,
Director, Correspondence and Directives Washington HQS Services Department of Defense.

DEPARTMENT OF ENERGY

CASES FILED WITH THE OFFICE OF HEARINGS AND APPEALS

Week of April 28 through May 5, 1978

Notice is hereby given that during the week of April 28 through May 5, 1978, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under the DOE's procedural regulations, 10 CFR part 205, any person who will be aggrieved by the DOE action sought in such cases may file

²In Category 643/644, only T.S.U.S.A. numbers 380.0420, 380.8145, 380.8148, 382.0447, 382.7866, and 382.7868.

³In Category 643/644, all T.S.U.S.A. numbers not listed in footnote 2.

with the DOE written comments on the application within 10 days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the

date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings

and Appeals, Department of Energy, Washington, D.C. 20461.

Dated: May 17, 1978.

MELVIN GOLDSTEIN,
Director,
Office of Hearings and Appeals.

APPENDIX.—List of cases received by the Office of Hearings and Appeals

[Week of Apr. 28, through May 5, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Apr. 28, 1978	Buck's Butane & Propane Service, Inc., San Jose, Calif. If granted: Buck's Butane & Propane Service, Inc., would receive a stay of the provisions of the revised remedial order issued Mar. 21, 1978, by DOE region IX pending a final determination on the appeal of that order which the firm intends to file.	DRS-0173	Stay request.
Do	Butler & Fought Exxon Service, Little Rock, Ark. If granted: Butler & Fought Exxon Service would not be required to file form EIA-8 (Retail Motor Fuels Service Station Survey).	DEE-1058	Exception to the reporting requirements.
Do	Clyde's Service Station, Minneapolis Minn. If granted: Clyde's Service Station would not be required to file form EIA-8 (Retail Motor Fuels Service Station Survey).	DEE-1059	Exception to the reporting requirements.
Do	Robert Lingle Cobb, Gibsonville, N.C. If granted: Robert Lingle Cobb would not be required to file form EIA-8 (Retail Motor Fuels Service Station Survey).	DEE-1060	Exception to the reporting requirements.
Do	Consumer Federation of America, Washington, D.C. If granted: The DOE's Apr. 27, 1978, decision and order would be modified with respect to staff costs and attorneys fees.	DMR-0019	Modification of the relief granted in Consumer Federation of America, 1 DOE Par. — (Apr. 27, 1978).
Do	Don Baldwin Oil, Gloversville, N.Y. If granted: Don Baldwin Oil would not be required to file form EIA-9 (No. 2 Heating Oil Supply/Price Monitoring Report).	DEE-1062	Exception from reporting requirements.
Do	Fraser Mustang, Hideaway Park, Colo. If granted: Fraser Mustang would not be required to file form EIA-8 (Retail Motor Fuels Service Station Survey).	DEE-1061	Exception to the reporting requirements.
Do	Lunday-Thagard Oil Co., South Gate, Calif. If granted: Lunday-Thagard Oil Co. would receive an exception from the provisions of 10 CFR 211.67 with respect to its entitlement purchase obligations for the months of June through November 1978.	DXE-1057	Exception from the entitlements program.
Do	Maurice L. Brown Co., Kansas City, Mo. If granted: Maurice L. Brown Co. would be permitted to sell the crude oil produced from the S. E. Anderson Lease located in Lea County, N. Mex., at upper tier ceiling prices.	DEE-1055	Price exception (sec. 212.73).
Do	New England Petroleum Corp., New York, N.Y. If granted: New England Petroleum Corp. would receive a stay of the provisions of 10 CFR 211.67 and 10 CFR Pt. 213 pending a final determination in its application for exception.	DES-0861	Stay request.
Do	Sid Richardson Carbon & Gasoline Co., Fort Worth, Tex. If granted: The applicant would be permitted to increase its prices to reflect non-product cost increases incurred in producing natural gas liquids and natural gas liquid products.	DXE-1064	Extension of the relief granted in Sid Richardson Carbon & Gasoline Co., Case No. DXE-0325 (decided Feb. 13, 1978) (unreported decision).
Do	Tenneco Oil Co., Houston, Tex. If granted: Tenneco Oil Co. would receive an adjustment in the exception relief granted in the Apr. 4, 1978 decision and order to account for the fact that the gravity of the crude oil from the Veeder-Hunt lease had not declined since May 15, 1973.	DEX-0072	Supplemental Order in Tenneco Oil Co., 1 DOE Par. — (Apr. 4, 1978).
Do	Universal, Inc., Luling, Tex. If granted: Universal, Inc. would receive an exception from the requirement of 10 CFR 212.93 that it calculate its inventory costs on a company-wide, single inventory basis for the period prior to May 1, 1978.	DEE-1056	Price exception (sec. 212.93).
Do	Wilmot Oil Co., Seabrook, N.H. If granted: Wilmot Oil Co. would not be required to file form EIA-9 (No. 2 Heating Oil Supply/Price Monitoring Report).	DEE-1063	Exception from reporting requirements.
May 1, 1978	Atlantic Richfield Co., Los Angeles, Calif. If granted: Atlantic Richfield Co. would be granted an evidentiary hearing with respect to its pending appeal of the Aug. 1, 1977 remedial order.	DRH-0005	Request for an evidentiary hearing.
Do	Louis K. Bell, Augusta, Ga. If granted: The DOE's Mar. 27, 1978 denial of a request for information pertaining to Louis K. Bell would be rescinded.	DFA-0175	Appeal of the information request denial.
Do	Ben R. Briggs, Dallas, Tex. If granted: Ben R. Briggs would be permitted to increase its prices to reflect nonproduct cost increases in excess of \$0.005/gal for natural gas liquid products produced at the East Texas plant.	DEE-1068	Price exception (sec. 212.165).
Do	Hugh M. Briggs, Dallas, Tex. If granted: Hugh M. Briggs would be permitted to increase its prices to reflect nonproduct cost increases in excess of \$0.005/gal for natural gas liquid products produced at the East Texas plant.	DEE-1067	Price exception (sec. 212.165).
Do	Buck's Butane and Propane Service, Inc., San Jose, Calif. If granted: The Mar. 21, 1978 revised remedial order issued by DOE Region IX would be rescinded and Buck's Butane and Propane Service, Inc. would not be required to refund overcharges made in its sales of propane.	DRA-0173	Appeal of revised remedial order.
Do	C F Braun & Co., Alhambra, Calif. If granted: C F Braun & Co. would be permitted to increase its prices to reflect nonproduct cost increases in excess of \$0.005/gal for natural gas liquid products produced at the Mooreland and Selling plants.	DEE-1065	Price exception (sec. 212.165).
Do	Joe K. Staley Oil Co., Greenacres, Wash. If granted: The Mar. 16, 1978 denial of Joe K. Staley Oil Co.'s motion to quash the Nov. 30, 1977 special report order would be rescinded.	DEE-1066	Price exception (sec. 212.165).
Do	Northern Illinois Gas Co., Chicago, Ill. If granted: The Mar. 31, 1978 assignment order regarding Northern Illinois Gas Co.'s base period use of propane, butane, natural gasoline, and naphtha for synthetic natural gas feedstock during the period Apr. 1 through Sept. 30, 1978 would be rescinded.	DSG-0017	Request for special redress.
Do	R. W. Tyson Producing Co., Inc., Jackson, Miss. If granted: R. W. Tyson Producing Co., Inc. would be permitted to sell the crude oil produced from the No. 4 and No. 5 wells of the Stevens No. 1 lease located in Perry County, Miss., at exempt price levels.	DEA-0174	Appeal of an assignment order.
Do	Tosco Corp., Washington, D.C. If granted: The DOE's Apr. 19, 1978 proposed decision and order issued to the Tosco Corp. would be modified.	DXE-1069	Extension of the relief granted in R. W. Tyson Producing Co., 1 DOE Par. — (Feb. 28, 1978).
May 2, 1978	66 Service Center, Birmingham, Ala. If granted: 66 Service Center would not be required to file form EIA-8 (Retail Motor Fuels Service Station Survey).	DEX-0068	Supplemental order.
Do	Caribou Four Corners, Inc., Farmington, N. Mex. If granted: Caribou Four Corners, Inc. would receive an exception from the provisions of 10 CFR 212.131 with respect to the certification of crude oil sold to Plateau, Inc.	DEE-1070	Exception to the reporting requirements.
Do	Getty Oil Co., Los Angeles, Calif. If granted: The DOE's Apr. 21, 1978 decision and order would be modified.	DEE-1073	Price exception (sec. 212.131).
		DEX-0069	Supplemental order in Getty Oil Co., 1 DOE Par. — (Apr. 21, 1978).

APPENDIX.—List of cases received by the Office of Hearings and Appeals—Continued
[Week of Apr. 28, through May 5, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Do	Southland Oil Corp./VGS Corp., Jackson, Miss. If granted: Southland Oil Co./VGS Corp. would receive an exception from the provisions of 10 CFR 211.67 with respect to its entitlement purchase obligations.	DXE-1071	Extension of the relief granted in Southland Oil Co., 1 DOE Par. — (Feb. 28, 1978).
May 3, 1978	Coastal States Gas Corp., Houston, Tex. If granted: The applicant would be permitted to increase its prices to reflect nonproduct increases incurred in producing natural gas liquids and natural gas liquid products at its Hidalgo plant.	DXE-1072	Extension of the relief granted in Coastal States Gas Corp., Case No. FKE-4735 (decided Nov. 2, 1977) (unreported decision).
Do	General Motors Corp., Washington, D.C. If granted: The Mar. 31, 1978 assignment order issued to Consumers Power Co. with respect to its feedstock allocation of propane, butane, or natural gasoline for its Marysville SNG plant would be rescinded.	DEA-0178	Appeal of an assignment order.
Do	Harvey W. Jones & Associates, Natchez, Miss. If granted: Harvey W. Jones & Associates would receive an evidentiary hearing with respect to its appeal of the Nov. 29, 1977 remedial order.	DRH-0061	Request for an evidentiary hearing.
Do	Irving Oil Corp., Boston, Mass. If granted: Irving Oil Corp. would be permitted to import 3,500,000 bbl of finished petroleum products on a fee-exempt basis for the period May 1, 1978 through Apr. 30, 1980.	DPI-0007	Exception to base fee requirements.
Do	New England Petroleum Corp., Washington, D.C. If granted: New England Petroleum Corp. would receive an exception from the provisions of 10 CFR 211.67 with respect to its entitlement obligations for the mos. of December 1975 and January 1976.	DEX-0073	Supplemental order.
May 4, 1978	Kalama Chemical, Inc., Kalama, Wash. If granted: Kalama Chemical Inc. would be permitted to import 310,000 bbl of unfinished oil into PAD district V on a fee-exempt basis for the allocation period May 1, 1978 through Apr. 30, 1978.	DPI-0008	Exception from base fee requirements.
Do	Kerr-McGee Corp., Oklahoma City, Okla. If granted: Kerr-McGee Corp. would be permitted to increase its prices to reflect nonproduct cost increases in excess of \$0.005/gal for natural gas liquid products produced at the Boxcar Butte plant.	DEE-1074	Price exception (sec. 212.165).
Do	Oahu Gas Service, Inc., Washington, D.C. If granted: The June 26, 1975 decision and order which was issued to Standard Oil Co. of California would be modified by reducing the exception relief granted to Gasco.	DMR-0020	Modification of Standard Oil Co. of California, 2 FEA Par. 80,618 (June 26 1975).

ISSUANCE OF PROPOSED DECISIONS AND ORDERS BY THE OFFICE OF HEARINGS AND APPEALS

Week of May 1 through May 5, 1978

Notice is hereby given that during the period May 1 through May 5, 1978, the Proposed Decisions and Orders which are summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to Applications for Exception which had been filed with that Office.

Amendments to the DOE's procedural regulations, 10 CFR, part 205, were issued in proposed form on September 14, 1977 (42 FR 47210 (Sept. 20, 1977)), and are currently being implemented on an interim basis. Under the new procedures any person who will be aggrieved by the issuance of the Proposed Decision and Order in final form may file a written Notice of Objection within 10 days of service. For purposes of the new procedures, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice,

whichever occurs first. The new procedures also specify that if a Notice of Objection is not received from any aggrieved party within the time period specified in the regulations, the party will be deemed to consent to the issuance of the Proposed Decision and Order in final form. Any aggrieved party that wishes to contest any finding or conclusion contained in a Proposal Decision and Order must also file a detailed Statement of Objections within 30 days of the date of service of the Proposed Decision and Order. In that Statement of Objections an aggrieved party must specify each issue of fact or law contained in the Propos-

al Decision and Order which it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these Proposed Decisions and Orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room B-120, 2000 M Street NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.d.t., except Federal holidays.

Dated: May 17, 1978.

MELVIN GOLDSTEIN,
Director, Office of
Hearings and Appeals.

PROPOSED DECISIONS AND ORDERS

Gulf Oil Corporation, Tulsa, Okla., DEE-0612, Crude Oil

Gulf Oil Corp., (Gulf) filed an Application for Exception from the provisions of 10 CFR, part 212, subpart D. The exception request, if granted, would permit Gulf to sell the crude oil which it produces from the Kiefer Unit located in Creek County, Okla. at upper tier ceiling prices. On May 2, 1978, the DOE issued a proposed decision and Order which determined that the exception request be granted in part.

Moran Pipe & Supply Co., Inc., Seminole, Okla., DXE-1028, Crude Oil

Moran Pipe & Supply Co., Inc., filed an Application for Exception from the provisions, of 10 CFR, part 212, subpart D. The exception request, if granted, would permit Moran to continue to sell a portion of the crude oil produced from the Cozar Lease located in Seminole County, Okla., at upper tier ceiling prices. On May 2, 1978, the DOE issued a Proposed Decision and Order which determined that the exception request should be granted.

REQUESTS FOR EXCEPTION RECEIVED FROM NATURAL GAS PROCESSORS

The Office of Hearings and Appeals of the Department of Energy has issued a proposed decision and order granting exception relief from the provisions of 10 CFR 212.165 to the natural gas processor listed below. The proposed exception relief permits the firm involved to increase the prices of the production of the gas plants listed below to reflect certain nonproduct cost increases:

Company	Case	Plant	Location	Amount of price increase (per gallon)
Mapco, Inc.	DXE-0986	Altonah	Duchess/Utah	\$0.1132
	DXE-0987	Tyrone	Texas/Oklahoma	.0330

Federal Energy Regulatory Commission

[Docket Nos. E-7562, E-7655; Project Nos. 176, 599]

ESCONDIDO MUTUAL WATER CO. ET AL.

Notice of Project Inspection

MAY 17, 1978.

In the matter of Escondido Mutual Water Co., Project No. 176, Secretary of the Interior acting in his capacity, as trustee for the Rincon, La Jolla, and San Pasqual Bands of Mission Indians v. Escondido Mutual Water Company and City of Escondido, California, Docket No. E-7562, Vista Irrigation District, Docket No. E-7655, and San Diego Gas and Electric Co., Project No. 559.

Notice is hereby given that on June 1 and 2, 1978, Vice Chairman Don S. Smith and Commissioner George R. Hall will inspect the facilities of Project No. 176, Lake Henshaw and the La Jolla, Rincon, San Pasqual, Pauma and Pala Indian Reservations in conjunction with the proceeding for relicensing the said project which is pending before the Commission.

Representatives of the parties to the said proceeding may participate in the inspection. Such persons shall furnish their own meals and transportation and meet at 8 o'clock AM on June 1 and 2, 1978, in the parking area of the Mt. Vernon Motel, Escondido, Calif.

This notice shall be published in the

FEDERAL REGISTER and copies shall be transmitted to all parties as their names and addresses appear on the service list of the said proceeding.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP77-274]

MICHIGAN CONSOLIDATED GAS CO.— INTERSTATE STORAGE DIVISION

Notice of Petition To Amend

MAY 16, 1978.

Take notice that on March 13, 1978, Michigan Consolidated Gas Co.—Interstate Storage Division (Petitioner), One Woodward Avenue, Detroit, Mich. 48226, filed in Docket No. CP77-274 a petition to amend the Commission's order of December 9, 1977, as amended, pursuant to section 7(c) of the Natural Gas Act so as to authorize the storage of up to 18,650,000 Mcf of natural gas for Panhandle Eastern Pipe Line Co. (Panhandle), for either 6 or 13 years, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

It is indicated that pursuant to the Commission's order of December 9, 1977, as amended January 4, 1978, Petitioner was granted authorization to

receive from, store and redeliver to Panhandle up to 12,400,000 Mcf of gas for either 6 or 13 years, pursuant to two gas storage agreements. The first storage agreement, dated October 31, 1978, as amended June 10, 1977, provides for the storage of up to 6,000,000 Mcf of gas for 100-day service, and the second storage agreement, dated November 1, 1978, as amended June 10, 1977, provides for the storage of up to 6,400,000 Mcf of gas for Off-Peak Service.

The petition states that in order to provide additional storage service needed by Panhandle's customers, Petitioner and Panhandle have entered into an amendment to the October 31, 1967 gas storage agreement, dated February 1, 1978, which provides for the increase in the maximum volume of gas to be stored for 100-day gas storage service from 6,000,000 Mcf to 12,500,000 Mcf. It is stated that if Panhandle should elect to defer redelivery from one winter period to the next of any part of the volumes stored, to the extent that such deferred volumes exceed 2,450,000 Mcf, rather than 1,200,000 Mcf as originally provided in said agreement of October 31, 1978, Panhandle would furnish 2 percent of such excess as compressor fuel, to permit cycling of such excess gas to maintain storage capacity.

Petitioner indicates that to render the additional gas storage service beginning with the 1978-79 storage

season, it would utilize the Taggart Storage Field and associated pipeline and compression facilities which the Commission has temporarily certified in Docket No. CP76-254.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 7, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RP78-64]

MIDWESTERN GAS TRANSMISSION CO.

Order Instituting Investigation and Show Cause Proceeding

MAY 17, 1978.

Article XVII, Part 4, of the General Terms and Conditions of Midwestern Gas Transmission Co.'s (Midwestern) tariff¹ provides that Midwestern shall retain any refunds it may receive from its Southern System supplier, Tennessee Gas Pipeline Co. (Tennessee), until the Commission action requiring such refunds is final and nonappealable. Review and consideration of this tariff provision indicates that a Section 5 investigation should be instituted to determine the propriety of allowing the provision to remain in the tariff. For the reasons stated hereinafter, the Commission will order Midwestern to show cause why this tariff provision should not be amended by summary disposition to require the immediate crediting of supplier refunds to Account 191 for the benefit of its customers.

Article XVII, Part 4 of Midwestern's tariff provides as follows:

4. Flow-Through of Gas Supplier Refunds
4.1 Gas Supplier Refunds Subject to Flow-Through: Gas Supplier Refunds Subject to Flow-Through are refunds (including interest received) which have been received by Seller from Suppliers pursuant to final and nonappealable action by the Commission or the Courts applicable to gas purchased during the period beginning January 10, 1971, and continuing while Article XII is effective, except for refunds flowed through by Seller pursuant to Article III of the Amended Settlement Agreement dated May 24, 1973, in Docket Nos. RP71-16, et al. Gas Supplier Refunds Subject to Flow-Through shall be classified between demand and commodity components on the basis as received for each Supplier, and any interest received from any Supplier shall be classified between demand and commodity components in proportion to the demand and commodity components of the principal amount of the refunds. Nothing in this Article XVII in any way changes the rights and obligations of Seller or its customer with regard to gas supplier refunds applicable to gas purchased prior to January 10, 1971.

¹Third Revised Volume No. 1, First Revised Sheet No. 82.

tion or the Courts applicable to gas purchased during the period beginning January 10, 1971, and continuing while Article XII is effective, except for refunds flowed through by Seller pursuant to Article III of the Amended Settlement Agreement dated May 24, 1973, in Docket Nos. RP71-16, et al. Gas Supplier Refunds Subject to Flow-Through shall be classified between demand and commodity components on the basis as received for each Supplier, and any interest received from any Supplier shall be classified between demand and commodity components in proportion to the demand and commodity components of the principal amount of the refunds. Nothing in this Article XVII in any way changes the rights and obligations of Seller or its customer with regard to gas supplier refunds applicable to gas purchased prior to January 10, 1971.

4.2 Credit of Gas Supplier Refunds to Unrecovered Purchased Gas Cost Account: Seller shall flow through Gas Supplier Refunds Subject to Flow-Through by reducing the balance of the Unrecovered Purchased Gas Cost Account by the amount of such refunds at the time of receipt by Seller or at the time the related action of the Commission or the Courts becomes final and nonappealable, whichever is later. Seller shall not be required to pay interest on Gas Supplier Refunds Subject to Flow-Through.

This provision allows Midwestern to accept refunds resulting from collections in excess of prescribed just and reasonable revenues, but to refuse to flow such refunds through to its customers during the pendency of any review proceedings relating to those refunds.

There is no apparent justification for such a provision. The determination as to whether or not refunds shall be retained by the party who is initially obligated by a final Commission order to make such refunds, is made when the Commission and/or the reviewing Court determines whether or not to stay the refund obligation of that party pending judicial review. However, once the determination is made by the Commission and/or the Court that refunds should be made during the pendency of appellate review, then the FERC must, to the limits of its power, ensure that refunds are flowed through. The reasoning supporting this policy is that, to the extent possible, the FERC should ensure, in this category of cases, that the ultimate consumers receive the benefits of the refunds during the pendency of the case before the Courts for judicial review.² There is no apparent equitable or legal reason,³

²This is particularly true in this case where there is no provision that Midwestern pay interest on the retained amount if the supplier ultimately loses its case in Court.

³We note that Midwestern and its pipeline supplier, Tennessee, are both divisions of Tenneco, Inc. This common ownership suggests an even more compelling reason to require the immediate flow-through of all refunds Midwestern receives from Tennessee related to Tennessee's own Section 4 rate cases.

ties like Midwestern should be permitted to retain supplier refunds pending resolution of court review proceedings involving the supplier which may continue for some time.⁴ This policy requiring complete flow-through of supplier refunds was recently clarified and reaffirmed by the FPC in *Area Rate Proceeding, et al.*, (Hugoton-Anadarko) order issued March 17, 1975, affirmed on rehearing, order issued May 30, 1975.⁵ As noted above, Article XVII of Midwestern's tariff plainly contravenes this policy.

For the above-stated reasons, the Commission believes its proper to institute a Section 5 investigation and order Midwestern to show cause why Article XVII of its existing tariff should not be found to be unjust and unreasonable for the reasons set forth above and why Article XVII of its tariff should not be modified by summary disposition to require Midwestern to immediately credit supplier refunds to its deferred account when they are received.

The Commission has, on several occasions, summarily disposed of issues that turned on question of law and policy, rather than fact.⁶ The courts have found that, "When there is no dispute on a factual issue, the application of an administrative policy does not require a hearing", *Tennessee Gas Pipeline Company, et al. v. FPC*, 561 F.2d 955, 958, (D.C. Cir. 1977) citing: *Municipal Light Boards of Reading and Wakefield, Massachusetts*, 146 U.S. App. D.C. 294, 400 F.2d 1341 (1971), cert. den., 405 U.S. 989 (1972).⁷

The matter presently before us appears to raise no factual issue, only one of policy. It therefore appears entirely proper for the Commission, by summary disposition, to determine the

⁴A good example may be found in *Tennessee Gas Pipeline Co.*, Docket No. RP73-113. In that proceeding, the Commission ordered Tennessee to make refunds to certain customers, including Midwestern. (See Opinions No. 769 issued July 9, 1976). Rehearing of this order was denied in Opinion No. 769-A, issued May 31, 1977. Tennessee then filed a motion for stay of refunds pending judicial review, which was also denied by this Commission. Finally, Tennessee filed a motion with the Court of Appeals requesting a stay of its refund obligation. This motion was denied October 24, 1977. Court review of the order is still pending, and Midwestern's customers are still waiting for a portion of their refunds.

⁵Those orders abolished, with certain exceptions not relevant to the instant case, the so called "equitable entitlement" doctrine which for past periods provided a limited exception to the complete flow-through policy.

⁶e.g., *Mississippi River Transmission Corporation*, Docket No. RP75-20, rehearing denied August 1, 1975.

⁷See also: *Citizens for Allegan County, Inc. v. FPC*, 414 F.2d 1125 (D.C. Cir. 1969); *Pennsylvania Gas and Water Company v. FPC*, 463 F.2d 1242 (D.C. Cir. 1172).

question whether Article XVII of Midwestern's tariff is unjust and unreasonable and whether such provision should be modified as mentioned above. We have found it appropriate, however, to provide, through the show cause procedure instituted herein, an opportunity for Midwestern to show why the action proposed in this order is not appropriate.

The Commission finds: It is necessary and proper and in the public interest and to aid in the enforcement of the Natural Gas Act that the Commission institute a Section 5 investigation and show cause proceeding as herein-after ordered.

The Commission orders: (A) The Commission hereby institutes an investigation pursuant to Section 5 of the Natural Gas Act and, pursuant to Sections 1.6(d) and 1.9(c) of the Commission's Rules of Practice and Procedure, directs Midwestern to show cause within 20 days of the issuance of this order why Article XVII of its existing tariff should not be found to be unjust and unreasonable for the reasons set forth above and why such tariff provision should not be modified by summary disposition to read as follows:

4. *Flow-Through of Gas Supplier Refunds*
4.1 *Gas Supplier Refunds Subject to Flow-Through:* Gas Supplier Refunds Subject to Flow-Through are refunds (including interest received) which have been received by Seller from Suppliers pursuant to final action by the Commission applicable to gas purchased during the period beginning January 10, 1971, and continuing while Article XII is effective, except for refunds flowed through by Seller pursuant to Article III of the Amended Settlement Agreement dated May 24, 1973, in Docket Nos. RP71-18, et al. Gas Supplier Refunds Subject to Flow-Through shall be classified between demand and commodity components on the basis as received for each Supplier, and any interest received from any Supplier shall be classified between demand and commodity components in proportion to the demand and commodity components of the principal amount of the refunds. Nothing in this Article XVII in any way changes the rights and obligations of Seller or its customer with regard to gas supplier refunds applicable to gas purchased prior to January 10, 1971.

4.2 *Credit of Gas Supplier Refunds to Unrecovered Purchased Gas Cost Account:* Seller shall flow through Gas Supplier Refunds Subject to Flow-Through by reducing the balance of the Unrecovered Purchased Gas Cost Account by the amount of such refunds at the time of receipt by Seller.

(B) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. TC78-41]

TENNESSEE GAS PIPELINE CO.

Extension of Time

MAY 17, 1978.

On May 12, 1978, Tennessee Natural Gas Lines, Inc. (TNGLI), a division of Tenneco Inc. filed a motion to extend the time to June 2, 1978, within which to file petitions to intervene or protests to the petition filed April 27, 1978, by Columbia Gas Transmission Corp. and noticed by the Commission on May 9, 1978. The motion states that Commission Staff Counsel does not object to the requested extension. On May 15, 1978, Chattanooga Gas Co. filed a joinder in TNGLI's motion for an extension of time, and Columbia Gas Transmission Corp. filed an answer in opposition to the request.

Upon consideration, notice is hereby given that an extension of time is granted to and including May 26, 1978, within which to file petitions to intervene or protests in this proceeding.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-14481 Filed 5-23-78; 8:45 am]

[Docket No. CP78-321]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Notice of Application

MAY 16, 1978.

Take notice that on May 9, 1978, Transcontinental Gas Pipe Line Corp. (Applicant), P.O. Box 1396, Houston, Tex. 77001, filed in Docket No. CP78-321 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of up to 4,000 dekatherms (dt) equivalent of natural gas per day for Mid Louisiana Gas Co. (Mid Louisiana), all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant requests authorization to transport up to 4,000 dt of natural gas per day for Mid Louisiana pursuant to a transportation agreement dated March 31, 1978, which agreement provides that Mid Louisiana has natural gas available to it in the Lake Field, Plaquemines Parish, La. (Lake Washington) which Tennessee Gas Pipeline Co., a Division of Tenneco Inc. (Tennessee), would transport and deliver to Applicant at the existing interconnection between their systems located in Allen Parish, La. (Kinder). Applicant would, in turn, receive up to a contract demand quantity of 4,000 dt per day from Tennessee and redeliver equivalent quantities, less 1.2 percent for compressor fuel and line loss make-up, to Mid Louisiana at existing interconnections between their systems located in East Feliciana Parish, La. (Ethel)

and St. James Parish, La. (Hester), it is said.

It is stated that for this service, Mid Louisiana would pay Applicant initially a monthly charge of \$6,400, and that Mid Louisiana would receive a credit to its monthly bill of 5.25 cents per dt for any quantities tendered within the contract demand quantity but not transported due to possible capacity limitations on Applicant's system.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 7, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-14482 Filed 5-23-78; 8:45 am]

[6740-02]

[Docket No. CP78-316]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Notice of Application

MAY 16, 1978.

Take notice that on May 4, 1978, Transcontinental Gas Pipe Line Corp. (Applicant), P.O. Box 1396, Houston,

Tex. 77001, filed in Docket No. CP78-316 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation, on an interruptible basis, of natural gas not to exceed the dekatherm (dt) equivalent of 7,000 Mcf per day and 15,000 Mcf per day, for Delmarva Power & Light Co. (Delmarva) and Elizabethtown Gas Co. (Elizabethtown) (CD-3 customers), respectively, for a period ending March 31, 1979, all as more fully set forth in the application on file with the Commission and open to public inspection.

The application states that Delmarva and Elizabethtown have contracted with National Fuel Gas Supply Corp. (Supply Corp.) for one-year underground storage service in the amount of 1,000,000 Mcf and 1,500,000 Mcf, respectively, and have requested Applicant to transport injection and withdrawal quantities for their respective accounts. Applicant indicates that injection quantities would be delivered to Supply Corp. through existing facilities at the Wharton Storage Field in Pennsylvania, and that withdrawal quantities would be delivered to Delmarva and Elizabethtown at existing points of delivery to those customers in Pennsylvania and New Jersey, respectively.

It is stated that of the quantities transported, 3 percent during injection and 4 percent during withdrawal would be retained by Applicant for compressor fuel and line loss makeup, subject to change as operating conditions warrant. For all quantities transported and delivered, Delmarva and Elizabethtown would pay Applicant an initial rate of 9.55 cents per dt.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 7, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a

hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP77-374]

UNITED GAS PIPE LINE CO.

Further Notice of Petition to Amend

MAY 16, 1978.

Take notice that on May 9, 1978, United Gas Pipe Line Co. (United), P.O. Box 1478, Houston, Tex. 77001, filed in Docket No. CP77-374 a supplement to its petition to amend filed herein on April 28, 1978, pursuant to section 7(c) of the Natural Gas Act so as to provide for certain changes in said petition, all as more fully set forth in the supplement in this proceeding.

In the petition to amend United sought authorization to add new receipt point(s) from Mississippi River Transmission Corp. (Mississippi River), which was identified as a point on United's 18-inch line in section 10, T.20N, R. 3W, Lincoln Parish, La. By this supplement, United States that the receipt point(s) should have read section 10 and/or 11.

Also in the petition to amend United requested authorization to increase the volume of gas transported for Mississippi River from 5,000 Mcf per day to 6,055 Mcf. United now states that such increase is not contemplated with the terms of the amendment to the gas transportation agreement, and, therefore, this part of the application should be deleted. The gas to be received by United through the new receipt point(s) will be within the presently authorized maximum daily quantity of 5,000 Mcf, it is stated.

Any person desiring to be heard or to make any protest with reference to said petition should on or before June 7, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or

1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RP78-65]

EAST TENNESSEE NATURAL GAS CO.

Order Instituting Section 5 Investigation and Show Cause Proceeding

MAY 17, 1978.

Section 22, Part 4, of the General Terms and Conditions of East Tennessee Natural Gas Company's (East Tennessee) tariff provides that East Tennessee shall retain any refunds it may receive from its suppliers, including Tennessee Gas Pipeline Company (Tennessee), until the Commission action requiring such refunds is final and nonappealable. Review and consideration of this tariff provision indicates that a Section 5 investigation should be instituted to determine the propriety of allowing the provision to remain in the tariff. For the reasons stated hereinafter, the Commission will order East Tennessee to show cause why this tariff provision should not be amended by summary disposition to require the immediate crediting of supplier refunds to Account 191 for the benefit of its customers.

Section 22, Part 4 of East Tennessee's tariff provides as follows:

22.4 *Flow-Through of Gas Supplier Refunds*

(a) *Gas Supplier Refunds Subject to Flow-Through:* Gas Supplier Refunds Subject to Flow-Through are refunds (including interest received) which have been received by Seller pursuant to final and nonappealable action by the Commission or the Courts, applicable to gas purchased during the period beginning January 10, 1971, and continuing while Section 22 is effective, except for refunds made by East Tennessee pursuant to Section 5 of Article II of the Settlement Agreement in Docket Nos. RP75-114 et al., approved by the Commission's order dated October 13, 1976, and refunds made by Supplier pursuant to Article II of the Settlement Agreement dated August 16, 1971, approved by the Commission's Opinion No. 619 in Docket Nos. RP71-6, et al. Gas Supplier Refunds Subject to Flow-Through shall be classified between demand and commodity components on the basis as received from Supplier, and any interest received from Supplier shall be classified between demand and commodity components in pro-

portion to the demand and commodity components of the principal amount of the refunds. Seller shall not be required to pay interest on amounts refunded under Section 22.4. Nothing contained in this Section 22.4 in any way changes the rights and obligations of Seller or its jurisdictional customers with regard to refunds applicable to gas purchased prior to January 10, 1971.

(b) *Credit of Gas Supplier Refunds to Unrecovered Purchased Gas Cost Account.* Seller shall flow-through Gas Supplier Refunds Subject to Flow-Through by reducing the balances of the demand and commodity subaccounts, as appropriate, of the Unrecovered Purchased Gas Cost Account by the amount of such refunds at the time of receipt by Seller or at the time the related action of the Commission or the Courts becomes final and nonappealable, whichever is later.

This provision allows East Tennessee to accept refunds resulting from collections in excess of prescribed just and reasonable revenues, but to refuse to flow such refunds through to its customers during the pendency of any review proceedings relating to those refunds.

There is no apparent justification for such a provision. The determination as to whether or not refunds shall be retained by the party who is initially obligated by a final Commission order to make such refunds, is made when the Commission and/or the reviewing Court determines whether or not to stay the refund obligation of that party pending judicial review. However, once the determination is made by the Commission and/or the Court that refunds should be made during the pendency of appellate review, then the FERC must, to the limits of its power, ensure that refunds are flowed through. The reasoning supporting this policy is that, to the extent possible, the FERC should ensure, in this category of cases, that ultimate consumers receive the benefits of the refunds during the pendency of the case before the Courts for judicial review.¹ There is no apparent equitable or legal reason,² why "middleman" jurisdictional entities like East Tennessee should be permitted to retain supplier refunds pending resolution of court review proceedings involving the supplier which may continue for some time.³ This policy requires

¹This is particularly true in this case where there is no provision that East Tennessee pay interest on the retained amount if the supplier ultimately loses its case in Court.

²We note that East Tennessee and its primary pipeline supplier, Tennessee, are both divisions of Tenneco, Inc. This common ownership suggests an even more compelling reason to require the immediate flow-through of all refunds Tennessee receives from Tennessee related to Tennessee's own Section 4 rate cases.

³A good example may be found in *Tennessee Gas Pipeline Co.*, Docket No. RP73-113. In that proceeding, the Commission ordered

ing complete flow-through of supplier refunds was recently clarified and reaffirmed by the FPC in *Area Rate Proceeding*, et al., (Hugoton-Anadarko) order issued March 17, 1975, affirmed on rehearing, order issued May 30, 1975.⁴ As noted above, Section 22.4 of East Tennessee's tariff plainly contravenes this policy.

For the above-stated reasons, the Commission believes it proper to institute a Section 5 investigation and order Tennessee to show cause why Section 22 of its existing tariff should not be found to be unjust and unreasonable for the reasons set forth above and why Section 22 of its tariff should not be modified by summary disposition to require East Tennessee to immediately credit supplier refunds to its deferred account when they are received.

The Commission has, on several occasions, summarily disposed of issues that turned on question of law and policy, rather than fact.⁵ The courts have found that, "When there is no dispute on a factual issue, the application of an administrative policy does not require a hearing", *Tennessee Gas Pipeline Company, et al. v. FPC*, 561 F.2d 955, 958 (D.C. Cir. 1977) citing: *Municipal Light Boards of Reading and Wakefield, Massachusetts*, 146 U.S. App. D.C. 294, 400 F.2d 1341 (1971), cert den., 405 U.S. 989 (1972).⁶

The matter presently before us appears to raise no factual issue, only one of policy. It appears therefore entirely proper for the Commission, by summary disposition, to determine the question of whether Section 22 of East Tennessee's tariff is unjust and unreasonable and whether such provision should be modified as mentioned above. We have found it appropriate, however, to provide, through the show cause procedure instituted herein, an opportunity for East Tennessee to show why the action proposed in this order is not appropriate.

Tennessee to make refunds to certain customers, including East Tennessee. (See: Opinion No. 769 issued July 9, 1976). Rehearing of this order was denied in Opinion No. 769-A, issued May 31, 1977. Tennessee then filed a motion for stay of refunds pending judicial review, which was also denied by this Commission. Finally, Tennessee filed a motion with the Court of Appeals requesting a stay of its refund obligation. This motion is still pending, and East Tennessee's customers are still waiting for a portion of their refunds.

⁴Those orders abolished, with certain exceptions not relevant to the instant case, the so called "equitable entitlement" doctrine which for past periods provided a limited exception to the complete flow-through policy.

⁵*Mississippi River Transmission Corporation*, Docket No. RP75-20, rehearing denied August 1, 1975.

⁶See also: *Citizens for Allegan County, Inc. v. FPC*, 414 F.2d 1125 (D.C. Cir. 1969); *Pennsylvania Gas and Water Company v. FPC*, 463 F.2d 1242 (D.C. Cir. 1972).

The Commission finds: It is necessary and proper and in the public interest and to aid in the enforcement of the Natural Gas Act that the Commission institute a Section 5 investigation and show cause proceeding as herein-after ordered.

The Commission orders: (A) The Commission hereby institutes an investigation pursuant to Section 5 of the Natural Gas Act and, pursuant to Sections 1.6(d) and 1.9(c) of the Commission's Rules of Practice and Procedure, directs East Tennessee to show cause within 20 days of the issuance of this order why Section 22 of its existing tariff should not be found to be unjust and unreasonable for the reasons set forth above and why such tariff provision should not be modified by summary disposition to read as follows:

22.4 Flow-Through of Gas Supplier Refunds

(a) *Gas Supplier Refunds Subject to Flow-Through:* Gas Supplier Refunds Subject to Flow-Through are refunds (including interest received) which have been received by Seller pursuant to final action by the Commission, applicable to gas purchased during the period beginning January 10, 1971, and continuing while Section 22 is effective, except for refunds made by East Tennessee pursuant to Section 5, Article II of the Settlement Agreement in Docket Nos. RP75-14, et al., approved by the Commission's order dated October 13, 1976, and refunds made by Supplier pursuant to Article II of the Settlement Agreement dated August 16, 1971, approved by the Commission's Opinion No. 619 in Docket No. RP71-6, et al. Gas Supplier Refunds Subject to Flow-Through shall be classified between demand and commodity components on the basis as received from Supplier, and any interest received from Supplier shall be classified between demand and commodity components in proportion to the demand and commodity components of the principal amount of the refunds. Nothing contained in this Section 22.4 in any way changes the rights and obligations of Seller or its jurisdictional customers with regard to refunds applicable to gas purchased prior to January 10, 1971.

(b) *Credit of Gas Supplier Refunds to Unrecovered Purchased Gas Cost Account:* Seller shall flow-through Gas Supplier Refunds Subject to Flow-Through by reducing the balances of the demand and commodity subaccounts, as appropriate, of the Unrecovered Purchased Gas Cost Account by the amount of such refunds at the time of receipt by Seller.

(B) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[6560-01]

ENVIRONMENTAL PROTECTION AGENCY

[IP 6G1705/T149 (FRL-899-3)]

PESTICIDE PROGRAMS

Extension of Temporary Tolerances, O-Ethyl O-[4-(methylthio)phenyl] S-propyl phosphorodithioate

On June 10, 1977, the Environmental Protection Agency (EPA) announced (42 FR 29956) a renewal of temporary tolerances for combined residues of the insecticide O-ethyl O-[4-(methylthio)phenyl] S-propyl phosphorodithioate and its cholinesterase-inhibiting metabolites in or on the raw agricultural commodities cottonseed at 0.5 part per million (ppm); the meat, fat, and meat byproducts of cattle, goats, hogs, horses, poultry, and sheep at 0.01 ppm; and in milk and eggs at 0.001 ppm. These tolerances were established (41 FR 14812) in response to a pesticide petition (PP 6G1705) submitted by Chemagro Agricultural Div., Mobay Chemical Corp., PO Box 4913, Kansas City, MO 64120. This renewal will expire June 3, 1978.

Chemagro Agricultural Div. has requested a one-year extension of these temporary tolerances both to permit continued testing to obtain additional data and to permit the marketing of the above raw agricultural commodities when treated in accordance with the provisions of the experimental use permit that is being extended concurrently under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 137(a) et seq.). (A related document establishing a feed additive regulation for residues of the subject insecticide in cottonseed hulls and oil appears elsewhere in today's FEDERAL REGISTER.)

The scientific data reported and all other relevant material have been evaluated, and it has been determined that an extension of the temporary tolerances will protect the public health. Therefore, the temporary tolerances are extended on condition that the pesticide is used in accordance with the experimental use permit with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.

2. Chemagro Agricultural Div. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These temporary tolerances expire June 3, 1978. Residues not in excess of

0.5 ppm remaining in or on cottonseed; 0.01 ppm remaining in the meat, fat, and meat byproducts of cattle, goats, hogs, horses, poultry, and sheep; and 0.001 ppm remaining in milk and eggs after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerances. These temporary tolerances may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicate such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to the Special Registrations Branch, Registration Division (WH-567), Office of Pesticide Programs, Room 315, East Tower, 401 M Street, SW, Washington, D.C. 20460, 202-755-4851.

(Sec. 408(j), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(j)).)

Dated: May 9, 1978.

MARTIN H. ROGOFF,
Acting Director,
Registration Division.

FEDERAL DEPOSIT INSURANCE CORPORATION

INCOME TAX REMITTANCE BY BANKS TO HOLDING COMPANY AFFILIATES

Statement of Policy

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Policy Statement.

SUMMARY: This policy statement reflects the judgment of the Corporation that certain questionable intercorporate tax practices may constitute unsafe and unsound banking practices. Notification is given that the agency intends to take appropriate supervisory action to obtain correction where such practices are found.

EFFECTIVE DATE: Immediately.

FOR FURTHER INFORMATION CONTACT:

Paul L. Sachtleben, Examination Specialist, Projects and Planning, Federal Deposit Insurance Corporation, Washington, D.C. 20429, 202-389-4483.

SUPPLEMENTARY INFORMATION: This policy statement is issued pursuant to the Financial Institutions Supervisory Act, 12 U.S.C. 1818, and the supervisory authority of the Federal

Deposit Insurance Corporation with respect to nonmember insured banks.

STATEMENT OF POLICY CONCERNING INCOME TAX REMITTANCE BY BANKS TO HOLDING COMPANY AFFILIATES

It is a common practice within the banking industry, as well as other industries, to use different accounting methods for IRS purposes and for financial statement purposes. Because timing differences arise from the use of different accounting methods, income and expenses reported on the financial statements differ from what is reported on the tax return. Generally accepted accounting practices and the Corporation's instructions for the preparation of the Reports of Income and Condition require banks to provide for any deferred income taxes resulting from these timing differences.

A bank that is a subsidiary of a bank holding company will often join in the filing of a consolidated income tax return. Several methods are currently used in determining the amount which the parent holding company may collect for each subsidiary's allocated share of the consolidated income tax obligation.

Some banks remit to their holding companies the entire amount of income tax expense computed for financial statement or Call Report purposes, including both the current provision and deferred income taxes. The bank receives no benefit by transferring the equivalent of its deferred taxes to its parent. Further, the bank's liquidity is unnecessarily reduced and/or the bank is deprived of income which may have been generated from the transferred funds.

Past transfers of the bank's deferred income taxes shall be reinstated on the bank's books. If cash or other consideration that the bank had previously passed up to the parent cannot be restored immediately, that amount shall be recorded on its books as a loan to the parent company and an appropriate level of interest charged. This loan is subject to the provisions of section 18(j) of the Federal Deposit Insurance Act. Of course, as with any applicable insider transaction, the requirements of §337.3 of the FDIC rules and regulations apply.

Any future transfer of deferred income taxes by a bank, or a refusal to reverse past transfers, may constitute an unsafe and unsound banking practice. As with any bank practice which has been determined to be unsafe and unsound, the Corporation may take appropriate supervisory action against the bank, ranging from informal efforts to obtain voluntary correction to formal proceedings under Section 8 of the FDI Act.

In summary, cash transfers paid by the bank to the holding company as a result of the consolidated income tax obligation (a) shall not exceed, but may be less than, the amount of tax the bank would have paid had a tax return been filed on a separate return basis, and (b) shall not be made prior to the approximate time that estimated payments or income tax returns are submitted to the IRS. Additionally, a bank which incurs a taxable loss shall be reimbursed in cash by the holding company to the extent that there is a tax benefit arising from these losses in the consolidated return, as determined in a manner consistent with the allocation of taxes to profitable subsidiaries.

Finally, the establishment of a formal tax allocation agreement between the bank and the parent holding company would be consistent with the responsibilities of the bank's board of directors.

By order of the Board of Directors, April 19, 1978.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

[1610-01]

GENERAL SERVICES ADMINISTRATION

PRIVACY ACT OF 1974

New General Routine Use

AGENCY: General Services Administration.

ACTION: Notification of new general routine use for the GSA systems of records.

SUMMARY: The purpose of this document is to give notice, pursuant to the provisions of the Privacy Act of 1974, 5 U.S.C. 552a(e)(1), of intent to establish a new general routine use covering disclosures of information from the GSA systems of records to agents of GSA.

DATES: Any interested party may submit written comments regarding the proposal. To be considered, comments must be received on or before the 30th day following publication of this notice. The routine use shall become effective as proposed without further notice on June 23, 1978, unless comments are received which would result in a contrary determination.

ADDRESS: Address comments to General Services Administration (BR), Washington, D.C. 20405.

FOR FURTHER INFORMATION CONTACT:

Mr. William Hiebert, Records Management Branch, Paperwork Management Division, 202-566-0674.

BACKGROUND

Although experts, consultants, and contractors of GSA act as agents for the Government in the performance of Federal duties, in some situations they may not fulfill all the requirements of officers and employees for purposes of the disclosure provisions of 5 U.S.C. 552a(b)(1). Although we consider that GSA currently has authority to transfer medical records to physicians to conduct physical examinations, in some cases it is necessary to transfer personnel records and other records to a physician to apprise him of the employment background of the individual he is to examine. The proposed general routine use is to clarify the status of experts, consultants, and contractors and to allow disclosure of personnel records and other records to physicians. We believe that these disclosures of information are consistent with the purposes for which the records were compiled.

Proposed routine use: The proposed general routine use is to be added to the appendix following the GSA notices of systems of records. The current appendix was published on September 21, 1977 (42 FR 47782 and

47783). The proposed new general routine use reads as follows:

ROUTINE USE—GSA AGENTS

A record from this system of records may be disclosed as a routine use: (1) to an expert, a consultant, or a contractor of GSA to the extent necessary to further the performance of a Federal duty, and (2) to a physician to conduct a fitness-for-duty examination of a GSA officer or employee.

Dated: May 16, 1978.

JANICE K. MENDENHALL,
Director of Administration.

[Intervention Notice 65: Docket No. 19960]

VIRGINIA STATE CORPORATION COMMISSION, VIRGINIA ELECTRIC POWER CO.

Proposed Intervention in Electric Rate Increase Proceeding

The Administrator of General Services seeks to intervene in a proceeding before the Virginia State Corporation Commission involving an application of Virginia Electric Power Co. for an increase in rates charged for electric service. The Administrator of General Services represents the interests of the executive agencies of the U.S. Government as users of electric power.

Persons desiring to make inquiries of GSA concerning this case should submit them, in writing, to Mr. Spence W. Perry, Assistant General Counsel, Regulatory Law Division, General Services Administration, 18th and F Streets NW., Washington, D.C. 20405, telephone 202-566-0726, on or before June 23, 1978, and refer to this notice number.

Persons making inquiries are put on notice that the making of an inquiry shall not serve to make any persons parties of record in the proceeding.

(Sec. 201(a)(4), Federal Property and Administrative Services Act (40 U.S.C. 481(a)(4)).)

Dated: May 17, 1978.

JAY SOLOMON,
Administrator of General Services.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Human Development Services

[Announcement Number 13608-781]

CHILD WELFARE RESEARCH AND DEMONSTRATION GRANTS PROGRAM

Availability of Research and Demonstration Grants

The administration for Children, Youth and Families, Office of Human Development Services, announces the availability of Fiscal Year 1978 funds for research and demonstration grants under the Child Welfare Research and Demonstration Grants Program, as authorized by 42 U.S.C. 606(a)(1) (A) and (B) (section 426, Part B, Title IV of the Social Security Act as amended). The regulations applicable to this program are contained in 42 CFR Part 205.

Applications must be received by July 21, 1978.

DEFINITIONS OF RESEARCH AND DEMONSTRATION

Research refers to a project to develop new knowledge or to evaluate existing knowledge in new settings.

Demonstration and/or replication refer to activities designed specifically to show the method of operation or applicability of a research or program model.

SCOPE OF THIS PROGRAM ANNOUNCEMENT

Applications will be received and competitively reviewed for the award of research and demonstration grants relating to the purpose and objectives of the program. Grant support is not available for ongoing programs or services (such as the provision of day care services), for projects that demonstrate a service that has already been established in other communities and is generally accepted as part of a comprehensive child welfare or child development program, or for staff training projects.

Since ACYF will be funding new research and demonstration grants in Fiscal Year 1978 under its National Center on Child Abuse and Neglect, it will not consider or fund child abuse and neglect projects under the authority of the Child Welfare Research and Demonstration Grants Program.

A. PROGRAM PURPOSE AND OBJECTIVES

The overall purpose of the Child Welfare Research and Demonstration Grants Program is to support major research and demonstration efforts in selected areas of high impact and national concern where the utilization of findings is expected to make a substantial contribution to the development and welfare of children and their

families. Grants will be made for projects which reflect the following four program objectives:

1. To test hypotheses and demonstrate the feasibility of specific program models which will enhance child and family development, child rearing, and family-institution relationships among families from different cultural groups, economic levels, and age groups. (ACYF is particularly interested in receiving grant applications which address the special concerns of teenaged parents and anticipates making approximately half of the grant awards within this program objective for projects which reflect these concerns.) All research or demonstration applications should address one or more of the hypotheses (questions) as follows:

a. *Child and Family Development.* (1) Within a given culture subgroup or socioeconomic level, how do coping abilities of families differ as a function of relative stress and available supports, utilized or non-utilized? Is age of parents a factor (e.g., teenaged parents)?

(2) Is family coping skill a significant predictor of child outcomes?

(3) What are important family process variables which mediate the effects of a variety of family structures on child development outcomes?

(4) What are the different supports needed by families at different stages in family development?

(5) What are important dimensions of family-child interactions which mediate effects of tv programming on the child's socialization?

b. *Child Rearing.* (1) What are the effects of: (a) Parental expectations on the child's aspirations and developmental outcomes? (b) child behavior on parental expectations?

(2) Are the interaction of family characteristics with school/program characteristics, and the quality of the relationships between the two systems, more powerful predictors of child outcome than the characteristics of either system alone?

(3) Is the presence of siblings and the nature of child-sibling relationship a significant source of support (or stress) to the child in helping (or hindering) social adaptation and development?

(4) Are interventions regarding child rearing most effective when they are sought by individuals rather than imposed upon them? And, if so, why is this the case?

(5) What are the high risk combinations of constitutional and environmental factors that will provide for the precise targeting of appropriate interventions?

c. *Family-Institution Relationships.* (1) What features of mediating structures (e.g., kinship networks, neighborhoods, churches, voluntary associ-

ations, and other primary support groups) make them more or less able to support family and child development?

(2) In what ways do service systems by-pass and undermine the functioning of mediating structures that support family and child development?

(3) What are the natural caregiving functions of extended kin across family development stages and across ethnic groups?

(4) What is the most useful typology for service systems that delineate types of intervention according to impact on mediating structures and thence on family and child development?

(5) Does community control of service systems enhance understanding by agency personnel of indigenous family forms and structures?

(6) What are the critical intra-organizational policies in community linkages for a service system that are necessary for establishing a base of acceptance in the local community?

2. To coordinate the activities of a task force involving interested citizens, community group representatives, foster parents, private agency child welfare professionals, public agency staff, and other family and children's advocates in order for a State to review and assess its foster family services systems, develop recommendations for changes in policies, procedures, program and licensing standards, or legislation and regulations. Demonstration applications will propose to conduct not more than one of the following activities:

(a) Carry out an assessment of foster family care services within the state and develop recommendations for improving services in accordance with the revised standards to be published by the American Public Welfare Association.

(b) Where the state has already completed a comprehensive assessment of its foster family services within the last three years, write or revise it foster family care regulations which provide the basis for program operation. They may involve licensing regulations as well as those for services to the foster child, the biological family, and foster family.

(c) Assist the agency in revising its foster family services manual or program guidelines, to incorporate changes which are recommended as a result of a comprehensive assessment completed during the previous three years.

(d) Combine a comprehensive assessment of the foster family services system with followup activities described in b above (revision of regulations) or c above (revision of services manual).

3. To demonstrate that the delivery of social services to children and their

families by public agencies can be improved through the utilization and implementation of Self-Assessment manuals and System Design materials geared toward improving the quality, timeliness, and efficiency of service delivery. (These two sets of materials, recently developed at the direction of the Children's Bureau, will be made available, in part, to prospective applicants as part of the application kit.) Two types of grants, service delivery demonstration projects and a collaborative research project, will be awarded.

a. *Service delivery* demonstration project applications will be expected to use the Self-Assessment and System Design materials in order to: (1) Assess current service delivery practices;

(2) Identify, define and put in priority order areas for needed improvements;

(3) Modify existing practices and procedures based on prior demonstrated successes and "best practices" from the field;

(4) Implement needed changes to improve service delivery in one or more local agencies;

(5) Implement changes county or State-wide based on the successes achieved in the local agencies; and,

(6) Document and assess the steps taken to improve service delivery to inform the field.

b. *Collaborative research* project applications will be expected to: (1) Interpret the self-assessment and system design materials to the "service delivery projects" and others in the field;

(2) Identify and interpret additional materials bearing on improving the delivery of social services to children and their families;

(3) Assist the service delivery projects in achieving local agency as well as county-wide or State-wide improvements in service delivery;

(4) Coordinate the research, systems design, development and implementation efforts among the service delivery project States;

(5) Provide guidance to the service delivery projects to assess their own progress;

(6) Promote technology transfer nationally to other State, county, or local agencies through refinement of existing materials or development of additional materials, dissemination and interpretation of materials, and other means; and,

(7) Provide an annual analytic report synthesizing the collaborative experience.

4. To identify research and demonstration projects which are relevant to ACYF's objective of increasing knowledge regarding the development and welfare of children and their families. These applications will be subject to the same competitive review process and criteria for evaluating research and demonstration projects.

B. ELIGIBLE APPLICANTS

Applicant eligibility is noted below for each of the four program objectives as previously stated in Section A:

Objective 1—Enhancement of child and family development. Public or private nonprofit organizations may apply.

Objective 2—Assessment of States' foster family services systems. The single State agency or its organizational unit responsible for social services to families and children, including foster family care services, may apply.

Objective 3—Improvement of the delivery of social services to children and families.

(a) *Service Delivery Projects*. Any State, county, or local public social service agency may apply.

(b) *Collaborative Research Project*. Any public or other nonprofit institution of higher learning or public or other nonprofit agency or organization engaged in research of child welfare activities may apply.

Objective 4—Other projects.

Public or private nonprofit organizations may apply. Under the statutory authority or this program, grants are not made to individuals even though they may be affiliated with a public or private nonprofit institution.

C. AVAILABLE FUNDS AND DURATION OF PROJECT

of the total appropriation of \$15,700,000 available in fiscal year 1978, ACYF expects to award approximately \$2,477,000 for each program objective as follows:

Objective 1—Enhancement of child and family development. ACYF will award 10-12 grants totaling approximately \$1,200,000 for one-three years, with an average award of \$125,000 per year. Of the \$1,200,000, \$600,000 will be awarded for five-six grants dealing with the specific concerns of teenaged parents.

Objective 2—Assessment of States' foster family services systems. ACYF will award four-six grants totaling \$192,000, for one year each, at \$25,000-\$50,000 depending upon salary schedule, geographical size, and travel and per diem costs of the particular state.

Objective 3—Improvement of the delivery of social services to children and families.

a. *Service delivery projects*. ACYF will award seven grants totaling \$560,000 for three years at \$80,000 per year.

b. *Collaborative research project*. ACYF will award one three-year grant at \$275,000 per year.

Objective 4—Other projects. ACYF will award three-four grants totaling \$250,000 for one-three years, with an average award of \$75,000 per year.

D. GRANTEE SHARE OF PROJECT

Program regulations require that all grantees share in the costs of projects.

It is generally expected that grantees will provide at least five percent of total project costs. Grantee contributions must be project-related and may be in cash or in kind.

E. THE APPLICATION PROCESS

1. *Availability of application forms*. In order to be considered for a grant under the Child Welfare Research and Demonstration Grants Program, an application must be submitted on the forms supplied and in the manner prescribed by the Administration for Children, Youth, and Families. Application kits which contain the prescribed application forms and information for the applicant may be obtained from:

Administration for Children, Youth, and Families, Research and Evaluation Division, P.O. Box 1182, Washington, D.C. 20013. (Attention: 13608-781) Telephone, 202-755-7755; 755-7758.

2. *Application submission*. The prescribed application form must be executed by an individual authorized to act for the applicant agency and to assume the obligations imposed by the terms and conditions of the grant award, including the regulations of the Program.

One signed original and two copies of the grant application, including all attachments, are required. The original and the two additional copies may be mailed or hand-delivered to:

Department of Health, Education, and Welfare, Office of Human Development Services, Switzer Building, Grants Management Branch, Room 1427, 330 C Street SW., Washington, D.C. 20201. (Attention: 13608-781.)

Hand-delivered applications are accepted during normal working hours of 9 a.m. to 5 p.m.

3. *Application consideration*. The Commissioner for Children, Youth, and Families determines the final action to be taken with respect to each grant application. Applications which do not conform to this announcement, or are not complete, or which do not meet the deadline will not be accepted for consideration, and applicants will be notified accordingly. Otherwise, all applications will be considered for funding.

All accepted grant applications will be subjected to a competitive review and evaluation conducted by persons independent of the program office who are experts in the areas of child and family development and welfare. The results of the competitive review supplement and assist the Commissioner's consideration of the competing applications. The Commissioner also takes into account the comments of the HEW Regional Offices and the headquarters program office. Comments on the applications may also be requested from appropriate specialists

and consultants both within and outside the Government.

After the Commissioner has decided either to disapprove or not to fund a competing grant application, the unsuccessful applicant will be notified by letter of that decision. The letter will include an explanation of the reasons for disapproval or non-funding or will indicate that an explanation may be obtained upon request.

4. *Grant awards*. The Commissioner for Children, Youth, and Families makes grant awards consistent with the purposes of the legislation, the regulations, and program announcements within the limits of Federal funds available for the purpose of supporting research and demonstration projects. The official grant award document is the Notice of Grant Awarded (NGA). The NGA sets forth in writing to the grantee the amount of funds awarded, the purpose of the grant, the terms and conditions of the grant award, the effective date of the award, the budget period for which support is given, and the total grantee participation. The initial award also specifies the total project period for which support is contemplated, although support beyond the first year is dependent upon the grantee's satisfactory progress and the availability of funds.

F. CRITERIA FOR REVIEW AND EVALUATION OF APPLICATIONS

All competing grant applications will be reviewed and evaluated against the following criteria:

1. That the estimated cost to the government for the proposed project is reasonable considering anticipated results;

2. That project personnel are or will be well qualified, and that the applicant organization has adequate resources;

3. That the proposed methodology or procedures, if well executed, are capable of attaining project objectives. Reviewers will consider the following:

a. Review of literature

b. Innovativeness of approach/design

c. Objectives/hypotheses clearly stated

d. Procedures

(1) Sample size

(2) Comparison/control group(s)

(3) Treatment(s)

(4) Design

(5) Measures/instruments

(6) Data analysis plan

(7) Time schedule

(8) Reports.

4. That the project objectives are identical with or capable of achieving the specific program purpose and objectives defined in the program announcement (See Section A1-4);

5. Dissemination/utilization plan.

a. Applicant indicates knowledge of appropriate users

b. Applicant presents an appropriate utilization plan, i.e., understands potential implications of results with regard to whichever of the following may be relevant: policy, programs, service delivery systems, legislation, research and demonstration activities, training, teaching, staffing, etc.;

6. Comparability of proposed study to other completed and/or ongoing studies.

a. Applicant indicates awareness of related completed and/or ongoing projects.

b. Applicant uses marker measures and marker variables for research comparability as appropriate.

7. Protection of human subjects. If subjects are at risk, appropriate safeguards have been taken.

G. CLOSING DATE FOR RECEIPT OF APPLICATIONS

The closing date for receipt of applications under this program announcement is July 21, 1978. An application will be considered to have arrived by the closing date if:

1. The application was sent by registered or certified mail not later than July 18, 1978 as evidenced by the U.S. Postal Service postmark, or on the original receipt from the U.S. Postal Service; or

2. The application is received on or before July 21, 1978 by the OHDS receiving office.

H. LATE APPLICATIONS

Late applications are not accepted. They are returned without consideration, and applicants are notified accordingly. (Catalog of Federal Domestic Assistance Program Number 13.608 Child Welfare Research and Demonstration Grants Program.)

Dated: May 8, 1978.

BLANDINA CARDENAS,
Commissioner for Children,
Youth and Families. Approved:
May 19, 1978. Arabella
Martinez,

Assistant Secretary for
Human Development Services.

Office of the Secretary

ADVISORY COUNCIL ON SOCIAL SECURITY

Public Meeting

AGENCY: Advisory Council on Social Security, HEW.

ACTION: Notice is hereby given of a public meeting of the Advisory Council on Social Security.

SUMMARY: Notice is given pursuant to Pub. L. 92-463, that the Advisory

Council on Social Security, established pursuant to section 706 of the Social Security Act, as amended, will meet on Thursday, June 8, 1978, from 9 a.m. to 5 p.m. in Room 800 of the Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, D.C. The meeting will be devoted to the topic of social security benefits, with particular emphasis upon how they relate to means-tested income programs and pension programs. The meeting is open to the public.

Individuals and groups who wish to have their interest in the social security program taken into account by the Council may submit written comments, views, or suggestions to Mr. Lawrence H. Thompson.

FOR FURTHER INFORMATION CONTACT:

Mr. Lawrence H. Thompson, Executive Director of the Advisory Council, P.O. Box 17054, Baltimore, Md. 21235. Telephone inquiries should be directed to Mr. Edward F. Moore, telephone number 301-594-3171.

(Catalog of Federal Domestic Assistance Program Numbers 13.800-13.807 Social Security Program.)

Dated: May 19, 1978.

LAWRENCE H. THOMPSON,
Executive Director, Advisory
Council on Social Security.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. N-78-874]

PRIVACY ACT OF 1974

Amendment to Routine Uses

AGENCY: Department of Housing and Urban Development.

ACTION: Notice of amendment of existing system of records.

SUMMARY: This amendment adds the Social Security Administration to the routine uses of HUD's Privacy Act system entitled Pay and Leave Records of Employees (HUD/DEPT-34).

EFFECTIVE DATE: The amendment shall become effective without further notice in 30 calendar days (June 23, 1978), unless comments are received on or before June 23, 1978, which would result in a contrary determination.

ADDRESS: Rules Docket Clerk, Room 5218, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410.

FOR FURTHER INFORMATION CONTACT:

Mr. Harold Rosenthal, Departmental Privacy Act Officer, telephone number 202-755-5192.

SUPPLEMENTARY INFORMATION: This amendment is necessitated by the provisions of Pub. L. 94-202 which require that agencies furnish W-2 (Wage and Tax Statement), W-2P (Statement for Recipients of Annuities, Pensions, or Retired Pay), and W-3 (Transmittal of Income and Tax Statements) to the Social Security Administration starting with tax periods beginning January 1, 1978.

The Department has determined that an Environmental Impact Statement is not required with respect to this notice.

NOTE.—It is hereby certified that the economic and inflationary impacts of this notice have been carefully evaluated in accordance with OMB Circular A-107.

Accordingly, the Department amends the routine uses of system HUD/DEPT-34 to read as follows:

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See Routine Uses paragraphs in prefatory statement. Other routine uses: Transmittal of data to U.S. Treasury to effect issuance of paycheck to employees and distribution of pay according to employee directions for savings bonds, allotments, financial institutions, and other authorized purposes. The reporting of W-2 statements to Internal Revenue Service, Social Security Administration, the individual, and taxing authorities of States, the District of Columbia, territories, possessions, and local governments, except Social Security numbers will be reported only to such authorities that have satisfied the requirement set forth in section 7(a)(2)(B) of the Privacy Act of 1974. To the Civil Service Commission concerning pay, benefits, retirement deductions, and other information necessary for the Commission to carry on its Government-wide personnel functions; to GAO—for audit; to other Federal Government agencies—to facilitate employee transfers; and to State agencies—to verify workmen's compensation injury claims.

For the convenience of the public, the Department is printing below the system of records in its entirety including the modification. The prefatory statement containing General Routine Uses applicable to all of the Department's systems of records was published at 42 FR 54765 (October 7, 1977). Appendix A which lists the addresses of HUD's field offices was published at 42 FR 54777 (October 7, 1977).

HUD-DEPT-34

System name:

Pay and leave records of employees.

System location:

All Department offices. For a complete listing of offices, with addresses, see appendix A.

Categories of individual covered by the system:

HUD employees.

Categories of records in the system:

Name, social security number and employee number, grade, step, and salary; organization, retirement, or FICA data as applicable; Federal, State, and local tax deductions; regular and optional Government life insurance deduction(s), health insurance deduction and plan or code; cash award data; jury duty data; military leave data; pay differentials; union dues deductions; allotments, by type and amount; financial; institution code and employee account number; leave status and data of all types (including annual, compensatory, jury duty, maternity, military, retirement disability, sick, transferred, and without pay); time and attendance records, including leave applications and reports, individual daily time reports, adjustments to time and attendance, overtime reports, supporting data, such as medical certificates, number of regular, overtime, holiday, Sunday, and other hours worked; pay period number and ending dates; cost of living allowances; mailing address; coowner and/or beneficiary of bonds, marital status and number of dependents; and "Notification of Personnel Action."

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

See routine uses paragraphs in prefatory statement. Other routine uses: Transmittal of data to U.S. Treasury to effect issuance of paycheck to employees and distribution of pay according to employee directions for savings bonds, allotments, financial institutions, and other authorized purposes. The reporting of W-2 statements to Internal Revenue Service, Social Security Administration, the individual, and taxing authorities of States, the District of Columbia, territories, possessions, and local governments, except Social Security numbers will be reported only to such authorities that have satisfied the requirements set forth in section 7(a)(2)(B) of the Privacy Act of 1974. To the Civil Service Commission concerning pay, benefits, retirement deductions, and other information necessary for the Commission to carry on its Government-wide personnel functions; to GAO—for audit; to other Federal Government agencies—to facilitate employee transfers; and to State agencies—to verify workmen's compensation injury claims.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Manual, machine-readable, and magnetic media.

Retrievability:

Name of employee; social security number.

Safeguards:

Physical, technical, and administrative security is maintained with all storage equipment and/or rooms locked when not in use. Admittance, when open, is restricted to authorized personnel only. All payroll personnel and computer operators and programmers are instructed and cautioned on the confidentiality of the records. Manual files kept in lockable desks, file cabinets, and safes.

Retention and disposal:

Retained on site until after GAO audit, then disposed of, or transferred to Federal Records Storage Centers in accordance with fiscal records program approval by GAO, as appropriate, or General Record Schedules of GSA.

System manager and address:

Director, Office of Organization and Management Information, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410.

Notification procedure:

For information, assistance, or inquiry about existence of records, contact the Privacy Act Officer at the appropriate location, in accordance with procedures in 24 CFR part 16. A list of all locations is given in appendix A.

Record access procedures:

The Department's rules for providing access to records to the individual concerned appear in 24 CFR part 16. If additional information or assistance is required, contact the Privacy Act Officer at the appropriate location. A list of all locations is given in appendix A.

Contesting record procedures:

The Department's rules for contesting the contents of records and appealing initial denials, by the individual concerned, appear in 24 CFR part 16. If additional information or assistance is needed, it may be obtained by contacting: (i) In relation to contesting contents of records, the Privacy Act Officer at the appropriate location. A list of all locations is given in appendix A; (ii) In relation to appeals of initial denials, the HUD Departmental Privacy Appeals Officer, Office of General Counsel, Department of Housing and

Urban Development, 451 Seventh Street SW., Washington, D.C. 20410.

Record source categories:

Subject individuals, supervisors, timekeepers, official personnel records, previous employers, or other Federal Government agencies.

(5 U.S.C. 552a, 88 Stat. 1896; sec. 7(d) Department of HUD Act (42 U.S.C. 3535(d)).)

Issued at Washington, D.C., May 12, 1978.

PATRICIA ROBERTS HARRIS,
Secretary of Housing and
Urban Development.

[4310-84]

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

PUBLIC MEETINGS

The Interagency Geothermal Streamlining Task Force will hold a series of public meetings to discuss alternatives for streamlining the Federal geothermal leasing and environmental review procedures activities. The Task Force was created to assist the Interagency Geothermal Coordinating Council (IGCC) in developing recommendations for implementing the President's commitment that:

The Departments of the Interior and Agriculture will streamline leasing and environmental review procedures to remove unnecessary barriers to development of geothermal resources.

This objective was included in the President's comprehensive energy program submitted to Congress in April 1977. It responds to the fact that nearly seven and one-half years after the Geothermal State Act of 1970 (Pub. L. 91-581) was passed, there is no commercial geothermal production and utilization on Federal lands despite the fact that approximately two-thirds of the Nation's identified geothermal reservoirs exist on Federal land.

While there are also technological, environmental, and economic problems to be resolved in geothermal application, it is widely believed that the Federal leasing and post-lease permit programs, as set forth in CFR Title 43, Group 3200, and Title 30, Parts 270 and 271, are a major deterrent to development, since repetitive requirements results in major delays in obtaining lease and permits. Furthermore, non-uniform timeframes have impeded orderly planning for development.

The Task Force is therefore undertaking a comprehensive analysis of each step in the existing leasing and

permitting processes of the Bureau of Land Management, Forest Service, and Geological Survey which will identify and document the sources of and reasons for delay. The data analysis will be followed by analysis of the effects which would be exerted on the existing program by various options for program modification. The effectiveness of alternative options will be assessed in terms of their relative ability to support the IGCC's projected geothermal power on-line schedule while protecting the public interest and environment.

The purpose of the four public meetings announced below is to obtain public assistance in developing remedial options and receive public input to the decision making process. Comment is requested on the following options, and suggestions for additional alternatives are solicited.

OPTION 1.

IMPROVE THE PRESENT SYSTEM THROUGH CHANGES IN PROCEDURAL AND ADMINISTRATIVE MEASURES

This would maintain the basic features between the pre-lease and post-lease reviews but improve the procedures to conduct the reviews in a more uniform and efficient manner.

This option could be implemented through program modifications such as the following:

1. Use regional or areawide environmental analysis in the pre-lease review and conduct site specific studies only during the post-lease permitting process.

2. Set time limits or timeframes (through administrative directives and/or regulations) for issuance of lease and permits.

3. Promote interagency coordination in all cases of pre- and post-lease activities.

(a) Establish in each agency, field level coordinators for the geothermal program.

(b) Modify and formalize the existing Memorandum of Understanding to include the Departments of Energy, Agriculture and Interior and to establish guidelines for interagency cooperation in implementing the geothermal program.

(c) Establish uniform policy and guidelines for application of special lease stipulations.

(d) Standardize special lease stipulations of similar nature and intent (i.e., archaeological, endangered species, etc.)

4. Institute formal nomination procedures for KGRA's and non-competitive areas.

5. Allow no-surface-occupancy leases and/or leases limited to exploratory drilling in (a) wilderness study and other special areas and (b) where requested.

6. Modify KGRA regulations to:
(a) Allow for reclassification of geologic and competitive KGRA's.
(b) Abolish competitive interest KGRA's.

(c) Provide for direct thermal utilization areas.

7. Allow issuance of non-competitive leases unless the area is in a KGRA at time of application as opposed to time of lease issuance.

OPTION 2

BASE LEASING DECISIONS ON AREAWIDE ENVIRONMENTAL ASSESSMENT IN COMBINATION WITH LAND MANAGEMENT PLAN

This option is based on the existence of the planning requirements imposed by the Federal Land Policy and Management Act of 1976 (Pub. L. 94-759) and the National Forest Management Act of 1976 (Pub. L. 94-588) on BLM and the Forest Service, respectively. Where land management plans have been completed, this mechanism could be effectively initiated. Where land management plans are not complete, or where the existing plan does not consider geothermal energy production and utilization, two alternatives are available:

1. Complete or amend the land management plan to consider geothermal development with environmental assessment as appropriate.

2. Design the environmental assessment specifically for incorporation into the management plan at the next revision. This process would recognize the existing plan's limitations while providing supplementary information which could fulfill needs on a limited area for immediate leasing decisions. The area to be considered would be the area which might reasonably be assumed to be affected prior to scheduled revision.

OPTION 3

PROVIDE FOR SEPARATE ENVIRONMENTAL ANALYSIS OF EXPLORATION AND DEVELOPMENT PHASES, WITH INITIAL REVIEW OF EXPLORATORY IMPACTS COMPREHENSIVE REVIEW ONLY AFTER A DISCOVERY IS MADE.

"Exploration" would be redefined in the regulations to mean exploratory activity up to and including the drilling and testing of a deep well or wells to determine the presence or absence of a commercial resource. Leases would be issued with stipulations conditioning development on the results of a detailed environmental assessment after discovery. This option could be carried one step further by providing legislatively for reimbursement of exploration costs if development of a commercial resource is denied on environmental grounds.

Other options have been considered by the Task Force but their implement-

tation is not deemed feasible for various reasons. For information purposes they are stated below with the reason for rejection:

1. *Amend the Act to provide for exploration licenses for acreage in non-KGRA areas much larger than present limitations with a preference right to a lease for the usable acreage after discovery.* This approach is inconsistent with Department of the Interior mineral policies and could act as a restraint to development in that only one operator at a time would be permitted to conduct preliminary exploration at a time in any area.

2. *Amend the Act to provide for the use of the "locatable minerals" procedures now applied only to "hard rock" minerals.* This approach conflicts with the stated desire of the President and the Secretary of the Interior to do away with the location/patent system for hard rock minerals. In addition, it is difficult to define a "geothermal system" in terms of a specific land area because the limits of the heat and/or fluid sources cannot be precisely defined by any existing technology.

The public meetings on this subject are scheduled as follows:

JUNE 13, 1978

Hilton Inn, 1901 University Boulevard NE., Albuquerque, N.M.

JUNE 16, 1978

Suite 285, 350 South Figueroa, Los Angeles, Calif., (Place).

JUNE 23, 1978

Room 128, Salt Palace, Salt Lake City, Utah.

JUNE 27, 1978

Conference Room B in the Departmental Auditorium between 12th and 14th Streets NW., on Constitution Avenue, Washington, D.C.

Each meeting will begin at 9:30 a.m. and continue until those desiring to participate have been heard. Oral statements are limited to 10 minutes each. Written statements will be accepted until July 31 at the following address:

Winston B. Short, Chairman, Interagency Geothermal Streamlining Task Force, U.S. Department of the Interior, 19th at C Street NW., Washington, D.C. 20240.

Dated Washington, D.C., this 19th day of May, 1978.

WINSTON B. SHORT,
Chairman, Interagency Geothermal Streamlining Task Force.

Bureau of Land Management

[AA-6659-A]

ALASKA NATIVE CLAIMS SELECTION

On December 4, 1973, Choggiung Limited filed selection application AA-6659-A, as amended, under the provisions of section 12 of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 701; 43 U.S.C. 1601, 1611 (Supp. V, 1975)), for certain lands within the Dillingham area, specifically lands contained in quitclaim deed AA-12820, more particularly described as portions of lots 3 and 5 of U.S. Survey 2262.

On May 3, 1961, the State of Alaska filed selection application A-054379, as amended, pursuant to section 6(b) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339-340; 48 U.S.C. Ch. 2, Sec. 6(b) (1970)) for certain lands in the Dillingham area. The State selection, as amended, included the lands in lot 3, U.S. Survey 2262 which was tentatively approved on April 5, 1971. On April 12, 1971, the State of Alaska issued quitclaim deed (AA-12820) to the United States for a portion of lot 3, U.S. Survey 2262. This quitclaim deed was delivered to the Bureau of Indian Affairs.

Subsequently, on September 7, 1971, the Bureau of Land Management issued patent No. 50-72-0016 to the State of Alaska conveying all the United States' rights, title, privileges, immunities and appurtenances for lot 3, U.S. Survey 2262. Ownership and jurisdiction of all of lot 3, U.S. Survey 2262, including that portion contained in quitclaim deed AA-12820 was transferred from the United States to the State of Alaska by virtue of the patent.

In view of the above, Choggiung Limited must be and is hereby rejected to that portion of lot 3 of U.S. Survey 2262 contained in quitclaim deed AA-12820, more particularly described as follows:

A portion of lot 3 of U.S. Survey 2262 described by metes and bounds as follows:

Commencing for reference at corner No. 1 of U.S. Survey 2430, being also corner No. 13 of U.S. Survey 2732 A;

Thence N. 0° 06' E., 28.25 feet, along a common boundary of U.S. Survey 2430 and U.S. Survey 2732 A, to corner No. 4 of U.S. Survey 2262, being also corner No. 12 of U.S. Survey 2732 A;

Thence N. 0° 06' E., 160.00 feet, along the common boundary of U.S. Survey 2430 and U.S. Survey 2262, to the point of beginning;

Thence N. 89° 54' W., 250.00 feet;

Thence N. 0° 06' E., 38 feet, to a northerly boundary of said lot 3;

Thence S. 89° 54' E., 52.00 feet, along a northerly boundary of said lot 3;

Thence N. 0° 06' E., 162.00 feet, along a westerly boundary of said lot 3;

Thence S. 89° 54' E., 198.00 feet, to the common boundary of U.S. Survey 2430 and U.S. Survey 2262;

Thence S. 0° 06' W., 200.00 feet, along the common boundary of U.S. Survey 2430 and U.S. Survey 2262, to the point of beginning. Containing 0.955 acre (41,576 square feet), more or less.

Lot 5 of U.S. Survey 2262, containing 13.64 acres, was quitclaim deeded to the State of Alaska under section 46(a) of the Alaska Omnibus Act of June 25, 1959 (73 Stat. 152). On April 12, 1971, the United States acquired a portion of the surface estate of lot 5 of U.S. Survey 2262 in quitclaim deed AA-12820, containing approximately .193 acre.

In view of the foregoing, the surface estate of the following described land, selected pursuant to section 12(a), aggregating approximately .193 of an acre, is considered proper for acquisition by Choggiung Limited and is hereby approved for conveyance pursuant to section 14(a) of the Alaska Native Claims Settlement Act:

A portion of lot 5 of U.S. Survey 2262 described by metes and bounds as follows:

Commencing for reference at corner No. 1 of U.S. Survey 2430, being also corner No. 13 of U.S. Survey 2732 A;

Thence N. 0° 06' E., 28.25 feet, along a common boundary of U.S. Survey 2430 and U.S. Survey 2732 A, to corner No. 4 of U.S. Survey 2262, being also corner No. 12 of U.S. Survey 2732 A;

Thence N. 0° 06' E., 198.00 feet, along the common boundary of U.S. Survey 2430 and U.S. Survey 2262;

Thence N. 89° 54' W., 198.00 feet, to the southeasterly corner of said lot 5 and the point of beginning;

Thence N. 89° 54' W., 52.00 feet along the southerly boundary of said lot 5;

Thence N. 0° 06' E., 162.00 feet;

Thence S. 89° 54' E., 52.00 feet to the easterly boundary of said lot 5;

Thence S. 0° 06' W., 162 feet, along the easterly boundary of said lot 5, to the point of beginning.

Containing 0.193 acre (8,424 square feet), more or less.

All bearings are from true north.

The conveyance issued for the surface estate of the lands described above shall contain the following reservation to the United States:

Pursuant to section 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 708; 43 U.S.C. 1601, 1616(b) (Supp. V, 1975)), the following public easements, referenced by easement identification number (EIN) on the easement maps in case file AA-6659-EE are reserved to the United States and are subject to further regulation thereby:

(a) (EIN 29 C) The right of the United States to enter upon the lands hereinabove granted for cadastral, geodetic, or other survey purposes is reserved, together with the right to do all things necessary in connection therewith.

(b) (EIN 30 C) Easements for the transportation of energy, fuel, and natural resources which are the prop-

erty of the United States or which are intended for delivery to the United States or which are produced by the United States. These easements also include the right to build any related facilities necessary for the exercise of the right to transport energy, fuel, and natural resources, including those related facilities necessary during periods of planning, locating, constructing, operating, maintaining, or terminating transportation systems. The specific location of these easements shall be determined only after consultation with the owner of the servient estate. Whenever the use of such easements will require removal or relocation of any structure owned or authorized by the owner of the servient estate, such use shall not be initiated without the consent of the owner of such improvement; Provided, however, That the United States may exercise the right of eminent domain if such consent is not given. Only those portions of these easements that are actually in use or that are expressly authorized on March 3, 1996, shall continue to be in force.

This reservation has not been conformed to the Departmental easement policy announced March 3, 1978. Conformance is contingent upon resolution of the litigation *Calista, et al v. Andrus* and implementation of the Secretary's new easement policy.

The grant of the lands shall be subject to:

(1) Issuance of a patent confirming the boundary description of the lands hereinabove granted after approval and filing by the Bureau of Land Management of the official plat of survey covering such lands;

(2) Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under section 6(g) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, 341; 48 U.S.C. Ch. 2, Sec. 6(g) (1970))), contract, permit, right-of-way, or easement and the right of the lessee, contractee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him;

(3) The reservation of all oils, gases, coal, ores, minerals, fissionable materials, and fossils of every name, kind or description, and which may be in or upon said lands above described, or any part thereof, and the right to explore the same for such oils, gases, coal, ores, minerals, fissionable materials, and fossils, and it also hereby expressly saves and reserves out of the grant hereby made, unto itself, its lessees, successors, and assigns forever, the right to enter by itself, its or their agents, attorneys, and servants upon said lands, or any part or parts thereof, at any and all times, for the purpose of opening, developing, drilling, and working mines or wells on these or

other lands and taking out and removing therefrom all such oils, gases, coal, ores, minerals, fissionable materials and fossils, and to that end it further expressly reserves out of the grant hereby made, unto itself, its lessees, successors, and assigns forever, the right by its or their agents, servants and attorneys at any and all times to erect, construct, maintain, and use all such buildings, machinery, roads, pipelines, power lines, and railroads, sink such shafts, drill such wells, remove such soil, and to remain on said lands or any part thereof for the foregoing purposes and to occupy as much of said lands as may be necessary or convenient for such purposes hereby expressly reserving to itself, its lessees, successors and assigns, as aforesaid, generally all rights and power in, to and over said land, whether herein expressed or not, reasonably necessary or convenient to render beneficial and efficient the complete enjoyment of the property and rights hereby expressly reserved by the State of Alaska in quitclaim deed AA-12820 issued to the United States April 12, 1971;

(4) Requirements of section 14(c) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 703; 43 U.S.C. 1601, 1613(c) (Supp. V, 1975)), that the grantee hereunder convey those portions, if any, of the lands hereinabove granted as are prescribed in said section; and

(5) The terms and conditions of the agreement dated January 18, 1977, between the Secretary of the Interior, Bristol Bay Native Corporation, Choggiung Limited and other Bristol Bay village corporations. A copy of the agreement shall be attached to and become a part of the conveyance document and shall be recorded therewith. A copy of the agreement is located in the Bureau of Land Management easement case file for Choggiung Limited, serialized AA-6659-EE. Any person wishing to examine this agreement may do so at the Bureau of Land Management, Alaska State Office, 555 Cordova Street, Anchorage, Alaska 99501.

Choggiung Limited is entitled to conveyance of 161,280 acres of land selected pursuant to section 12(a) of the Alaska Native Claims Settlement Act. Upon conveyance of the 0.193 acre described herein, a total of approximately 48,673.20 acres will have been approved for conveyance to Choggiung Limited. The remaining entitlement will be conveyed at a later date.

Since the State of Alaska reserved the subsurface estate in the lands above-described no subsurface estate is available for conveyance to Bristol Bay Native Corporation pursuant to section 14(f) of the Alaska Native Claims Settlement Act.

There are no inland water bodies considered to be navigable within the land described.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the FEDERAL REGISTER and once a week, for four (4) consecutive weeks, in the Anchorage Times. Any party claiming a property interest in lands affected by this decision may appeal the decision to the Alaska Native Claims Appeal Board, P.O. Box 2433, Anchorage, Alaska 99510, with a copy served upon both the Bureau of Land Management, Alaska State Office, 555 Cordova Street, Pouch 7-512, Anchorage, Alaska 99510, and the Regional Solicitor, Office of the Solicitor, 510 L Street, Suite 408, Anchorage, Alaska 99501, also:

(1) Any party receiving service of this decision shall have 30 days from the receipt of this decision to file an appeal.

(2) Any unknown parties, any parties unable to be located after reasonable efforts have been expended to locate, and any parties who failed or refused to sign the return receipt shall have until June 23, 1978, to file an appeal.

(3) Any party known or unknown who may claim a property interest which is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Alaska Native Claims Appeal Board.

(4) If Choggiung Limited or Bristol Bay Native Corporation objects to any easement which is identified for reservation in the conveyance, and which is subject to the discretion of the State Director and not reserved pursuant to an express Secretarial directive, a petition for reconsideration must be filed within 30 days from receipt of service with the State Director, Bureau of Land Management, 555 Cordova Street, Pouch 7-512, Anchorage, Alaska 99510. A copy of the petition should be served upon the Regional Solicitor, Office of the Solicitor, 510 L Street, Suite 408, Anchorage, Alaska 99501. If a petition for reconsideration is not filed, it will be deemed that the right to contest any such easement has been waived.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeal. Further information on the manner of, and requirements for filing an appeal may be obtained from the Bureau of Land Management, 555 Cordova Street, Pouch 7-512, Anchorage, Alaska 99510.

If an appeal is taken the adverse parties to be served are:

Choggiung Limited, P.O. Box 247, Dillingham, Alaska 99576.
Bristol Bay Native Corporation, P.O. Box 237, Dillingham, Alaska 99576.

State of Alaska, Division of Lands, 323 East Fourth Avenue, Anchorage, Alaska 99501.

ROBERT E. SORENSON,
Chief, Branch of Lands
and Minerals Operations.

NEVADA

Termination, in Part of Airport Lease

Notice is hereby given that Elko County, through and by the Board of County Commissioners, relinquished its airport lease as to the following described lands:

MOUNT DIABLO MERIDIAN, NEV.

T. 47 N., R. 65 E.
Sec. 7, lots 1, 2, and 3.

Therefore, at 10 a.m. on June 19, 1978, the lands will be relieved of the segregation effect of the lease.

WM. J. MALENCIK,
Chief, Division of
Technical Services.

NEVADA

Airport Lease Application

MAY 16, 1978.

Notice is hereby given that pursuant to the Act of May 24, 1928 (49 U.S.C. 211-214), Wallace M. Dill (D Bar Ranch) has applied for an airport lease on the following land:

MOUNT DIABLO MERIDIAN, NEV.

T. 6 N., R. 66 E.,
Sec. 30, S $\frac{1}{4}$ NE $\frac{1}{4}$, W $\frac{1}{2}$ NW $\frac{1}{4}$, SE $\frac{1}{4}$ NW $\frac{1}{4}$, S $\frac{1}{4}$.

The purpose of this notice is to inform the public that the filing of this application segregated the described public lands from all forms of appropriation under the public land laws. Interested persons desiring to express their views should promptly send their comments, together with their name and address, to the Ely District Manager, Bureau of Land Management, Star Route 5, Box 1, Ely, Nev. 89301.

WM. J. MALENCIK,
Chief, Division of
Technical Services.

DEPARTMENT OF THE INTERIOR

Office of the Secretary

DEPARTMENT OF COMMERCE

Industry and Trade Administration

WATCHES AND WATCH MOVEMENTS

Allocation of Duty-Free Quotas for Calendar Year 1978 Among Producers Located in Guam

AGENCY: Bureau of Trade Regulation, Industry and Trade Administration.

ACTION: Allocation of duty-free quotas for calendar year 1978 among producers located in Guam.

SUMMARY: Pursuant to Public Law 89-805 the Departments of the Interior and Commerce (the Departments) share responsibility for the allocation of watch quotas among watch assembly firms in the insular possessions. Section 303.5(a)(2) of the Departments' Watch Quota Rules (15 CFR 303, 42 FR 62907 (1977)) provides for the annual allocation of watch quotas. The criteria for the calculation of the 1978 watch quotas among producers in Guam are contained in Section 1 of the Final Watch Quota Allocation Rules published in the FEDERAL REGISTER dated February 1, 1978 (43 FR 4274 (1978)). In announcing the allocation of quotas for producers located in

the Virgin Islands (43 FR 16797 (1978)), the Departments noted they had not completed their verification of the data on the annual application forms (ITA Form 334P) of the producers in Guam, and that the Guam allocation would be announced by separate notice as soon as the verification was completed. The Departments' verification of the Guam data has now been completed.

FOR ADDITIONAL INFORMATION CONTACT:

Mr. Richard M. Seppa, who can be reached by telephone on 202-377-2925.

SUPPLEMENTARY INFORMATION: The duty-free watch quota allocations for calendar year 1978 among producers located in Guam are as follows:

Name of firm	Number of units
1. Jerlian Watch Co., Inc.	450,643
2. Phoenix Industries, Inc.	39,357
Total	490,000

The preceding distribution of quota among the individual producers in Guam reflects: (1) Adjustments made in the data supplied on the producers' annual application forms as a result of the Departments' verification; and (2) Quota (150,000 units) set aside for allocation to new firms in Guam (Section 3 of the Annual Rules; 43 FR 4274 (1978); amended 43 FR 10718 (1978)). The number of watches and watch movements authorized for shipment on or after January 1, 1978, under initial quotas previously allocated by the Departments are to be applied against the allocations above, which are for the full calendar year 1978.

Dated: May 19, 1978.

RICHARD M. SEPPA,
Director, Statutory Import Programs Staff, Bureau of Trade Regulation, Industry and Trade Administration, Department of Commerce.

RUTH G. VAN CLEVE,
Director, Office of Territorial Affairs, Department of the Interior.

NATIONAL ADVISORY COUNCIL ON ECONOMIC OPPORTUNITY

WORK PROGRAM; DISCUSSION, DEVELOPMENT AND REFINEMENT

Meeting

MAY 18, 1978.

Pursuant to section 10 of the Federal Advisory Committee Act of 1972

notice is hereby given that the National Advisory Council on Economic Opportunity will hold a two-day meeting on June 22 and 23, 1978 at the Claremont Hotel in Berkeley, Calif. The meeting will begin at 9:30 P.d.s.t. on June 22nd and will continue on June 23rd and is open to the public.

The purpose of the meeting will be to discuss, develop and refine a work program for the Advisory Council 1979 report. The Council will also visit the Spanish Speaking Unity Council of Oakland, Calif. as part of its field work for 1979.

The National Advisory Council on Economic Opportunity is authorized by section 605 of the Community Services Act to advise the President and the Director of the Community Services Administration on policy matters arising under the administration of the Act and to review the effectiveness and operations of programs under the Act.

For further information, contact the National Advisory Council on Economic Opportunity, 1725 K Street, NW., Suite 405, Washington, D.C. 20006, 202-254-3217.

WALTER B. QUETSCH,
Executive Director.

[7555-01]

NATIONAL SCIENCE FOUNDATION

SUBCOMMITTEE ON ETHICS AND VALUES IN SCIENCE AND TECHNOLOGY OF THE ADVISORY COMMITTEE ON SCIENCE AND SOCIETY

Part-Open Meeting

In accordance with the Federal Advisory Committee Act, Public Law 92-463, the National Science Foundation announces the following meeting:

Name: Subcommittee on Ethics and Values in Science and Technology (EVIST) of the Advisory Committee on Science and Society.

Date and time: June 18, 1978, 9:30 a.m.

Place: Room 651, National Science Foundation, 5225 Wisconsin Avenue NW., Washington, D.C.

Type of Meeting: Part-Open.

Contact person: Dr. William A. Blanpied, Program Director, Ethics and Values in Science and Technology, Office of Science and Society, National Science Foundation, Washington, D.C. 20550, Telephone 202-282-7770. Individuals planning to attend are requested to notify Dr. Blanpied by June 14, 1978.

Summary minutes: May be obtained from the Committee Management Coordination Staff, Division of Financial and Administrative Management, National Science Foundation, Room 248, Washington, D.C. 20550.

Purpose of Advisory Committee: To provide advice and recommendations concerning support of activities to explore the ethical and value issues associated with develop-

NOTICES

ments in science and technology, in conjunction with the program of the National Science Foundation (NSF).

Agenda: 9:30 a.m. to 12:30 p.m. (Open). Reports and Discussion of Current Status and Future Directions for the EVIST Program and for the NSF Office of Science and Society. Discussion of Roles for the Sub-Committee in Program Monitoring and Development.

2 p.m. to 5 p.m. (Closed). Review and evaluate proposals as part of the selection process for awards.

Reason for closing: The categories and quality of applications presently under consideration for funding will be discussed. This will involve consideration of individual proposals currently being reviewed which include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government of the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10 (d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make determinations by the Director, NSF, on February 18, 1977.

Dated: May 18, 1978.

M. REBECCA WINKLER,
Committee Management
Coordinator.

[7555-01]

SUBCOMMITTEE ON PUBLIC UNDERSTANDING OF SCIENCE OF THE ADVISORY COMMITTEE ON SCIENCE AND SOCIETY

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Science Foundation announces the following meeting:

Name: Subcommittee on Public Understanding of Science of the Advisory Committee on Science and Society.

Date and time: June 9, 1978, 9 a.m. to 5 p.m.

Place: The Exploratorium, San Francisco, Calif.

Type of meeting: Closed.

Contact person: Mr. George W. Tressel, Program Director, Public Understanding of Science, Office of Science and Society, National Science Foundation, Washington, D.C. 20550, telephone 202-282-7770.

Purpose of subcommittee: To provide advice and recommendations concerning support for projects in Public Understanding of Science.

Agenda: Review FY 1978 grants. Review and evaluate proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are with exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF on February 18, 1977.

Dated: May 18, 1978.

M. REBECCA WINKLER,
Committee Management
Coordinator.

[FR Doc. 78-14525 Filed 5-23-78; 8:45 am]

[7590-01]

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-348]

ALABAMA POWER CO., JOSEPH M. FARLEY NUCLEAR PLANT UNIT NO. 1

Order For Modification of License

I. The Alabama Power Co. (the licensee), is the holder of Facility Operating License No. NPF-2 which authorizes the operation of the nuclear power reactor known as Joseph M. Farley Nuclear Power Unit No. 1 (the facility) at steady reactor power levels not in excess of 2652 megawatts thermal (rated power). The facility consists of a Westinghouse Electric Corp. designed pressurized reactor (PWR) located at the licensee's site in Houston County Ala.

II. In accordance with the requirements of the Commission's ECCS Acceptance Criteria 10 CFR 50.46, the licensee submitted on January 14, 1977 an ECCS evaluation for proposed operation using 17x17 fuel manufactured by the Westinghouse Electric Corp. This evaluation included limits on the peaking factor. The ECCS evaluation submitted by the licensee was

based upon an ECS evaluation development by the Westinghouse Electric Corp. (Westinghouse), the designer of the Nuclear Steam Supply System for this facility. The Westinghouse ECCS Evaluation Model had been previously found to conform to the requirements of the Commission's ECCS Acceptance Criteria, 10 CFR Part 50.46 and Appendix K. The evaluation indicated that with the peaking factor limited as set forth in the evaluation, and with other limits set forth in the facility's Technical Specifications, the ECCS cooling performance for the facility would conform with the criteria contained in 109 CFR 50.46(b) which govern calculated peak clad temperature, maximum cladding oxidation, maximum hydrogen generation, coolable geometry and long-term cooling.

On March 23, 1978 Westinghouse informed the Nuclear Regulatory Commission (NRC) that an error had been discovered in the fuel rod heat balance equation involving the incorrect use of one half of the volumetric heat generation due to metal-water reaction in calculating the cladding temperature. Thus, the LOCA analyses previously submitted to the Commission by licensees of Westinghouse reactors were in error. The staff promptly determined that no immediate action was required to assure safe operation of these plants.

The error identified would result in an increase in calculated peak clad temperature, which, for some plants, could result in calculated temperatures in excess of 2200°F unless the allowable peaking factor was reduced somewhat. Westinghouse identified a number of other areas in the approved model which Westinghouse indicated contained sufficient conservatism to offset the calculated increase in peak clad temperature resulting from the correction of the error noted above. Four of these areas were generic, applicable to all plants and a number of others were plant specific. As outlined in the attached SER, the staff concurs that some of these modifications would be appropriate to offset to some extent the penalty resulting from correction of the error. The attached SER sets forth the value for each modification applicable to each facility.

Revised computer calculations correcting the error, noted above, and incorporating the modifications describe in the SER have not been run for each plant. However, the various parametric studies that have been made for various aspects of the approved model over the course of time provide a reasonable basis for concluding that when final revised calculations for the facility are submitted using the revised and corrected model, they will demonstrate that with the peaking factors set forth in the SER operation will

conform to the criteria of 10 CFR 50.46(b). Such revised calculations fully conforming to 10 CFR 50.46 are to be provided for the facility as soon as possible.

As discussed in this Order and in the SER, operation of the Joseph M. Farley, Unit No. 1 facility at a peaking factor limit of 2.32 which is now specified in the Technical Specifications will assure that the ECCS will conform to the performance requirements of 10 CFR 50.46(b). Accordingly, this limit provides reasonable assurance that the public health and safety will not be endangered. Upon notification by the NRC staff, the licensee committed to provide a reevaluation of ECCS performance as promptly as practicable. The commitment was confirmed by the licensee's letter of April 7, 1978. The staff believes that the licensee's action, under the circumstances, is appropriate and that this action should be confirmed by NRC Order.

IV. Copies of the Safety Evaluation and the following documents are available for inspection at the Commission's Public Document Room at 1717 H Street, Washington, D.C. 20555, and are being placed in the Commission's local public document room at the George S. Houston Memorial Library, 212 West Vurdeshaw Street, Dothan, Ala. 36301.

(1) Letter from Westinghouse to NRC dated April 7, 1978.

(2) Letter from Alabama Power Co., to Mr. Victor Stello, Office of Nuclear Reactor Regulation, dated April 7, 1978.

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's rules and regulations in 10 CFR Parts 2 and 50: *It is ordered*, That Facility Operating License No. NPF-s is hereby amended by adding the following new provision:

As soon as possible, the licensee shall submit a reevaluation of ECCS cooling performance calculated in accordance with the Westinghouse Evaluation Model, approved by the NRC staff and corrected for the errors described herein.

Dated at Bethesda, Md., this 27th day of April 1978.

For the Nuclear Regulatory Commission.

VICTOR STELLO, Jr.,
Director, Division of Operating
Reactors, Office of Nuclear
Reactor Regulation.

[FR Doc 78-14507 Filed 5-23-78; 8:45 am]

[7590-01]

[Docket No. 50-335]

FLORIDA POWER AND LIGHT CO.

Issuance of Amendment to Facility Operating
License

The U.S. Nuclear Regulatory Commission (the Commission) has issued

Amendment No. 25 to Facility Operating License No. DPR-67 issued to Florida Power and Light Co. (the licensee), which revised Technical Specifications for operation of St. Lucie Plant, Unit No. 1 (the facility), located in St. Lucie County, Fla. The amendment becomes effective 60 days after its date of issuance.

The amendment incorporates fire protection Technical Specifications on the existing fire protection equipment and adds administrative controls related to fire protection at the facility. This action is being taken pending completion of the Commission's overall fire protection review of the facility.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) and environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this statement.

For further details with respect to this action, see (1) the application for amendment dated February 23, 1978, (2) the Commission's letter to the licensee dated November 28, 1977, (3) Amendment No. 25 to License No. DPR-67, and (4) the Commission's related Safety Evaluation issued November 28, 1977. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Indian River Junior College Library, 3209 Virginia Avenue, Ft. Pierce, Fla. A copy of items (2) through (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 12th day of May 1978.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors
Branch No. 4, Division of
Operating Reactors.

[FR Doc. 78-14508 Filed 5-23-78; 8:45 am]

[7590-01]

[Docket Nos. 50-498A, 50-499A]

HOUSTON LIGHTING & POWER CO., CITY OF
SAN ANTONIO, CITY OF AUSTIN, AND CENTRAL
POWER AND LIGHT CO., (SOUTH
TEXAS PROJECT, UNITS 1 AND 2)

Special Prehearing Conference

MAY 17, 1978.

In *Houston Lighting & Power Company, et al.* (South Texas Project, Units 1 and 2), CLI 77-13, 5 NRC 1303 (June 15, 1977), the Commission made a "determination" pursuant to Section 105c(2) of the Atomic Energy Act of 1954 as amended that there had been "significant changes" in the activities of Houston, a co-owner and co-construction permit holder of these nuclear units, which were sufficient to trigger the initiation of an operating license antitrust review. Houston's request for a waiver of the FSAR filing requirement was granted in order to provide an expedited operating license antitrust review. The Staff was directed to seek the antitrust advice of the Attorney General pursuant to Section 105c(1). (5 NRC at 1319, 1322).

On February 21, 1978, the Attorney General rendered the requested advice and concluded that changed circumstances required that an antitrust hearing be held on the operating license application. Houston filed a motion for the Commission "to order procedures" on February 22, which the Commission denied by its Order dated April 5, 1978 (7 NRC —). Such Order further directed the Director of Nuclear Reactor Regulation to issue a notice of antitrust hearing. Accordingly, a Notice of Antitrust Hearing on Operating License Application was duly published in the FEDERAL REGISTER (43 FR 15811, April 14, 1978).

This Licensing Board was designated in the notice of hearing to make a determination as to whether the activities under the proposed operating licenses will create or maintain a situation inconsistent with the antitrust laws on the basis of significant changes in the Applicants' activities which have occurred subsequent to the previous review by the Attorney General and the Commission in connection with the application for construction permits. In the event the Board makes an affirmative finding, it will also consider what relief, if any, would be appropriate. The parties to the hearing will be the Applicants, the NRC Staff, the Department of Justice if it so desires, and any other person admitted as a party pursuant to the provisions of 10 CFR 2.714. A petition for leave to intervene was required to be filed by May 15, 1978.

Pursuant to the notice of hearing, a petition for leave to intervene was filed by mail on April 28, 1978 by

Texas Utilities Generating Company and Dallas Power & Light Company, Texas Electric Service Company, and Texas Power & Light Company. Answers to the notice of antitrust hearing were filed by the Applicants City of San Antonio (May 3, 1978), Houston Lighting & Power Company (May 4, 1978), City of Austin (May 5, 1978) and Central Power and Light Co. (May 5, 1978).

The Board takes note of the expressed desire of all counsel for an expeditious resolution of relevant antitrust issues related to this operating license proceeding. We concur that it is in the public interest to minimize regulatory delays in the licensing process, and the active cooperation of counsel is essential for that purpose. In view of the professional attention these antitrust issues have received from expert counsel in this and other fora over an extended period of time, it is anticipated that protracted hearings will not be necessary in this proceeding. Schedules will be developed for the framing of issues of law and fact, the completion of discovery and the conduct of an evidentiary hearing under these standards. The Federal Rules of Civil Procedure and the Federal Rules of Evidence will be applied by analogy wherever they are reasonably applicable. All testimony of witnesses will be oral except for good cause made known and ruled upon in advance. Concise summaries of the testimony of witnesses shall be exchanged in advance, as well as all proposed exhibits, studies and other documents. The liberal use of depositions to focus issues and to shorten trial testimony is encouraged.

Please take notice that a special prehearing conference pursuant to the provisions of § 2.751a as amended (such amendments are effective on May 26, 1978) will be held at 9:30 a.m., local time, on June 21, 1978 in the Nuclear Regulatory Commission's Hearing Room, 5th Floor, East West Towers, located at 4350 East West Highway, Bethesda, Md. 20014.

All parties and any petitioners for intervention and counsel are directed to appear at such special prehearing conference where the Board will consider the identification of key issues in the proceeding, the delineation of the scope and dimension of the primary issues involved in the Commission's decision in 5 NRC 1303, the ruling on intervention petitions, and the establishment of a schedule for further actions in the proceeding. A statement of issues and contentions involved in this proceeding shall be discussed by counsel prior to the conference. Counsel are requested to report on the nature and extent of discovery obtained in other proceedings which might be useful in this action. Copies of all prehearing statements, motions,

briefs, points and authorities or other documents to be considered at the prehearing conference shall be in the hands of members of the Board by June 14, 1978.

It is so ordered.

Dated at Bethesda, Md., this 17th day of May 1978.

For the Atomic Safety and Licensing Board.

MARSHALL E. MILLER,
Chairman.

[7590-01]

Low-Level Radiation Exposure

Decision Not to Conduct a Hearing to Refine or Reduce the Health Cost Figures Previously Adopted

The Nuclear Regulatory Commission announced its intention to conduct a rule making hearing to establish appropriate monetary values for the worth of reducing radiation doses to the public in its decision on Rulemaking Docket No. RM-50-2¹ (numerical guides for design objectives and limiting conditions for operation to meet the criterion "as low as practicable"² for radioactive materials in light-water-cooled nuclear power reactor effluents). In that decision, the Commission adopted interim values of \$1,000 per total-body man-rem and \$1,000 per man-thyroid-rem for use in a cost-benefit analysis of the need for additional radioactive effluent control systems to reduce population radiation exposures (Section IID of Appendix I to 10 CFR Part 50.) In adopting these values, the Commission noted that they were believed to be conservative as they were higher than previously published values of a dollar per man-rem value for the total body and that there were arguments that the worth of reductions in the collective (man-thyroid-rem) dose to the thyroid should be lower than the value for the total body.

However, experience has shown that a more precise determination of appropriate dollar per man-rem and dollar per man-organ-rem values is now unnecessary. The NRC staff has performed 30 evaluations of the cost-benefit analyses submitted in support of nuclear power reactor license applications as required by Section IID of Appendix I of 10 CFR Part 50. In each of these cases, it was found that no additional effluent control equipment

¹Published in the FEDERAL REGISTER of May 5, 1975 (40 FR 19439).

²This terminology was changed to "as low as is reasonably achievable" to conform to the terminology of the International Commission on Radiological Protection (FEDERAL REGISTER of December 19, 1975 at 40 FR 58847).

was required to meet the cost-benefit provisions of Section IID of Appendix I beyond the equipment that was required to meet the individual dose design objectives contained in Sections IIA, IIB, and IIC of Appendix I to 10 CFR Part 50. This experience indicates that, for most situations, the individual dose design objectives will be limiting, even for the conservative interim dollar per man-rem values. Further refinements are expected to provide lower numerical values, which would be even less likely to affect effluent treatment system requirements. For this reason the interim values of \$1,000 per total body man-rem and \$1,000 per man-thyroid-rem, although not precise, appear to remain usable values for regulatory decisionmaking.

Moreover, the Environmental Protection Agency (EPA) has issued generally applicable environmental radiation standards for uranium fuel cycle operations.³ These standards provide limits on doses to individual members of the public and limits on the quantities of certain long-lived radionuclides released from the nuclear fuel cycle to the general environment. These standards were developed by EPA through consideration of the potential health risks associated with various levels of effluent releases in relation to the costs of achieving these levels by procedures that did not require a precise assessment of the cost of radiation exposures. In the statement of considerations accompanying the proposed standards,⁴ EPA concluded that the two types of proposed standards "... are the most appropriate choice of criteria to provide effective limitation of the potential health impact on populations of short-lived and long-lived radioactive materials ..."

In the Commission's view, these EPA standards provide further assurance, in addition to the requirements of Appendix I to 10 CFR Part 50, that both individual and population doses from light-water-cooled nuclear reactor effluents will be as low as is reasonably achievable. The EPA standards also ensure that doses from lightwater reactors and associated fuel cycle facilities will be maintained at or below levels that are, in EPA's view, environmentally acceptable, without the need for a precise determination of the worth of radiation exposure reductions.

Other developments also affect the timeliness of proceeding with the pro-

posed rule making at this time. Recent amendments to the Clean Air Act provide for a study to be conducted by EPA to determine whether airborne emissions of radioactive materials contribute to air pollution which may be reasonably anticipated to endanger public health.⁵ This study and subsequent findings by the EPA might affect the present regulatory framework embodied in Appendix I and in 40 CFR Part 190 and, consequently, lessen the importance of undertaking this rule making hearing at this time.

The above considerations have led the Commission to reconsider the need for further efforts to redefine the worth of reducing radiation exposure to the general population. Rather than further postpone the rule making hearing until an unspecified future time, the Commission believes that the uncertainties that would be introduced in the regulatory process can best be avoided by cancelling the proposed rule making. This action does not preclude the possibility that such rule making will be reinstituted at a future time if a need develops for a more precise definition of dollar per man-rem and dollar per man-organ-rem values.

The cancellation of this rulemaking should not be interpreted as an abandonment by the Commission of the concept of a quantified cost-benefit analysis for defining as low as is reasonably achievable levels of radiation exposure. The Commission believes that the Appendix I rule making proceeding (Docket No. RM-50-2) and the subsequent experience with the Appendix I rule show that this concept has considerable merit and utility. In this regard, the Commission notes the opinions of the Advisory Committee on the Biological Effects of Ionizing Radiation of the National Academy of Sciences—National Research Council⁶ that:

Such analyses could facilitate rational and cost-effective safety and control procedures and the avoidance of health hazards and economic dislocations associated with excessive or inadequate expenditures in relation to risk. Health benefit/cost assessments, even though present data are incomplete, can provide some guidance to decision makers, direct attention to gaps in knowledge, indicate priorities for research, and stimulate the accumulation of needed data and analysis, and contribute to public understanding of the relevant issues and problems ... (page 6)

³Clean Air Act Amendments of 1977, Pub. L. 95-95, 91 Stat. 685 (1977), 42 U.S.C. 7401 et seq. (1977).

⁴National Academy of Sciences—National Research Council Advisory Committee on the Biological Effects of Ionizing Radiation, "Considerations of Health Cost-Benefit Analysis for Activities Involving Ionizing Radiation Exposure and Alternatives," issued as EPA Report in EPA 520/4-77-03 (1977).

The Commission will continue to strive for the reduction of radiation exposures from all licensed activities to as low as is reasonably achievable (ALARA) levels and, where practicable, to employ a quantitative cost-benefit analysis to better define such ALARA levels. At the present time, however, efforts to make this analysis more precise do not appear to be warranted by our experience to date.

The NRC staff will continue to accumulate experience with the implementation of the design objectives and the cost-benefit analysis of Appendix I to 10 CFR Part 50. This experience is being and will be incorporated into the on-going NRC efforts to develop detailed implementation procedures for EPA's uranium fuel cycle standards in 40 CFR Part 190. These efforts and the efforts by EPA and NRC to comply with the provisions of the Clean Air Act Amendments of 1977 will provide a basis for any further changes in the current regulatory framework for controlling releases of radioactive materials from the normal operation of NRC licensed nuclear power and fuel cycle operations.

Dated at Washington, D.C., this 18th day of May 1978.

For the Nuclear Regulatory Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

[Docket No. 50-336]

NORTHEAST NUCLEAR ENERGY CO., CONNECTICUT LIGHT AND POWER CO., HARTFORD ELECTRIC LIGHT CO., AND WESTERN MASSACHUSETTS ELECTRIC CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 41 to Facility Operating License No. DPR-65 to Northeast Nuclear Energy Co., The Connecticut Light and Power Co., The Hartford Electric Light Co., and Western Massachusetts Electric Co., which revised Technical Specifications for operation of the Millstone Nuclear Power Station, Unit No. 2, located in the Town of Waterford, Conn. The amendment is effective as of its date of issuance.

This amendment revises the Technical Specifications to eliminate the monthly visual inspection of all inaccessible hydraulic snubbers with non-ethylene-propylene seal materials for the remainder of cycle 2. The visual inspection of such inaccessible snubbers is required if plant conditions allow access or if inspections of accessible snubbers reveal evidence of seal degradation.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated April 26, 1978, as supplemented by letters dated April 11 and May 5, 1978, (2) Amendment No. 41 to License No. DPR-65, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Conn. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 15th day of May 1978.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors
Branch No. 4, Division of Operating Reactors.

[7590-01]

[Docket No. STN 50-437]

OFFSHORE POWER SYSTEMS, (MANUFACTURING LICENSE FOR FLOATING NUCLEAR POWER PLANTS)

Memorandum and Order Granting in Part Applicant's Motion (No. 8) To Establish Schedule.

On April 24, 1978, Applicant filed Motion (No. 8) To Establish Schedule. Natural Resources Defense Council (NRDC) filed a response on May 4th, the NRC Staff filed its response on May 8th, and Atlantic County Citizens Council on Environment (ACCCE) filed a response on May 9, 1978.

In the fifth prehearing conference order of May 17, 1976, we had stated

that the conditions, limitations and qualifications in the "Stipulation Covering Hearing Schedule" of the parties (except for NRDC) dated March 8, 1976 would be adhered to and the schedule therein would be followed as closely as is reasonably practicable. Further, as indicated in our Order of March 30, 1978, we have become increasingly concerned about the lack of progress toward the closing of the evidentiary record in this case, and we stated therein that we were prepared to reconsider the ruling in the Order of June 21, 1977 that any future hearing would be held in one continuous session. Hearings in the instant case have not been held since May 20, 1977. Clearly it is our duty to take appropriate action to avoid unnecessary delay (10 CFR 2.718)—we must advance this aging case toward final disposition. There has been no showing that any real harm or injury to any party would result from proceeding to receive evidence upon the issues set forth in the addendum to applicant's motion (No. 8) To Establish Schedule. Moreover, those issues set forth in the aforementioned addendum are related to Part II of the FES issued in September 1976. None of these issues relate either to the subject matter of the final addendum to Part II which the staff will publish on or before June 16, 1978 (see Order on March 30, 1978) or to the subject matter of Part III of the FES which the staff advises will be published in final form in September 1978. The stipulation and our orders of September 28, 1976 and of August 1, 1977 provide in substance that a party might move to amend or expand contentions (within a certain time) upon a showing of a rational connection between any new matters in the addendum to Part II and in Part III.

ORDER

In light of the discussion, supra, the Board allows in part, as hereinafter reflected, applicant's motion (No. 8) To Establish Schedule:¹

¹We deny that portion of the instant motion wherein applicant moves for summary disposition and requests that we establish a schedule, whereunder, beginning July 7, 1978, the parties would exchange briefs on NRDC's contention on programmatic impact statement. We neither understand nor appreciate applicant's resurrection of its motion for summary disposition and its request for scheduling which we had previously denied without prejudice in our order of October 11, 1977. Said order indicated that applicant could resubmit its motion and request only after the entire (finalized) FES had been issued. To proceed with summary disposition procedures might be a premature and wasted exercise since, in its response of May 4, 1978, NRDC reserved the right to file supplemental briefs or requests for reconsideration if the finalized addendum to Part II and the finalized Part III re-

1. Public hearing will be resumed on July 10, 1978 at 1:30 p.m. at the following location:

NRC Public Hearing Room, 5th Floor, East-West Towers Building, 4350 East-West Highway, Bethesda, Md. 20014.

Thereafter, commencing at 9:30 a.m., the hearing will continue on weekdays through July 28, if necessary.

2. Testimony will be taken on the following issues and Board Questions:

(a) Atlantic County Contention I (impact on resort economics). Cross-examination of applicant's panel will be concluded, and thereafter Atlantic County and staff will call their witnesses.

(b) ACCCE Contention 3b (functional design of discharge outfall) admitted by order dated May 21, 1974, p. 5.

(c) ACCCE Contention 3f (dredging), admitted by order dated May 21, 1974, p. 6.

(d) ACCCE Contention II (net energy yield, cost-benefit balance), admitted by order of August 1, 1977, pp. 4 and 5.

(e) Issue retained By The Board:

"1. Section 12.10.4 of Part II of the FES is inadequate in that it does not take into account the special energy requirements needed to procure breakwater material, to construct the breakwater, to tow plants to the site and to provide shore to barge umbilicals". (Formerly Contention I, 4 in part of the City of Brigantine, which was retained as an issue in the Board's Order of August 1, 1977, pp. 12 and 13, after CB withdrew as a party).

(f) Board question:

"To what extent, if any, would the consideration of the utilization of heat pumps and of secondary and tertiary recovery from oil wells serve to modify the discussions and/or conclusions reached in Part II of the FES?" (Board's order of August 1, 1977, p. 10).

3. Written direct testimonies shall be submitted by no later than June 23, 1978 by the applicant and the staff. By said due date the intervening party who placed an issue (contention) into contest shall submit its written direct testimony, if any. With regard to the issue retained by the Board (par. 2e, supra) and with regard to the Board question (par. 2f, supra), by no later than June 23, 1978, the applicant and staff shall submit written direct testimonies, and the intervening parties, if desiring to do so, shall submit written direct testimonies by the aforesaid due date.

Dr. Schink concurs but was not available to sign the instant memorandum and order.

Reflected major alterations to the drafts of these two documents.

Dated at Bethesda, Md., this 18th day of May 1978.

It is so ordered.

THE ATOMIC SAFETY AND
LICENSING BOARD,
LESTER KORNBLITH,
Member,
SHELDON J. WOLFE,
Chairman.

[7590-01]

[Docket No. 50-2781]

PHILADELPHIA ELECTRIC CO., ET AL

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 41 to Facility Operating License No. DPR-56 issued to Philadelphia Electric Co., Public Service Electric and Gas Co., Delmarva Power and Light Co., and Atlantic City Electric Co., which revised Technical Specifications for operation of the Peach Bottom Atomic Power Station Unit No. 3. The amendment is effective as of its date of issuance.

The amendment modifies the Technical Specifications for the Peach Bottom Atomic Power Station, Unit No. 3 to: (1) Permit operation of the facility during cycle 3 with up to 252 improved two water rod 8x8R reload fuel bundles, designed and fabricated by the General Electric Co. and having an average enrichment of 2.23 wt% ²³⁵U, and (2) revise the maximum average planar linear heat generation rates as determined by the reevaluation of the ECCS performance.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Notice of proposed issuance of amendment to Facility Operating License in connection with this action was published in the FEDERAL REGISTER on February 2, 1978 (43 FR 4468). No request for a hearing or petition for leave to intervene was filed following notice of the proposed action.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated December 19, 1977, as supplemented August 30, 1977, Jan-

uary 17, February 2 and 17, May 8 and 11, 1978, (2) Amendment No. 41 to License No. DPR-56, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pa. 17126. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 17th day of May 1978.

For the Nuclear Regulatory Commission.

GEORGE LEAR,
Chief, Operating Reactors
Branch No. 3, Division of Operating Reactors.

[7590-01]

[Docket No. 50-2881]

POWER AUTHORITY OF THE STATE OF NEW YORK (INDIAN POINT NUCLEAR GENERATING UNIT NO. 3)

Order for Modification of License

I. The Power Authority of the State of New York (the licensee), is the holder of Facility Operating License No. DPR-64 which authorizes the operation of the nuclear power reactor known as Indian Point Nuclear Generating Unit No. 3 (the facility), at steady reactor power levels not in excess of 2,760 megawatts thermal (rated power). The facility consists of a Westinghouse Electric Corp. designed pressurized reactor (PWR) located at the licensee's site in Westchester County, N.Y.

II. In accordance with the requirements of the Commission's ECCS Acceptance Criteria 10 CFR 50.46, the licensee submitted on January 26, 1977, an ECCS evaluation for proposed operation using fuel manufactured by the Westinghouse Electric Corp. This evaluation included limits on the peaking factor. The ECCS evaluation submitted by the licensee was based upon an ECCS evaluation developed by the Westinghouse Electric Corp. (Westinghouse), the designer of the Nuclear Steam Supply System for the facility. The Westinghouse ECCS Evaluation Model has been previously found to conform to the requirements of the Commission's ECCS Acceptance Criteria, 10 CFR part 50.46 and appendix K. The evaluation indicated that with the peaking factor limited as set forth in the evaluation, and with other limits set forth in the facility's Technical Specifications, the ECCS cooling performance for the facility would

conform with the criteria contained in 10 CFR 50.46(b) which govern calculated peak clad temperature, maximum cladding oxidation, maximum hydrogen generation, coolable geometry, and long-term cooling.

On March 23, 1978, Westinghouse informed the Nuclear Regulatory Commission (NRC) that an error had been discovered in the fuel rod heat balance equation involving the incorrect use of only half of the volumetric heat generation due to metal-water reaction in calculating the cladding temperature. Thus, the LOCA analyses previously submitted to the Commission by licensees of Westinghouse reactors were in error. The staff promptly determined that no immediate action was required to assure safe operation of these plants.

The error identified would result in an increase in calculated peak clad temperature, which, for some plants, could result in calculated temperatures in excess of 2,200° F unless the allowable peaking factor was reduced somewhat. Westinghouse identified a number of other areas in the approved model which Westinghouse indicated contained sufficient conservatism to offset the calculated increase in peak clad temperature resulting from the correction of the error noted above. Four of these areas were generic, applicable to all plants, and a number of others were plant specific. As outlined in the attached SER, the staff concurs that some of these modifications would be appropriate to offset to some extent the penalty resulting from correction of the error. The attached SER sets forth the value for each modification applicable to each facility.

Revised computer calculations correcting the error, noted above, and incorporating the modifications described in the SER have not been run for each plant. However, the various parametric studies that have been made for various aspects of the approved model over the course of time provide a reasonable basis for concluding that when final revised calculations for the facility are submitted using the revised and corrected model, they will demonstrate that with the peaking factors set forth in the SER operation will conform to the criteria of 10 CFR 50.46(b). Such revised calculations fully conforming to 10 CFR 50.46 are to be provided for the facility as soon as possible.

As discussed in this order and in the SER, operation of the Indian Point Unit No. 3 facility at the peaking factor limit specified in this order, will assure that the ECCS will conform to the performance requirements of 10 CFR 50.46(b). Accordingly, such limits provide reasonable assurance that the public health and safety will not be endangered. Upon notification by the

NRC staff, the licensee committed to provide a reevaluation of ECCS performance as promptly as practicable and to limit operation to achieve a peaking factor not exceeding the value specified herein. Such commitments were confirmed by the licensee's letter of April 10, 1978. The staff believes that the licensee's action, under the circumstances, is appropriate and that this action should be confirmed by NRC order.

IV. Copies of the Safety Evaluation and the following documents are available for inspection at the Commission's Public Document Room at 1717 H Street, Washington, D.C. 20555, and are being placed in the Commission's local public document room at the Hendrick Hudson Free Library, 31 Albany Post Road, Montrose, N.Y.

(1) Letter from Westinghouse to NRC dated April 7, 1978.

(2) Letter from Power Authority of the State of New York, to Mr. A. Schwencer, Operating Reactors Branch No. 1, dated April 10, 1978.

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's rules and regulations in 10 CFR parts 2 and 50: *It is ordered*, That Facility Operating License No. DPR-64 is hereby amended by adding the following new provisions:

(1) As soon as possible, the licensee shall submit a reevaluation of ECCS cooling performance calculated in accordance with the Westinghouse Evaluation Model, approved by the NRC Staff and corrected for the errors described herein.

(2) Until further authorization by the Commission, the Technical Specifications limit for total nuclear peaking factor (F_p) for the facility shall be limited to 2.23.

Dated at Bethesda, Md., this 27th day of April 1978.

For the Nuclear Regulatory Commission.

VICTOR STELLO JR.,
Director, Division of Operating Reactors, Office of Nuclear Reactor Regulation.

[7590-01]

[Docket No. 50-272]

PUBLIC SERVICE GAS & ELECTRIC CO., SALEM GENERATING STATION, UNIT NO. 1

Order For Modification of License

I. The Public Service Gas & Electric Co. (the licensee), is the holder of Facility Operating License No. DPR-70 which authorizes the operation of the nuclear power reactor known as Salem Generating Station, Unit No. 1 (the facility) at steady reactor power levels not in excess of 3,338 megawatts thermal (rated power). The facility con-

sists of a Westinghouse Electric Corp. designed pressurized reactor (PWR) located at the licensee's site in Salem County, New Jersey.

II. In accordance with the requirements of the Commission's ECCS Acceptance Criteria 10 CFR 50.46, the licensee submitted on December 27, 1976, an ECCS evaluation for proposed operation using 17x17 fuel manufactured by the Westinghouse Electric Corp. This evaluation included limits on the peaking factor. The ECCS evaluation submitted by the licensee was based upon an ECCS evaluation developed by the Westinghouse Electric Corp. (Westinghouse), the designer of the Nuclear Steam Supply System for this facility. The Westinghouse ECCS Evaluation Model had been previously found to conform to the requirements of the Commission's ECCS Acceptance Criteria, 10 CFR part 50.46 and appendix K. The evaluation indicated that with the peaking factor limited as set forth in the evaluation, and with other limits set forth in the facility's Technical Specifications, the ECCS cooling performance for the facility would conform with the criteria contained in 10 CFR 50.46(b) which govern calculated peak clad temperature, maximum cladding oxidation, maximum hydrogen generation, coolable geometry, and long-term cooling.

On March 23, 1978, Westinghouse informed the Nuclear Regulatory Commission (NRC) that an error had been discovered in the fuel rod heat balance equation involving the incorrect use of only half of the volumetric heat generation due to metal-water reaction in calculating the cladding temperature. Thus, the LOCA analyses previously submitted to the Commission by licensees of Westinghouse reactors were in error. The staff promptly determined that no immediate action was required to assure safe operation of these plants.

The error identified would result in an increase in calculated peak clad temperature, which, for some plants, could result in calculated temperatures in excess of 2,200° F unless the allowable peaking factor was reduced somewhat. Westinghouse identified a number of other areas in the approved model which Westinghouse indicated contained sufficient conservatism to offset the calculated increase in peak clad temperature resulting from the correction of the error noted above. Four of these areas were generic, applicable to all plants, and a number of others were plant specific. As outlined in the attached SER, the staff concurs that some of these modifications would be appropriate to offset to some extent the penalty resulting from correction of the error. The attached SER sets forth the value for each modification applicable to each facility.

Revised computer calculations correcting the error, noted above, and in-

corporating the modifications described in the SER have not been run for each plant. However, the various parametric studies that have been made for various aspects of the approved model over the course of time provide a reasonable basis for concluding that when final revised calculations for the facility are submitted using the revised and corrected model, they will demonstrate that with the peaking factors set forth in the SER operation will conform to the criteria of 10 CFR 50.46(b). Such revised calculations fully conforming to 10 CFR 50.46 are to be provided for the facility as soon as possible.

As discussed in this order and in the SER, operation of the Salem facility at the peaking factor limit specified in this order, will assure that the ECCS will conform to the performance requirements of 10 CFR 50.46(b). Accordingly, this limit provides reasonable assurance that the public health and safety will not be endangered. Upon notification by the NRC staff, the licensee committed to provide a reevaluation of ECCS performance as promptly as practicable and to limit operation to achieve a peaking factor not exceeding the value specified herein. These commitments were confirmed by the licensee's letter of April 17, 1978. The staff believes that the licensee's action, under the circumstances, is appropriate and that this action should be confirmed by NRC order.

IV. Copies of the Safety Evaluation and the following documents are available for inspection at the Commission's Public Document Room at 1717 H Street, Washington, D.C. 20555, and are being placed in the Commission's local public document room at the Salem Free Public Library, 112 West Broadway, Salem, N.J.

(1) Letter from Westinghouse to NRC dated April 7, 1978.

(2) Letter from Public Service Gas & Electric Co., to Director NRR, dated April 17, 1978.

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's rules and regulations in 10 CFR parts 2 and 50: *It is ordered*, That Facility Operating License No. DPR-70 is hereby amended by adding the following new provisions:

(1) As soon as possible, the licensee shall submit a reevaluation of ECCS cooling performance calculated in accordance with the Westinghouse Evaluation Model, approved by the NRC staff and corrected for the errors described herein.

(2) Until further authorization by the Commission, the Technical Specification limit for total nuclear peaking factor (F_p) for the facility shall be limited to 2.21.

Dated at Bethesda, Md., this 27th day of April 1978.

For the Nuclear Regulatory Commission.

VICTOR STELLO, Jr.,
Director, Division of Operating
Reactors, Office of Nuclear Re-
actor Regulation.

[7590-01]

[Docket No. 50-281]

VIRGINIA ELECTRIC & POWER CO., (SURRY
POWER STATION, UNIT NO. 2)

Order For Modification of License

I. The Virginia Electric & Power Co. (the licensee), is the holder of Facility Operating License No. DPR-37 which authorizes the operation of the nuclear power reactor known as Surry Power Station, Unit No. 2 (the facilities) at steady reactor power levels not in excess of 2441 megawatts thermal (rated power). The facility consists of a Westinghouse Electric Corporation designed pressurized water reactor (PWR) located at the licensee's site in Surry County, Va.

II. In accordance with the requirements of the Commission's ECCS Acceptance Criteria 10 CFR 50.46, the licensee submitted on August 9, 1977 as supplemented August 26, October 14 and November 16, 1977 an ECCS evaluation for proposed operation using 15 x 15 fuel manufactured by the Westinghouse Electric Corp. This evaluation included limits on the peaking factor. The ECCS evaluation submitted by the licensee was based upon an ECCS evaluation developed by the Westinghouse Electric Corp. (Westinghouse), the designer of the Nuclear Steam Supply System for this facility. The Westinghouse ECCS Evaluation Model had been previously found to conform to the requirements of the Commission's ECCS Acceptance Criteria, 10 CFR Part 50.46 and Appendix K. The evaluation indicated that with the peaking factor limited as set forth in the evaluation, and with other limits set forth in the facility's Technical Specifications, the ECCS cooling performance for the facility would conform with the criteria contained in 10 CFR 50.46(b) which govern calculated peak clad temperature, maximum cladding oxidation, maximum hydrogen generation, coolable geometry and long-term cooling.

On March 23, 1978 Westinghouse informed the Nuclear Regulatory Commission (NRC) that an error had been discovered in the fuel rod heat balance equation involving the incorrect use of only half of the volumetric heat generation due to metal-water reaction in calculating the cladding temperature. Thus, the LOCA analyses previously submitted to the Commission by licensees of Westinghouse reactors were in error. The staff promptly deter-

mined that no immediate action was required to assure safe operation of these plants.

The error identified would result in an increase in calculated peak clad temperature, which, for some plants, could result in calculated temperatures in excess of 2,200° F unless the allowable peaking factor was reduced somewhat. Westinghouse identified a number of other areas in the approved model which Westinghouse indicated contained sufficient conservatism to offset the calculated increase in peak clad temperature resulting from the correction of the error noted above. Four of these areas were generic, applicable to all plants, and a number of others were plant specific. As outlined in the attached SER, the staff concurs that some of these modifications would be appropriate to offset to some extent the penalty resulting from correction of the error. The attached SER sets forth the value for each modification applicable to each facility.

Revised computer calculations correcting the error, noted above, and incorporating the modifications described in the SER have not been run for each plant. However, the various parametric studies that have been made for various aspects of the approved model over the course of time provide a reasonable basis for concluding that when final revised calculations for the facility are submitted using the revised and corrected model, they will demonstrate that with the peaking factors set forth in the SER operation will conform to the criteria of 10 CFR 50.46(b). Such revised calculations fully conforming to 10 CFR 50.46 are to be provided for the facility as soon as possible.

As discussed in this Order and in the SER, operation of the Surry Power Station, Unit No. 2, at the peaking factor limits specified in this Order, and in accordance with the operating surveillance requirements specified in this Order, will assure that the ECCS will conform to the performance requirements of 10 CFR 50.46(b). Accordingly, such limits provide reasonable assurance that the public health and safety will not be endangered. Upon notification by the NRC staff, the licensee committed to provide a reevaluation of ECCS performance as promptly as practicable to limit operation to achieve a peaking factor not exceeding the value specified herein, and to submit operating surveillance procedures to assure operation within such limits. Such procedures were submitted and the commitments confirmed by the licensee's letter of April 7, 1978. The staff believes that the licensee's action, under the circumstances, is appropriate and that this action should be confirmed by NRC Order.

IV. Copies of the Safety Evaluation and the following documents are available for inspection at the Commission's Public Document Room at 1717 H Street, Washington, D.C. 20555, and are being placed in the Commission's local public document room at the Swem Library, College of William and Mary, Williamsburg, Va.

(1) Letter from Westinghouse to NRC dated April 7, 1978.

(2) Letter from Virginia Electric Power Co., dated April 7, 1978.

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's rules and regulations in 10 CFR Parts 2 and 50: *It is ordered*, That Facility Operating License No. DPR-37 is hereby amended by adding the following new provisions:

(1) As soon as possible, the licensee shall submit a reevaluation of ECCS cooling performance calculated in accordance with the Westinghouse Evaluation Model, approved by the NRC staff and corrected for the errors described herein.

(2) Until further authorization by the Commission, the Technical Specification limit for total nuclear peaking factor (F_0) for the Surry Power Station, Unit No. 2 shall be limited to 1.81 for a steam generator tube plugging level of 20.8 percent or less and 1.79 for a steam generator tube plugging level of greater than 20.8 percent but less than 25 percent.

(3) Until further authorization by the Commission, the licensee shall conduct the operating surveillance program described in its letter of April 7, 1978 where APDM surveillance will be performed above 85 percent for Unit No. 2.

Dated at Bethesda, Md. this 28th day of April 1978.

For the Nuclear Regulatory Commission.

VICTOR STELLO, Jr.,
Director, Division of Operating
Reactors, Office of Nuclear Re-
actor Regulation.

[FR Doc. 78-14515 Filed 5-23-78; 8:45 am]

[7590-01]

[Docket Nos. 50-266 and 50-301]

WISCONSIN ELECTRIC POWER CO., (POINT
BEACH NUCLEAR PLANT, UNIT NOS. 1 & 2)

Order For Modification of License

I. Wisconsin Electric Power Co. (the licensee) is the holder of Facility Operating License Nos. DPR-24 and DPR-27 which authorize the operation of the nuclear power reactors known as Point Beach Nuclear Plant, Unit Nos. 1 and 2 (the facilities) at steady reactor power levels not in excess of 1518 megawatts thermal (rated power). The facilities consist of

Westinghouse Electric Corp.-designed pressurized water reactors (PWRs) located at the licensee's site in Manitowoc County, Wis.

II. In accordance with the requirements of the Commission's ECCS Acceptance Criteria 10 CFR 50.46, the licensee submitted on October 27, 1976 an ECCS evaluation for proposed operation using 14X14 fuel manufactured by the Westinghouse Electric Corp. This evaluation included limits on the peaking factor. The ECCS evaluation submitted by the licensee was based upon an ECCS evaluation developed by the Westinghouse Electric Corp. (Westinghouse), the designer of the Nuclear Steam Supply System for these facilities. The Westinghouse ECCS Evaluation Model had been previously found to conform to the requirements of the Commission's ECCS Acceptance Criteria, 10 CFR Part 50.46 and Appendix K. The evaluation indicated that with the peaking factor limited as set forth in the evaluation, and with other limits set forth in the facilities' Technical Specifications, the ECCS cooling performance for the facilities would conform with the criteria contained in 10 CFR 50.46(b) which govern calculated peak clad temperature, maximum cladding oxidation, maximum hydrogen generation, coolable geometry and long-term cooling.

On March 23, 1978 Westinghouse informed the Nuclear Regulatory Commission (NRC) that an error had been discovered in the fuel rod heat balance equation involving the incorrect use of only half of the volumetric heat generation due to metal-water reaction in calculating the cladding temperature. Thus, the LOCA analyses previously submitted to the Commission by licensees of Westinghouse reactors were in error. The staff promptly determined that no immediate action was required to assure safe operation of these plants.

The error identified would result in an increase in calculated peak clad temperature, which, for some plants, could result in calculated temperatures in excess of 2,200° F unless the allowed peaking factor was reduced somewhat. Westinghouse identified a number of other areas in the approved model which Westinghouse indicated contained sufficient conservatism to offset the calculated increase in peak clad temperature resulting from the correction of the error noted above. Four of these areas were generic, applicable to all plants, and a number of others were plant specific. As outlined in the attached SER, the staff concurs that some of these modifications would be appropriate to offset to some extent the penalty resulting from correction of the error. The attached SER set forth the value for each modification applicable to each facility.

Revised computer calculations correcting the error, noted above, and incorporating the modifications described in the SER have not been run for each plant. However, the various parametric studies that have been made for various aspects of the approved model over the course of time provide a reasonable basis for concluding that when final revised calculations for the facilities are submitted using the revised and corrected model, they will demonstrate that the peaking factors set forth in the SER operation will conform to the criteria of 10 CFR 50.46(b). Such revised calculations fully conforming to 10 CFR 50.46 are to be provided for the facilities as soon as possible.

As discussed in this Order and in the SER, operation of the Point Beach facilities at a peaking factor limit of 2.32, which is now specified in the Technical Specifications, will assure that the ECCS will conform to the performance requirements of 10 CFR 50.46(b). Accordingly, such limits provide reasonable assurance that the public health and safety will not be endangered. Upon notification by the NRC staff, the licensee committed to provide a reevaluation of ECCS performance as promptly as practicable. This commitment was confirmed by the licensee's letter of April 6, 1978. The staff believes that the licensee's action, under the circumstances, is appropriate and that this action should be confirmed by NRC Order.

IV. Copies of the Safety Evaluation and the following documents are available for inspection at the Commission's Public Document Room at 1717 H Street, Washington, D.C. 20555, and are being placed in the Commission's local public document room at the University of Wisconsin-Stevens Point Library, Stevens Point, Wis.

(1) Letter from Westinghouse to NRC dated April 7, 1978.

(2) Letter from Wisconsin Electric Power Co. dated April 6, 1978.

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's rules and regulations in 10 CFR Parts 2 and 50: *It is ordered*, That Facility Operating License Nos. DPR-24 and DPR-27 are hereby amended by adding the following new provisions:

As soon as possible, the licensee shall submit a reevaluation of ECCS cooling performance calculated in accordance with the Westinghouse Evaluation Model, approved by the NRC staff and corrected for the errors described herein.

Dated at Bethesda, Md., this 28th day of April 1978.

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS

Revised Notice of Meeting

The meeting notice for the meeting previously scheduled on June 1-3, 1978 (published on May 17, 1978, FEDERAL REGISTER, volume 43, No. 96, pp. 21383-4) is revised as detailed below. This revision incorporates schedule changes due to the cancellation of the session for the Indian Point Nuclear Generating Station, Unit 3. The changes include cancellation of the session on Saturday, June 3, 1978.

The agenda for the subject meeting will be as follows:

THURSDAY, JUNE 1, 1978

8:30 a.m.-9:00 a.m.: *Executive Session (open)*—The Committee will hear and discuss the report of the ACRS Chairman regarding miscellaneous matters relating to ACRS activities including the appointment of new Committee members.

This session will be open to the public except for those portions which must be closed to protect information the release of which would represent an unwarranted invasion of personal privacy.

The Committee will hear and discuss the report of the ACRS Subcommittee and consultants who may be present regarding the request for operation at increased power of the Maine Yankee Atomic Power Station. Portions of this session will be closed if necessary to discuss Proprietary Information applicable to this matter and provisions for physical protection of this unit.

9:00 a.m.-11:00 a.m.: *Maine Yankee Atomic Power Station (open)*—The Committee will hear and discuss presentations by representatives of the NRC Staff and the Applicant related to the request to operate this unit at increased power. Portions of this session will be closed if necessary to discuss Proprietary Information applicable to this matter and provisions for physical protection of this unit.

11:00 a.m.-12:00 noon: *Executive Session (open)*—The Committee will hear and discuss reports of Subcommittees and Working Groups on a number of generic matters related to reactor safety including Anticipated Transients Without Scram and proposed revisions to NRC Regulatory Guides. The Subcommittee on the Vermont Yankee Nuclear Power Station will

also report on operating experience at this facility.

1:00 p.m.-2:15 p.m.: Report on Inter-agency Review of Nuclear Waste Management (open)—The Committee will hear and discuss a report by representatives of the NRC regarding NRC participation in the program for review of nuclear waste management and disposal.

2:15 p.m.-2:30 p.m.: Executive Session (open)—The Committee will discuss proposed use of Class 9 Accidents as a methodology for evaluation of alternate reactor sites.

2:30 p.m.-4:30 p.m.: Meeting with NRC Staff (open)—The Committee will hear and discuss a report by representatives of the NRC Staff regarding use of Class 9 Accidents as a methodology for evaluation of alternate sites for nuclear power plants.

4:30 p.m.-6:30 p.m.: Executive Session (open)—The Committee will discuss proposed ACRS positions and comments regarding generic matters related to nuclear power plant safety including the source term used in reactor safety analysis, the need for a quasi-judicial, statutory board to review reactor accidents, and radiobiological protection.

The Committee will also discuss its proposed report to the NRC on the Maine Yankee Nuclear Plant.

FRIDAY, JUNE 2, 1978

8:30 a.m.-11:30 a.m.: Meeting with NRC Staff (open)—The Committee will hear presentations from and hold discussions with members of the NRC Staff regarding recent licensing actions and operating experience including the seismic reevaluation of several nuclear power plants and review of a proposed safe shutdown system for the Oconee Nuclear Plant. A portion of this session will be closed to protect information related to physical protection of the Oconee Nuclear Plant.

Representatives of the NRC Staff and its contractors will also report to the ACRS on generic matters related to nuclear power plant safety including the bases for combination of seismic and other dynamic loads.

The future schedule for ACRS activities and topics proposed for consideration by the Committee will also be discussed.

11:30 a.m.-12:30 p.m.: Executive Session (open)—The Committee will discuss miscellaneous Committee activities including reorganization of ACRS Subcommittees and Working Groups and a proposed periodic report of ACRS activities.

1:30 p.m.-4:00 p.m.: Executive Session (open)—The Committee will discuss proposed ACRS comments regarding the establishment of a quasi-judicial, statutory board to investigate reactor accidents, and other generic matters considered during this meeting.

The Committee will also discuss its proposed report to the NRC on the Maine Yankee Nuclear Plant.

Procedures for the conduct of and participation in ACRS meetings were outlined in the FEDERAL REGISTER on October 31, 1977, page 56972. In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

I have determined in accordance with Subsection 10(d) of Pub. L. 92-463 that it is necessary to close portions of the meeting as noted above to protect Proprietary Information (5 U.S.C. 552b(c)(4)), to preserve the confidentiality of classified and proprietary information related to safeguarding of special nuclear material and the physical protection of nuclear facilities (5 U.S.C. 552b(c)(1) and (4)), and to protect information the release of which would represent an unwarranted invasion of personal privacy (5 U.S.C. 552b(c)(6)). Separation of factual information from information considered exempt from disclosure during closed portions of the meeting is not considered practical.

Background information concerning items to be considered during this meeting can be found in documents on file and available for public inspection in the Nuclear Regulatory Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555 and in the following Public Document Rooms:

Maine Yankee Atomic Generating Station, Wiscasset Public Library, High Street, Wiscasset, Me. 04578.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 202-634-1371), between 8:15 a.m. and 5 p.m. e.d.t.

Dated: May 19, 1978.

JOHN C. HOYLE,
Advisory Committee
Management Officer.

(FR Doc. 78-14660 filed 5-23-78; 8:45 am)

[7590-01]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS, SUBCOMMITTEE ON RELIABILITY AND ACCIDENT PROBABILITIES

Meeting

The ACRS Subcommittee on Reliability and Accident Probabilities will hold an open meeting on June 8, 1978 in Room 1046, 1717 H Street NW., Washington, D.C. 20555 to consider whether the Nuclear Plant Reliability Data System reporting requirements should be made mandatory by the NRC.

In accordance with the procedures outlined in the FEDERAL REGISTER on October 31, 1977, page 56972, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The agenda for subject meeting shall be as follows:

THURSDAY, JUNE 8, 1978

11 a.m. until the conclusion of business—The Subcommittee may meet in Executive Session, with any of its consultants who may be present, to explore and exchange their preliminary opinions regarding matters which should be considered during the meeting and to formulate a report and recommendations to the full Committee.

At the conclusion of the Executive Session, the Subcommittee will hear presentations by and hold discussions with representatives of the nuclear industry, the NRC Staff, and their consultants, pertinent to this review.

The Subcommittee may then caucus to determine whether the matters identified in the initial session have been adequately covered and whether the project is ready for review by the full Committee.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the Designated Federal Employee for this meeting, Mr. John C. McKinley, telephone 202-634-1371, between 8:15 a.m. and 5 p.m. e.d.t.

Dated: May 22, 1978.

JOHN C. HOYLE,
Advisory Committee
Management Officer.

(FR Doc. 78-14661 filed 5-23-78; 8:45 am)

SMALL BUSINESS ADMINISTRATION

(Delegation of Authority No. 30, Rev. 15, Amdt. 21)

PROGRAM ACTIVITIES IN FIELD OFFICES

Delegation of Authority

Delegation of Authority No. 30, Revision 15, republished in the FEDERAL REGISTER on February 25, 1976 (41 FR 8240), as amended (41 FR 16234, 17829, 28049, 36702, 47610, 50883, 42 FR 56990, 59153, 61347, 43 FR 55, 1577, 6667, 10998, and 13651), is hereby further amended to delegate authority to Regional Directors and Assistant Regional Directors for Administration to contract for services for SBA.

Accordingly, Delegation of Authority No. 30, Revision 15, Part X, Administration, is amended by adding paragraph 3 as set forth below and renumbering current paragraphs 3 thru 5 as paragraphs 4 thru 6.

PART X—ADMINISTRATION

Section A— . . .

1. . . .
2. . . .

3. **Contract for Services.** To contract for services for the agency not exceeding the monetary amount of \$2500 pursuant to Chapter 4 of Title 41, United States Code, subject to the limitations contained in section 257(a) and (h) of that chapter.

(a) Regional Director;
(b) Assistant Regional Director for Administration.

Effective date: May 24, 1978.

Dated: May 18, 1978.

A. VERNON WEAVER,
Administrator.

DEPARTMENT OF STATE

Agency for International Development

JOINT COMMITTEE FOR AGRICULTURAL DEVELOPMENT OF THE BOARD FOR INTERNATIONAL FOOD AND AGRICULTURAL DEVELOPMENT

Meeting

Pursuant to Executive Order 11769 and the provisions of Section 10 (a), (2), Pub. L. 92-463, Federal Advisory Committee Act, notice is hereby given of the eleventh meeting of the Joint Committee on Agricultural Development of the Board for International Food and Agricultural Development on June 12 and 13, 1978.

The purpose of this meeting is to review the status of Title XII projects in Asia, Africa, Latin America and the Near East; to receive a progress report on baseline studies of research, education and extension; to review and discuss JCAD participation in Annual Budget Submission reviews; and to consider other business brought before the Committee.

The meeting on June 12, 1978, will convene in Regional Work Groups

(RWGs): Africa RWG at 9:30 a.m. in Room 3524, New State Department Bldg.; Asia RWG at 10 a.m. in Room 206 Rosslyn Plaza Bldg., 1601 North Kent Street, Rosslyn, Va.; and Near East RWG at 9:30 a.m. in Room 6484, New State Department Bldg. The Latin America RWG will not meet. The meeting on June 13, 1978, will convene from 9 a.m. to 5 p.m. in the Arlington Room of the Quality Inn, Pentagon City, 300 Army-Navy Drive, Arlington, Va., 22202. The meeting is open to the public. Any interested person may attend, may file written statements with the Committee before or after the meeting; or may present oral statements in accordance with procedures established by the Committee, and to the extent the time available for the meeting permits.

Dr. Fletcher E. Riggs, Deputy Director, Office of Title XII Coordination, Development Support Bureau, is designated AID Advisory Committee Representative at the meeting. It is suggested that those desiring further information write to him in care of the Agency for International Development, State Department, Washington, D.C. 20523, or telephone him at 703-235-9001.

Dated: May 11, 1978.

FLETCHER E. RIGGS,
AID Advisory Committee Representative, Joint Committee on Agricultural Development, Board for International Food and Agricultural Development.
(FR Doc. 78-14568 Filed 5-23-78; 8:45 am)

[4710-02]

JOINT RESEARCH COMMITTEE OF THE BOARD FOR INTERNATIONAL FOOD AND AGRICULTURAL DEVELOPMENT

Meeting

Pursuant to Executive Order 11769 and the provisions of Section 10 (a), (2), Pub. L. 92-463, Federal Advisory Committee Act, notice is hereby given of the twelfth meeting of the Joint Research Committee of the Board for International Food and Agricultural Development on June 13 and 14, 1978.

The purpose of this meeting is to discuss progress of current planning activities of contractors on sorghum-millet, fisheries-aquaculture, and small ruminant animals for collaborative research support programs (CRSP's); discussion of Auburn University's domestic and international research and technical services activities in fisheries and aquaculture; AID procedures for making contracts and grants for collaborative research support programs; and future plans for CRSP's and achieving balance between centrally funded contract research and CRSP's in agriculture, food and nutrition.

The meeting will convene at 9 a.m. and adjourn at 5 p.m. on June 13 and 14, 1978. The meeting will be held in Comer Hall, Rm. 109, School of Agriculture Administration Building, Auburn University, Auburn, Ala. The meeting is open to the public. Any interested person may attend, may file written statements with the Committee before or after the meeting, or may present oral statements in accordance with procedures established by the Committee, and to the extent the time available for the meeting permits.

Dr. Erven J. Long, Director, Office of Title XII Coordination, Development Support Bureau, is designated AID Advisory Committee Representative at the meeting. It is suggested that those desiring further information write to him in care of the Agency for International Development, State Department, Washington, D.C. 20523, or telephone him at 703-235-2243.

Dated: May 15, 1978.

ERVEN J. LONG,
AID Advisory Committee Representative,
Joint Research Committee,
Board for International Food and Agricultural Development.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

LOCAL RAIL SERVICES ASSISTANCE PROGRAM

Public Meeting

On January 4, 1978, the Federal Railroad Administration ("FRA") published in the FEDERAL REGISTER at 43 FR 858 final regulations implementing the local rail service assistance program established by section 5 of the Department of Transportation Act, as amended. These regulations, 49 CFR Part 266, set forth the procedures and requirements to be followed by States in applying for Federal funds under the program.

Various parties have requested an opportunity to meet with representatives of the FRA to discuss the new regulations and any problems that have arisen during the period since their publication. In response to these requests, the FRA will sponsor a public meeting to discuss those matters with interested members of the public. The meeting is scheduled for June 22, 1978, at 9:30 a.m., in Room 2230 of the Nassif Building, 400 Seventh Street SW., Washington, D.C.

Dated: May 17, 1978.

CHARLES SWINBURN,
Associate Administrator
for Federal Assistance.

Office of the Secretary

INTERNATIONAL AIR TRANSPORTATION NEGOTIATIONS

Proposed Policy Statement

AGENCY: Office of the Secretary, Department of Transportation.

ACTION: Notice of Proposed Policy Statement and Invitation for Public Participation.

SUMMARY: This document sets forth the proposed United States policy for the conduct of international air transport negotiations. This policy is designed to give guidance to those agencies responsible for the conduct of bilateral negotiations and set forth objectives that the United States will seek to obtain in the negotiations.

DATES: Public Hearing: June 27, 1978. Deadline for requests to testify: June 16, 1978. Deadline for written comments: July 13, 1978. Expected transmittal of proposed final policy statement to President: July 25, 1978.

ADDRESSES: Send comments on the proposed policy to: Docket Clerk, OST File No. 57, Office of the General Counsel, Department of Transportation, Washington, D.C. 20590. Comments will be available for public inspection and copying from 9 a.m. to 5:30 p.m. local time, Monday through Friday, except Federal holidays at: Office of the Assistant General Counsel for Regulation and Enforcement, Department of Transportation, Headquarters (Nassif) Building, Room 10100, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-4723. Public hearing will be held beginning at 9 a.m. in: Department of Transportation, Headquarters (Nassif) Building, Room 2234, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Robert A. Holland, Deputy Director of Public and Consumer Affairs, 202-426-0434, 400 Seventh Street SW., Washington, D.C. 20590. Office hours are from 9 a.m. to 5:30 p.m., local time, Monday-Friday.

SUPPLEMENTARY INFORMATION: Over the last 8 months, an interagency group composed of the Departments of State, Transportation, Commerce, Defense, and Justice and the Office of Management and Budget, the Council on Wage and Price Stability, the Domestic Policy Staff and the Council of Economic Advisors has worked to put together a new statement to govern the conduct of United States international aviation negotiations. This Administration group has also had the full participation and assistance of the Civil Aeronautics Board, an independent agency. As in-

dedicated in the draft statement, the United States policy is to seek the greatest possible benefit for travelers and shippers and further develop international air transportation. The drafters believe that these benefits can best be achieved through the preservation and extension of competition among airlines in a fair marketplace.

During the course of the policy review, an outline of the policy was made available to the public and the Department of Transportation accepted comments on behalf of the interagency group with respect to that outline. While these comments have been very helpful, the interagency group believes that the draft final statement should be published formally for public comment prior to its submission to the President for approval.

In addition, the interagency group also believes that a public hearing to give interested parties a full opportunity to participate in an open forum would be conducive to the development of the final statement. For that reason, a public hearing will be held at the Department of Transportation Headquarters (Nassif) Building on June 27, 1978. Representatives of the major interested agencies will participate in the hearing and will participate in evaluation of the comments received in order to prepare a final statement to send to the President for final approval. Commenters are requested to address the specific issues of concern to them and to present concise statements of proposed modifications in the policy, if any. One copy of the testimony should be submitted at the hearing for the record.

Any person desiring to participate in the public hearing should advise Robert A. Holland at the address and telephone number shown above by June 16, 1978. Each request to testify must be accompanied by the following information:

1. Name, address and telephone number of person desiring to speak.
2. Organization or interest group represented, if any.
3. Summary of comment.
4. Amount of time desired.

Every effort will be made to accommodate all interested persons. The time allotted will depend on the number of persons seeking the opportunity to comment. Parties may consolidate presentations.

Issued in Washington, D.C., on May 19, 1978.

BROCK ADAMS,
Secretary of Transportation.

PROPOSED UNITED STATES POLICY FOR THE CONDUCT OF INTERNATIONAL AIR TRANSPORTATION NEGOTIATIONS

PREAMBLE

United States international air transportation policy is designed to provide the great-

est possible benefit to travelers and shippers. Our primary aim is furthering the maintenance and continued development of affordable, safe, convenient, efficient, and environmentally acceptable air services. Our policy for negotiating civil air transport agreements reflects our national goals in international air transportation. This policy provides a set of general objectives, designed particularly for major international air markets, on the basis of which United States negotiators can develop specific negotiating strategies.

Maximum consumer benefits can be best achieved through the preservation and extension of competition between airlines in a fair market place. Reliance on competitive market forces to the greatest extent possible in our international air transportation agreements will allow the public to receive improved service at low costs that reflect economically efficient operations. Competition and low prices are also fully compatible with a prosperous U.S. air transport industry and our national defense, foreign policy, international commerce and energy efficiency objectives.

Bilateral aviation agreements, like other international agreements, should serve the interests of both parties. Other countries have an interest in the economic prosperity of their airline industries, as we do in the prosperity of ours. The United States believes this interest is best served by a policy of expansion of competitive opportunity rather than restriction. By offering more services to the public, in a healthy and fair competitive environment, the international air transport industry can stimulate the growth in traffic which contributes both to profitable industry operations and to maximum public benefits.

A. *Goals of U.S. International Air Transportation Policy.* The U.S. will work to achieve a system of international air transportation that places its principal reliance on actual and potential competition to determine the variety, quality and price of air service. An essential means for carrying out our international air transportation policy will be to work for greater competitive opportunities for U.S. and foreign airlines and to promote new low-cost transportation options for travelers and shippers. Especially in major international air transport markets, there can be substantial benefits for travelers, shippers, airlines and labor from increasing competitive opportunities and reducing protectionist restrictions. Increasing the amount of U.S. flag air carrier transportation to and from the United States will contribute to the development of our foreign commerce, assure that more airlift resources are available for our defense needs, and promote and expand productivity and job opportunities in our international air transport industry.

B. *Translating Goals into Negotiating Objectives.* U.S. international air transportation policy cannot be implemented unilaterally. Our objectives have to be achieved in the system of international agreements that form the basic framework for the international air transportation system.

Routes, prices, capacity, scheduled and charter rules and competition in the market place are interrelated, not isolated problems to be resolved independently. Thus, the following objectives will be presented in negotiations as an integrated U.S. position:

1. Creation of new and greater opportunities for innovative and competitive pricing to respond to the varied service and price needs of different consumers,

2. Liberalization of charter rules and elimination of restrictions on charter operations,
3. Expansion of scheduled service through elimination of restrictions on capacity, frequency, and route and operating rights,
4. Elimination of discrimination and unfair competitive practices faced by U.S. airlines in international transportation,
5. Flexibility to designate multiple U.S. airlines in international air markets, and
6. Encouragement of maximum traveler and shipper access to international markets by permitting service through more non-stop gateway cities and improving the integration of domestic and international airline services.

EXPLANATION OF OBJECTIVES

1. *Pricing.* The U.S. will strive for a more competitive and innovative international aviation industry by placing special emphasis on low prices. U.S. agencies will develop procedures to accommodate a more competitive system for establishing scheduled air fares and rates. For charter services the U.S. will continue to insist on competitive pricing.

2. *Charters.* The introduction of charters (which are not subject to industry price agreements) acted as a major catalyst to the expansion of international air transportation in the 1960's. Charters are a competitive spur and exert downward pressure on the pricing of scheduled services. Rather than diverting traffic from scheduled operations, charters generate new traffic and help stimulate expansion in all sectors of the industry. Restrictions which have been imposed on the volume, frequency and regularity of charter services as well as requirements for approval of individual charter flights have restrained the growth of traffic and tourism and do not serve the interests of either party to an aviation agreement. Strong efforts will be made to obtain liberal charter provisions in bilateral agreements.

3. *Scheduled Services.* We will seek to increase the freedom of airlines from capacity and frequency restrictions. We will also work to maintain or increase the route and operating rights of our airlines where such actions improve international route systems and offer the consumer more convenient and efficient air transportation.

4. *Discrimination and Unfair Competitive Practices.* U.S. airlines must have the flexibility to conduct operations and market their services in a manner consistent with a fair and equal opportunity to compete with the airlines of other nations. We will insist that U.S. airlines have the business, commercial and operational opportunities to compete fairly. The United States will seek to eliminate unfair or destructive competitive practices that prevent U.S. airlines from competing on an equal basis with the airlines of other nations. Charges for providing airway and airport properties and facilities should be related to the costs due to airline operations and should not discriminate against U.S. airlines. These objectives were recognized by the Congress in legislation enacted in 1975, and their attainment is required if consumers are to obtain the benefits of an otherwise competitive international aviation system.

5. *Multiple Airline Designations.* The designation of new U.S. airlines in international markets that will support additional service is a way to create a more competitive environment and thus encourage improved service and competitive pricing.

6. *Maximum Access to International Markets.* Increasing the number of gateway

cities for non-stop air service offers the potential for increasing the convenience of air transportation for passengers and shippers and improving routing and market opportunities for international airlines. In addition, enhancing the integration of U.S. airline domestic and international air services benefits both consumers and airlines.

C. *Negotiating Principles.* The guiding principle of United States aviation negotiating policy will be to trade competitive opportunities, rather than restrictions, with our negotiating partners. We will aggressively pursue our interests in expanded air transportation and reduced prices rather than accept the self-defeating accommodation of protectionism. Our concessions in negotiations will be given in return for progress toward competitive objectives, and these concessions themselves will be of a liberalizing character.

Proposed bilateral agreements which do not meet our minimum competitive objectives will not be signed without prior Presidential approval.

DEPARTMENT OF THE TREASURY

Fiscal Service

[Dept. Circ. 570, 1977 Rev., Supp. No. 21]

AMERICAN AND FOREIGN INSURANCE COMPANY; SAFEGUARD INSURANCE COMPANY

Surety Companies Acceptable on Federal Bonds: Termination of Authority

Notice is hereby given that the certificates of authority issued by the Treasury to American and Foreign Insurance Company, New York, New York, and Safeguard Insurance Company, New York, New York, under Sections 6 to 13 of Title 6 of the United States Code, to qualify as acceptable sureties on Federal bonds are hereby terminated effective June 30, 1978.

American and Foreign Insurance Company was last listed as an acceptable surety on Federal bonds at 42 FR 34069 July 1, 1977. Safeguard Insurance Company was last listed as an acceptable surety on Federal bonds at 42 FR 34078 July 1, 1977.

With respect to any bonds currently in force with American and Foreign Insurance Company and Safeguard Insurance Company, bond-approving officers of the Government should secure new bonds with acceptable sureties in those instances where a significant amount of liability remains outstanding.

Dated: May 17, 1978.

D. A. PAGLIAI,
Commissioner, Bureau of
Government Financial Operations.

THE CHESSIE SYSTEM

Amended System Diagram Map

Notice is hereby given that, pursuant to the requirements contained in Title 49 of the Code of Federal Regulations, §1121.23, that the Chessie System, has filed with the Commission its amended color-coded system diagram map in docket No. AB 18 (SDM). The maps reproduced here in black and white are reasonable reproductions of that amended system diagram map and the Commission on May 1, 1978, received a certificate of publication as required by said regulation which is considered the effective date on which the amended system diagram map was filed.

Color-coded copies of the map have been served on the Governor of each state in which the railroad operates and the Public Service Commission or similar agency and the State designated agency. Copies of the map may also be requested from the railroad at a nominal charge. The maps also may be examined at the office of the Commission, Section of Dockets, by requesting docket No. AB 18 (SDM).

H. G. HOMME, J. R.,
Acting Secretary.

CHESIE SYSTEM LINES

Description of Lines to Accompany the System Diagram Map

CATEGORY (1)

Lines or portions of lines which the carrier anticipates will be the subject of an abandonment or discontinuance application to be filed within three years.

DELAWARE

Map code [31]

Docket No. AB-19 (Sub. No. 3)

- (a) Landenberg Branch.
- (b) Located in State of Delaware.
- (c) Located in New Castle County.
- (d) Milepost 1.19 near Green Bank to milepost 10.18 near Hockessin.
- (e) Open agency station at Yorklyn (milepost 7.9) served by a traveling agent from Wilmington.

Map code [73]

- (a) South Side Extension.
- (b) Located in State of Delaware.
- (c) Located in New Castle County.
- (d) Station 0+00 to station 21+17 near Wilmington, a distance of 0.40 mile.
- (e) No agency stations located on the line.

INDIANA

Map code [19]

- (a) Wabash Subdivision.
- (b) Located in State of Indiana.
- (c) Located in Starke, Porter, and Lake Counties.
- (d) Milepost 222.01 near LaCrosse to milepost 260.0 at HY Tower.
- (e) Agent located at Griffith (milepost 253.8).

KENTUCKY

Map code [22]

- (a) Preston Street Yard.
- (b) Located in Commonwealth of Kentucky.
- (c) Located in Jefferson County.
- (d) Station 4+20 to station 32+22 in Louisville, a distance of 0.53 mile.
- (e) Agency station at Louisville would not be included in abandonment.
- (f) Comments: Proposal calls for C&O to abandon operations at ConRail's Preston Street Yard and operate into K&IT's Youngstown Yard. C&O's viaduct track leading into yard would be abandoned.

NOTICES

Map code [27]

- (a) Levisa Fork Subdivision.
- (b) Located in Commonwealth of Kentucky.
- (c) Located in Pike County.
- (d) Station 56+00 to station 78+00, a distance of .42 mile.
- (e) No agency stations on the line.

Map code [75]

- (a) Coon creek subdivision.
- (b) Located in Commonwealth of Kentucky.
- (c) Located in Pike County.
- (d) Milepost 0.0 at Johns Creek Junction to milepost 9.0 at Raccoon.
- (e) No agency stations on the line.

MARYLAND

Map code [52]

- (a) Canton Branch.
- (b) Located in State of Maryland.
- (c) Located in Baltimore City.
- (d) Milepost 1.86 at Sparrows Point Junction to milepost 2.47.
- (e) No agency stations on the line.

Map code [70]

- (a) East Subdivision.
- (b) Located in State of Maryland and Commonwealth of Pennsylvania.
- (c) Located in Carroll and Frederick Counties, Maryland and Adams County in Commonwealth of Pennsylvania.
- (d) Milepost 23.94 near Cedarhurst, Md. to milepost 69.14 at Highfield, Pa.
- (e) Agent located at Union Bridge, Md., (milepost 45.40).
- (f) Comment: Proposal calls for Short Line Railroad to acquire and operate the segment of line between Keymar (milepost 49.10) and Westminster (Milepost 32.20).

Map code [78]

- (a) Fell Street area.
- (b) Located in State of Maryland.
- (c) Located in Baltimore City.
- (d) Station 0+00 to station 9+53 at Baltimore, Md., a distance of .18 mile.
- (e) Agency station at Camden (Baltimore) would not be included in abandonment.

Map code [49]

- (a) Mt. Airy branch.
- (b) Located in station of Maryland.
- (c) Located in Frederick and Carroll Counties.
- (d) Station 1729+50 to station 1698+90 at Mt. Airy, a distance of .58 mile.
- (e) No agency stations on the line.

Map code [77]

- (a) Williamsport branch.
- (b) Located in State of Maryland.
- (c) Located in Washington County.
- (d) Milepost 0.00 at PV Junction to milepost 1.25 near Williamsport, Md.
- (e) No agency stations on the line.

MICHIGAN

Map code [23]

- (a) North Horn spur.
- (b) Located in State of Michigan.
- (c) Located in Muskegon County.
- (d) Station 0+00 to station 55+71 at Muskegon, a distance of 1.06 miles.
- (e) No agency stations on the line.

Map code [24]

- (a) Superior Street spur.
- (b) Located in State of Michigan.
- (c) Located in Saginaw County.
- (d) Station 15+00 to station 68+68 at Saginaw, a distance of 1.02 miles.
- (e) No agency stations on the line.

NEW YORK

Map code [58]

- (a) Dock Branch Rochester Belt Line.
- (b) Located in State of New York.
- (c) Located in Monroe County.
- (d) Milepost 0.0 at Dock Junction to milepost 1.14. Milepost 6.89 to milepost 8.74 at R.W. & O. junction.
- (e) No agency stations on the line.

OHIO

Map code [20]

- (a) Athens Branch.
- (b) Located in State of Ohio.

NOTICES

(c) Located in Athens County.
(d) Station 3943+45 at Armitage to station 4014+71 at Athens, a distance of 1.35 miles.

(e) No agency stations on the line.
(f) Comments: Abandonment of line only. Applicant abandoned operation over the line on November 12, 1973, Docket No. AB-18 (Sub No. 2).

Map code [53]

(a) Midland Branch.
(b) Located in State of Ohio.
(c) Located in Licking County.
(d) Milepost 2.18 near Newark to milepost 8.11.
(e) No agency stations on the line.

Map code [56]

(a) Portsmouth Branch.
(b) Located in State of Ohio.
(c) Located in Scioto County.
(d) Milepost 37.20 near South Webster to milepost 39.63 near Edmunds. Milepost 48.99 to milepost 49.47 near Portsmouth.
(e) No agency stations on the line.

Map code [57]

(a) Cleveland Terminal and Valley Branch (includes Huff Run Branch).
(b) Located in State of Ohio.
(c) Located in Carroll and Tuscarawas Counties.
(d) Milepost 4.28 near Sandyville to milepost 1.34 near Mineral City. Milepost 0.0 at Huff Run Junction to milepost 3.65.
(e) Open agency station at Mineral City (milepost 2.0) served by traveling agent from Dover. Non-agency station at James Mine (milepost 2.7) on Huff Run Branch served by traveling agent from Dover.

Map code [59]

(a) Home Avenue Branch.
(b) Located in State of Ohio.
(c) Located in Montgomery County.
(d) Station 9+45 to station 35+50, a distance of 0.49 mile. Station 113+50 to station 158+76, a distance of 0.86 mile.
(e) No agency stations on the line.

PENNSYLVANIA

Map code [79]

(a) Craigsville Branch.
(b) Located in Commonwealth of Pennsylvania.
(c) Located in Armstrong County.
(d) Milepost 1.54 to station 2.01 near Worthington, Pa. As information, station limits will be 81+45 to 106+26.
(e) No agency stations located on this line.

Map code [70]

(a) East Subdivision.
(b) Located in Commonwealth of Pennsylvania and State of Maryland.
(c) Located in Adams County in Commonwealth of Pennsylvania and in Carroll and Frederick Counties, Maryland.
(d) Milepost 23.94 near Cedarhurst, Md. to milepost 69.14 at Highfield, Pa.
(e) Agent located at Union Bridge, Md. (milepost 45.40).
(f) Comments: Proposal calls for Short Line Railroad to acquire and operate the segment of line between Keymar (milepost 49.10) and Westminster (milepost 33.20).

PENNSYLVANIA

Map code [40]

Docket No. AB-19 (Sub. No. 10)

(a) Indiana Branch.
(b) Located in Commonwealth of Pennsylvania.
(c) Located in Indiana County.
(d) Milepost 41.46 to milepost 44.69 near Black Lick Junction.
(e) No agency stations located on the line.

Map code [69]

(a) Lurgan Subdivision.
(b) Located in Commonwealth of Pennsylvania.
(c) Located in Franklin and Cumberland Counties.
(d) Milepost 32.65 near Lurgan to Milepost 34.0 near Shippenburg.
(e) No agency stations located on the line.

Map code [41]

Docket No. AB-19 (Sub. No. 34)

(a) Northern Branch (includes Kane Branch—0.64).
(b) Located in Commonwealth of Pennsylvania.
(c) Located in Armstrong, Clarion, Forest, Elk and McKean Counties.
(d) Milepost 66.83 near Parkers Landing to milepost 162.88 at Mt. Jewett.
(e) Agents located at Knox (milepost 86.9), Marienville (milepost 121.3), and Kane (milepost 152.8). Open agency station at Foxburg (milepost 69.4) served by traveling agent from Petrolia. Non-agency stations at St. Petersburg (milepost 73.0), Alum Rock (milepost 77.5), and Turkey (milepost 79.1) are served by a traveling agent from Petrolia.

WEST VIRGINIA

Map code [80]

(a) Sand Run.
(b) Located in State of West Virginia.
(c) Located in Tucker County.
(d) Milepost 0.00 near Williams, West Virginia to milepost 2.41 near Pierce, West Virginia. As information, station limits would be from station minus 1+11 to station 126+00, a distance of 12,711 feet.
(e) No agency stations on the line.

CHESSIE SYSTEM LINES

Description of Lines to Accompany the System Diagram Map

CATEGORY (2)

Lines or portions of lines under study and potentially subject to abandonment application.

DISTRICT OF COLUMBIA

Map code [61]

(a) Shepherd Industrial Track.
(b) Located in District of Columbia.
(c) Located in City of Washington.
(d) Milepost 5.76 at Shepherd Junction to milepost 11.76 at Shepherd.
(e) No agency stations on the line.

Map code [76]

(a) Georgetown Branch.
(b) Located in District of Columbia and Maryland.

(c) Located in Montgomery County, Md. and City of Washington.
(d) Milepost 0.0 at Georgetown Junction, Md. to milepost 10.98 at Georgetown, D.C.
(e) No agency stations on the line.

ILLINOIS

Map code [34]

Docket No. AB-19 (Sub. No. 26)

(a) Decatur Subdivision.
(b) Located in States of Illinois and Indiana.
(c) Located in Edgar, Douglas, Piatt, and Macon Counties of Illinois, and in Marion, Hendricks, Putnam, Parke, and Vermillion Counties of Indiana.
(d) Milepost 275.50 near Decatur, Ill. to milepost 245.75 near Ficklin, Ill. Milepost 225.0 near Newman, Ill. to milepost 130.39 near Speedway, Ind.
(e) Open agency stations in Illinois are LaPlace (milepost 264.3), Hammond (milepost 257.6), Atwood (milepost 240.7) and Chrisman (milepost 209.0). These stations are served by traveling agent from Tuscola. Traveling agent located at Montezuma, Ind. (milepost 191.9), also serves Russellville, Ind. (milepost 169.5).

INDIANA

Map code [34]

Docket No. AB-19 (Sub. No. 26)

(a) Decatur Subdivision.
(b) Located in States of Indiana and Illinois.
(c) Located in Marion, Hendricks, Putnam, Parke and Vermillion Counties of Indiana, and Edgar, Douglas, Piatt, and Macon Counties of Illinois.
(d) Milepost 130.39 near Speedway, Ind. to milepost 225.0 near Newman, Ill. Milepost 245.75 near Ficklin, Ill. to milepost 275.50 near Decatur, Ill.
(e) Traveling agent located at Montezuma, Ind. (milepost 191.9), also serves Russellville, Ind. (milepost 169.5). Open agency stations in Illinois are LaPlace (milepost 264.3), Hammond (milepost 257.6), Atwood (milepost 240.7) and Chrisman (milepost 209.0). These stations are served by traveling agent from Tuscola.

KENTUCKY

Map code [17]

(a) Lexington Belt.
(b) Located in Commonwealth of Kentucky.
(c) Located in Fayette County.
(d) Station 127+26 to station 174+00, a distance of 0.89 mile.
(e) No agency stations on the line.

MARYLAND

Map code [76]

(a) Georgetown Branch.
(b) Located in State of Maryland and District of Columbia.
(c) Located in Montgomery County and City of Washington.
(d) Milepost 0.0 at Georgetown Junction, Maryland to milepost 10.98 at Georgetown, D.C.
(e) No agency stations on the line.

Map code [71]

(a) Eckhart Branch.
(b) Located in State of Maryland.
(c) Located in Allegany County.
(d) Milepost 0.0 at Eckhart Junction to milepost 1.41.
(e) No agency stations on the line.

MICHIGAN

Map code [15]

(a) Hart Branch.
(b) Located in State of Michigan.
(c) Located in Muskegon and Oceana Counties.
(d) Milepost 72.25 near Montague to milepost 95.23 near Hart.
(e) Open agency station at Hart (milepost 95) served by traveling agent from Muskegon.

Map code [16]

(a) Ionia Branch.
(b) Located in State of Michigan.
(c) Located in Ionia County.
(d) Milepost 11.57 near Portland to milepost 26.30 at Ionia.
(e) Open agency station at Ionia (milepost 26.1) served by traveling agent from Lowell, Mich.
(f) Comment: Proposal calls for GTW to acquire and operate the portion of the line between milepost 25.38 and milepost 26.30 in Ionia.

Map code [18]

(a) Fremont Branch.
(b) Located in State of Michigan.
(c) Located in Muskegon and Newaygo Counties.
(d) Milepost 0.0 at Berry to milepost 20.28 near Fremont.
(e) Open agency station at Fremont (milepost 19.6) served by traveling agent from Muskegon.

NEW YORK

Map code [60]

(a) Main Line Fourth Subdivision Silver Lake Branch.
(b) Located in State of New York.
(c) Located in Genesee, Wyo., Allegany, and Cattaraugus Counties.
(d) Milepost 93.71 at or near Ashford to milepost 28.86 near LeRoy. Milepost 0 at Silver Lake Junction to milepost 2.27 near Chase.
(e) Agent located at Silver Springs (milepost 1).

OHIO

Map code [21]

(a) Cheviot and Miami Subdivisions.

NOTICES

(b) Located in State of Ohio.
(c) Located in Hamilton and Bulter Counties.
(d) Milepost 1.77 near Cincinnati to milepost 19.09 near Fernald.
(e) No agency stations on the line.

PENNSYLVANIA

Map code [54]

(a) 9th Street to Three Rivers Stadium in Pittsburgh.
(b) Located in Commonwealth of Pennsylvania.
(c) Located in Allegheny County.
(d) Station 7824+25 to station 7843+62, a distance of 0.36 mile.
(e) No agency stations on the line.

WEST VIRGINIA

Map code [72]

(a) Greenbrier, Cheat and Elk Branch.
(b) Located in State of West Virginia.
(c) Located in Randolph, Pocahontas and Webster Counties.
(d) Milepost 31.80 near Cheat Bridge to milepost 86.80 at Webster Springs. Station 0+00 to station 52+75 on Back Fork Branch near Webster Springs, a distance of one mile.
(e) No agency stations on the line.

CHESSIE SYSTEM LINES

Description of Lines to Accompany the System Diagram Map

CATEGORY (3)

Lines or portions of lines for which an abandonment or discontinuance application is currently pending before the Interstate Commerce Commission.

ILLINOIS

Map Code [29]

Finance Docket No. 26745

(a) Beardstown Branch.
(b) Located in State of Illinois.
(c) Located in Sangamon and Cass Counties.
(d) Milepost 184.46 near Coal Shaft to milepost 228.17 at Beardstown.
(e) Open agency station at Virginia (milepost 215) served by a traveling agent from Taylorville. Agent located at Beardstown, joint with Burlington Northern (milepost 228).
(f) Comments: ICC order, served June 1, 1976, authorized abandonment.

Map Code [32]

Finance Docket No. 26965

(a) Shawneetown Branch.
(b) Located in State of Illinois.
(c) Located in Clay, Wayne, White, and Gallatin Counties.
(d) Milepost 0.0 at Shawneetown to milepost 73.27 near Flora.
(e) Open agency stations at Cisne (milepost 63), Mill Shoals (milepost 43.5), Ridgeway (milepost 11.4), and Shawneetown (milepost 0.0). These stations are served by traveling agent from Flora.

(f) Comments: 5.36 miles of line between milepost 6.05 and milepost 0.69 are jointly owned by B&O and the Louisville & Nashville Railroad Company. Applicant seeks to abandon operations over this segment, but not the line of railroad. The Prairie Trunk Railway filed an application dated October 15, 1973, F.D. No. 27506, to acquire and operate the line. Application in F.D. No. 27506 was approved and application in F.D. No. 26965 was dismissed by order served March 15, 1977. Approval was appealed.

Map Code [33]

Docket No. AB-19 (Sub. No. 27)

(a) Flora to Sangamon Junction (103.29-mile segment of the Springfield Subdivision).
(b) Located in State of Illinois.
(c) Located in Clay, Effingham, Fayette, Shelby, Christian, and Sangamon Counties.
(d) Milepost 75.0 near Flora to milepost 178.29 at Sangamon Jct.
(e) Agent located at Taylorville (milepost 155.7). Open agency stations at Louis (milepost 81.3), Edgewood (milepost 95.6), Altamont (milepost 106.7), Cowden (milepost 121.9). These four stations are served by traveling agent from Flora. Open agency stations at Owaneco (milepost 148.3), Edinburg (milepost 164.6), and Rochester (milepost 174.8). These three stations are served by traveling agent from Taylorville.

INDIANA

Map Code [35]

Docket No. AB-19 (Sub. No. 37)

(a) Main Line Subdivision.
(b) Located in State of Indiana.
(c) Located in Lake County.
(d) Milepost 249.80 to milepost 251.78 in vicinity of Indiana Harbor.
(e) No agency stations on the line.
(f) Comments: Abandonment contingent on B&O, B&OCT and C&O acquiring trackage rights over ConRail from Pine Junction and Clark Junction to "HC" Tower, approximately 3.4 miles. Docket No. AB-18 (Sub. No. 25) covers the abandonment of trackage rights by Chesapeake & Ohio Railway over the segment of the line as shown in (d) above. Applications were approved by order served November 9, 1977 and upheld on appeal by order served January 31, 1978.

MARYLAND

Map Code [36]

Docket No. AB-19 (Sub. No. 20)

(a) Hagerstown Branch; Antietam Branch.
(b) Located in State of Maryland.
(c) Located in Washington County.
(d) Station 0+00 near Weverton to station 980+00 at Roxbury, a distance of 18.56 miles and station 0+00 to station 130+00 near Security, a distance of 2.46 miles, a total distance of 21.02 miles.
(e) No agency stations on the lines.
(f) Comments: By applications, B&O sought to abandon portions described in (d) above and WM sought to lease portions of

NOTICES

the Hagerstown and Antietam Branches, as set forth in F.D. No. 28348. Applications were approved by initial decision served November 8, 1977, as follows: (1) B&O abandon Hagerstown Branch between Valuation Stations 0+00 at Weverton, Md., and 980+00 at Roxbury, Md., and Antietam Branch between valuation stations 65+71 and 130+00 at or near Security, Md., and (2) WM lease Hagerstown Branch between valuation stations 980+00 at Roxbury, Md., and 1250+94 at Hagerstown, Md., and Antietam Branch between valuation stations 0+00 and 65+71, between valuation stations 130+00 and 194+21.3 at or near Security, Md. Initial decision was appealed.

MICHIGAN

Map Code [1]

Finance Docket No. 26757

- (a) Northport Branch.
- (b) Located in State of Michigan.
- (c) Located in Leelanau County.
- (d) Milepost 1.9 near Rennie to Milepost 29.56 at Northport.
- (e) No agency stations on the line.
- (f) Comments: Applicant seeks to abandon the lease and operation of Leelanau Transit Co. between Hatch's Crossing, milepost 5.52, and Northport, milepost 29.56. ICC order, served March 10, 1975, authorized abandonment. Stay order was issued on November 5, 1975 and removed by order served March 1, 1978.

Map Code [4]

Docket No. AB-18 (Sub. No. 5)

- (a) Elk Rapids Branch.
- (b) Located in State of Michigan.
- (c) Located in Grand Traverse and Antrim Counties.
- (d) Milepost 0.0 at Williamsburg to milepost 8.82 at Elk Rapids.
- (e) No agency stations on the line.

Map Code [5]

Docket No. AB-18 (Sub. No. 6)

- (a) Mount Pleasant Branch.
- (b) Located in State of Michigan.
- (c) Located in Isabella County.
- (d) Milepost 0.78, near Coleman, to milepost 12.42, near Mount Pleasant.
- (e) No agency stations on the line.
- (f) Comments: Applicant plans to serve Mount Pleasant by means of trackage rights over the former Ann Arbor Railroad between Clare and Mount Pleasant—F.D. No. 27412. Applications were approved by initial decision served December 7, 1977 and an appeal was filed.

Map Code [2]

Docket No. AB-18 (Sub. No. 19)

- (a) Petoskey Branch.
- (b) Located in State of Michigan.
- (c) Located in Grand Traverse, Kalkaska, Antrim, Charlevoix, and Emmet Counties.
- (d) Milepost 172.06 near Traverse City to milepost 247.98 near Bay View.
- (e) Open agency stations at Ellsworth (milepost 220.0), and Petoskey (milepost 247.0), served by traveling agent from Charlevoix. Agent located at Charlevoix (milepost 247.0).

Map Code [7]

Docket No. AB-18 (Sub. No. 20)

- (a) Traverse City Subdivision Petoskey and Northport Branches.

- (b) Located in State of Michigan.
- (c) Located in Manistee, Benzie, Grand Traverse, and Leelanau Counties.
- (d) Milepost 113.68 near Manistee to milepost 172.06 near Traverse City. Milepost 0.0 at Traverse City to milepost 2.77 near Rennie.
- (e) Agents located at Kaleva (milepost 131.8), and Traverse City (milepost 169.5).

Map Code [6]

Docket No. AB-18 (Sub. No. 21)

- (a) Car Ferry across Lake Michigan between Ludington, Mich., and Kewaunee, Milwaukee and Manitowoc, Wis. Ludington Branch.
- (b) Located in States of Michigan and Wisconsin.
- (c) Located in Mason County, Mich. Located in Milwaukee, Manitowoc, and Kewaunee Counties, Wis.
- (d) Ludington to Kewaunee, approximately 61 miles. Ludington to Milwaukee, approximately 97 miles. Ludington to Manitowoc, approximately 60 miles. Milepost 137.54 to milepost 137.66 at Ludington.
- (e) Agents located at Milwaukee (Jones Island), Manitowoc, and Kewaunee (joint with GB&W). Agency Station at Ludington (milepost 137) not included in abandonment.

OHIO

Map code [37]

Docket No. AB-19 (Sub. No. 33)

- (a) Bowling Green Branch.
- (b) Located in State of Ohio.
- (c) Located in Wood County.
- (d) Station -2+14 near Tontogany to station 1010+40.2 at North Baltimore.
- (e) Open agency station at Bowling Green (milepost 5.4) served by traveling agent from Lima, Ohio.
- (f) Comment: By order served October 31, 1977, abandonment was authorized between valuation stations -2+14 and 980+00. The approval was appealed.

Map code [38]

Docket No. AB-19 (Sub. No. 36)

- (a) Sandusky Branch.
- (b) Located in State of Ohio.
- (c) Located in Huron and Erie Counties.
- (d) Milepost 87.75 near Willard to milepost 117.50 at Sandusky.
- (e) Agent located at Sandusky (milepost 115.5).
- (f) Comment: Application was approved by initial decision served March 16, 1978.

Map code [39]

Docket No. AB-19 (Sub. No. 19)

- (a) Ohio and Little Kanawha Branch.
- (b) Located in the State of Ohio.
- (c) Located in Muskingum, Morgan and Washington Counties.
- (d) Milepost 9.16 near Philo to milepost 44.97 near Relief.
- (e) Open agency station at Malta (milepost 24.7) served by traveling agent from Zanesville. Non-agency station at Beckett (milepost 43.7) served by traveling agent from Parkersburg, W. Va.
- (f) Comment: Application was approved by initial decision served August 25, 1977. Approval was appealed.

Map code [9]

Docket No. AB-18 (Sub. No. 10)

- (a) Pomeroy Branch.

- (b) Located in State of Ohio.
- (c) Located in Hocking, Vinton, Gallia and Meigs Counties.

- (d) Milepost 51.29 near Oldtown to milepost 69.43 near Creola. Milepost 78.09 near Dundas to milepost 135.05 near Pomeroy.

- (e) Agent located at Gallipolis (milepost 114.6).

- (f) Comments: Applicant seeks to abandon operations only over 17.87-mile segment between Milepost 114.13 near Gallipolis and milepost 132.0 near Pomeroy. By order dated November 5, 1975, the ICC granted C&O's petition for authority to amend the application to eliminate therefrom that portion of Branch between milepost 69.43 near Creola and milepost 78.09 near Dundas.

Map code [9]

- By application filed on December 22, 1976, F.D. No. 28084, applicant and Baltimore & Ohio Railroad Co. seek authority for B&O to lease and operate a portion of branch between milepost 69.43 near Creola and milepost 78.09 near Dundas. Applications were approved in part and appeals were filed.

Map code [10]

Docket No. AB-18 (Sub. No. 24)

- (a) Cheviot Subdivision.
- (b) Located in State of Ohio.
- (c) Located in Hamilton County.
- (d) Milepost 0.20 to milepost 1.77 in Cincinnati.
- (e) No agency stations located on line.
- (f) Comment: Application was approved by order served November 29, 1977, and certificate was served on January 31, 1978.

Map code [11]

Docket No. AB-18 (Sub. No. 15)

- (a) Armitage Branch.
- (b) Located in State of Ohio.
- (c) Located in Hocking and Athens Counties.
- (d) Milepost 52.45 near Oldtown to milepost 62.9 near Nelsonville.
- (e) No agency stations located on line.

PENNSYLVANIA

Map Code [42]

Docket No. AB-19 (Sub. No. 11)

- (a) Smithfield & Masontown Branch.
- (b) Located in Commonwealth of Pennsylvania.
- (c) Located in Fayette County.
- (d) Milepost 2.06 near Strum to milepost 8.64 near Leckrone.
- (e) Non-agency stations located at Smiley (milepost 2.6), Shoaf (milepost 3.6), and Leckrone (milepost 8.6) are served by traveling agent from Conneville, Pa.
- (f) Comments: Application was partially approved by initial decision served February 22, 1978. Abandonment was approved between valuation stations 226+68 and 420+99. Certificate has not yet been issued.

Map Code [43]

Docket No. AB-19 (Sub. No. 35)

- (a) Big Run Branch.
- (b) Located in Commonwealth of Pennsylvania.
- (c) Located in Lawrence County.
- (d) Milepost 4.03 to milepost 6.53 near New Castle.
- (e) No agency stations on the line.
- (f) Comment: Application was approved, in part, by order served March 14, 1978.

WISCONSIN

Map Code [6]

Docket No. AB-18 (Sub. No. 21)

- (a) Car Ferry across Lake Michigan between Ludington, Mich. and Kewaunee, Milwaukee and Manitowoc, Wis. Ludington Branch.
- (b) Located in States of Wisconsin and Michigan.

[AB 1 (SDM)]

CHICAGO AND NORTH WESTERN
TRANSPORTATION CO.

Amended System Diagram Map

Notice is hereby given that, pursuant to the requirements contained in Title 49 of the Code of Federal Regulations, §1121.23, that the Chicago and North Western Transportation Co., has filed with the Commission its amended color-coded system diagram map in Docket No. AB 1 (SDM). The maps reproduced here in black and white are reasonable reproductions of that amended system diagram map and the Commission on May 10, 1978, received a certificate of publication as required by said regulation which is considered the effective date on which the amended system diagram map was filed.

Color-coded copies of the map have been served on the Governor of each state in which the railroad operates and the Public Service Commission or similar agency and the State designated agency. Copies of the map may also be requested from the railroad at a nominal charge. The maps also may be requested at the office of the Commission, Section of Dockets, by requesting docket No. AB 1 (SDM).

H. G. HOMME, Jr.,
Acting Secretary.

FEDERAL REGISTER, VOL. 43, NO. 101—WEDNESDAY, MAY 24, 1978

FEDERAL REGISTER, VOL. 43, NO. 101—WEDNESDAY, MAY 24, 1978

CHICAGO AND NORTH WESTERN
TRANSPORTATION CO., AB-1

Description of all lines or portions of lines identified on the Chicago and North Western Transportation Co. System Diagram Map, as amended, falling within category 1. 49 CFR § 1121.21

CATEGORY 1

All lines or portions of lines which the Chicago and North Western Transportation Co. anticipates will be the subject of an abandonment or discontinuance application to be filed within the 3-year period following the date upon which the diagram, or any amended diagram, is filed with the Interstate Commerce Commission. 49 CFR § 1121.20(b)(1).

Iowa

- (a) Mallard to Ayrshire (10.6 mile portion of Tara Subdivision).
- (b) Entire segment is located in the State of Iowa.
- (c) Entire segment is located in Palo Alto County.
- (d) M.P. 227.9 to M.P. 217.3
- (e) Central agent at Rolfe (unaffected) is responsible for associate stations of Curlew and Ayrshire.

Comments.—This proposal does not involve industries located at Mallard. This segment is a portion of the Rolfe to Ayrshire segment that was in category 2 on map published May 3, 1977, FR Vol. 42, No. 85, pp. 22532-22541. The segment from Rolfe to Mallard (11.6 miles) will remain in category 2.

- (a) Carroll to Harlan (40.2 miles—entire Harlan Subdivision).
- (b) Entire segment is located in the State of Iowa.
- (c) Entire segment is located in Carroll, Crawford and Shelby Counties.
- (d) M.P. 421.7 to M.P. 461.9.

(e) Agent located at Harlan and central agent located at Carroll (unaffected) is responsible for associate stations of Manning and Irwin, and closed station of Halbur.

Comments.—Proposal does not include industries located at Carroll. This entire segment was in category 2 on map published May 3, 1977, FR Vol. 42, No. 85, pp. 22532-22541.

- (a) Coulter to Clarion (westerly 17.9 miles of Waverly Subdivision).
- (b) Entire segment is located in the State of Iowa.
- (c) Entire segment is located in Franklin and Wright Counties.
- (d) M.P. 326.5 to M.P. 344.4.

(e) Central agent located at Clarion (unaffected) is responsible for closed station of Solberg and central agent located at Hampton (unaffected) is responsible for closed station of Rowan.

Comment.—Proposal does not involve industries located at Coulter or Clarion.

- (a) Lu Verne to Corwith (8.6 mile portion of Forest City Subdivision).
- (b) Entire segment located in the State of Iowa.
- (c) Entire segment located in Kossuth and Hancock Counties.
- (d) M.P. 186.6 to M.P. 178.0.

(e) Central agent at Britt (unaffected) is responsible for associate station of Corwith and closed station of Hanna.

Comments.—Proposal does not include industries located at Lu Verne. This entire segment was in category 2 on map published May 3, 1977, FR Vol. 42, No. 85, pp. 22532-22541.

(a) Manly, Iowa to Austin, Minnesota (33.2 mile portion of Mason City Subdivision).

(b) Entire segment is located in the States of Iowa and Minnesota.

(c) Entire segment is located in Worth and Mitchell Counties, Iowa and Mower County, Minnesota.

(d) M.P. 48.0 to M.P. 14.8.

(e) Central agent at Austin is responsible for associate station of Lyle and closed stations of Bolan and Meltonville.

Comments.—Proposal does not include industries located at Manly. This segment was in category 2 on map published May 3, 1977, FR Vol. 42, No. 85, pp. 22532-22541. This proposal does include Austin, Minn. and is no longer contingent on a trackage rights agreement with the C.M.St.P. & P. RR.

(a) Oelwein to Dubuque (73.1 miles, entire Dubuque Subdivision).

(b) Entire segment is located in the State of Iowa.

(c) Entire segment is located in Fayette, Buchanan, Delaware and Dubuque Counties.

(d) M.P. 245.0 to M.P. 171.9.

(e) Central agent at Dubuque is responsible for associate station of Dyersville and closed stations of Durango, Graf, Farley, Petersburg, and Almorat. Central agent at Oelwein (unaffected) is responsible for associate station of Aurora and closed stations of Thorpe, Dundee, Lamont, and Stanley.

Comments.—Proposal does not include industries located at Oelwein. This segment was in category 1 on map published May 3, 1977, FR Vol. 42, No. 85, pp. 22532-22541. Proposal now includes Dubuque and is no longer contingent on a trackage rights agreement with the C.M.St.P. & P. RR.

Minnesota

(a) Cannon Falls to Red Wing (20.5 mile portion of Red Wing Subdivision).

(b) Entire segment is located in the State of Minnesota.

(c) Entire segment is located in Goodhue County.

(d) M.P. 74.3 to M.P. 94.8.

(e) Agent at Red Wing is responsible for closed station of Welch.

Comments.—This proposal does not include industries located at Cannon Falls. This segment was in category 2 on map published May 3, 1977, FR Vol. 42, No. 85, pp. 22532-22541. Proposal now includes Red Wing and is no longer contingent on a trackage rights agreement with the C.M.St.P. & P. and B.N.

(a) Hayfield to Waltham 95.2 miles (entire Waltham spur).

(b) Entire segment is located in the State of Minnesota.

(c) Entire segment is located in Dodge and Mower Counties.

(d) M.P. 0.0 to M.P. 5.2.

(e) Central agent at Austin (unaffected) is responsible for associate station of Waltham.

(a) Manly, Iowa to Austin, Minnesota. Line description is on page 3 (Iowa).

(a) Riceville, Iowa to Randolph, Minnesota. Line description is on page 4 (Iowa).

South Dakota

(a) Watertown to Clark (westerly 29.5 miles of Watertown Subdivision).

(b) Entire segment is located in the State of South Dakota.

(c) Entire segment is located in Codington and Clark Counties.

(d) M.P. 321.5 to M.P. 351.0.

(e) Central agent at Watertown (unaffected) is responsible for associate stations of Henry and Clark, and closed stations of Kampeka and Elrod.

Comment.—Proposal does not include industries located at Watertown.

Wisconsin

(a) Wisconsin Rapids to Marshfield (21.9 mile portion of Wisconsin Rapids Subdivision).

(b) Entire segment is located in the State of Wisconsin.

(c) Entire segment is located in Wood County.

(d) M.P. 142.5 to M.P. 184.4.

(e) Central agent at Wisconsin Rapids (unaffected) is responsible for closed stations of Vesper and Arpin.

Comments.—Proposal does not include industries located at Wisconsin Rapids or Marshfield. Proposal is contingent on agreement with C.M.St.P. & P. RR and Soo Line RR for trackage rights between Wisconsin Rapids and Marshfield. Proposal is for discontinuance of operations only over 10.7 miles of Soo Line trackage, and abandonment operations and track for 11.2 miles.

DELAWARE AND HUDSON RAILWAY CO.

Amended System Diagram Map

Notice is hereby given that, pursuant to the requirements contained in Title 49 of the Code of Federal Regulations, § 1121.23, that the Delaware and Hudson Railway Co., has filed with the Commission its amended color-coded system diagram map in Docket No. AB 156 (SDM). The maps reproduced here in black and white are reasonable reproductions of that amended system diagram map and the Commission on March 31, 1978, received a certificate of publication as required by said regulation which is considered the effective date on which the amended system diagram map was filed.

Color-coded copies of the map have been served on the Governor of each state in which the railroad operates and the Public Service Commission or similar agency and the State designated agency. Copies of the map may also be requested from the railroad at a nominal charge. The maps also may be examined at the office of the Commission, Section of Dockets, by requesting docket No. AB 156 (SDM).

H. G. HOMME, Jr.,
Acting Secretary.

[AB 158 (SDM)]

THE PITTSBURGH & LAKE ERIE RAILROAD CO.

Amended System Diagram Map

Notice is hereby given that, pursuant to the requirements contained in Title 49 of the Code of Federal Regulations, § 1121.23, that the Pittsburgh & Lake Erie Railroad Co., has filed with the Commission its amended color-coded system diagram map in Docket No. AB 158 (SDM). The maps reproduced here in black and white are reasonable reproductions of that amended system diagram map and the Commission on April 27, 1978, received a certificate of publication as required by said regulation which is considered the effective date on which the amended system diagram map was filed.

Color-coded copies of the map have been served on the Governor of each state in which the railroad operates and the Public Service Commission or similar agency and the State designated agency. Copies of the map may also be requested from the railroad at a nominal charge. The maps also may be examined at the Office of the Commission, Section of Dockets, by requesting docket No. AB 158 (SDM).

H. G. HOMME, Jr.,
Acting Secretary.

Red.—All lines or portions of lines which are anticipated to be the subject of an abandonment or discontinuance application to be filed within three years following April 30, 1977.

Green.—All lines or portions of lines potentially subject to abandonment which are under study and believed to be the subject of a future abandonment application because of either anticipated operating losses or excessive rehabilitation costs as compared to potential revenues.

Yellow.—All lines or portions of lines for which an abandonment or discontinuance application is pending before the Commission as of April 30, 1977.

Brown.—All lines or portions of lines which are being operated under the Rail Services Continuation provisions of the Interstate Commerce Act or the Regional Rail Reorganization Act of 1973 as of April 30, 1977.

Black.—All other lines or portions of lines which are owned and operated either directly or indirectly.

The lines of the The Pittsburgh and Lake Erie Railroad Co. designated in Categories Red, Green or Yellow are described as follows:

Red—Pennsylvania

1. (a) Ellwood City Track (Ellwood City Branch); (b) State of Pennsylvania; (c) Beaver and Lawrence Counties; (d) Milepost 1 to milepost 3.7 (end); (e) No agency stations.

2. (a) Mahoning State Line Track (Old Walford Branch); (b) State of Pennsylvania;

(c) Lawrence County; (d) Milepost 3.8 to milepost 7.8; (e) No agency stations.

Green—Pennsylvania

(a) Mahoning State Line Track (Old MSL RR); (b) States of Pennsylvania and Ohio; (c) Lawrence County, PA, and Mahoning County, OH; (d) Milepost 0 to milepost 3.6; (e) No agency stations;

Green—Ohio

(a) Mahoning State Line Track (Old MSL RR); (b) States of Pennsylvania and Ohio; (c) Lawrence County, PA, and Mahoning County, OH; (d) Milepost 0 to milepost 3.6; (e) No agency stations.

[7035-01]

Petitions for declaratory order; Administrative Procedure Act

MAY 18, 1978.

On March 6, 1978, eighteen railroads filed a petition for a declaratory order under section 554(3) of the Administrative Procedure Act. The petitioners seek a determination that named tariffs, as set forth in the appendix hereto, published by Traffic Executive Association-Eastern Railroads, where reference to certain ex parte general increases had been omitted, the increases were nonetheless applicable.

The proceeding has been assigned Docket No. 36864.

The petitioning railroads state that over 3,000 claims have already been filed based on the omission of reference to those ex parte increases.

It has come to the attention of the Commission that some of these claims have been declined by the railroads. On the other hand, it seems that many shippers and/or receivers have not as yet filed claims with the railroads. In any event, shippers and/or receivers of traffic moving under the tariff involved, whether or not they have filed claims with the railroads, should file informal complaints with the Commission's Bureau of Traffic for the purpose of tolling the statute under section 16(3) of the Interstate Commerce Act. Such complaints should conform with the Commission's General Rules of Practice, make reference to this notice and be addressed to:

Mr. Scott Walker, Chief, Section of Rates & Informal Cases, Bureau of Traffic, Interstate Commerce Commission, 12th and Constitution Avenue, Washington, D.C. 20423.

H. G. HOMME, Jr.,
Acting Secretary.

[Notice No. 666]

ASSIGNMENT OF HEARINGS

MAY 19, 1978.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

No. BB 10 (Sub-No. 11), Norfolk and Western Railway Co. abandonment between New Castle and Rushville, in Henry and Rush Counties, IN, and No. AB 10 (Sub-No. 12), Norfolk and Western Railway Co. abandonment between Connorsville and New Castle, in Henry, Wayne and Fayette Counties, IN, now assigned July 24, 1978, at New Castle, IN, are postponed to September 11, 1978 (1 week), at New Castle, IN, in a hearing room to be later designated.

MC-F-13499, B. J. McAdams, Inc.—Control—Southern Trucking Corp., is now assigned for hearing July 11, 1978 at the offices of the Interstate Commerce Commission, Washington, DC.

No. MC 97876 (Sub-No. 206), Anderson Trucking Service, Inc., now being assigned for further Pre-hearing conference on the 31st day of May 1978, at the Offices of the Interstate Commerce Commission, Washington, DC.

MC 1515 Sub-No. 7 M1, Greyhound Lines, Inc., is assigned for hearing June 26, 1978 at Phoenix, AZ and will be held at Room 235, P.O. Building, 522 North Central.

MC 143169 Sub-No. 1, Harry Brotton & Henry Lucero, d.b.a. Lucero Film Service, is assigned for hearing June 5, 1978, at Phoenix, AZ, and will be held in the Saguro Room 1831, Second Floor, West Jefferson.

MC 144009, Allstates Transworld Van Lines, Inc., now assigned for prehearing conference May 23, 1978, at Washington, DC, is postponed to June 27, 1978 at the offices of the Interstate Commerce Commission, Washington, DC.

No. MC 95876 (Sub-No. 206), Anderson Trucking Service, Inc., now assigned for further pre-hearing conference on May 30, 1978, at Washington, DC is canceled and application dismissed.

MC 121649 Sub-No. 5, Milan Express, Inc., is now assigned for hearing July 10, 1978 (1 week) at the Holiday Inn, Room 402, Junction I-40 and U.S. 45 Bypass, Jackson, TN; and will continue July 17, 1978 (1 week) at the Holiday Inn, Rhodes Room, Junction U.S. 45 and U.S. 78-North, Tupelo, MS.

[7035-01]

[Revised Service Order No. 1315, Exception No. 2]

GRAIN SHIPMENTS

Inspection and Grading

To: All railroads.

The grain tariffs of certain railroads provide additional free time for the furnishing of billing instructions authorizing the movement from origin of carloads of grain in order to provide sufficient time to secure inspection and grade prior to billing. Shipments inspected and graded at origin are not normally subject to inspection at destination prior to placement for unloading. The total time for loading, sampling and grading at origin is substantially less than the time required for loading and subsequent destination inspection and grading prior to placement. Because Revised Service Order No. 1315 limits to twenty-four (24) hours the free time allowed for loading and furnishing instructions for forwarding, many shippers of grain are reverting to destination inspection in order to avoid demurrage at origin, thus increasing the total time required for loading and inspection.

It is ordered, That, pursuant to the authority vested in the Railroad Service Board by section (a)(1)(ix) of Revised Service Order No. 1315, car loads of grain which are inspected and graded at origin shall be granted the free-time periods provided by the applicable tariffs authorizing such services, subject to a maximum free-time period not to exceed thirty-six (36) hours.

It is further ordered, That cars of grain given thirty-six (36) hours free time for loading, inspection and billing shall not be eligible for inspection at destination or at any point intermediate between origin and destination. Billing on such cars must be endorsed:

Waive inspection—Inspected at origin

Effective 7:00 a.m., May 17, 1978.
Issued at Washington, D.C., May 16, 1978.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael, Member Joel E. Burns not participating.

ROBERT S. TURKINGTON,
Acting Chairman,
Railroad Service Board.

[FR Doc. 78-14539 Filed 5-23-78; 8:45 am]

[7035-01]

[Revised Service Order No. 1252; I.C.C. Order No. 56-A]

CHICAGO, ROCK ISLAND AND PACIFIC RAILROAD CO.

Rerouting Traffic

To all railroads:
Upon further consideration of I.C.C. Order No. 56 (Chicago, Rock Island and Pacific Railroad Company), and good cause appearing therefor:

It is ordered, That:
I.C.C. Order No. 56 is vacated.

It is further ordered, That this amendment shall become effective at 11:59 p.m., May 12, 1978, and that this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., May 12, 1978.

INTERSTATE COMMERCE
COMMISSION,
ROBERT S. TURKINGTON,
Agent.

[M-130; Amdt. 2, May 19, 1978]

CIVIL AERONAUTICS BOARD.

Notice of deletion and addition of items to the May 19, 1978, meeting agenda.

TIME AND DATE: 9:30 a.m., May 19, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: Addition: 6a. Clarification of the effective date of Order 78-5-85 granting a stay of the charter-scheduled service transfer provisions of the tour operator blanket waiver (BPDA). Deletion: 24. Dockets 29706, 31216 and 31956—Motion of Allegheny for immediate hearing on its application for Philadelphia-Bermuda nonstop authority and motion of Eastern to dispense with a hearing, (Memo No. 7541-B, BPDA, BIA).

STATUS: 1-27, open; 28, closed.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary,
202-673-5068.

SUPPLEMENTARY INFORMATION:

On April 19, 1978, the Board orally granted a blanket waiver to all air carriers and charter operators of various provisions of the charter rules, including permitting charter operators who are forced to cancel a flight due to insufficient sales to transfer passengers to a comparable scheduled flight. By Order 78-5-85, dated May 15, 1978, the Board stayed, "effective immediately", the charter-scheduled service transfer provision of the blanket waiver. A number of questions have been raised as to the meaning of "effective immediately", and particularly whether agreements entered into before the date of the stay may still be honored. Because the Board's decision in Order 78-5-85 may affect numerous flights,

and to avoid further confusion, the Board must meet as soon as possible to clarify its action.

The Chief Judge wishes to attach some comments and he did not receive Item 24 on time to do so and still have the item considered at Friday's meeting. Accordingly, the following Members have voted that agency business requires Item 6a be added to the May 19th agenda and Item 24 be deleted and rescheduled for May 25, 1978 agenda and that no earlier announcement of these changes was possible:

Chairman, Alfred E. Kahn
Vice Chairman, G. Joseph Minetti
Member, Lee R. West
Member, Richard J. O'Melia

Member, Elizabeth E. Bailey

INDIAN CLAIMS COMMISSION.

TIME AND DATE: 10:15 a.m. June 1, 1978.

PLACE: Room 600, 1730 K Street NW., Washington, D.C.

STATUS: Open to the public

Dockets 158 and 231, *Sac and Fox*; Docket 301, *Oneida*, Petition to Intervene; and Docket 332-C, *Yankton Sioux*.

FOR MORE INFORMATION:

David H. Bigelow, Executive Director, Room 640, 1730 K Street NW., Washington, D.C. 20006, 202-653-6174.

[S-1085-78 Filed 5-22-78; 3:44 pm]

[7545-01]

NATIONAL LABOR RELATIONS BOARD.

TIME AND DATE: 11 a.m., Tuesday, June 20, 1978.

PLACE: Board Conference Room, Sixth Floor, 1717 Pennsylvania Avenue NW., Washington, D.C. 20570.

STATUS: Closed to public observation.

MATTER TO BE CONSIDERED: Consideration of applicant qualified for appointment to Administrative Law Judge.

CONTACT PERSON FOR MORE INFORMATION:

William A. Lubbers, Executive Secretary, Washington, D.C. 20570, 202-254-9430.

Dated: Washington, D.C., May 22, 1978.

By direction of the Board.

GEORGE A. LEET,
Associate Executive Secretary,
National Labor Relations Board.

[S-1088-78 Filed 5-22-78; 3:44 pm]

[7910-01]

RENEGOTIATION BOARD.

DATE AND TIME: Thursday, June 1, 1978; 9:30 a.m.

PLACE: Conference Room, 4th Floor, 2000 M Street NW., Washington, D.C. 20446.

STATUS: Closed to public observation.

MATTER TO BE CONSIDERED: Hercules, Inc., affiliated with: Haveg Industries, Inc., Haskon, Inc.; fiscal year ending December 31, 1970.

CONTACT PERSON FOR MORE INFORMATION:

Kelvin H. Dickinson, Assistant General Counsel-Secretary, 2000 M Street NW., Washington, D.C. 20446, 202-254-8277.

Dated: May 22, 1978.

HARRY R. VAN CLEVE,
Acting Chairman.

[8010-01]

SECURITIES AND EXCHANGE COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 43 FR 20612, May 12, 1978.

STATUS: Closed meeting.

PLACE: Room 825, 500 North Capitol Street, Washington, D.C.,

PREVIOUSLY ANNOUNCED TIME AND DATE: Wednesday, May 17, 1978, 9 a.m.; Thursday, May 18, 1978, 1:30 p.m.,

CHANGES IN THE MEETINGS: Additional items considered or to be considered.

The following additional items were considered by the Commission at a closed meeting immediately following the open meeting on Wednesday, May 17, 1978:

Suspension of trading; Settlement of injunctive action; Formal orders of investigation; and Other litigation matter.

The following additional item will be considered by the Commission at the closed meeting on Thursday, May 18, 1978:

Formal order of investigation.

Chairman Williams, Commissioners Loomis, Evans, Pollack and Karmel determined that Commission business required consideration of these matters and that no earlier notice thereof was possible.

May 18, 1978.

Implementation of Executive
Orders 11988 and 11990

[8025-01]

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

[Rev. 1, Amdt. 1]

PART 116—POLICIES OF GENERAL APPLICATION

Subpart D—Floodplain Management and Wetlands Protection

INTERIM RULE

AGENCY: Small Business Administration.

ACTION: Interim rule.

SUMMARY: This rule adds a new subpart to the Small Business Administration regulation part 116 in order to implement Executive Orders 11988 (Floodplain Management) and 11990 (Protection of Wetlands). Policy and procedures are being established for carrying out the Agency's financial assistance programs in accordance with these Executive Orders.

DATES: Effective date: July 24, 1978. Comments by: June 23, 1978.

ADDRESS: Comments in duplicate, may be addressed to the Associate Administrator for Finance and Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT:

Richard L. Wray, Financial Analyst, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416, telephone 202-653-6470.

SUPPLEMENTARY INFORMATION: On May 24, 1977, Executive Order 11988 was issued for the following purposes: (1) To avoid to the extent possible the long and short term adverse impacts associated with the occupancy and modification of floodplains; and (2) to avoid direct or indirect support of floodplain development wherever there is a practicable alternative. This Executive Order applies to Federal agencies engaged, among other things, in conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities. This Executive Order (Sec. 2(d)) directs that Federal agencies issue regulations and procedures by May 24, 1978, and this interim rule is intended to comply with that requirement. The U.S. Water Resources Council (WRC) published guidelines for implementing E.O. 11988 in the FEDERAL REGISTER on February 10, 1978 at 43 FR 6030. These regulations follow closely the WRC

guidelines in setting forth policy and procedures for floodplain management relating to disaster assistance granted under the Small Business Act, and the Small Business Investment Act, as amended. The main emphasis of these regulations is on compliance with Executive Order 11988, Floodplain Management. However, in cases where Executive Order 11990—Protection of Wetlands would apply, these regulations also set forth policy and procedures to implement that Executive Order. Further implementation of Executive Order 11990, as appropriate, will be included in revisions to other subparts of these regulations. Implementing this regulation is expected to increase processing time by 60 or 90 days for loans to which the Executive Order applies. Special reference is made to subpart B of this part. In order to insure that these regulations can be published in time to comply with the Executive Order's date of May 24, 1978, SBA has determined that it is necessary to publish this amendment as an interim rule effective upon July 24, 1978. Interested parties and government agencies are encouraged to submit written comments, suggestions, data, or arguments regarding this rulemaking to the Associate Administrator for Finance and Investment, whose address appears above. All submission received on or before June 23, 1978, will be evaluated and acted upon in the same manner as if this document were a proposal. All comments shall be available for inspection at the address listed.

A finding of inapplicability with respect to economic impact has been prepared in accordance with Executive Order 11821. A Finding of Inapplicability of section 102(2)(c) of the National Environmental Policy Act of 1969 has been made. It is the position of the signatories to the finding that this regulation in itself has no significant impact on the human environment beyond those impacts of Executive Orders 11988 and 11990.

NOTE:—The Small Business Administration has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11281 and OMB Circular A-107.

Pursuant to Small Business Act, Pub. L. 85-536 (15 U.S.C. 631); Small Business Investment Act of 1958, Pub. L. 85-699 (15 U.S.C. 661); EO 11988, 42 FR 26951 and EO 11990, 42 FR 26961, title 13 part 116 is amended by the addition of the following subpart.

Subpart D—Floodplain Management and Wetlands Protection

Sec.

116.30 General.

116.32 Inapplicable actions.

116.33 Actions covered by Executive Orders 11988 and 11990.

Sec.

116.34 Policies.

116.35 Decisionmaking process.

Appendix A—Decisionmaking Process for E.O. 11988.

Appendix B—Sources of Floodplain Information and Technical Assistance Services for determining whether a location is in a floodplain.

AUTHORITY: Small Business Act, Pub. L. 85-536 (15 U.S.C. 631); Small Business Investment Act of 1958, Pub. L. 85-699 (15 U.S.C. 661); EO 11988, 42 FR 26951 and EO 11990, 42 FR 26961.

Subpart D—Floodplain Management and Wetlands Protection

§ 116.30 General.

(a) **Purpose.** The purpose of this subpart is to prescribe the policies and procedures for implementing Executive Orders 11988 and 11990.

(b) **Scope.** This subpart covers policies, procedures, standards, and criteria for determining the applicability of, Executive Orders 11988 and 11990 to all the financial assistance programs authorized by the Small Business Act and the Small Business Investment Act as amended. These regulations are intended for the use of Agency personnel who have specific responsibilities under the regulations and applicants for financial assistance from SBA.

(c) **Responsibilities.** The following personnel and agencies have responsibilities under these executive orders which are described briefly here and may be discussed in more detail elsewhere in this subpart.

(1) **Administrator.** The Administrator is responsible for assuring that all Federal assistance given under his statutory authority meets the requirements of these executive orders. Such authority may be delegated to Regional and District Directors and to other agency personnel with loan approval authority as is deemed appropriate and published in the FEDERAL REGISTER.

(2) **Participation.** Eligible financial institutions who intend to request SBA participation in financial assistance to an applicant for a loan on an immediate or deferred (guaranteed) basis must have complied with the requirements of these Executive Orders before submitting the application for participation to the SBA.

(3) **Direct.** Applicants for direct financial assistance from SBA shall present with their applications evidence: (i) as to whether the location for which financial assistance is proposed is in a floodplain; (ii) if in a floodplain, that such assistance is in compliance with local land use plans; (iii) that any necessary construction or use permits will be issued; and (iv) if the SBA approves such financial assistance, such assistance would be in accordance with the Executive Orders, these regulations and the "Guidelines

for Implementing Executive Order 11988—Floodplains Management" published by the U.S. Water Resources Council (USWRC); see 43 FR 6030, Feb. 10, 1978.

§ 116.31 Definitions.

Throughout this subpart, the following basic definitions shall apply:

(a) **Base flood.** Is that flood which has a 1 percent chance of occurring in any given year (also known as a 100-year flood). This term is used in the National Flood Insurance Program (NFIP) to indicate the minimum level of flooding to be used by a community in its floodplain management regulations.

(b) **Base floodplain.** An area subject to flooding by the base flood.

(c) **Channel.** A natural or artificial watercourse of perceptible extent, with a definite bed and banks to confine and conduct continuously or periodically flowing water.

(d) **Critical action.** Any activity for which even a slight chance of flooding would be too great.

(e) **Facility.** Any man placed item other than a structure.

(f) **Flood or flooding.** A general and temporary condition of partial or complete inundation of normally dry land areas from the overflow of inland and/or tidal waters, and/or the unusual and rapid accumulation or runoff of surface waters from any source.

(g) **Floodplain.** The relatively flat area or lowlands adjoining a river, stream or other waterbody (ocean, lake, wetland, or other standing water) which has been or may be covered by floodwater. Properly stated, a reference to floodplain is accompanied by a modifier indicating which level of flooding will inundate the referenced floodplain, e.g., the 0.2 percent chance (500-year) floodplain.

(h) **1 percent chance flood.** The flood having 1 chance in 100 of being exceeded in any 1-year period (a large flood). The likelihood of exceeding this magnitude increases in a time period longer than 1 year. For example, there are two chances in three of a larger flood exceeding the 1 percent chance flood in a 100-year period.

(i) **Practicable.** Capable of being done within existing constraints. The test of what is practicable depends upon the situation and includes consideration of the pertinent factors, such as the economic needs of the loan applicant who may be a disaster victim; the environment, cost, or technology.

(j) **Structures.** Walled or roofed buildings, including mobile homes and gas or liquid storage tanks that are primarily above ground (as set by the NFIP).

(k) **Wetlands.** Those areas that are inundated by surface or ground water with a frequency sufficient to support

and under normal circumstances does or would support a prevalence of vegetative or aquatic life that requires saturated or seasonally saturated soil conditions for growth and reproduction. Wetlands generally include swamps, marshes, bogs, and similar areas such as sloughs, potholes, wet meadows, river overflows, mud flats, and natural ponds (as defined in Executive Order 11990, Protection of Wetlands).

§ 116.32 Inapplicable actions.

(a) **General.** The Administrator has determined that certain types of actions typically do not create adverse effects or incompatible development on wetlands or in the floodplain. Therefore public review and a finding of inapplicability on a case-by-case basis in such instances is not necessary. For the following types of actions the Administration by its responsible officials to whom the authority has been delegated may determine on a case-by-case basis that the situation does not warrant application of the full 8-step decision-making process after completion of Step 1:

(1) Actions located outside the base floodplain and critical actions located outside the 500-year floodplain which do not directly or indirectly support floodplain development and which do not impact on the base floodplain.

(2) Repairs to damaged Facilities. Repairs to Facilities in which the cost of the repairs, as determined immediately before the repairs, is less than fifty percent (50 percent) of the fair market value of the Facility.

(3) Replacement of building contents, materials and equipment. The determination of applicability of these procedures to this action will be guided by the determination for the Facility in which the materials and equipment are located. For instance, liquid gas storage Facilities might require the full determination process which non-degrading inventory and materials would not.

(4) Hazard Mitigation Measures. Actions taken by an applicant to mitigate natural hazards including safe land-use and construction practices.

(5) Generally, working capital loans of any amount solely for debt payment, carrying accounts receivables, acquisition of non-water degradable inventory and equipment as determined under subparagraph (3) of this paragraph;

(6) All SBA loan assistance of \$300,000 or less;

§ 116.33 Actions covered by Executive Orders 11988 and 11990.

This section includes actions which because of the potential for harm to the Facility or to the Floodplain will generally require application of the full review and 8-step decision-making process as set forth in this subpart.

(a) Construction or acquisition of new Facilities under either Section 7(a) of the Small Business Act (15 U.S.C. 636) or Section 502 of the Small Business Investment Act (15 U.S.C. 696).

(b) Repair and restoration of damaged Structures in which the cost of repairs, as determined immediately before the repairs, is equal to or greater than fifty percent (50 percent) of the market value of the structure or, is the case of a physical disaster, the pre-disaster value of the Structure.

(c) Replacement of destroyed structures.

(d) No designation of a Neighborhood Business Revitalization Area will be made within a 1 percent Floodplain.

§ 116.34 Policies.

(a) SBA will ascertain the accuracy and completeness of the material relating to compliance with the Executive Orders and determine whether (1) there are feasible alternatives to the provision of financial assistance to businesses located in Structures within the Floodplain; (2) whether Structures built in or repaired and restored as in § 116.33(b) and (c) herein, are to be repaired and restored in full compliance with the Flood Insurance Protection Act; (3) SBA will also discuss with any applicant for assistance or participating institution the economic consequences of remaining in or locating in a Floodplain area.

(b) SBA will continue to require Flood Insurance as set forth in Subpart B hereof and take appropriate action to assure that applicants are aware of their continuing responsibility to maintain such insurance and that no future Federal disaster assistance will be available if such insurance is not maintained.

(c) SBA will identify flood hazards and evaluate the potential effects of any non-exempt actions it may be requested to finance in Wetlands or in a Floodplain to achieve the goals and objectives set forth by the two executive orders.

(d) SBA will comply fully with the requirements of the two executive orders to give early public notice and full publicity to appropriate steps in the decision-making process set forth in this subpart.

(e) SBA will assure that its program implementation and budget requests reflect consideration of flood hazards, protection of the Wetlands, and Floodplain management in accordance with applicable standards and the WRC guidelines.

(f) SBA will coordinate its implementation of these two executive orders under this subpart with the implementation of NEPA to achieve the requirements of all these programs in the decisionmaking process with minimum duplication or conflict.

§ 116.35 Decision-Making Process.

(a) *General*—Individuals responsible to the Administrator for executing this decision-making process must be thoroughly familiar with the two Executive Orders, the USWRC Guidelines, and with this subpart. Questions requiring clarification of any aspect of this Subpart should be referred to the Associate Administrator for Finance and Investment for his review and determination. Any delegate is responsible to the Administrator for appropriate execution of this decision-making process in each case, involving any non-exempt action funded by an SBA loan in the Wetlands or in a Floodplain (See Appendix A for flow chart of this 8-step process).

(b) *Step 1—Determine if a proposed action is in the Base Floodplain.* The first step in complying with the Order is to determine whether or not a proposed action is located in the Base Floodplain.

(1) *Step 1.A. Types of Floodplain*—(i) *Riverine Floodplains.* Riverine Floodplains are valley areas adjacent to any size stream or river which can be covered by floodwaters. Flooding in these areas results from excessive rainfall, snowmelt, or a combination thereof. If runoff is increased to the point that the carrying capacity of the channel is exceeded, flooding occurs. Flooding also occurs when the capacity of the stream channel is reduced by natural obstructions (ice or debris, dams, sediment, and vegetation) and man-placed obstruction (Structures and Facilities). Some areas flood either from tributary stream overflow, backwater from a major stream, or from both simultaneously.

(ii) *Coastal Floodplains.* Coastal Floodplains border lakes, estuaries, oceans, or similar bodies of standing water. Flooding in these areas is due to landward flows caused by unusually high tides, waves from high winds, storm surges, tsunamis (large waves in the sea associated with very strong earthquakes or other impulsive disturbances), or by a combination of these causes.

(iii) *Special Floodplain Areas.* Special Floodplain areas encompass sheet flow or shallow flooding areas, Wetlands, and sinkholes. Sheet flow occurs where a clearly defined channel is absent and where the path of flooding is unpredictable and indeterminate. In some cases, high velocity flow may occur with sheet flow, as it does commonly on debris cone Floodplains (alluvial fans). These cones build up from eroded geological debris that is carried by mountain streams and deposited when the stream encounters an abrupt decrease in slope. Other Flood problems are caused when development occurs in areas drained by sinkholes which often become plugged.

(2) *Step 1.B. Limits of Flooding.* For purposes of the Order, SBA will be

concerned at a minimum with the Floodplain area which would be inundated by a Flood having a one percent chance of occurring in any year—the so called “100 year or Base Flood” because the Administrator or his delegate must support any decision to conduct, support, or allow an action (i.e., “Structure”, “Facility” or “activity”) to be financially assisted within this area. In addition, such delegation should consider the implications of the occurrence of a Flood larger than the Base Flood on the economics and safety of a proposed Floodplain action. If a proposed action would be especially dangerous when exposed to larger Floods, consideration must be given to the larger Floodplain area. (See (b)(4) “Critical Actions.”)

(3) *Procedures for Determining a Floodplain Location.* The following is a guide for obtaining the Floodplain information needed to make a determination.

(i) *Areas of Predominantly Private Land Ownership.* If a decision involves a publicly or privately owned site within an area of predominantly private ownership, a map showing the Flood hazard areas will usually be available in the community or SBA Office or can be obtained from the Federal Insurance Administration (FIA), HUD. Detailed maps showing the elevations and boundaries of the “100-year” (Zones A and V) and “500-year” (Zone B) Floodplains are known as “Flood Insurance Rate Maps” (FIRM). Many of the communities which have a FIRM also have a Flood Insurance Study Report (FIS) containing detailed Flood information. Some 13,000 less detailed maps showing the approximate areas of the base (Zone A) Floodplain are available for most of the remaining communities. These are called “Flood Hazard Boundary Maps” (FHBM). Similar information, some very detailed, is also available from the agencies in Appendix B. The search for Flood hazard information should follow the sequence below. The detailed map (FIRM) or the Flood Insurance Study (FIS) report should be consulted first. If a detailed map (FIRM) is not available, obtain an approximate boundary map (FHBM) from the same source as in the preceding step. If the proposed site is at or near the “100-year” boundary, if data on Flood elevations are needed, or if the map does not delineate the Flood hazard boundaries in the vicinity of the proposed site—seek detailed information and assistance from the agencies listed in Appendix B. If an approximate boundary map (FHBM) is not available or if the map does not delineate the Flood hazard boundaries in the vicinity of the proposed site—seek detailed information and assistance from the agencies listed in Appendix B. If the agencies listed do not

have or know of detailed information and are unable to assist in determining whether or not the proposed site is in the Base Floodplain—report this fact to the nearest SBA office director and obtain guidance.

(ii) *Areas of Predominately State Land Holdings.* If a decision involves an area or location within extensive State holdings, it is unlikely that FIS reports and FIRM or FHBM maps would be available. In this event, information should be sought from the State land administering agency before information and/or assistance is sought from the agencies listed in Appendix B.

(iii) *Actions located out of the Base Floodplains as shown on either the FIRM or FHBM would meet the minimum requirements and no further action is required for compliance with the Order, unless the action impacts on the Base Floodplain, indirectly supports Floodplain development, or is a Critical Action.*

(4) *Step 1.C. As indicated previously, the minimum Floodplain of concern for certain Critical Actions is the area subject to inundation from a Flood having a 0.2 percent chance of occurring in any given year (500-Floodplain). This Floodplain includes both Zones A and B as shown on FIRM's. Some key questions in identifying critical actions are:*

(i) If flooded, would the proposed action create an added dimension to the disaster as could be the case for liquified natural gas terminals and Facilities producing and storing highly volatile, toxic, or water-reactive materials?

(ii) Given the Flood warning lead-time available, would the occupants of buildings such as hospitals, schools, and nursing homes be insufficiently mobile to avoid loss of life and injury?

(iii) Would essential and irreplaceable records, utilities, and/or emergency services be lost or become inoperative if flooded?

(c) *Step 2—Early Public Review.*—(1) *General.* The objective of public involvement is to provide sufficient information early enough in the process of making decisions affecting Floodplains so that the public can have impact on the decision outcome. The order includes requirements that the public be provided adequate information, opportunity for review and comment, and an accounting for the rationale for proposed actions affecting Floodplains. Approval by such groups will not affect the financial determination to be made by SBA.

(2) *Procedures.* Compliance with the requirements of § 116.30 (c)(2) and (3) requires that applicants will have notified local and State officials of the proposed request for financial assistance, and any requirements for public hearings will have been initiated by

such requests for building permits, licenses, etc. However, SBA deciding officials will determine on a case-by-case basis if there is a need for further publicity and public hearing and arrange for such additional dissemination of information, hearings, or written comments as are appropriate and necessary to comply with the intent and spirit of these Executive Orders and implementing regulations. Such determination must recognize SBA's responsibility to reach as broad an audience as possible and provide for public input before alternative actions have been precluded. If there is a reasonable likelihood that a plan or proposed action or its alternatives will impact on a Floodplain, then it should be announced as early as that is known, and not delayed until much more detailed information is developed. Public notice must precede major site identification and analysis so the public can have an input early in the decision-making process of preliminary site screening and selection. If not, public choice options may be foreclosed, or decisions will not be based on similarly detailed information bases. It is recognized, because of the type of financial assistance available from SBA and the limited effect of such assistance which is authorized only to individual businesses or homeowners in disaster areas, that public involvement will be minimal. It is the intention of this provision for public involvement to emphasize SBA's commitment to and desire to comply with the spirit and letter of the Executive Orders. It should also be noted that no SBA actions are subject to OMB Circular A 95 procedures which is a recognition of the minor impact of SBA actions.

(d) *Step 3—Identify and Evaluate Practicable Alternatives to Locating in the Base Floodplain.* Having determined that a proposed action is located in the Base Floodplain, the designated official is required to identify and evaluate practicable alternatives to locating in the Base Floodplain. Alternatives to be evaluated include: carrying out the proposed action at a location outside the Base Floodplain (alternative sites); other means which accomplish the same purpose as the proposed action (alternative actions) and no action.

(1) *Step 3.A. Alternative Sites.* Alternative sites must be identified and the practicability of such sites evaluated. If a practical site exists outside the Base Floodplain, the proposed action must not be located in the Base Floodplain. Whenever a Floodplain site is the only practical alternative, the SBA analysis leading to this conclusion should be fully documented. In determining the practicability of a non-Floodplain site, the general concepts of site feasibility apply. At a minimum site practicability shall be addressed in the light of the following:

(i) Natural (topography, habitat, hazards, etc.);

(ii) Social (aesthetics, historic and cultural values, land use patterns, etc.);

(iii) Economic (cost of space, construction, services, relocation, and the needs of the applicant, who may be a disaster victim); and legal (deeds, leases, etc.).

(2) *Step 3.B. Alternative Actions.* Alternative actions must be considered before a decision is made to carry out an action in the Base Floodplain. These are actions which substitute for the proposed action in that they comprise new solutions or approaches which serve the same function or purpose as that proposed, but which have less potential for harm.

(3) *Step 3.C. No Action.* No action is also an alternative, and assessment of this course is required. The alternative of no action probably cannot be fully evaluated until a determination has been made in Step 4 of the harm to or within the Floodplain resulting from the proposed action.

(e) *Step 4—Identify Impacts of the Proposed Action.* If the designated official has determined that the only practicable alternative is locating in the Base Floodplain, the impacts of the proposed action must be identified. Similarly, where actions proposed to be located out of the Floodplain will affect the Base Floodplain, impacts resulting from these actions must be identified. Since the Order is based primarily on NEPA, SBA can draw upon the impact identification and assessment experience and guidance which it has developed in its implementation of NEPA. The concepts of impact assessment applicable to both NEPA and the Order are identical, with the Order's focus being narrower. The following discussion addresses general concepts of impact identification and assessment (Step 4.A), and the two areas of concern which are impacted as a result of the occupancy and modification of Floodplains; lives and property (Step 4.B), and Floodplain values (Step 4.C).

(1) *Step 4.A. General Concepts.* In his review of a proposed action that is not exempt, the designated official shall specifically consider and document:

(i) Impacts associated with modification of Wetlands or Floodplains regardless of its location; (ii) additional impacts which may occur when certain types of actions may support subsequent actions which have additional impacts of their own; (iii) adverse impacts of the proposed action on lives and property and on natural and beneficial Floodplain or Wetland values; (iv) the three basic types of impacts discussed in the following paragraphs.

(2) *Step 4.A.1. Direct and Indirect Support of Floodplain or Wetland De-*

velopment. An action supports Floodplain development if it encourages, allows, serves, or otherwise facilitates additional Floodplain development. The designated official may consider whether or not proposed repair or restorative work has the effect of maintaining the status that existed prior to a major disaster in evaluating its impacts. Direct support results from actions located in Wetlands or on the Floodplain, while indirect support results from those outside. All such impacts shall be evaluated.

(3) *Step 4.A.2. Types of Impacts.* The three basic types of impacts which must be addressed are:

(i) Positive and negative impacts: both must be identified, even though the focus of impact identification and assessment is on negative or adverse impacts. This is necessary in order to identify the full range of impacts against which to weigh the practicability of a proposed action. In addition, it must be recognized that impacts which are beneficial to some, may be harmful to others.

(ii) Concentrated and dispersed impacts: Both may result from any action. The impact is concentrated if it occurs at or near the site of the action and is dispersed if it occurs at a site remote from the action.

(iii) *Short and long-term impacts.* Both must be analyzed in order to evaluate the total impact of an action. Short-term impacts are temporary changes occurring during or immediately following an action and usually persist for a short while. Long-term impacts occur during or after an action and may take the form of delayed changes or changes resulting from the cumulative effects of many individual actions. Long-term impacts may persist for a considerable time and may continue indefinitely.

(4) *Step 4.A.3. Sources of Impacts.* Regardless of the source of impacts, the designated official is required to identify the types of impacts discussed above which arise from proposed actions when these impacts affect the Floodplain. Thus, this requirement applies to actions proposed both in and out of the Base Floodplain (or the 500-year Floodplain where a Critical Action is proposed). The location of the action causing the impact determines which of the requirements of the Order must be met. For actions proposed in the Base Floodplain (or the 500-year Floodplain where a Critical Action is proposed), all of the requirements of the Order must be met. For actions, proposed out of the Base Floodplain, however, the Order does not require that the public notice and findings discussed in Steps 2 and 7 be prepared. Similarly, since in these cases the action causing the impacts in the Base Floodplain is located outside of it, the practicability test (Step 3) is

not required. As a minimum, however, the designated official must identify these impacts and minimize ensuing harm to or within the Floodplain which would result if the action is taken as proposed. Because there is no requirement for public notice or the practicability test, the minimization responsibility (Step 5) takes on added significance. The designated official shall apply the public notice procedures and alternate site and action evaluation to actions proposed out of the Floodplain which will result in impacts to Floodplain.

(5) *Step 4.B. Lives and Property.* After determining that a proposed action is in the Base Floodplain, the risk to lives and property involved in using that site must be determined. This requires an understanding of the magnitude and consequences of Flooding that can be expected.

(6) *Step 4.B.1. Nature of Hazard and Risk.* Two basic types of Floods are used in determining flood hazards:

(i) *Historic Floods.* Often these can be the basis for deciding whether a proposed site is in a hazardous area. However, the fact that a certain level of Flooding has been observed indicates little about how Floods are likely to occur in the future. Even where records extend over a long period of time, the highest observed Flood must not be used as the only guide for decision-making. With very few exceptions, Flooding at any site can be expected to reach higher levels than those previously recorded because larger storms, urbanization, Floodplain encroachment, or other factors affect Flooding.

(ii) *Probability Flood.* These are statistically derived Floods. The one percent chance (100-year or Base) Flood is the term which describes the magnitude of Flooding, used by FIA as the minimum acceptable level to which a community must regulate the Floodplain in order to qualify for the National Flood Insurance Program.

(7) *Step 4.B.2. High Hazard Areas.* High hazard areas are those portions of riverine and coastal Floodplains nearest the source of Flooding. These are the frequently flooded areas that become areas of major flood dynamics during large Floods. Here Flood waters exert their maximum pressures, erosion is greatly accelerated and loss potential is increased. Additionally, these are the areas of coastal and riverine Floodplains within which many of the most critical Floodplain values are concentrated. In riverine situations, the high hazard area is that portion of the Floodplain where impedance to flood flow resulting from man's occupancy can increase Flood heights and consequently the area subject to Flooding. In coastal Floodplains the high hazard area is usually confined to the beach area in front of

high bluffs or the crest of primary or foredunes, where wave impact is the most significant inducing factor. In light of the high loss potential and the likelihood of significant adverse effects to Floodplain values associated with the conduct, support or allowance of actions in these portions, the designated official must rigorously apply the Order's charge to avoid these areas.

(8) *Step 4.B.3. Evaluation of Flood Hazard.* In preparing the Damage Survey Report for a proposed action in the Wetlands or in the Floodplain, the designated official shall make a determination in the field whether the 8-step decision making process may be involved and shall record his determination on the Damage Survey Report. If his determination is affirmative, he shall clearly identify and describe the hazard involved and shall answer the following questions:

(i)—Is the proposed action to be located in the floodway portion of the riverine Floodplain, or the coastal high hazard area?

(ii)—Is the proposed action in a flood-fringe area such as the flood-fringe portion of a riverine Floodplain or the backwater areas of a coastal Floodplain?

(iii)—Is the flood hazard aggravated by the presence of, or potential for, destructive velocity flows, Flood-related erosion, subsidence or sinkholes, or other special problems?

(iv)—Is there a combination of Flood sources present which may Flood simultaneously in the area (e.g., river and ocean)?

(9) *Step 4.C. Natural and Beneficial Floodplain Values.* Water and the adjacent Floodplain exist in nature in a state of dynamic equilibrium. If one part of a coastal or riverine system is disturbed, the entire system usually readjusts toward a new equilibrium. Thus, Floodplain actions must be viewed with caution and a careful assessment made of their impact on natural and beneficial Floodplain values. Floodplains in their natural or relatively undisturbed state serve water resource values (natural moderation of Floods, water quality maintenance, and groundwater recharge), living resource values (fish, wildlife, and plant resources), cultural resources values (open space, natural beauty, scientific study, outdoor education, and recreation), and cultivated resource values (agriculture, aquaculture, and forestry).

(f) *Step 5—Minimize, Restore, Preserve.*—(1) *General.* The requirements of the Order to minimize, restore, and preserve, apply if a proposed action will result in harm to or within the Floodplain. The term "harm," as used in the context of the Order, applies to both lives and property (Step 4.B.), and natural and beneficial Floodplain

values (Step 4.C.). The concept of minimization (Step 5.A.), applies to harm. The concept of restoration and preservation (Step 5.A.) applies only to Floodplain values. Step 5.C. discuss some mechanisms which may be applied to achieve these three requirements.

(2) *Step 5.A. Minimize.* Minimize is a demanding standard and requires that harm be reduced to the smallest possible degree. From the standpoint of lives and property, potential harm to or within the Floodplain must be reduced to the smallest possible amount or degree. The goal is to avoid increasing the Flood loss potential associated with the level of the Base Flood prior to the proposed action. Where a Critical Action is proposed (see Step 2.C.) the goal is associated with higher levels of Flooding. The Order's requirement to minimize potential harm applies to (i) the investment at risk, or the Flood loss potential of the action itself, (ii) the impact the action may have on others, and (iii) the impact the action may have on Floodplain values. In his review and findings the designated official shall specify how actions will be designed and modified to minimize harm to or within the Floodplain.

(3) *Step 5.B. Restore and Preserve.* In the context of this Order, "restore" focuses upon conditions existing as a result of prior actions, while "preserve" focuses upon the impacts of a proposed action. Restore means to reestablish a setting or environment in which the natural and beneficial Floodplain values can again operate. Where Floodplain values have been degraded by past actions, the designated official must identify, evaluate, and implement measures to restore the values diminished or lost. Preserve means to prevent modification to the natural Floodplain environment, or to maintain it as closely as possible to its natural state. If an action will result in harm to or within the Floodplain, the designated official must design or modify the action to assure that it will be carried out in a manner which preserves as much of the natural and beneficial Floodplain values as is possible.

(4) *Step 5.C. Methods of Minimize, Restore and Preserve.* A wide range of methods have been developed over time to minimize harm to lives and property from Flood hazards. In the recent past, other methods directed toward minimizing harm to natural and beneficial environmental values, including those associated with the Floodplain, have also been developed. The technology and methodologies for achieving restoration and preservation are not as well documented nor understood, but currently are receiving increasing attention. The tools and approaches, which are directed toward

attaining these three goals of the Order, should be considered and applied at all stages of a proposed action, as appropriate, e.g., during the planning, design, construction, operation and maintenance of a proposed project.

(g) *Step 6—Reevaluate Alternatives.*—(1) *General.* Having identified the impacts the proposed action would have on the Floodplain (Step 4), methods to minimize these impacts, and opportunities to restore and preserve Floodplain values (Step 5); the proposed action should now be reevaluated. For proposed actions in the Base Floodplain, the reevaluation should consider if the action is still feasible at this site. If not, consider limiting the action to make non-Floodplain sites practicable. If neither is acceptable, the alternative is no action. If the proposed action is outside the Base Floodplain but has impacts which cannot be minimized (Step 5), consider whether the action can be modified or relocated to eliminate or reduce the identified impacts, or if the no action alternative should be chosen. The reevaluation should also include a provision for comparison of the relative adverse impacts associated with the proposed action located in and out of the Floodplain. The comparison should emphasize Floodplain values. However, a site out of the Floodplain should not be chosen if the overall harm is significantly greater than that associated with the Floodplain site.

(2) *Step 6.A Location in the Base Floodplain.* In determining whether the proposed action will be located in the Base Floodplain, the designated official must ascertain that the Floodplain site is the only practicable alternative. Further, the importance of the location must clearly outweigh the requirements of the Order to:

(i)—Avoid direct or indirect support of floodplain development wherever there is a practicable alternative;

(ii)—Reduce the risk of flood loss;

(iii)—Minimize the impact of floods on human safety, health and welfare; and

(iv)—Restore and preserve the natural and beneficial Floodplain values.

(3) *Step 6.B Limit Action.* If an action proposed to be located in the Floodplain cannot satisfy the four requirements in Step 6.A., consider reducing the criteria for the proposed

action. This would lower the threshold for what constitutes a practicable alternative. New alternative actions and sites could then be identified and previously rejected ones reevaluated for practicability based on scaled-down expectations.

(4) *Step 6.C. No Action.* If neither of the above courses of action are feasible, reevaluate the no action alternative.

(h) *Step 7—Findings and Public Explanation.*—(1) *General.* If reevaluation results in the determination that there is no practicable alternative to locating in or impacting the Floodplain, a statement of findings and public explanation must be provided for the proposed action. The SBA Public Statement of Findings and Explanation should explain how any tradeoff analysis was conducted by the agency in making its findings. Some existing Regional public notice procedures may already satisfy part of the requirements of the Order. However, procedures must incorporate the development and issuance of a written statement of findings and public explanation which includes:

(i)—A description of why the proposed action must be located in the Floodplain;

(ii)—A description of all significant facts considered in making the determination including alternative sites and actions;

(iii)—A statement indicating whether the actions conform to applicable State or local Floodplain protection standards;

(2) In addition, and in keeping with the concept of the overall public involvement process discussed in Step 2, the following items should be included in the statement of findings and public explanation:

(i)—A statement, if appropriate, indicating why the NFIP criteria are demonstrably inappropriate for the proposed action (for instance, marinas, piers, docks, etc. must be at the water level);

(ii)—A provision for publication in the FEDERAL REGISTER or other appropriate vehicle;

(iii)—A provision for a brief comment period prior to agency action (15 to 30 days);

(iv)—A description of how the activity will be designed or modified to

minimize harm to or within the Floodplain.

(v)—A statement indicating how the action affects natural or beneficial Floodplain values;

(vi)—A statement listing other involved agencies and individuals.

(3) *Step 7.A.* The Administrator must develop procedures to provide for similar notice and explanation of why a proposed action is to be located in a Floodplain.

(4) *Step 7.B. Actions Subject to NEPA.* For actions subject to NEPA which take place in the Base Floodplain, the public review requirements discussed above should include the nine items listed in the introduction to this step. Section 2(a)(4) of the Order requires the same public notice procedures for Federal actions in the Floodplain even though impacts are not significant enough to require the preparation of any environmental impact statement (EIS) under Section 102(2)(C) of NEPA (Pub. L. 91-190). Under NEPA procedures, a final EIS is circulated for public and interagency review and comment. A minimum of 30 days is required to allow a review and to receive responses from the public and governmental agencies. These comments must then be considered. The findings must be made in conjunction with a final SBA decision, and the formal statement of findings required by the Order must be issued prior to initiating the proposed action. A final EIS should explain, if appropriate, why the responsible official has recommended or why SBA might support an action located in a Floodplain.

(5) *Step 7.C. All Actions Located in the Base Floodplain.* A statement of findings (including the explanatory information discussed in 7.A.) must be issued by the Administrator in compliance with Section 2(a)(2) of the Order. This applies to all proposed actions located within or impacting on the Floodplain, including proposed actions whose impacts are not significant enough or are not otherwise required to complete and EIS.

(i) *Step 8—Implement Action.* With the conclusion of the decisionmaking process described in Steps 1-7, the proposed action can be implemented. However, there is a continuing responsibility for insuring that the action is carried out in compliance with the Order.

WATER RESOURCES POLICIES AND
AUTHORITIESImplementation of Executive Order 11988 on
Floodplain ManagementAGENCY: U.S. Army Corps of Engi-
neers.

ACTION: Proposed regulation.

SUMMARY: This proposed regulation prescribes policies to be used by the Corps of Engineers in implementing Executive Order 11988, Floodplain Management as it pertains to the planning, design and construction of civil works projects, and to the activities under the operation and maintenance and the regulatory programs of the Corps.

DATE: Comments must be received by June 24, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Maurice B. Jackson, 202-693-6807, or write: Office of the Chief of Engineers, Forrestal Building, Washington, D.C. 20314, Attn: DAEN-CWR-R.

Dated: May 19, 1978.

C. A. SELLECK, Jr.,
Colonel, Corps of Engineers,
Executive Director of Civil Works.

PART 239—WATER RESOURCES POLICIES AND
AUTHORITIES: IMPLEMENTATION OF EXECU-
TIVE ORDER 11988 ON FLOOD PLAIN MAN-
AGEMENT

- Sec.
239.1 Purpose.
239.2 Applicability.
239.3 References.
239.4 Definitions.
239.5 Background.
239.6 The objective of the order.
239.7 General policy.
239.8 General procedures.
239.9 Assessment of impacts.
239.10 Minimize.
239.11 Restore and preserve.
239.12 Regulatory.
239.13 Reporting requirements and public involvement.
239.14 Application of EO to Civil Works program.

AUTHORITY: E.O. 11988, 43 FR 6030, February 10, 1978.

§ 239.1 Purpose.

The purpose of this regulation is to provide policy and guidance for Corps of Engineers implementation of Executive Order 11988, Floodplain Management, as it pertains to the planning, design and construction of Civil Works projects, and to the activities under the operation and maintenance and the regulatory programs of the Corps.

§ 239.2 Applicability.

This regulation is applicable to all OCE elements and all field operating agencies having Civil Works responsibilities.

§ 239.3 References.

§ 239.4 Definitions.

(a) "Action" is any Federal activity including (1) acquiring, managing, and disposing of Federal lands and facilities; (2) providing federally undertaken, financed, or assisted construction and improvements; and (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities.

(b) "Base Floodplain" is the one percent chance floodplain.

(c) "Minimize" is to reduce to the smallest possible amount or degree.

(d) "Practicable" is capable of being done within existing constraints. The test of what is practicable depends upon the situation and includes consideration of the pertinent factors, such as environment, cost or technology.

(e) "Preserve" is to prevent modification to the natural floodplain environment or to maintain it as closely as possible to its natural state.

(f) "Restore" is to re-establish a setting or environment in which the natural functions of the floodplain can again operate.

§ 239.5 Background.

Executive Order 11988, Floodplain Management, signed May 24, 1977, revoked and replaced Executive Order 11296 issued August 10, 1966. The new Order is based in part on the National Environmental Policy Act of 1969 (NEPA) and adds new prominence to the environmental aspects of floodplains that were not present in Executive Order 11296. Federal agencies are required, during the decisionmaking process, to recognize significant public

values of floodplains and to consider the public benefits that will be derived from the restoration and preservation of floodplains. The new Order requires agencies to amend their existing procedures and regulations within one year in consultation with the Water Resources Council (WRC), Federal Insurance Administration (FIA) and the Council on Environmental Quality (CEQ). In this regard, a task force was formed under the leadership of WRC for the purpose of developing broad guidance on the interpretation of the Order to assist Federal agencies in developing their procedures and regulations. The efforts of the task force resulted in the publication of the Floodplain Management Guidelines for Implementing EO 11988 in the FEDERAL REGISTER on February 10, 1978, (43 FR 6030) (Reference 3b). The guidelines provide an explanation of key terms in the Order, floodplain management concepts, and procedures necessary to comply with the EO. The Order requires that agency procedures incorporate the conceptual framework of floodplain management as set out in the "Unified National Program for Flood Plain Management." (Reference 3c). The Unified Program has as a goal sound floodplain management that embodied the "wise use, conservation, development and utilization of interrelated land and water resources to serve objectives of economic efficiency, environmental quality and social well-being as consonant with responsibilities assigned to respective levels of government by law."

§ 239.6 The objective of the order.

The objective of the Executive Order is to avoid to the extent possible the long and short term adverse impacts associated with occupancy and modification of floodplains and to avoid direct and indirect support of floodplain development wherever there is a practicable alternative. The Order requires Federal agencies to provide leadership and take action to:

- (a) Avoid the base floodplain unless it is the only practicable alternative;
(b) Reduce the hazard and risk of flood loss;
(c) Minimize the impact of floods on human safety, health and welfare; and
(d) Restore and preserve the natural and beneficial floodplain values. Direct support of floodplain development is an action in the floodplain that encourages, allows, serves or otherwise facilitates additional floodplain development. An example of direct support would be provision of flood protection measures to undeveloped or underutilized floodplain lands for the purposes of permitting future development and growth.

§ 239.7 General policy.

It shall be Corps policy to formulate projects which, to the extent possible,

avoid the adverse impacts associated with use of floodplains and avoid inducing development in the base floodplain unless there is no practicable alternative to the development. The decision on whether a practicable alternative exists shall be based on the advantages and disadvantages of floodplain sites and non-floodplain sites. Factors to be considered include conservation, economics, aesthetics, natural and beneficial values served by floodplains, impact of floods on human safety, locational advantage, the functional need for locating the development in the floodplain, historic values, fish and wildlife habitat values, endangered and threatened species, Federal and State designations of wild and scenic rivers, refuges, etc., recreation, water supply, water quality, food production, and, in general, the needs and welfare of the people. The test of practicability will apply to both the Corps action and to any induced development caused by the action. When it is determined that no practicable alternative to actions in the floodplain exist, the features or qualities of the floodplain that make it advantageous over alternative non-floodplain sites shall be described and adequately supported. The practicability analysis is not required for lots or small tracts of vacant lands in closely spaced urban areas, unless these vacant areas have retained most of the unique environmental values associated with undisturbed floodplains.

§ 239.8 General procedures.

The basic determinations necessary to implement the Executive Order are:

- (a) Determine whether the proposed action is in the base floodplain.
(b) If so, determine whether there is a practicable alternative to locating the action in the base floodplain as outlined in 7 above.
(c) Identify adverse impacts due to the action and the induced development and identify losses of natural and beneficial values of the floodplain.
(d) If the proposed action induces development in the base floodplain, determine if there is a practicable alternative to the development as outlined in § 239.7.
(e) As part of the multiobjective planning approach under the Principles and Standards, determine viable methods to minimize the adverse impacts of the action and the induced development and methods to restore and preserve the natural and beneficial values of the floodplain. Successive iterations of the planning process as called for in ER 1105-2-200 should be used to develop methods for minimization (see paragraphs 10 and 11). This includes reevaluation of the no action alternative.
(f) Advise the general public if the proposed action will be located in the

floodplain. The policies and procedures of ER 1105-2-502 shall be utilized to the extent possible to advise the public.

(g) Recommend the most desirable plan responsive to the established planning objectives and consistent with the requirements of the Executive Order stated in § 239.6 above.

§ 239.9 Assessment of impacts.

The determination called for in § 239.8c above, requires an assessment of the impacts of the action. Impact identification and assessment apply to both the Corps action and to the induced development, if any, that would occur in the base floodplain with the proposed action, but not in the absence of the action. Existing procedures and guidance for identifying and assessing impacts are contained in ER 1105-2-240 for multiobjective planning and ER 1105-2-507 for responding to NEPA requirements. These procedures are designed to ensure that all significant adverse and beneficial effects of actions are identified and measured. ER 1105-2-240 requires identifying sources of impacts, tracing impacts, describing the magnitude of impacts and specifying the location, timing, and duration of impacts. ER 1105-2-507 generally requires the identification of impacts and effects of an action on the environment. In this regard, impact identification and assessment procedures required by existing regulations meet the requirements of the EO and shall be followed.

§ 239.10 Minimize.

As previously defined, minimize is to reduce to the smallest possible amount or degree. The goal of minimization is to avoid the adverse impacts associated with induced floodplain use. "Minimize" as defined in the WRC guidelines is broad and open-ended. There is an implicit acceptance of practical limitations which makes it consistent with the Principles and Standards. It is expected that all practicable workable means and measures will be utilized to minimize adverse impacts. Application of "minimization" to Corps activities and programs will require careful consideration and evaluation of the floodplain action and any adverse impacts of induced floodplain development. For example, successive iterations of the planning process should normally result in the deletion of separable segments of a project when such segment protects undeveloped land and induces development in the floodplain for which there would be another practicable non-floodplain alternative.

§ 239.11 Restore and preserve.

Restoration and preservation are methods of enhancing the natural and beneficial values of floodplains. Such

values are primarily environmental quality (EQ) objectives. Therefore, restoration and preservation should be considered as EQ components of overall plans or as EQ Plans under the Principles and Standards and the ER 1105-2-200 series. The implementation of actions or measures to restore or preserve floodplain values shall be recommended in reporting documents if they fall under existing Corps authorities. If they are not within existing authorities of the Corps, the report shall describe how the measures can be implemented. Example of actions that could be taken to restore floodplain values are as follows:

- (a) Relocate non-conforming structures and facilities out of the floodplain.
(b) Reestablish damaged floodplain ecosystems.
(c) Restore, preserve, and create wetlands, marshes, and etc.
(d) Implement measures that will enhance fish and wildlife values.
(e) Restore and revegetate damaged beaches and dunes.

§ 239.12 Regulatory.

The policy in this regulation is consistent with the general policies for evaluating permit applications under the Corps of Engineers regulatory program as contained in reference 3d. Section 2(c) of the Order pertaining to the issuance of permits or licenses requires agencies to: (a) Consider and evaluate flood hazards for actions in floodplains; (b) provide early public review of plans or proposals in floodplains for which the impact is not significant to require preparation of an EIS; and (c) provide guidance to applicants to enable them to evaluate the effects of their proposal on the floodplain prior to submitting an application. Parts 320.4 and 325.3 of reference 3d contain policies and procedures that comply with the intent of the Order for items 1 and 2 above, respectively, and shall be continued. A forthcoming Corps of Engineers regulation will provide broad general guidance that will assist an applicant in preparing an application for a permit to evaluate early in the planning process the effects the proposal will have on the floodplain.

§ 239.13 Reporting requirements and public involvement.

When a determination has been made that there is no practicable alternative to locating an action in the floodplain, the EO requires the reporting of this finding by various procedures. In addition, the Order requires early public review of plans whenever an action is proposed for the floodplain. The Order requirements generally include and relate to reporting procedures that are presently accomplished under existing Corps regula-

tions, with some minor exceptions. The following additional information shall be included in existing reporting requirements, as appropriate, for general investigation studies, projects in engineering and design stages, studies under the special continuing authorities program, and activities under the operations and maintenance program.

(a) *Section 2(a)(2)*. If there is no practicable alternative to locating an action in the floodplain, a public notice shall be prepared and circulated to the general public. The notice shall include the following: (1) A description of why the action must be located in the floodplain; (2) a description of significant facts considered in making the determination to locate in the floodplain, including alternative sites and actions considered and any tradeoffs that were made; and (3) a statement indicating whether the proposal conforms to applicable State or local floodplain protection standards. The public notice issued upon completion of a study action or its equivalent will serve as the means to satisfy this requirement of the Order. Public notices shall provide specific information pertaining to subparagraphs (1), (2) and (3) of this paragraph, and the notices shall be appropriately disseminated to the general public in the affected area.

(b) *Section 2(a)(3)* requires the submission of a notice, not to exceed three pages in length, including a location map, to State and areawide A-95 Clearinghouse for the geographic area affected, when an action is to be located in the floodplain. Continuation of existing procedures and requirements stated in ER 1105-2-811 will comply with the intent of the Order with the exception that future notices to clearinghouses shall also include the additional information requested in paragraph (a) of this section.

(c) *Section 2b*. Requests for new authorizations or new appropriations for construction starts transmitted to the Office of Management and Budget shall provide information on whether a proposed Corps action will be located in the floodplain. If the proposed action is located in the floodplain the transmittal to OMB shall provide information on compliance with the EO. This shall include statements on whether the action affects the natural and beneficial values of the floodplains; steps taken to minimize potential harm to or within the floodplain caused by the action; and steps taken to restore and preserve the natural and beneficial floodplain values of the floodplain area.

(d) *Statement of findings*. Since Corps actions in the floodplain are subject to NEPA, the Statement of

Findings that accompanies the EIS (paragraph 6b of ER 1105-2-509), or covered in the feasibility report will include, in addition to existing requirements, the following:

(1) Reasons why the proposed action must be located in the floodplain.

(2) Facts considered in making the determination to locate in the floodplain, including alternative sites and actions considered.

(3) Statement on whether the proposed action conforms to applicable State or local floodplain protection standards.

(4) Statement on whether the action affects the natural and beneficial values of the floodplain.

(5) Description of steps taken to design or modify the proposed action in order to minimize potential harm to or within the floodplain; and

(6) A general listing of other involved agencies, groups, and organizations.

(e) *Public involvement*. To insure that adequate information and opportunities are provided early in the decision-making process to allow the public to participate effectively in floodplain management decisions, a public involvement program shall: (1) Include as broad an audience as possible; (2) provide continuous interaction and involvement opportunities for the public during the decision-making process; (3) provide information which promotes the fullest understanding of the proposed action; and (4) provide timely opportunities for all segments of the public to affect an action or plan before alternative actions have been precluded. The policies and objectives for public involvement contained in ER 1105-2-800 for planning Civil Works projects are generally parallel to the requirements of the Order. However, public participation programs shall include early, specific reference to Executive Order 11988 and its objectives. The public in the affected area shall be advised early, through the public participation process, whenever a proposed plan will result in action in the base floodplain.

§ 239.14 Application of EO to Civil Works program.

The provisions of Executive Order 11988 shall be implemented by each agency not later than May 24, 1978.

(a) *Preauthorization studies*. At the earliest stages of planning, the policy and procedures of this regulation shall be incorporated in the multiobjective planning process (ER 1105-2-200 series of regulations) to a scope and level of detail appropriate for preauthorization studies. For those studies for

which reports have been completed and forwarded by the reporting officers, supplemental information concerning the implementation of the Executive Order has been requested by DAEN-CWP under a separate action.

(b) *Advanced engineering and design*. Reporting officers shall insure that projects in the advanced engineering and design stage comply with the intent and objective of the Executive Order as set forth in this regulation.

(c) *Continuing authorities program* (ER 1105-2-50). The policies and procedures of this regulation are applicable to the planning and design of projects under the Continuing Authorities Program. Current studies under the Continuing Authorities Program shall incorporate the policies and procedures of this regulation early in the multi-objective planning process as required by ER 1105-2-50.

(d) *Projects under construction*. The Order does not apply to projects presently under construction, or to projects for which all of the funds have been appropriated through fiscal year 1978, or to projects and programs for which a draft or final environmental impact statement was filed prior to October 1, 1977, as part of AE&D activities.

(e) *Operation and Maintenance Activities*. The policies and procedures of this regulation are applicable to operation and maintenance activities of the Corps of Engineers. District Engineers shall insure that projects operated and maintained by the Corps comply with the policies and procedures set forth in this regulation and 33 CFR 209.145.

(f) *Emergency Activities*. Emergency and flood-related activities conducted under Pub. L. 84-99 essential to saving lives and protecting property and public health and safety, are exempt from the provisions of the Order (e.g. the requirement to prepare and circulate a notice of a proposed activity in the floodplain). However, rehabilitation activities performed under Pub. L. 84-99 by the Corps shall be carried out in a manner that reflects compliance with the spirit and intent of the Executive Order. This shall include providing leadership and taking actions to:

- (1) Avoid harm to the natural and beneficial values of floodplains;
- (2) Minimize the impact of floods on human safety, health and welfare;
- (3) Restore the natural and beneficial floodplain values that have been impacted by an emergency action.

GENERAL SERVICES ADMINISTRATION

[GSA Order ADM 1095.]

CONSIDERATION OF FLOOD PLAINS AND WETLANDS IN DECISIONMAKING

GSA Procedures Regarding Floodplains and Wetlands

AGENCY: General Services Administration.

ACTION: Request for public comments.

SUMMARY: This notice announces that GSA is publishing internal procedures to be followed in implementing the laws and Executive orders concerning all GSA actions that affect flood plains and wetlands. This notice is intended to inform the public of the actions that will be taken within GSA to minimize the impact of floods on human safety, health, and welfare; to minimize the destruction, loss, or degradation of wetlands; and to preserve and enhance the natural beneficial value of flood plains and wetlands.

DATE: Comments must be received on or before June 23, 1978.

ADDRESS: Comments should be addressed to the General Services Administration (PRE), Washington, D.C. 20405.

FOR FURTHER INFORMATION CONTACT:

Mr. Carl W. Penland, Acting Director, Environmental Affairs Division, Office of Space Management, Public Buildings Service, General Services Administration, Washington, D.C. 20405, 202-566-1416.

Dated: May 18, 1978.

JAMES B. SHEA, Jr.,
Commissioner,
Public Buildings Service.

[ADM 1095.]

GSA ORDER

CONSIDERATION OF FLOOD PLAINS AND WETLANDS IN DECISIONMAKING

1. *Purpose*. This order prescribes the uniform procedures to be followed in implementing the laws and Executive orders concerning all GSA actions that affect flood plains and wetlands, consistent with the basic statutory responsibilities governing GSA program operations. This order also provides a basis for publication, when required, of service and staff office orders and instructions explicitly directed toward the particular functions, activities, and personnel of each organization.

2. *Background*. a. The laws and Executive orders to be implemented include the National Environmental Policy Act of 1969 (42 U.S.C. 4321, et

seq.), hereinafter referred to as NEPA; the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4001, et seq.); the Flood Disaster Protection Act of 1973 (Pub. L. 93-234, 87 Stat. 975); Executive Order 11988, of May 24, 1977, entitled "Floodplain Management," hereinafter referred to as the Flood Plains Order; the Guidelines issued by the Water Resources Council for implementing Executive Order 11988, published in the FEDERAL REGISTER on February 10, 1978, 43 FR 6030; and Executive Order 11990, of May 24, 1977, entitled "Protection of Wetlands," hereinafter referred to as the Wetlands Order.

b. Section 1 of the Flood Plains and Wetlands Orders requires that each agency shall provide leadership and shall take action to minimize the impact of floods on human safety, health, and welfare, to minimize the destruction, loss, or degradation of wetlands, and to preserve and enhance the natural and beneficial values of flood plains and wetlands. The Flood Plains and Wetlands Orders were issued to restrict Federal activities in flood plains and wetlands and in furtherance of the National Environmental Policy Act, the National Flood Insurance Act, and the Flood Disaster Protection Act. They are intended to prevent to the extent possible the long- and short-term adverse impacts associated with the occupancy, destruction, or modification of flood plains and wetlands and to avoid direct or indirect support of flood plain development and new construction in wetlands wherever there is a practicable alternative.

c. Compliance with the Flood Plains and Wetlands Orders is required for the following Federal activities;

- (1) The acquisition, management, and disposition of Federal lands and facilities;
- (2) The provision of federally undertaken, financed, or assisted construction and improvements; and
- (3) The planning for and conducting of Federal activities and programs affecting land use, including but not limited to water and related resources planning, regulating, and licensing activities.

d. The more detailed requirements of the Flood Plains Order apply to actions which impact upon both flood plains and wetlands.

3. *Responsibilities*. The Head of the Service or Staff Office or Regional Administrator under whose jurisdiction the action is being planned, hereinafter referred to as the responsible official, is responsible for the implementation of this order.

4. *Requirements*. a. Before taking any action in or affecting a flood plain or wetland, the responsible official shall:

- (1) Determine if the proposed action is in a base flood plain or wetland, as defined in par. 1 of the attachment.

(2) Provide public notice and allow early public review of the preliminary proposal.

(3) Identify and evaluate alternatives which do not affect the base flood plain or wetland.

(4) Determine whether the action would adversely impact or indirectly support development in the base flood plain or wetland.

(5) Determine how to minimize the adverse impacts.

(6) Present the finding to the public for review.

(7) Reevaluate the alternatives to the proposed action.

b. The responsible official shall take no action in or affecting flood plains or wetlands unless the Administrator determines that it is the only practicable alternative.

5. *Applicability*. a. This order applies to the following actions involving flood plains and wetlands, including, but not limited to:

- (1) Real property acquisition, (2) facility design and construction, (3) buildings alteration, (4) buildings operation, (5) stockpile management and operation, and (6) real property disposal to non-Federal public or private parties.

b. If a Federal agency requests conveyance of a property containing a flood plain or wetland, that agency is responsible for compliance with the Flood Plains and Wetlands Orders.

ATTACHMENT

1. *Definitions*. a. *Flood plains*. "Flood plains" are the lowland and relatively flat areas adjoining inland and coastal waters including flood-prone areas of offshore islands, including, at a minimum, that area subject to a 1 percent or greater chance of flooding in any given year. Flood plains may be, but are not necessarily, wetlands.

b. *Wetlands*. "Wetlands" are those areas that are inundated by surface or ground water with a frequency sufficient to support, and under normal circumstances does or would support, a prevalence of vegetative or aquatic life that requires saturated or, seasonally saturated soil conditions for growth and reproduction. Wetlands generally include swamps, marshes, bogs, and similar areas such as sloughs, pot-holes, wet meadows, river outflows, mud flats, and natural ponds. Wetlands may be, but are not necessarily, located in flood plains.

c. *Based flood plains*. "Based flood plains" are those areas which have a 1 percent or greater chance of flooding in any given year, the so-called 100-year flood plains.

d. *Critical actions*. "Critical actions" are those actions which should not be exposed to even a slight chance of flooding. For example, activities for storage of volatile, toxic, or water-re-

active materials; hospitals and schools which may not be sufficiently mobile to avoid loss of life and injury; and utilities and emergency services which would be inoperative if flooded.

e. **Critical action flood plains.** "Critical action flood plains" are those areas which have a 0.2 percent chance of flooding any given year, the so-called 500-year flood plains.

2. **Meeting goals.** The goals of the Flood Plains and Wetlands Orders shall be met by the following:

a. The GSA site selection processes shall be amended to preclude the acquisition of facilities through purchase or lease within:

(1) Base flood plains and wetlands,
(2) Areas in which the action would adversely impact or indirectly support development in the base flood plain or wetland, and

(3) Critical action flood plains, if the proposed use would be especially dangerous when exposed to larger floods.

Exceptions are permissible only when the Administrator determines that no practicable alternative exists.

b. Land use plans shall be formulated in a manner which will avoid adverse impacts to flood plains and wetlands.

c. The alteration of facilities shall be discouraged within base flood plains and wetlands if the action would enlarge or modify the use of the facility and increase or change the environmental impacts on natural or human resources. Normal maintenance and repair to existing buildings are exempt from this requirement.

d. When it is proposed to dispose of any interest in surplus real property located in a flood plain or wetland to non-Federal public or private parties, the advertisement and conveyance documents shall reference and identify those uses that are restricted under Federal, State, or local regulations and shall attach other appropriate property use restrictions or withhold the properties from conveyance.

3. **The decisionmaking process.** The decisionmaking process for those GSA activities listed in par. 5. of the transmittal order shall include the following steps.

a. **Determination.** In the early stages of planning an action, the responsible official shall determine if the action will involve the disposal of a base flood plain or wetland or if it could involve the use of a base flood plain or wetland.

(1) A determination regarding flood plains should be made by inspecting Department of Housing and Urban Development flood plain maps of the property or by referring to a more detailed source, if available. This process and sources of flood plain information and technical assistance services are described in part II, step 1 of the Water Resources Council Guidelines.

(2) A determination regarding wetlands should be made by inspecting the property and by applying the definition in subpar. 1b. However, if a determination cannot be made on the basis of the definition and inspection, the information should be obtained from the Department of the Interior, the Corps of Engineers, the Environmental Protection Agency, or from city or county planning and zoning agencies.

(3) When a determination is made that the action will not involve the use or disposal of a base flood plain or wetland, the responsible official shall determine if the proposed action will have any indirect impact by performing the analysis in d, below.

b. **Early public review.** As soon as it becomes apparent that the proposed action may involve a base flood plain or wetland, the action shall undergo early public review to allow interested parties the opportunity to offer their views.

(1) Distribution of notices for early public review shall occur:

(a) Immediately after determining that a surplus property is in a flood plain or wetland,

(b) As soon as possible after the establishment of a delineated area which does not specifically exclude base flood plains and wetlands as acceptable sites, or

(c) As soon as possible after it becomes apparent that any GSA action may involve the use of or have an impact upon a base flood plain or wetland.

(2) The responsible official shall provide those individuals and groups who normally receive EIS's and those groups having specific interest in flood plain and wetland management a description of the property, plan, or proposal and (for flood plains only) as much of the material that has been developed to date to satisfy the A-95 clearinghouse review requirements of the Floodplains Order.

c. **Alternatives.** If the proposed action could be in a base flood plain or wetland or could affect a base flood plain or wetland, the responsible official shall consider the following alternatives:

(1) Carrying out the proposed action at a location outside the base flood plain or wetland (alternative sites),

(2) Using other means which accomplish the purpose of the proposed action (alternative actions), and

(3) Taking no action.

d. **Impacts.** The impacts of each alternative shall be identified and analyzed as discussed in part II, step 4 of the Water Resources Council Guidelines.

(1) The responsible official shall consider economic, environmental, and other pertinent factors when evaluating the impacts of the alternatives.

The NEPA implementation processes are the principal means of identifying impacts. The three basic types of impacts which must be assessed are: (a) Positive and negative, (b) concentrated and dispersed, and (c) short- and long-term.

(2) The responsible official may assume that he has complied with this order if the proposed action is not located in a base flood plain or wetland and the impact analysis concludes that the action will have neither direct nor indirect impact on the base flood plain or wetland.

e. **Decision.** (1) After the environmental assessment, final EIS, or other impact analyses and alternative studies have been completed on an action which would be located in or which may have an impact upon a base flood plain or wetland, the responsible official shall recommend a course of action to the Administrator. The Administrator may decide to take the action only if: (a) No practicable alternative exists, or (b) the requirements of subpar. 2d are followed for real property disposal actions.

(2) If the conditions in a or b, above, are met and the action is the subject of an environmental assessment or an EIS, the environmental assessment or the final EIS shall state that the preferred alternative involves a base flood plain or wetland.

f. **Minimize impacts.** (1) If the action is to be undertaken in a base flood plain, it must be in accordance with the standards and criteria, and consistent with the intent of, the National Flood Insurance Program (24 CFR 1909). It may deviate from this only to the extent that the standards of the flood insurance program are demonstrably inappropriate for the action. This means that projects will be designed and carried out as they would be to meet the substantive requirements for eligibility under the Flood Insurance Program even through GSA projects are not insured under this program.

(2) All reasonable actions shall be taken to "floodproof" the project and to design or modify the project to minimize potential harm to or within the flood plain. Elevation of the structure above the flood level shall always be taken instead of filling in land.

(3) If the action is to be undertaken in a wetland, the action shall be designed or modified using all practicable measures consistent with the intent of the National Environmental Policy Act and the Wetlands Order to minimize harm to the wetland.

g. **Public notice.** Public notices are not required by the Wetlands Order. However, the responsible official shall consider the impacts of the action and the level of concern the public has shown, or would show if it were aware of the action, and determine whether

the public interest would be served by a public notice. The public notice shall be prepared and issued as follows.

(1) The responsible official shall prepare the public notice, not exceeding three pages in length, which shall include: (a) An explanation why the action is proposed in the base flood plain or wetland, (b) a statement indicating whether the action conforms to State and local flood plain or wetland standards, (c) a list of the alternatives considered, and (d) a location map.

(2) The public notice shall be transmitted to: (a) State and areawide A-95 clearinghouses, (b) individuals and groups who normally receive EIS's on the actions in the geographical area, and (c) groups which have special interest in flood plain or wetland management.

(3) Distribution of the public notice for actions affecting a base flood plain or wetland shall occur as soon as possible after: (a) The distribution of a final EIS which states a preferred alternative, (b) the approval of an environmental assessment and negative declaration, or (c) the decision to take an action which is not included in categories a and b, above.

The transmittal letter for the final EIS may serve as the public notice if the transmittal letter meets the content requirements of subpar. 1, above.

(4) The public notice shall be circulated for a commenting period of not less than 15 days prior to commencement of the action. The 15 days may run concurrently with the 30-day commenting period on the final EIS if the final EIS transmittal letter serves as the public notice.

(5) All GSA notices on actions subject to OMB Circular A-95 must state, if known, whether or not the action is located in a base flood plain or wetland.

(6) Public hearings may be held when the responsible official determines that public hearings are the best method of notifying the public about the proposed action. A decision to hold a public hearing shall be based on the significance of the impact of the action on the base flood plain or wetland and the degree of interest the public has expressed or would express if it were aware of the action. If public hearings are held under the EIS process on the proposed action, these hearings will meet the requirement for hearings under the Flood Plains Order.

h. **Reevaluate.** The Administrator shall reevaluate his decision to take an

action affecting a base flood plain or wetland if significant new information is revealed in comments on the final EIS or comments received during the public review period.

1. **Implement.** When the actions in a thru h, above, have been taken, the proposed action may be implemented.

4. **Critical actions.** The development of proposals which are critical actions shall follow the decisionmaking process in par. 3, substituting the term "critical action flood plain" for "base flood plain."

5. **Requests for authorization or appropriation.** When the proposed action necessitates a request for Congressional authorization or appropriation, the request to OMB must indicate the action is in compliance with the policy and mandatory provisions of the Flood Plains and Wetlands Orders.

[4810-25]

DEPARTMENT OF THE TREASURY

Office of the Secretary

FLOODPLAIN MANAGEMENT AND PROTECTION OF WETLANDS

Implementation of Executive Order 11988 and 11990

AGENCY: Department of the Treasury.

ACTION: Implementation of Executive Orders 11988 and 11990, dated May 24, 1977, in accordance with section 2(d) of Executive Order 11988, and section 8 of Executive Order 11990.

SUMMARY: This Treasury memorandum is published for public review as required by Council on Environmental Quality (CEQ) and U.S. Water Resources Council (WRC) guidelines for implementing Executive Order 11988.

COMMENT DATE: Written comments must be received on or before June 23, 1978.

ADDRESS: Comments should be mailed or delivered to: Director of Administrative Programs, room 2438, Main Treasury, Department of the Treasury, Washington, D.C. 20220, Attention: AAE.

FOR FURTHER INFORMATION CONTACT:

Mr. James M. Wright or Mr. Gerald W. Coe at 202-376-0289.

SUPPLEMENTARY INFORMATION: Since the Department of the Treasury does not, as a general rule, engage in activities which would impact upon floodplains or wetlands, no separate Departmental procedures will be issued to implement these Executive Orders. The Treasury Procedures for Preparation and Coordination of Environmental Impact Statements (39 FR 14796, April 26, 1974) will, however, be revised to include requirements concerning floodplain management and protection of wetlands.

Dated: May 18, 1978.

ROBERT R. FREDLUND,
Director of Administrative Programs.

EXECUTIVE ORDERS 11988, FLOODPLAIN MANAGEMENT, AND 11990, PROTECTION OF WETLANDS

MAY 18, 1978.

My memorandum of October 28, 1977, subject as above, provided you with copies of Executive Orders 11988 and 11990 and advised that further Departmental instructions would be forthcoming. Since the Department does not, as a general rule, engage in activities which would impact upon floodplains or wetlands, no separate Departmental procedures will be issued to implement these Executive Orders. The Treasury Procedures for Preparation and Coordination of Environmental Impact Statements (39 FR 14796, April 26, 1974) will, however, be revised to include requirements concerning floodplain management and protection of wetlands.

In the event any bureau should contemplate action within or adjacent to, or which would impact upon a floodplain or wetlands, it shall be the joint responsibility of the Bureau Environmental Quality Officer and Bureau Facility Managers to assure compliance with the provisions of Executive Orders 11988 and 11990 in accordance with the Treasury Environmental Impact Statement (EIS) Procedures. Floodplain management and protection of wetlands should be addressed, as necessary, in the current format of Treasury environmental impact statements or assessments until such time as the Treasury EIS Procedures are revised, or the Council on Environmental Quality issues its new regulations under the National Environmental Policy Act (NEPA).

All matters pertaining to floodplains and wetlands shall be immediately brought to the attention of the Assistant Director (Environmental Programs), Office of Administrative Programs.

Treasury Administrative Circular No. 243, Evaluation of Flood Hazards, dated August 27, 1973, is hereby rescinded.

ROBERT R. FREDLUND,
Director of Administrative programs.

FISHERY
CONSERVATION AND
MANAGEMENT ACT OF
1976

Applications for Permit to Fish
off Coasts of U.S.

[4710-09]

DEPARTMENT OF STATE

[Public Notice 609]

FISHERY CONSERVATION AND MANAGEMENT
ACT OF 1976Applications for Permits To Fish Off the Coasts
of the United States

The Fishery Conservation and Management Act of 1976 (Pub. L. 94-265) (the "Act") provides that no fishing shall be conducted by foreign fishing vessels in the Fishery Conservation Zone of the United States after February 28, 1977, except in accordance with a valid and applicable permit issued pursuant to section 204 of the Act.

The Act also requires that all applications for such permits be published in the FEDERAL REGISTER.

Additional applications for fishing during 1978 have been received from the Governments of the Republic of Cuba, Mexico, the Polish People's Republic, and the Union of Soviet Socialist Republics, and are published herewith.

Dated: May 17, 1978.

JAMES A. STORER,
Director,
Office of Fisheries Affairs.

DEPARTMENT OF THE TREASURY

Office of the Secretary

DRAFT REPORT FOR IMPLEMENTATION OF EXECUTIVE ORDER 12044 ON IMPROVING GOVERNMENT REGULATIONS

AGENCY: Department of the Treasury.

ACTION: Draft implementation report required by Executive Order 12044.

SUMMARY: This draft report is published for public comment as required by section 5(a) of Executive Order 12044. A copy has also been provided to the Office of Management and Budget. Subsequent to review and comment, a revised report will be submitted to the Office of Management and Budget for approval before final publication in the **FEDERAL REGISTER** in accordance with section 5(b) of the Order.

COMMENT DATE: Written comments must be received on or before July 24, 1978.

ADDRESS: Comments must be mailed or delivered to: the Assistant Secretary (Administration), Room 3442 Main Treasury, Department of the Treasury, Washington, D.C., 20220, Attention: RIIP.

FOR FURTHER INFORMATION CONTACT: Mr. Anthony V. DiSilvestre, Regulatory Improvement Implementation Project (RIIP) Coordinator, at 202-566-2966.

SUPPLEMENTARY INFORMATION: This draft report is in three parts. Part One briefly describes the current process by which the Treasury Department develops regulations. Part Two describes the proposed process for future development of regulations in accordance with Executive Order 12044. The proposed process, in the form of a draft Treasury directive, includes criteria for defining significant regulations, for identifying which regulations will require regulatory analyses, and for selecting existing regulations to be reviewed. Part Three provides a list of Treasury regulations proposed to be considered for an initial review in accordance with sections 4 and 5(a) of the Executive Order.

Consideration will be given to public comments on Parts Two and Three of this draft report in the preparation of a revised Treasury report. Comments received on the draft report will be available for public inspection, and reproduction (at a cost of ten cents per page), in the Treasury Library, Room 5030 Main Treasury.

CURRENT PROCESS BY WHICH THE DEPARTMENT OF THE TREASURY DEVELOPS REGULATIONS

PREFACE

The Department of the Treasury is a decentralized agency which has no single "regulations office" preparing regulations for the Department as a whole. This function is performed by an organizational unit within each Treasury bureau or office that issues regulations. Consequently, the following process for developing Treasury regulations is a composite of the current procedures used by the various bureaus and offices. Exceptions to this general process are indicated in the text. In order to develop this material, each Treasury bureau or office which drafts regulations was asked to submit a description of the specific process by which they do so. Copies of the individual descriptions are available for public inspection, or reproduction, in the Treasury Library, Room 5030 Main Treasury.

I. ESTABLISHMENT OF REGULATIONS

A. Responsibility. All bureaus, offices, or other components of the Treasury Department (hereafter referred to as "bureaus") which draft regulations: (1) have a distinct organizational unit responsible for drafting regulations; or (2) assign responsibility for drafting regulations to their legal counsel. The unit responsible for drafting regulations will be referred to as the "regulatory office".

B. Source of Regulations. Treasury regulatory proposals are generated by:

- (1) New legislation;
- (2) Requests from the Office of the Secretary of the Treasury;
- (3) Requests from offices within the bureau;
- (4) Legal decisions in court cases; and
- (5) Suggestions or petitions from taxpayers, industry, or consumers.

C. Study of Regulatory Proposal. Proposals for regulations are evaluated by the regulatory office or by other offices within the bureaus or Office of the Secretary. In some cases, information may be solicited from other Government agencies or interested members of the public prior to beginning regulatory action. After establishment of a regulatory project, the regulatory office may notify officials in the Office of the Secretary of the expected scope and content of the regulation and furnish a brief description of any significant policy issues.

D. Requirement for Notice of Proposed Rulemaking.

(1) Normally a notice of proposed rulemaking will be prepared before a final regulation is issued.

(2) Under 5 U.S.C. 553, certain regulations may be issued without notice

of proposed rulemaking. If a regulation is issued without notice, the reason is generally stated in the final document.

(3) In some cases, the U.S. Customs Service and the Bureau of Alcohol, Tobacco and Firearms issue an advance notice of proposed rulemaking to solicit information from the public or to involve the public at an early stage in the rulemaking process.

II. PROPOSED RULEMAKING

A. Preliminary Draft:

(1) A specialist or attorney in the regulatory office prepares a preliminary draft of the document. A senior specialist or attorney within the office then reviews the document.

(2) The preliminary draft is furnished to and informally reviewed by staff members of the office within the bureau having primary operation or legal responsibility. The preliminary draft is typically reviewed by the appropriate legal counsel and the head of the bureau, and may be reviewed by officials within the Office of the Secretary, or other Government agencies.

(3) Comments from offices to which the preliminary draft was circulated are reviewed. The regulatory office may modify the draft regulation accordingly. Informal meetings may be held to discuss changes or to resolve questions. In some cases, policy differences are resolved by the bureau heads.

B. Final Draft:

(1) The regulatory office then prepares a final draft of the document. This document is reviewed by affected program personnel, managers, and the legal counsel for the bureau.

(2) The head of the bureau signs the document.

(3) If the regulation has significant effect on State and local governments, it is sent to the Advisory Commission on Intergovernmental Relations for comment under the provisions of Office of Management and Budget Circular A-85. In such cases, thirty days are usually allowed for comment.

(4) The document is then sent to the responsible Assistant Secretary of the Treasury or the General Counsel for review and approval, as appropriate.

(5) After approval by the Assistant Secretary or General Counsel, the document is transmitted to the Executive Secretary of the Treasury in accordance with Treasury Directive 50-04.E, "Procedures for Preparing Documents Which Impact the Public", dated September 26, 1977. The transmittal memorandum describes any important policy considerations and recommends whether the document should be reviewed by the Secretary of Deputy Secretary.

(6) Upon approval by the appropriate official within the Office of the Secretary, the document is returned to

the regulatory office within the bureau.

C. Federal Register Publication:

(1) The proposed regulation is certified by the regulatory office and sent to the FEDERAL REGISTER for publication. The U.S. Customs Service also publishes proposed rulemaking in the Customs Bulletin.

(2) The notice of proposed rulemaking allows the public 30-60 days to comment on the proposed regulation. All written comments are ordinarily available for public inspection. Some bureaus also schedule public hearings or allow members of the public to request hearings on proposed regulations.

(3) If a public hearing is held on a proposed regulation, officials from the bureau or Office of the Secretary will attend. Transcripts of hearings, when recorded, are made available to the public at cost.

III. FINAL REGULATION (TREASURY DECISION)

A. *Evaluation of Comments.* Written comments and oral testimony from public hearings are evaluated by the bureau. The regulatory office usually summarizes comments received and furnishes them to other offices within the bureau.

B. *Preliminary Draft.* The regulatory office then may prepare a preliminary draft of the final regulation, modified, if necessary, by public comments. If radical changes are made, the notice of proposed rulemaking may be withdrawn and a new one issued. The preliminary draft is next reviewed within the bureau as outlined in section II.A above.

C. *Final Draft.* The regulatory office will then prepare a final draft of the regulation which will be reviewed within the bureau and Office of the Secretary as outlined in section II.B above. For some regulations, an Economic Impact Statement may be prepared in accordance with Treasury Directive 50-04.D, "Inflation Impact Statements for proposed Legislation, Regulations or Rules", dated October 8, 1976.

D. Federal Register Publication.

(1) After approval of the final regulation by the Office of the Secretary, it is returned to the regulatory office, certified, and sent to the FEDERAL REGISTER for publication. The U.S. Customs Service, Bureau of Alcohol, Tobacco and Firearms, and the Internal Revenue Service also publish final regulations in their own publications.

(2) Final regulations will ordinarily be effective not less than 30 days after publication in the FEDERAL REGISTER. A bureau may, however, under 5 U.S.C. 553(d), determine that an earlier effective date is necessary.

(3) After FEDERAL REGISTER publication, the regulation is incorporated

into the next annual revision of the appropriate title of the Code of Federal Regulations.

PART TWO

PROPOSED PROCESS BY WHICH THE DEPARTMENT OF THE TREASURY WILL DEVELOP AND REVIEW REGULATIONS

PREFACE

Part Two describes the proposed new process by which Treasury will develop and review regulations. This description is in the form of a proposed Treasury directive which will instruct Treasury bureaus and offices on the procedures they shall follow in compliance with Executive Order 12044. Treasury directives are not normally made available for public comment. As part of this report, however, public comment is being solicited on the proposed procedures outlined in the directive.

Although this proposed Treasury directive has not as yet received final approval, all Treasury bureaus and offices will be expected to comply with it effective May 22, 1978, even though it is subject to change as a result of public comment on this report as a whole. *Summary of the New Process.* The key element in Treasury's proposed procedures is a work plan. This work plan will be required before a bureau or office may initiate any action, other than preliminary studies, relating to the development or review of a regulation. The work plan will provide a summary description of the regulation, and a statement as to its need and statutory authority, policy issues raised, potential alternatives, and whether the regulation should not be considered significant. Secretarial approval of the work plan will allow the originating office to proceed with the regulatory action. Major changes involving regulations described in any work plan may necessitate that the plan be revised and reaproved.

Under the proposed procedure, all Treasury regulations codified in the Code of Federal Regulations will be defined as significant regulations unless they are identified and approved in the work plan as being non-significant. The proposed directive also establishes criteria which may be used to identify non-significant regulations.

Treasury bureaus or offices issuing regulations will be required by the proposed procedures to publish a semi-annual agenda of significant regulations being developed or reviewed. The agenda itself will be compiled from the approved work plans for each regulation, and will be published by the responsible bureau or office with the approval of the Secretary.

Each bureau or office will be required also to periodically review its regulations to determine if they meet

the policy objectives of Executive Order 12044. The proposed procedures list criteria to be used in identifying those regulations for review. Significant regulations so identified will appear in each bureau or office's semi-annual agenda.

Some significant regulations may have a major economic impact on the general economy, on individual industries, geographical regions, or levels of government. For these regulations, the originating office will be required to prepare a regulatory analysis. Criteria for the selection of regulations for this analysis are outlined in the proposed procedure. The bureau or office will make the draft regulatory analysis publicly available when regulations are proposed; a final copy will be available upon publication of final regulations.

Under the proposed procedures, Secretarial approval is required for the issuance of all significant regulations. This approval would be conditioned upon the determination that the regulations meet certain important criteria specified in the procedures.

PROPOSED DIRECTIVE

The text of the proposed Treasury directive is as follows:

Subject: Criteria and Procedures for the Preparation, Review, and Approval of Regulations.

1. *Purpose.* This Directive establishes policies, criteria, and procedures for the issuance of new regulations, the review of existing regulations, and the preparation of regulatory analyses, and makes assignments of related responsibilities. This Directive is intended to improve the quality of Treasury regulatory practices. It is not intended to create delay in the process.

2. *Scope.* This Directive applies to the Office of the Secretary and all bureaus.

3. *Authority and References.* a. Executive Order 12044, "Improving Government Regulations," dated March 23, 1978 (43 FR 12661).

b. FEDERAL REGISTER Document Drafting Handbook, dated January 1975.

c. 1 CFR 18.12, Preparation of Preambles for FEDERAL REGISTER Documents.

d. TD 50-04.A "Filing Documents for Publication with the FEDERAL REGISTER", dated September 22, 1975.

4. *Cancellation.* a. TD 50-04.D, "Inflation Impact Statements for Proposed Legislation, Regulations or Rules", dated October 8, 1976.

b. TD 50-04.E, "Procedures for Preparing Documents Which Impact the Public", dated September 26, 1977.

5. *Applicability.* a. *In general.* The Department through its bureaus and offices issues regulations which, for

the purposes of this Directive, are divided into three categories. The first category consists of internal directives, generally published in Treasury directives systems. The second consists of regulations which impact on the public and which are published in the FEDERAL REGISTER and codified in the Code of Federal Regulations. The third consists of notices and other essentially nonpermanent matters published in the FEDERAL REGISTER, but not codified in the Code of Federal Regulations. The policies set forth in paragraph 7 and the responsibilities assigned by paragraph 14 of this Directive govern all three categories. The principal purpose of this Directive is to implement Executive Order 12044. In recognition of this, the criteria and procedures described in paragraphs 8 through 13 relate principally to the second category of regulations.

b. *Specific nonapplicability.* Specifically, the criteria and procedures set forth in paragraphs 8 through 13 do not apply to:

(1) Internal management documents issued in the Department of the Treasury Directives Manual, the Treasury Personnel Manual, the Treasury Fiscal Requirements Manual, the Treasury Procurement Regulations, and similar or related constituent unit directives systems;

(2) Regulations issued in accordance with the formal rulemaking provisions of the Administrative Procedure Act (5 U.S.C. 556, 557); and

(3) Regulations issued with respect to a military or foreign affairs function of the United States.

c. *Notice section material.* Materials which are published in the Notice section of the FEDERAL REGISTER are also not subject to the criteria and procedures set forth in paragraphs 8 through 13. The FEDERAL REGISTER publication of these materials shall include an express statement to the effect that the published material does not meet the Department's criteria for significant regulations. However, in the discretion of the office or person proposing issuance, or when directed by higher authority, material to be published in the Notice section may be made subject to the criteria and procedures to the extent possible.

d. *Waiver.* The provisions of paragraphs 8 through 13 may be waived with respect to regulations, otherwise subject to those provisions, when the regulations are issued in response to an emergency, or are governed by short-term deadlines imposed by a statute or judicial decision. However, when such waiver is necessary, the FEDERAL REGISTER publication of the regulation shall include a statement of the reasons why it is impractical or contrary to the public interest to follow the procedures of this Directive, together with the name and title

of the policy official responsible for the determination.

6. *Effective date.* The provisions of this Directive are effective as of May 22, 1978. However, any regulation in the process of preparation on that date, which, on or prior to September 1, 1978, either is published in the FEDERAL REGISTER in proposed form, or has been, or was scheduled to be, the subject of a public hearing, will not require a work plan (paragraph 9.b.) or a regulatory analysis (paragraph 12) unless otherwise directed by higher authority. This period of transition is provided in order that the issuance of any regulation, which has already been published or is now close to publication as a notice of proposed rulemaking, will not be delayed. Also, in the case of any regulation on which work has been commenced prior to May 22, 1978, but which has not been published in the FEDERAL REGISTER in proposed form, or has not been, or has not been scheduled to be, the subject of a public hearing, a work plan will not be required until further work is performed with respect to that regulation.

7. *Policy.* It is the policy of the Department of the Treasury that the spirit as well as the letter of Executive Order 12044 be followed in the development of regulations. To achieve this objective, regulations shall be developed through a process which ensures that:

a. The need for, and the purposes of, the regulation are clearly established;

b. The Secretary and other policy officials are able to exercise effective oversight;

c. Opportunity exists, as otherwise required, for early participation and comment by other Federal agencies, State and local governments, businesses, organizations, and individual members of the public;

d. Meaningful alternatives are considered and analyzed before the regulation is issued; and

e. Compliance costs, paperwork and other burdens on the public are minimized.

8. *Criteria for Significant Regulations.* Each regulation or amendment to an existing regulation which is to be (or has been) issued by the Department of the Treasury or a component thereof, published in the FEDERAL REGISTER, and codified in the Code of Federal Regulations is considered to be a significant regulation. Any document which is not published in the FEDERAL REGISTER, or published there, but not codified in the Code of Federal Regulations, is not significant and may not be a regulation. A regulation which would otherwise be eligible for consideration as a significant regulation may, nonetheless, with Secretarial approval, be determined not to be a significant regulation. Such determination shall be expressly justified. Examples of qualifying justifications are the following. The regulation or amendment:

a. Is required to implement a statute, an international agreement, a court decision, or a regulatory action of another agency, bureau, or office, and no substantial element of discretion is afforded the rulemaker;

b. Is non-substantive;

c. Is essentially procedural;

d. Does not materially change existing, or establish new, policy;

e. Does not impose substantial additional requirements or costs on, or substantially alter the legal rights or obligations of, those affected thereby; or

f. Is addressed to, and primarily impacts, Federal officials or employees, and not the general public, business entities or State and local governments.

9. *Development or Review of Regulations—A. Approval to develop or review regulations.* No action, other than preliminary studies, on any regulation which is to be, or has been, published in the FEDERAL REGISTER and codified in the Code of Federal Regulations, shall be undertaken without Secretarial approval of a work plan.

b. *Work plan to be furnished the Secretary.* The initiating office wishing to gain approval of such a regulation project shall prepare a work plan in memorandum form from the bureau or office head, through the appropriate policy review officials to the Secretary. Each work plan shall be serially numbered by the bureau or office. The work plan shall contain the following information:

(1) A description of the subject matter of the regulation project and whether a new regulation, or revision or rescission of an existing regulation is proposed;

(2) A justification of the need for a new or revised regulation or other action proposed;

(3) The statutory basis for the regulation;

(4) The name and telephone number of a knowledgeable official;

(5) If applicable or possible, a statement of whether a regulatory analysis will be prepared, or a statement as to when and how it will be determined whether such an analysis will be prepared;

(6) A brief description of the policy issues involved;

(7) A brief discussion of potential alternative approaches to be explored for solving the issues;

(8) The plan for obtaining public comments, which shall address whether a public hearing or conference will be held;

(9) The target dates for completion of the following steps in the development of the regulation:

(a) Completion of advance notice of proposed rulemaking or notice of intent (if any), and proposed publication date for such notice;

(b) Completion of the draft regulatory analysis, if applicable, and the preliminary draft of the notice of proposed rulemaking;

(c) Completion of the final draft of proposed rulemaking, the period of review within Treasury, and the proposed date for publication in the FEDERAL REGISTER;

(d) Expiration of the period for written comments and completion of hearing, if any;

(e) Completion of the final regulatory analysis, if applicable, and the preliminary draft of the final rulemaking; and

(f) Completion of the final draft, the period for review within Treasury, and the proposed date for publication in the FEDERAL REGISTER;

(10) If applicable, the reasons why the regulation should not be considered significant in accordance with paragraph 8; and

(11) A recommendation that the work plan receive Secretarial approval.

c. *Work plan for non-significant regulations.* If a work plan in accordance with b.(10) above states reasons why the regulation should not be considered significant, the work plan shall fully address the matters in b.(1) through b.(5) and b.(10), and may address all other matters in an abbreviated, conclusionary manner. For example, with respect to b.(9), only the information in b.(9)(f) need be specified.

d. *Approval of work plan.* Any reviewing official may disapprove or direct that work plan be revised. By concurring and forwarding the work plan to the next reviewer, each reviewing official will be deemed to recommend approval of the work plan as presented. Approval of a work plan is limited to the Secretarial level. The initiating office may be required to revise the work plan prior to, or as a condition of, approval. An approved work plan is a commitment by the initiating bureau or office that the regulation project will be undertaken in conformity with the approved plan. Bureau and office heads will be held accountable for carrying out the plan as approved, whether revised or amended.

e. *Revision or amendment of work plan.* (1) The originating office may, at any time during the development or a regulation, initiate a revision of an approved work plan. Unless the Secretary has determined the regulation not to be significant, a material, substantive revision of items (1), (2), (3), (5), (6), (7), or (8) of the work plan, prior to publication of a notice of proposed rulemaking, requires resubmission for Secretarial approval. Any such revision made to the work plan

after such publication does not require resubmission, but shall be explained in connection with approval of the final regulation under paragraph 13.c. A revision of item (9) also requires resubmission, if the target dates under (a), (c), or (f) are to be delayed for more than three months. In such event, the resubmission for approval shall state the reasons for the delay. Revision of item (10), at any time, requires resubmission for Secretarial approval.

(2) Non-material, non-substantive changes in any item, and changes in item (9), other than as specified in e.(1) above, of approved work plans for significant regulations, or any changes (other than to item (10)) to work plans covering regulations identified as non-significant, may be accomplished by amendment. Amendments do not require Secretarial approval.

(3) Revisions or amendments to approved work plans shall be made by placing brackets "[]" around material to be deleted and underlining new language. This will permit immediate focus on changes and will provide a continuous history of the work plan.

f. *Opportunity for public participation.* As otherwise required, and in accordance with paragraph 7.c., each bureau and office shall give the public, in general, and State and local governments or their representatives, in particular, an early and meaningful opportunity to participate in the regulatory process. Bureaus and offices may consider a number of ways to provide this opportunity, including:

(1) Publishing an advance notice of proposed rulemaking;

(2) Holding open conferences or public hearings;

(3) Sending notices of proposed regulations to publications likely to be read by those affected; and

(4) Notifying interested parties directly. Bureaus and offices shall allow at least 60 days for comment on proposed significant regulations. If this is not possible, the regulation shall be accompanied by a brief statement of the reason why a shorter time period is necessary.

10. *Semiannual Agenda—*a. *Schedule of semiannual agenda.* Each year, by September 1, starting in 1978, the head of each bureau or office shall submit to the Executive Secretary, a statement of the dates on which the bureau or office proposes to publish its semiannual agenda. The Executive Secretary shall compile the Department's publication schedule on the basis of these submissions and, with Secretarial approval, submit the schedule for publication in the FEDERAL REGISTER on the first Monday in October of each year, starting in 1978.

b. *Semiannual agendas.* Each bureau or office shall publish its semiannual agenda in accordance with the schedule published in the FEDERAL REGISTER

in October of each year, and may publish a supplement at any time. The head of each bureau or office shall submit the semiannual agenda, or supplements thereto, for FEDERAL REGISTER publication by signing below the subscription, "By direction of the Secretary of the Treasury".

(1) Each semiannual agenda shall be composed of two parts, a list of significant regulations under development, and a list of significant existing regulations to be reviewed. Regulations determined to be nonsignificant may also be listed. For each regulation, the semiannual agenda shall contain items (1) through (5) of the approved work plan. The semiannual agenda shall also indicate the status of regulations listed on prior semiannual agendas.

(2) Upon publication of a semiannual agenda or supplement, the bureau or office shall also furnish a copy to the Executive Secretary.

11. *Review of Existing Regulations—*a. *Criteria.* Bureaus or offices shall periodically review their existing regulations to determine if they are achieving the policy goals set forth in paragraph 7. Selection of regulations for review shall be made on the basis of the following criteria listed in the order of their significance. Regulations which:

(1) Were issued prior to enactment of legislation which either materially alters the statute under which the regulations were issued or provides significantly different rules concerning the subject regulatory matter from the rules contained in the regulations;

(2) Are the subject of meaningful criticism directed at the agency by the public;

(3) Apply only with respect to a period of time for which the opportunity has expired for the agency to secure compliance;

(4) Were issued with respect to circumstances or conditions which are no longer material;

(5) Have not been invoked by those affected or the government for more than 1 year;

(6) The bureau or office considers are complied with at an unacceptable level by a significant portion of the public;

(7) By their terms (and without regard to the requirements of an underlying statute or court decision) impose a reporting, recordkeeping, or other burden on those affected thereby;

(8) May duplicate or overlap other regulations of the Federal Government;

(9) Have been the subject of a significant volume of litigation questioning their validity or interpretation;

(10) Contain substantive rules that are not simply interpretative rules, general statements of policy or rules of agency organization, procedure, or

practice and which have not been significantly revised in the preceding 6 years; and

(11) Are complex and can be clarified and simplified.

b. *Identification.* The head of each bureau or office shall ensure that the bureau or office maintains a systematic process for the identification of regulations for review using the criteria set forth above.

c. *Work plan.* The bureau or office proposing a regulation for review shall prepare and obtain Secretarial approval of a work plan in accordance with paragraph 9, prior to starting the review of the regulation. Review of a regulation shall follow the procedural steps applicable to the development of new regulations.

d. *Agenda.* Significant regulations approved for review shall be included in the semiannual agenda as provided in paragraph 10.

12. *Regulatory Analysis—*a. *Responsibility.* Some significant regulations may have major economic consequences for the general economy, for individual industries, geographic regions, or levels of government. For these regulations, a regulatory analysis shall be prepared. Such an analysis shall be a careful examination of alternative approaches, which is undertaken early in the regulatory process in order to be available to reviewers and the Secretary.

b. *Criteria.* A regulatory analysis shall be prepared for significant regulations or amendments to existing regulations which will, or can reasonably be calculated or estimated to, result in:

(1) An annual impact (positive, negative, or combination) on the general economy of \$100 million or more;

(2) An annual increase in costs or prices for an individual industry, geographic region, level of government, or identifiable class of individuals or business entities of \$40 million or more; or

(3) An effect on an individual industry, geographical region, or level of government which is of such a magnitude, without reference to a particular dollar threshold, that:

(a) The continued existence of an industry, or significant sector thereof, is seriously threatened;

(b) Severe dislocation, market disruptions, or shortages of labor would result; or

(c) The ability of a governmental unit to continue to carry out its governmental functions is seriously undermined. A regulatory analysis will not be required if the economic or other consequences meeting the above criteria flow directly from the statute, international agreement, or court decision being implemented. In such event, an abbreviated, conclusionary statement setting forth these facts shall be prepared in lieu of a regulatory analysis.

c. *Discretion.* In addition to the specific criteria in b. above, a work plan submitted for Secretarial approval may provide that a regulatory analysis shall be prepared on any proposed significant regulation or amendment to an existing regulation. The Secretary may also direct that such an analysis be prepared as part, or as a condition, of Secretarial approval of the original or revised work plan.

d. *Preparation of draft regulatory analysis.* When an approved work plan requires a regulatory analysis, the originating office shall prepare a draft prior to, or at the time of, the actual drafting of the proposed regulation. The originating office shall obtain such information, expertise, assistance, or review as is necessary from any available source within and outside the Government. However, no essential data shall be sought (other than data protected from disclosure by law) from the private sector that is already available to the Government, even if in some other form. If it, nonetheless, becomes necessary to seek essential data from the private sector, it shall be done in the least burdensome manner, and in accordance with applicable laws concerning reports by the public and the safeguarding of proprietary information. Each regulatory analysis shall contain, as a minimum, the following:

(1) A succinct statement of the problem;

(2) A description of the major alternative ways of dealing with the problem that were considered; and

(3) An analysis of the economic consequences of each alternative and a detailed explanation of reasons for choosing one alternative over the others.

e. *Preparation of final regulatory analysis.* The originating office shall prepare the final regulatory analysis, using the same process as with the draft, to reflect changes resulting from public participation in the rulemaking process. The final regulatory analysis shall accompany the final rulemaking through all review and approval levels, including Secretarial approval.

f. *Availability.* An explanation of the regulatory approach selected or favored and a short description of other alternatives considered shall be included in both the notice of proposed rulemaking and the final rulemaking. Also, a statement shall be included as to how the public may obtain a copy of the draft or final regulatory analysis.

13. *Approval of regulations—*a. *Proposed regulations.* Each advance notice of proposed rulemaking, or notice of intent to hold a public hearing or conference, or notice of proposed rulemaking issued in accordance with an approved work plan shall be

signed by, or at the direction of, the bureau or office head, approved, if otherwise required, by the appropriate policy official, and submitted by the bureau or office to the FEDERAL REGISTER for publication. If the approval work plan includes a determination that the rulemaking does not involve a significant regulation, a statement shall be included in the notice that the regulation does not meet the Treasury criteria for a significant regulation.

b. *Nonsignificant final regulations.* Final regulations which have been determined not to be significant in an approved work plan shall be signed by the bureau or office head, approved, if otherwise required, by the appropriate policy official, and submitted by the bureau or office to the FEDERAL REGISTER for publication. The final rulemaking shall include a statement that the regulation does not meet the Treasury criteria for a significant regulation.

c. *Significant final regulations.* Regulations which are significant shall be signed by the bureau or office head, approved, if otherwise required, by the appropriate policy official, and forwarded to the Executive Secretary for the Secretarial determination that the regulation should be approved for publication in the FEDERAL REGISTER. The Secretarial determination shall be requested by a memorandum from the appropriate policy official. The memorandum shall contain or transmit the following:

(1) The justification of the need for the new or revised regulation or other final action;

(2) A brief discussion demonstrating the adequacy of consideration given to both the direct and indirect effects of the regulation;

(3) A brief discussion of alternative approaches considered and the reason(s) why the approach chosen is considered the least burdensome of the acceptable alternatives;

(4) Evidence that public comments received during the development of the regulation have been considered and that an adequate response has been prepared, addressing the issues raised by the comments;

(5) Documentation of new reporting burdens or recordkeeping requirements necessary for compliance;

(6) A plan for evaluating the effectiveness of the regulation after its issuance;

(7) A copy of the final regulatory analysis, where applicable; and

(8) A recommendation for Secretarial authorization to publish the regulation.

Approval of the recommendation to authorize publication of the regulation will evidence that the Secretary has determined the regulation to be needed and that all steps preliminary

to publication have been satisfactorily completed. It will also evidence that the regulation has been reviewed, that it is written in plain English, and that it contains the name, address, and telephone number of a knowledgeable, responsible official. After approval, the regulation shall be submitted to the Federal Register for publication by the bureau or office.

14. **Responsibilities**—a. Heads of bureaus of offices shall ensure that:

(1) The initiation, preparation, publication, and review of regulations by their respective organizations are conducted in accordance with this Directive;

(2) Proposed regulation projects, which require a work plan, are submitted for Secretarial approval with well articulated work plans responsive to the requirements of this Directive and that work plans are accomplished as approved and by the specified target dates; and

(3) The President's objectives as expressed in Executive Order 12044 and this Directive are met as fully as possible.

b. Under Secretaries, the General Counsel, and Assistant Secretaries shall ensure that heads of bureaus and offices reporting to them receive the cooperation and assistance they may require to carry out their responsibilities under this Directive, and that every responsibility is carried out.

c. The Assistant Secretary for Economic Policy and, where appropriate, the Assistant Secretary for Tax Policy shall assist and cooperate with heads of bureaus and offices in preparing regulatory analyses, when required, and review, and advise the Secretary on, the adequacy of such analyses. The Office of Tax Analysis shall prepare those portions of regulatory analyses respecting Internal Revenue Service regulations dealing with economic consequences.

d. The Executive Secretary shall serve as the principal point of contact with the Office of Management and Budget and other agencies on the improvement of regulations and provide staff support to the Secretary by:

(1) Compiling and publishing the annual listing of semiannual agenda publication dates;

(2) Reviewing work plans;

(3) Maintaining a current file of approved work plans;

(4) Monitoring bureau and office publication and compliance with semiannual agendas and, for that purpose, maintaining a current file of published agendas;

(5) Reviewing, and maintaining a current file of, regulatory analyses in draft and final form;

(6) Reviewing final rulemaking requests and ensuring that each such request and final rule complies with this Directive and is ready for Secretarial approval; and

(7) Monitoring and evaluating the effectiveness of this Directive, in terms of the Executive Order which it implements, and providing a report on such effectiveness to the Secretary by January 15, 1980.

15. **Judicial Review**—Nothing in this Directive is intended to provide new grounds for judicial review or to be interpreted as superseding any existing statutory obligation governing rulemaking.

16. **Expiration**—Unless extended, this Directive expires on September 30, 1980.

17. **Office of Primary Interest**—Office of the Executive Secretary, Immediate Office of the Secretary.

W. MICHAEL BLUMENTHAL.

PART THREE

LIST OF EXISTING REGULATIONS SELECTED FOR INITIAL REVIEW

The following Department of the Treasury regulations have been selected for the initial review required by section 5(a)(4) of Executive Order 12044. The regulations are listed by bureau or office, in alphabetical order, and are identified by: (1) Code of Federal Regulations (CFR) or United States Code (U.S.C.) citation; (2) title or subject matter; and (3) the reason(s) for the proposed review based on the numbered criteria of paragraph 11.a., of the proposed directive set forth in part Two.

A. BUREAU OF ALCOHOL, TOBACCO AND FIREARMS

(1) 27 CFR part 4, Labeling and advertising of wine (10).

(2) 27 CFR part 5, Labeling and advertising of distilled spirits (10).

(3) 27 CFR part 6, Inducements furnished to retailers (10).

(4) 27 CFR part 7, Labeling and advertising of malt beverages (10).

(5) 27 CFR part 201 subpart Q, Distilled spirits plants, stamps (1).

(6) 27 CFR part 211, Distribution and use of denatured alcohol and rum (10, 11).

(7) 27 CFR part 213, Distribution and use of tax-free alcohol (10, 11).

(8) 27 CFR part 240, Wine (10, 11).

(9) 27 CFR part 245, Beer (10, 11).

B. COMPTROLLER OF THE CURRENCY

(1) 12 CFR part 1, Investment securities regulation (11).

(2) 12 CFR 4.1a, Central and field organization; delegations (4).

(3) 12 CFR part 7 subpart B, Loans secured by real estate (1, 4).

(4) 12 CFR part 9, Fiduciary power of national banks and collective investment funds (4).

C. CUSTOMS SERVICE

(1) 19 CFR part 4, Vessels in foreign and domestic trades (10, 11).

(2) 19 CFR part 6, Air commerce regulations (10, 11).

(3) 19 CFR part 7, Customs relations with insular possessions and Guantanamo Bay Naval Station (10, 11).

(4) 19 CFR part 10, Articles conditionally free, subject to a reduced rate, etc. (10, 11).

(5) 19 CFR part 11, Packing and stamping; marking (10, 11).

(6) 19 CFR part 12, Special classes of merchandise (10, 11).

(7) 19 CFR part 18, Transportation in bond and merchandise in transit (10, 11).

(8) 19 CFR part 19, Customs warehouses, container stations, and control of merchandise therein (10, 11).

(9) 19 CFR part 22, Drawback (10, 11).

(10) 19 CFR part 24, Customs financial and accounting procedure (10, 11).

(11) 19 CFR part 54, Certain importations temporarily free of duty (10, 11).

(12) 19 CFR 4.71 and 6.8, Exportation of livestock by air (10).

(13) 19 CFR 6.14(d), Color of aircraft to be furnished Customs (10).

(14) 19 CFR parts 10, 18, 125, 162, 171, and 172, Relief from fines, penalties, forfeitures, and liquidated damages (2).

(15) 19 CFR 101.3, Realignment of Customs stations; extension of port of entry limits (2, 4).

(16) 19 CFR 101.4, Elimination of Customs stations; designation of port of entry (2, 4).

(17) 19 CFR part 103, Availability of information (1).

(18) 19 CFR 111.30, Annual status report/customhouse brokers (1).

(19) 19 CFR 141.89, Classification of imported footwear (7).

(20) 19 CFR part 146, Foreign Trade Zone processing costs (9).

(21) 19 CFR 152.24, American selling price for footwear (2).

(22) 19 CFR 6.7(d), Foreign repairs and equipment purchases by U.S. aircraft (2).

(23) 19 CFR 123.9, Correction of manifest; border traffic (9, 10).

(24) 19 CFR 4.22 and part 148, Conforming amendments required by Panama Canal Treaty (1).

(25) 19 CFR part 6, Control of aircraft liquor kits (6, 10, 11).

(26) 19 CFR part 6, Designation of international and landing rights airports (4).

(27) 19 CFR 6.2(a), Compensation for aircraft inspection at other than international airports (10).

(28) 19 CFR 6.10, Use of navigation lights by aircraft from contiguous foreign country (10).

(29) 19 CFR 6.13, Revocation of international airport status—Akron, Ohio (4).

(30) 19 CFR parts 10, 18, 19, 54, 112, 148, and 151, Record retention requirements (10).

(31) 19 CFR 10.68, Duty-free return of articles without formal entry (10).

(32) 19 CFR part 12, Noise Control Act of 1972; implementation (1).

(33) 19 CFR 12.73, Motor vehicle emission standards (1).

(34) 19 CFR 12.85, Boat safety regulations (1).

(35) 19 CFR parts 19 and 144, Land-clearing certificates; control of merchandise in bonded warehouses (10).

(36) 19 CFR 19.2(a), 19.40, and 24.12(a)(iii), Fees for establishment of container stations and bonded warehouses (4, 10).

(37) 19 CFR 19.4, 19.6, 19.12, and 144.38, Supervision of bonded warehouses (7).

(38) 19 CFR 22.13(a), 22.13(h), and 22.20a, Identification of merchandise for drawback (10, 11).

(39) 19 CFR 101.3, Changes in Customs field organization—Flint, Saginaw/Bay City, Sault Ste. Marie, Mich; Dalton Cache, Alaska (2, 4).

(40) 19 CFR 111.30(a), Customhouse broker's records (2, 4).

(41) 19 CFR 113.14, 151.42, and 151.47, Licensing of public gaugers; delegation of authority (2, 4, 10, 11).

(42) 19 CFR part 114, ATA/ECS carnets; conforming changes (10, 11).

(43) 19 CFR 127.29, Sale and disposal of unclaimed and abandoned chemicals (10, 11).

(44) 19 CFR 127.31, Disposition of proceeds of sale of unclaimed or abandoned merchandise (10, 11).

(45) 19 CFR 132.15 and 142.11(c), Quota merchandise (2, 4).

(46) 19 CFR part 133, Conforming amendments required by Copyright Act of 1976 (1).

(47) 19 CFR 133.21(c), Trademarks; obliteration (10, 11).

(48) 19 CFR part 141, Statistical information on Customs forms (10, 11).

(49) 19 CFR 142.1 and 142.2, Special permits for immediate delivery of quota-class merchandise (10, 11).

(50) 19 CFR 143.3, Waiver of surety on importations less than \$1,000 (7, 10, 11).

(51) 19 CFR 144.36, Entry of restricted merchandise (4, 10, 11).

(52) 19 CFR part 146, Foreign Trade Zones; letters of credit (4, 10, 11).

(53) 19 CFR part 148, Importations; foreign government; waiver of entry if merchandise undutiable (4, 10, 11).

(54) 19 CFR 148.73, Baggage declaration requirement; military personnel (4, 10, 11).

(55) 19 CFR 151.13, Transportation of containerized merchandise by non-bonded carrier (4, 10, 11).

(56) 19 CFR 153.10, Antidumping—fair value: circumstances of sale (4, 10, 11).

(57) 19 CFR 174.11, Matters subject to protest; notice (4, 10, 11).

D. BUREAU OF GOVERNMENT FINANCIAL OPERATIONS

(1) 31 CFR part 120, Proclamations and Executive Orders concerning banking (3, 4, 5).

(2) 31 CFR part 240, Indorsement and payment of checks drawn on the U.S. Treasury (1).

(3) 31 CFR part 245, Issue of substitutes of lost, destroyed, mutilated, and defaced checks drawn on the U.S. Treasury (1).

(4) 31 CFR part 248, Issue of substitutes of lost, stolen, destroyed, mutilated, and defaced checks of the United States drawn on accounts maintained in depository banks in foreign countries or U.S. territories or possessions (1).

(5) 31 CFR part 253, Payments under the Act of Congress approved August 31, 1962, on unpaid balances of awards Philippine War Damage Commission (1, 3).

(6) 31 CFR part 254, Payments on account of awards and appraisals in favor of nationals of the United States on claims against the Government of Mexico (1, 3).

(7) 31 CFR part 256, Payments under judgments and private relief acts (1).

(8) 31 CFR part 270, Availability of records (1, 8).

(9) 31 CFR part 290, Loans to public or private agencies under Refugee Relief Act of 1953 (1, 3).

E. INTERNAL REVENUE SERVICE

(1) 26 U.S.C. 3, Tax tables for individuals (1).

ACTION

IMPROVING ACTION REGULATIONS

Response to Executive Order 12044

AGENCY: ACTION.

ACTION: Request for Public Comment.

SUMMARY: ACTION is issuing this notice to obtain comments on its proposals for implementing Executive Order No. 12044, Improving Government Regulations (43 FR 12661, March 24, 1978) "the Executive

Order". The proposals include procedures for developing new regulations and analyzing their potential impact, revising existing outdated or burdensome regulations, and increasing public participation in the development of regulations. New regulations will include a statement classifying them as major, significant, or non-significant.

DATE: Comments by July 31, 1978.

ADDRESS: Send comments to Harry N. MacLean, General Counsel, ACTION, Room M-607, 806 Connecticut Avenue NW., Washington, D.C. 20525, 202-254-3116.

FOR FURTHER INFORMATION CONTACT:

Harry N. MacLean, General Counsel, ACTION, Room M-607, 806 Connecticut Avenue NW., Washington, D.C. 20525, 202-254-3116.

DRAFT REPORT:

- I. Background
- II. Proposals for Implementation
- III. Comment Procedure

I. BACKGROUND

In the Executive Order the President directed each Executive Agency to improve existing and future regulations so that they are clear, effective, efficient, and not unnecessarily burdensome. The Director of ACTION supports the objectives of the Executive Order, especially the objective of providing for early and meaningful public participation in the development of ACTION regulations.

Public awareness of and participation in ACTION programs focuses on the agency's assignment of Volunteers in Service to America (VISTA) to public agencies and private nonprofit organizations, the award of grants to operate Older American Volunteer Programs (OAVP) to such agencies and organizations, and the assignment of Peace Corps Volunteers for service abroad.

ACTION's proposals for improving its regulations emphasize the goals of early participation by interested members of the public in the development of clearly written regulations.

For purposes of the draft report, "regulations" include advance notices of proposed rulemaking, proposed regulations, final regulations, and guidelines which are published in the FEDERAL REGISTER.

II. PROPOSALS FOR IMPLEMENTATION

This draft report outlines ACTION's response to Section 5 of the Executive Order, Implementation. In accordance with the requirements of Section 6 of the Executive Order, Coverage, this draft report covers regulations concerning grants awarded by ACTION. Regulations concerning volunteers are exempt from coverage under Section

6.(b)(3), as they are matters related to agency management and personnel. The draft report proposals are divided into the four (4) areas described in Section 5.

1. A BRIEF DESCRIPTION OF THE PROCESS FOR DEVELOPING REGULATIONS AND THE CHANGES THAT HAVE BEEN MADE TO COMPLY WITH THE EXECUTIVE ORDER.

In the past, ACTION has not used a formal process to develop regulations. The agency intends to set up a process in which:

a. Employees responsible for initiating and implementing agency programs and policies will propose the regulation and indicate whether they consider the proposed regulation significant;

b. A working group composed of representatives of the Evaluation Division of the Office of Policy and Planning, the Office of Administration and Finance, the Office of General Counsel, the relevant program office (Domestic and Anti-Poverty Operations, International Operations, Policy and Planning, Voluntary Citizen Participation) will evaluate the proposed regulation to determine whether a regulation is necessary to accomplish the stated purpose, to examine alternatives to the issuance of the proposed regulation, and to determine the potential effect of the proposed regulation on agency policy and the public;

c. If the working group finds that the proposed regulation is significant, a notice and brief synopsis of the proposed regulation will be published in the FEDERAL REGISTER setting a time 60 days later and place for an open meeting at which interested members of the public may submit oral and/or written comments; comments will also be solicited from state and local governments or their representative organizations through notices in their trade journals; if it is not deemed significant, a notice providing for a 60-day comment period only will be published in the FEDERAL REGISTER.

d. The Director of Communications, or her designee, will review and edit the proposed regulation to ensure that it is clearly and simply written;

e. The General Counsel, or his designee, will review the proposed regulation to ensure that it is legally sufficient and consistent with agency policy;

f. After the meeting or at the end of the comment period, the working group, the Director of Communications (or her designee) and the General Counsel, or his designee, will review the proposed regulation and the comments received in response to the FEDERAL REGISTER and trade journal notices; if it is deemed significant it will be forwarded to the Director of ACTION with information sufficient for him to determine whether:

(1) There is a need for such a regulation;

(2) There are direct and indirect effects of such a regulation;

(3) The issuance of such a regulation is the least burdensome of the listed alternatives considered;

(4) Public comments have been considered and responded to adequately;

(5) The regulation is written in plain English and is understandable to those who must comply with it;

(6) An estimate has been made of the new reporting burdens and record-keeping requirements necessary for compliance with it;

(7) The name, address, and telephone number of a knowledgeable agency official is included in the publication; and

(8) A plan for evaluating the regulation after its issuance has been developed by the Evaluation Division of the Office of Policy and Planning;

g. When the Director is satisfied that the criteria for significant regulations under paragraph f have been met, he shall sign the regulation and it shall be published in the FEDERAL REGISTER as a final regulation; if the proposed regulation is not significant, it will be forwarded to the responsible official for signature and publication as a final regulation in the FEDERAL REGISTER.

2. THE PROPOSED CRITERIA FOR DEFINING SIGNIFICANT AGENCY REGULATIONS.

An ACTION regulation concerning grant eligibility, grant requirements, or other grant-related factors, will be considered significant if it falls within one or more of the following categories:

a. the regulation causes substantial public interest or controversy;

b. the regulation affects an important agency policy or program;

c. The regulation imposes substantial compliance and reporting requirements.

3. THE PROPOSED CRITERIA FOR IDENTIFYING WHICH REGULATIONS REQUIRE REGULATORY ANALYSIS.

ACTION does not issue regulations with major economic consequences which will result in (a) an annual effect on the economy of \$100 million or more; or (b) a major increase in costs or prices for individual industries, levels of government or geographic regions. Therefore, no criteria are proposed. If, in the Director's discretion, a regulatory analysis is necessary, ACTION will establish and publish criteria at that time.

4. THE PROPOSED CRITERIA FOR SELECTING EXISTING REGULATIONS TO BE REVIEWED AND A LIST OF REGULATIONS THAT THE AGENCY WILL CONSIDER FOR ITS INITIAL REVIEW.

a. ACTION's proposed criteria for selecting existing grant-related regula-

tions to be reviewed will be the same as those for defining significant regulations:

(1) The regulation causes substantial public interest or controversy; or

(2) The regulation affects an important agency policy or program; or

(3) The regulation imposes substantial compliance and reporting requirements.

b. ACTION will consider for its initial review the following regulations:

(1) 45 CFR § 1209.2-3, Retired Senior Volunteer Program (RSVP) Cost Sharing. This regulation section sets forth required percentages of local cost sharing for ACTION-funded RSVP grants. The agency proposes to alter both the policy of requiring local cost sharing and the RSVP program by rescinding § 1209.2-3 and abolishing the local cost sharing requirement.

(2) 45 CFR Part 1206, Grants and Contracts—Suspension and Termination and Denial of Application for Refunding. This part sets forth the rules and procedures for the suspension and termination of financial assistance to grantees and for the denial of applications for refunding of continuation grants. There are no current proposals to alter agency policy regarding this part, but ACTION intends to review the regulation and examine its impact on affected grantees.

(3) 45 CFR Part 1222, Participation of Project Beneficiaries. This part pro-

vides the requirements for the meaningful participation of specified project beneficiaries in the planning, development, and implementation of project activities. ACTION will review the requirements of this part as they affect project beneficiaries who receive assistance from the Office of Policy and Planning to run demonstration grant programs.

c. In addition to reviewing existing published regulations, ACTION intends to review the agency's internal directives that affect grant assistance and recipients to determine whether any such directives should be developed and published in accordance with the regulation development process described in this draft report.

d. ACTION will publish semiannually an agenda of significant regulations under development or review. On October 2, 1978, ACTION will publish a schedule in the FEDERAL REGISTER showing the dates during fiscal year 1979 when the semiannual agenda will be published. Each agenda will:

(1) Be approved by the Director of ACTION prior to publication;

(2) Describe the existing or proposed regulations being considered;

(3) Explain the need and legal basis for the action being taken;

(4) Contain the status of regulations previously listed on the agenda; and

(5) Include the name and telephone number of a knowledgeable agency official.

If ACTION receives comments on specified regulations in the agenda from state and local governments or national organizations representing general purpose state and local governments, ACTION will develop a plan for consultation with state and local governments in the development of those regulations.

III. COMMENT PROCEDURE

ACTION invites interested members of the public to participate in the development of the procedures to implement the Executive Order. Written comments should be submitted to Harry N. MacLean, General Counsel, ACTION, Room M-607, 806 Connecticut Avenue NW., Washington, D.C. 20525. Indicate "Executive Order Comments" on the envelope. ACTION will consider all comments received by July 31, 1978, before taking further action on these matters.

The procedures and policies contained in this draft report, unless extended, will expire on June 30, 1980.

Issued in Washington, D.C., May 18, 1978.

SAM BROWN,
Director.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

SUBTITLE A—OFFICE OF THE
SECRETARY OF AGRICULTUREPART 2—DELEGATIONS OF AUTHORITY
BY THE SECRETARY OF AGRICULTURE
AND GENERAL OFFICERS
OF THE DEPARTMENTRevision of Delegations of Authority
Pertaining to Department Safety
and Health Program

AGENCY: Department of Agriculture.

ACTION: Final rule.

SUMMARY: This document revises the delegations of authority pertaining to the Safety and Health Program within the Department. The department has determined that the objectives can best be obtained by consolidating the functions into a new Office of Safety and Health Management reporting directly to the Assistant Secretary for Administration.

EFFECTIVE DATE: May 25, 1978.

FOR FURTHER INFORMATION
CONTACT:

Julius C. Jimeno, Acting Director,
Office of Safety and Health Management,
U.S. Department of Agriculture,
Washington, D.C. 20250, 202-
447-8247.

Subpart C—Delegations of Authority
to the Deputy Secretary, Assistant
Secretaries, the Director of Economics,
Policy Analysis and Budget,
and the Director, Office of Governmental
and Public Affairs

1. Section 2.25 is amended by revoking and reserving paragraphs (e) (10) (xviii) and (xix) and adding a new paragraph (f) to read as follows:

§ 2.25 Delegations of authority to the Assistant Secretary for Administration.

(e) *Related to personnel.* . . .

(10) . . .

(xviii) [Reserved]

(xix) [Reserved]

(f) *Related to safety and health management.* (1) Provide Department-wide leadership, development, coordination, and implementation of policies, standards, techniques, and procedures, and represent the Department in complying with:

(i) Section 19 of the Occupational Safety and Health Act of 1970.

(ii) Executive Order 11807.

(iii) Guidelines of the Secretary of Labor related to safety and health of Federal employees, 29 CFR Part 1960.

(2) Coordinate Department requests and comments related to rulemaking under Section 6 of the Occupational Safety and Health Act of 1970.

(3) Provide Department-wide liaison and coordination of safety and health activities with the Department of Labor (DOL), Department of Health, Education and Welfare (HEW), Environmental Protection Agency (EPA), Department of Commerce (DOC), Department of Transportation (DOT), Civil Service Commission (CSC), General Services Administration (GSA), safety and health components of state and local governments and universities, and other affected or interested organizations and parties.
